Permit Description

Introduction

The Title V operating air permit is intended to be a document containing only enforceable terms and conditions as well as any additional information, such as the identification of emission units, emission points, emission sources and processes, that makes the terms meaningful. 40 CFR Part 70.7(a)(5) requires that each Title V permit have an accompanying "...statement that sets forth the legal and factual basis for the draft permit conditions". The purpose for this permit review report is to satisfy the above requirement by providing pertinent details regarding the permit/application data and permit conditions in a more easily understandable format. This report will also include background narrative and explanations of regulatory decisions made by the reviewer. It should be emphasized that this permit review report, while based on information contained in the permit, is a separate document and is not itself an enforceable term and condition of the permit.

Summary Description of Proposed Project

Pactiv is proposing to modify existing emissions cap language (conditions #28 and #29 from Ren-1 Mod-0) to clarify that emissions from finished goods warehousing are to be counted and included in the emissions cap; install a new regenerative thermal oxidizer to replace the existing carbon adsorption system; exhaust the existing underwater pelletizers outdoors; include 40 CFR 64 Compliance Assurance

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

Monitoring as a facility-wide applicable requirement; and make minor administrative amendments to the Title V permit.

Attainment Status

PACTIV CORPORATION is located in the town of CANANDAIGUA in the county of ONTARIO. The attainment status for this location is provided below. (Areas classified as attainment are those that meet all ambient air quality standards for a designated criteria air pollutant.)

Criteria Pollutant	Attainment Status
Particulate Matter (PM)	ATTAINMENT
Particulate Matter < 10µ in diameter (PM10)	ATTAINMENT
Sulfur Dioxide (SO2)	ATTAINMENT
Ozone*	TRANSPORT REGION (NON-ATTAINMENT)
Oxides of Nitrogen (NOx)**	ATTAINMENT
Carbon Monoxide (CO)	ATTAINMENT

* Ozone is regulated in terms of the emissions of volatile organic compounds (VOC) and/or oxides of nitrogen (NOx) which are ozone precursors.

** NOx has a separate ambient air quality standard in addition to being an ozone precursor.

Facility Description:

THE FACILITY PRODUCES PLASTIC PACKAGING PRODUCTS VIA OPERATIONS SUCH AS EXTRUSION, THERMOFORMING, MATERIAL HANDLING, OPERATIONS, ETC.

Permit Structure and Description of Operations

The Title V permit for PACTIV CORPORATION

is structured in terms of the following hierarchy: facility, emission unit, emission point, emission source and process. A facility is defined as all emission sources located at one or more adjacent or contiguous properties owned or operated by the same person or persons under common control. The facility is subdivided into one or more emission units (EU). Emission units are defined as any part or activity of a stationary facility that emits or has the potential to emit any federal or state regulated air pollutant. An emission unit is represented as a grouping of processes (defined as any activity involving one or more emission sources (ES) that emits or has the potential to emit any federal or state regulated air pollutant). An emission source is defined as any apparatus, contrivance or machine capable of causing emissions of any air contaminant to the outdoor atmosphere, including any appurtenant exhaust system or air cleaning device. [NOTE: Indirect sources of air contamination as defined in 6 NYCRR Part 203 (i.e. parking lots) are excluded from this definition]. The applicant is required to identify the principal piece of equipment (i.e., emission source) that directly results in or controls the emission of federal or state regulated air pollutants from an activity (i.e., process). Emission sources are categorized by the following types:

- combustion - devices which burn fuel to generate heat, steam or power
- incinerator - devices which burn waste material for disposal
- control - emission control devices
- process - any device or contrivance which may emit air contaminants that is not included in the above categories.

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

PACTIV CORPORATION is defined by the following emission unit(s):

Emission unit UFOAMS - Polystyrene foam extrusion, storage, and thermoforming processes

Emission unit UFOAMS is associated with the following emission points (EP):

CST01, CST02, CST03, CST04, CT002, CT004, CT005, UP100, VP100

Process: CAS is located at Building CARB - THIS PROCESS INCLUDES ALL OPERATIONS VENTED THROUGH THE CARBON ADSORPTION SYSTEM. THIS INCLUDES THE FOAM THERMOFORMER CHOPPERS, RECLAIM GRINDERS AND RECLAIM EXTRUDER FEED LINES.

