State Pollutant Discharge Elimination System (SPDES) Priority Ranking List 2013/2014

The New York State Department of Environmental Conservation (NYS DEC) is providing the Environmental Benefit Permit Strategy (EBPS) priority rankings in conformance with section 17-0817(6) of the Environmental Conservation Law. The lists are based on a ranking system that prioritizes permits for full technical review and, when necessary, modification. The full technical review is conducted in one of nine regional offices or the central office, depending on the location of the discharge and whether the permit has been assigned to the central office based on USEPA designation as a major discharge or state designation as a centralized significant industrial permit.

The EBPS priority ranking system should not be confused with the SPDES permit renewal process. Most permits are renewed prior to expiration by a separate administrative procedure. At times, these renewals will be delayed to address necessary modifications to the permit.

The 2013/2014 SPDES permit lists can be viewed at the NYS DEC website: http://www.dec.ny.gov/permits/6054.html. The lists are based on ranking scores and reflect the priority list for each office. The ranking scores are updated on a continuous basis due to the discovery of new information and the issuance of modifications that eliminate the factors which go into each score. Each of the ranking lists includes the factors that make up each of the scores for each of the permits on the lists. The top 10% of each list represents a workload objective during this fiscal year. Additional information describing the EBPS process follows the ranking lists, and is also available by contacting the Bureau of Water Permits at (518) 402-8111 or by e-mail at bjhorton@gw.dec.state.ny.us, or at the address listed below.

Any interested party may provide, at any time, substantive comments requesting a change in a permit's rank based on the grounds that newly discovered material information exists; that a material change in environmental conditions has occurred; or that relevant technology or applicable law or regulations have changed since the issuance of the existing permit. All such requests shall be in writing and contain facts or reasons supporting the request. Comments must be sent to Director, Bureau of Water Permits, Division of Water, NYS DEC, 625 Broadway, Albany, NY 12233-3505.

EBPS ENB List - April 2013

Ranking Factors

Code	Description
1A	Permit needs a primary modification to conform to the State CSO/SSO Strategy; e.g. submission of a Facility Plan to control or eliminate CSOs known to be contributing to a water quality problem.
1B	Permit needs a secondary modification to conform to the State CSO/SSO Strategy; e.g. minor update in language to conform to an element of the State CSO Strategy.
2A	Permit needs a primary modification as part of a Department or Department accepted EPA initiative (e.g., significant issue regarding watershed TMDL implementation, multimedia permitting, DNA, etc)
2B	Permit needs a secondary modification as part of a Department or Department accepted EPA initiative (e.g., minor issue regarding watershed TMDL implementation, multimedia permitting, DNA, etc)
3A	Permit needs to be modified to add industrial pretreatment requirements of primary importance (e.g. inclusion of a mini pretreatment program to resolve a significant negative impact on the WWTP)
3B	Permit needs to be modified to add industrial pretreatment requirements of secondary importance (e.g. change in permit language to conform to federal regulations)
4A	Permit needs to be modified to add industrial BMP, PMP, or storm water requirements of primary importance (e.g. stormwater discharges from an industry are known to contain toxics)
4B	Permit needs to be modified to add industrial BMP, PMP, or storm water requirements of secondary importance (e.g. regulatory requirement not associated with the discharge of toxics)
5A	Permit needs to be modified for one effluent limit parameter: Bioacumulative/Persistent/Toxic (PCB, Dioxin, etc - Refer to Attachment 5 of EBPS Guidance)
5B	Permit needs to be modified for one effluent limit parameter: parameter change for completed stream reclassification, new WQ standard or important substance relative to WQ
5C	Permit needs to be modified for one effluent limit parameter: other minor parameter (e.g. water treatment chemicals, pH, Temp., Suspended Solids, action level, etc., not associated with WQ.
6A	Permit needs to be adjusted for a new wastewater treatment technology requirement for a parameter not identified in No.5 above: Bioacumulative/Persistent/Toxic (PCB, Dioxin, etc - Refer to Attachment 5)
6B	Permit needs to be adjusted for a new wastewater treatment technology requirement for a parameter not identified in No.5 above: Change in BPJ evaluation
07	Permit needs to be adjusted due to Consent Order or Permit non-compliance issues:
08	Permit is for an existing facility which triggers antidegradation:
09	Permit appears on an EPA 304(I) toxic list and requires an Individual Control Strategy (ICS)
10	Permit is municipal STP project on the State Revolving Fund loan list:
11	Permit need toxicity testing
12	Permit generated substantial public concern
13	Permit is a power plant needing modification for fish impingement or other fish and wildlife studies.
14	Longevity Score, Class 01, 07, 09, and 10: Enter the year when last Long Form Application with comprehensive effluent sampling was submitted.
