Part V Equipment Maintenance Log

Record the date of maintenance of any air cleaning component or exhaust system, such as:

- REGENERATION of the carbon in a carbon adsorber;
- REPLACEMENT of the carbon in the carbon adsorber
- maintenance of drying sensors;
- REPLACEMENT of carbon cartridges in the Perc-contaminated Wastewater Treatment Unit (if used).

Upon REPLACEMENT of the carbon in the carbon adsorber, record DATE of replacement; record the amount of activated carbon in the adsorber (dry weight in pounds) in the "Notes" column.

In the "Notes" column also RECORD THE NUMBER OF LOADS between each of the following occurrences:

- REGENERATION of the carbon in a carbon adsorber;
- cleaning and replacement of lint filters and carbon adsorber pre-filters;
- repair or replacement of exhaust fans.

Date	Activity	Notes