Process: EX1 is located at 1,2,3,6, Building 1 - THIS PROCESS INCLUDES THE FOAMS EXTRUDERS.

Process: R01 is located at GROUND, Building OUTSIDE -

Process: R01 is located at GROUND, Building OUTSIDE - This process includes the foam thermoformer choppers, reclaim grinders and reclaim extruder feed lines. PM associated with this process is vented to a series of dust collectors that exhaust to the new Regenerative Thermal Oxidizer. This process will replace the current CAS process once the new RTO is installed and operational.

Process: R03 This process includes all operations controlled via the Crawford RTO (CT004) as well as emissions from the underwater pelletizers. These operations include four reclaim extruders (lines 151,152,153 and 154). When running OPS reclaim, this process is an exempt activity consistent with 6NYCRR Part 201-3.2(c)(36).

Process: RST is located at 5,7, Building 5 -

Process: RST is located at 5,7, Building 5 - THIS PROCESS INCLUDES THE FOAMS ROLL STORAGE OPERATIONS.

Process: T01 is located at Building UST -

Process: T01 is located at Building UST - THIS PROCESS INCLUDES ONE OF THE ISOPENTANE UNDERGROUND STORAGE TANKS.

Process: TF1 is located at 1,2,3,6, Building 1 - This process includes the foams thermoforming operations and associated vacuum pumps.

Process: CR1 is located at GROUND, Building OUTSIDE -

Emission unit USOLID - MATERIAL HANDLING OPERATIONS.

Emission unit USOLID is associated with the following emission points (EP):

CD-53, CD-54, CRT01, CS100, CS101, CS102, CS103, CS104, CS105, CS106, CS201, CS202, CS203, OPS05, OPS09

Process: CR1 is located at GROUND, Building OUTSIDE - THIS PROCESS INCLUDES THE OPS UNLOAD SYSTEM AND ASSOCIATED FABRIC FILTER CONTROL. THE EMISSIONS FROM THIS SOURCE ARE PARTICULATE MATTER.

Process: CS1 is located at Building SILO - THIS PROCESS INCLUDES THE POLYSTYRENE TRANSFER SYSTEM. THE EMISSIONS OF CONCERN ARE PARTICULATE MATTER.

Process: CS2 is located at Building SILO - This process includes the reprocessed polystyrene pellet (RPP) transfer system from the reclaim extruders to silos that are not equipped with a control device. The emissions of concern are particulate matter.

Process: M05 is located at MAIN, Building 4 - THIS PROCESS INCLUDES THE EXTRUSION

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

SCRAP COLLECTION SYSTEM AND ASSOCIATED FABRIC FILTER CONTROL. THE EMISSIONS OF CONCERN ARE PARTICULATE MATTER.

Process: M09 is located at MAIN, Building 4 - THIS PROCESS INCLUDES THE EXTRUDER AND RECLAIM HOPPER SYSTEM AND ASSOCIATED CONTROLS. THE EMISSIONS OF CONCERN ARE PARTICULATE MATTER.

Process: M53 is located at MAIN, Building 1 - THIS PROCESS INCLUDES THE RECLAIM EXTRUDER LINE 153 FEED BIN AND ASSOCIATED FABRIC FILTER CONTROL. THE EMISSIONS OF CONCERN ARE PARTICULATE MATTER. THIS PROCESS COVERS OPS RECLAIM TRANSFER.

Process: M54 is located at MAIN, Building 1 - THIS PROCESS INCLUDES THE FEED FOR THE LINE 154 RECLAIM EXTRUDER AND ASSOCIATED FABRIC FILTER CONTROL. THE ONLY POLLUTANT EMITTED IS PARTICULATE MATTER. THE PROCESS COVERS THE TRANSFER OF OPS RECLAIM.

Emission unit USURFA - PLASTIC COATING OPERATIONS.

Emission unit USURFA is associated with the following emission points (EP):

OPS14, OPS15, OPS16, OPSXX

Process: ATM is located at MAIN, Building 1 - THIS PROCESS INCLUDES THE APPLICATION OF ATMER ANTI FOG COATING TO THE PLASTIC PRODUCT. MINOR AMOUNTS OF VOC ARE EMITTED IN THE PROCESS. FOUR OF THE THERMOFORMERS WILL HAVE THE CAPABILITY TO PERFORM THIS OPERATION.

Emission unit UDENSI - THERMAL DENSIFIER.

Emission unit UDENSI is associated with the following emission points (EP):

DEN01

Process: DEN is located at MAIN, Building 2 - THIS SOURCE IS ONE THERMAL DENSIFIER USED TO COLLAPSE POLYSTYRENE PRODUCTS. THE PRIMARY EMISSIONS FROM THIS PROCESS ARE VOC AND HAP.

Emission unit UOPSEX - EXTRUSION LINES.

Emission unit UOPSEX is associated with the following emission points (EP):

OPS03, OPS12

Process: OPS is located at MAIN, Building 4 - THIS PROCESS INCLUDES THE TWO OPS EXTRUSION LINE OVENS AT THE FACILITY. THE PRIMARY EMISSIONS ARE VOC AND HAP.

Emission unit UPYROL - PYROLYSIS OVEN.

Emission unit UPYROL is associated with the following emission points (EP):

BERRI

Process: PYR is located at MAIN, Building 2 - THIS SOURCE IS ONE BERRINGER JET CLEANER USED TO MELT RESIDUAL PLASTIC LEFT IN THE EXTRUDER DYES. THERE ARE MINOR EMISSIONS OF VOC, PARTICULATE MATTER AND HAP.

Emission unit USILIC - COATING LINES, FUGITIVE SOURCE.

Process: SIL is located at MAIN, Building 4 - THIS PROCESS INCLUDES THE TWO SILICONE COATING OPERATIONS FOR THE OPS EXTRUSION LINES. MINOR AMOUNTS OF VOC ARE EMITTED FROM THESE FUGITIVE SOURCES.

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

and scrap handling processes.

Emission unit UPPCUP is associated with the following emission points (EP):

CRE01, CRE02, CRE03, CRE04, CRE05, CRE06, CRE07, CRE08, CRE09, CRE10, CRE11, MTE01, MTE02, MTE03, MTE04, MTE05, MTE06, MTE07, MTE08, MTE09, MTE10, MTE11, MTE12, MTE13, MTE14, MTE15

Process: COR is located at Building 8-6 - This process includes corona treaters used to treat plastic prior to printing.

Process: MAT is located at Building 8-6 - This process includes material transport from railcars to resin silos, from silos to extruders, and thermoforming grinders to extruders.

Process: PRT is located at Building 8-6 - This process includes printing and associated equipment cleaning operations.

Process: SLC is located at 8-5,8-6, Building 8-5 - This process includes the 9 silicone operations for the PPCUP extrusion lines. Minor amounts of VOC's are emitted from these fugitive sources.

Title V/Major Source Status

PACTIV CORPORATION is subject to Title V requirements. This determination is based on the following information:

PTE > 100 TPY VOC

Program Applicability

The following chart summarizes the applicability of PACTIV CORPORATION with regards to the principal air pollution regulatory programs:

Regulatory Program	Applicability
PSD	NO
NSR (non-attainment)	YES
NESHAP (40 CFR Part 61)	NO
NESHAP (MACT - 40 CFR Part 63)	NO
NSPS	NO
TITLE IV	NO
TITLE V	YES
TITLE VI	NO
RACT	YES
SIP	YES

NOTES:

PSD Prevention of Significant Deterioration (40 CFR 52) - requirements which pertain to major stationary sources located in areas which are in attainment of National Ambient Air Quality Standards (NAAQS) for specified pollutants.

NSR New Source Review (6 NYCRR Part 231) - requirements which pertain to major stationary sources located in areas which are in non-attainment of National Ambient Air Quality Standards

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

(NAAQS)

for specified pollutants.

NESHAP National Emission Standards for Hazardous Air Pollutants (40 CFR 61) - contaminant and source specific emission standards established prior to the Clean Air Act Amendments of 1990 (CAAA) which were developed for 9 air contaminants (inorganic arsenic, radon, benzene, vinyl chloride, asbestos, mercury, beryllium, radionuclides, and volatile HAP's).

MACT Maximum Achievable Control Technology (40 CFR 63) - contaminant and source specific emission standards established by the 1990 CAAA. Under Section 112 of the CAAA, the US EPA is required to develop and promulgate emissions standards for new and existing sources. The standards are to be based on the best demonstrated control technology and practices in the regulated industry, otherwise known as MACT. The corresponding regulations apply to specific source types and contaminants.

NSPS New Source Performance Standards (40 CFR 60) - standards of performance for specific stationary source categories developed by the US EPA under Section 111 of the CAAA. The standards apply only to those stationary sources which have been constructed or modified after the regulations have been proposed by publication in the Federal Register and only to the specific contaminant(s) listed in the regulation.

Title IV Acid Rain Control Program (40 CFR 72 thru 78) - regulations which mandate the implementation of the acid rain control program for large stationary combustion facilities.

Title VI Stratospheric Ozone Protection (40 CFR 82, Subparts A thru G) - federal requirements that apply to sources which use a minimum quantity of CFC's (chlorofluorocarbons), HCFC's (hydrofluorocarbons) or other ozone depleting substances or regulated substitute substances in equipment such as air conditioners, refrigeration equipment or motor vehicle air conditioners or appliances.

RACT Reasonably Available Control Technology (6 NYCRR Parts 212.10, 226, 227-2, 228, 229, 230, 232, 233, 234, 235, 236) - the lowest emission limit that a specific source is capable of meeting by application of control technology that is reasonably available, considering technological and economic feasibility. RACT is a control strategy used to limit emissions of VOC's and NOx for the purpose of attaining the air quality standard for ozone. The term as it is used in the above table refers to those state air pollution control regulations which specifically regulate VOC and NOx emissions.

SIP State Implementation Plan (40 CFR 52, Subpart HH) - as per the CAAA, all states are empowered and required to devise the specific combination of controls that, when implemented, will bring about attainment of ambient air quality standards established by the federal government and the individual state. This specific combination of measures is referred to as the SIP. The term here refers to those state regulations that are approved to be included in the SIP and thus are considered federally enforceable.

Compliance Status

Facility is in compliance with all requirements.

SIC Codes

SIC or Standard Industrial Classification code is an industrial code developed by the federal Office of Management and Budget for use, among other things, in the classification of establishments by the type of activity in which they are engaged. Each operating establishment is assigned an industry code on the basis

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

of its primary activity, which is determined by its principal product or group of products produced or distributed, or services rendered. Larger facilities typically have more than one SIC code.

SIC Code	Description
3086	PLASTICS FOAM PRODUCTS

SCC Codes

SCC or Source Classification Code is a code developed and used" by the USEPA to categorize processes which result in air emissions for the purpose of assessing emission factor information.Each SCC represents

a unique process or function within a source category logically associated with a point of air pollution emissions. Any operation that causes air pollution can be represented by one or more SCC's.

SCC Code	Description
3-08-010-02	RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS RUBBER AND MISC PLASTIC PRODUCTS - PLASTIC PRODUCTS MANUFACTURING

Facility Emissions Summary

In the following table, the CAS No. or Chemical Abstract Service code is an identifier assigned to every chemical compound. [NOTE: Certain CAS No.'s contain a 'NY' designation within them. These are not true CAS No.'s but rather an identification which has been developed by the department to identify groups of contaminants which ordinary CAS No.'s do not do. As an example, volatile organic compounds or VOC's are identified collectively by the NY CAS No. 0NY998-00-0.] The PTE refers to the Potential to Emit. This is defined as the maximum capacity of a facility or air contaminant source to emit any air contaminant under its physical and operational design. Any physical or operational limitation on the capacity of the facility or air contamination source to emit any air contaminant , including air pollution

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

control equipment and/or restrictions on the hours of operation, or on the type or amount of material combusted, stored, or processed, shall be treated as part of the design only if the limitation is contained in federally enforceable permit conditions. The PTE Range represents an emission range for a contaminant. Any PTE quantity that is displayed represents a facility-wide emission cap or limitation for that contaminant. If no PTE quantity is displayed, the PTE Range is provided to indicate the approximate magnitude of facility-wide emissions for the specified contaminant in terms of tons per year (tpy). The term 'HAP' refers to any of the hazardous air pollutants listed in section 112(b) of the Clean Air Act Amendments of 1990. Total emissions of all hazardous air pollutants are listed under the special NY CAS No. 0NY100-00-0. In addition, each individual hazardous air pollutant is also listed under its own specific CAS No. and is identified in the list below by the (HAP) designation.

Cas No.	Contaminant Name	PTE		Range
		lbs/yr		
0NY998-00-0	VOC	1302000		

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

- (1) An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;
- (2) The equipment at the permitted facility causing the emergency was at the time being properly operated;
- (3) During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
- (4) The facility owner and/or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10(b)

The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.

Item C: Timely Application for the Renewal of Title V Permits -6 NYCRR Part 201-6.3(a)(4)

Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the

New York State Department of Environmental Conservation
Permit Review Report

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

date of permit expiration for permit renewal purposes.

- Item D: Certification by a Responsible Official - 6 NYCRR Part 201-6.3(d)(12)**
Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- Item E: Requirement to Comply With All Conditions - 6 NYCRR Part 201-6.5(a)(2)**
The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.
- Item F: Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR Part 201-6.5(a)(3)**
This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
- Item G: Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.5(a)(5)**
It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.
- Item H: Property Rights - 6 NYCRR 201-6.5(a)(6)**
This permit does not convey any property rights of any sort or any exclusive privilege.
- Item I: Severability - 6 NYCRR Part 201-6.5(a)(9)**
If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.
- Item J: Permit Shield - 6 NYCRR Part 201-6.5(g)**
All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:
- i. The ability of the Department to seek to bring suit on behalf of the State of

New York State Department of Environmental Conservation
Permit Review Report

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

- ii. The liability of a permittee of the Title V facility for any violation of applicable requirements prior to or at the time of permit issuance;
- iii. The applicable requirements of Title IV of the Act;
- iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

Item K: Reopening for Cause - 6 NYCRR Part 201-6.5(i)

This Title V permit shall be reopened and revised under any of the following circumstances:

- i. If additional applicable requirements under the Act become applicable where this permit's remaining term is three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which this permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the Department pursuant to the provisions of Part 201-6.7 and Part 621.
- ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
- iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.
- iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

Item L: Permit Exclusion - ECL 19-0305

The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item M: Federally Enforceable Requirements - 40 CFR 70.6(b)

All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS

**Item A: General Provisions for State Enforceable Permit Terms and Condition - 6
NYCRR Part 201-5**

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Applicability Discussion:

Mandatory Requirements: The following facility-wide regulations are included in all Title V permits:

ECL 19-0301

This section of the Environmental Conservation Law establishes the powers and duties assigned to the Department with regard to administering the air pollution control program for New York State.

6 NYCRR 200.6

Acceptable ambient air quality - prohibits contravention of ambient air quality standards without mitigating measures

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

6 NYCRR 200.7

Anyone owning or operating an air contamination source which is equipped with an emission control device must operate the control consistent with ordinary and necessary practices, standards and procedures, as per manufacturer's specifications and keep it in a satisfactory state of maintenance and repair so that it operates effectively

6 NYCRR 201-1.4

This regulation specifies the actions and recordkeeping and reporting requirements for any violation of an applicable state enforceable emission standard that results from a necessary scheduled equipment maintenance, start-up, shutdown, malfunction or upset in the event that these are unavoidable.

6 NYCRR 201-1.7

Requires the recycle and salvage of collected air contaminants where practical

6 NYCRR 201-1.8

Prohibits the reintroduction of collected air contaminants to the outside air

6 NYCRR 201-3.2 (a)

An owner and/or operator of an exempt emission source or unit may be required to certify that it operates within the specific criteria described in this Subpart. All required records must be maintained on-site for a period of 5 years and made available to department representatives upon request. In addition, department representatives must be granted access to any facility which contains exempt emission sources or units, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

6 NYCRR 201-3.3 (a)

The owner and/or operator of a trivial emission source or unit may be required to certify that it operates within the specific criteria described in this Subpart. All required records must be maintained on-site for a period of 5 years and made available to department representatives upon request. In addition, department representatives must be granted access to any facility which contains trivial emission sources or units subject to this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

6 NYCRR Subpart 201-6

This regulation applies to those terms and conditions which are subject to Title V permitting. It establishes the applicability criteria for Title V permits, the information to be included in all Title V permit applications as well as the permit content and terms of permit issuance. This rule also specifies the compliance, monitoring, recordkeeping, reporting, fee, and procedural requirements that need to be met to obtain a Title V permit, modify the permit and demonstrate conformity with applicable requirements as listed in the Title V permit. For permitting purposes, this rule specifies the need to identify and describe all emission units, processes and products in the permit application as well as providing the Department the authority to include this and any other information that it deems necessary to determine the compliance status of the facility.

6 NYCRR 201-6.5 (a) (4)

This mandatory requirement applies to all Title V facilities. It requires the permittee to provide information that the Department may request in writing, within a reasonable time, in order to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. The request may include copies of records required to be kept by the permit.

New York State Department of Environmental Conservation
Permit Review Report

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

6 NYCRR 201-6.5 (a) (7)

This is a mandatory condition that requires the owner or operator of a facility subject to Title V requirements to pay all applicable fees associated with the emissions from their facility.

6 NYCRR 201-6.5 (a) (8)

This is a mandatory condition for all facilities subject to Title V requirements. It allows the Department to inspect the facility to determine compliance with this permit, including copying records, sampling and monitoring, as necessary.

6 NYCRR 201-6.5 (c)

This requirement specifies, in general terms, what information must be contained in any required compliance monitoring records and reports. This includes the date, time and place of any sampling, measurements and analyses; who performed the analyses; analytical techniques and methods used as well as any required QA/QC procedures; results of the analyses; the operating conditions at the time of sampling or measurement and the identification of any permit deviations. All such reports must also be certified by the designated responsible official of the facility.

6 NYCRR 201-6.5 (c) (2)

This requirement specifies that all compliance monitoring and recordkeeping is to be conducted according to the terms and conditions of the permit and follow all QA requirements found in applicable regulations. It also requires monitoring records and supporting information to be retained for at least 5 years from the time of sampling, measurement, report or application. Support information is defined as including all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

6 NYCRR 201-6.5 (c) (3) (ii)

This regulation specifies any reporting requirements incorporated into the permit must include provisions regarding the notification and reporting of permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken.

6 NYCRR 201-6.5 (d) (5)

This condition applies to every Title V facility subject to a compliance schedule. It requires that reports, detailing the status of progress on achieving compliance with emission standards, be submitted semiannually.

6 NYCRR 201-6.5 (e)

Sets forth the general requirements for compliance certification content; specifies an annual submittal frequency; and identifies the EPA and appropriate regional office address where the reports are to be sent.

6 NYCRR 201-6.5 (f) (6)

This condition allows changes to be made at the facility, without modifying the permit, provided the changes do not cause an emission limit contained in this permit to be exceeded. The owner or operator of the facility must notify the Department of the change. It is applicable to all Title V permits which may be subject to an off permit change.

6 NYCRR 201-6.5 (g)

Permit Exclusion Provisions - specifies those actions, such as administrative orders, suits, claims for natural resource damages, etc that are not affected by the federally enforceable portion of the permit, unless they are specifically addressed by it.

6 NYCRR 202-1.1

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

This regulation allows the department the discretion to require an emission test for the purpose of determining compliance. Furthermore, the cost of the test, including the preparation of the report are to be borne by the owner/operator of the source.

6 NYCRR 202-2.1

Requires that emission statements shall be submitted on or before April 15th each year for emissions of the previous calENDar year.

6 NYCRR 202-2.5

This rule specifies that each facility required to submit an emission statement must retain a copy of the statement and supporting documentation for at least 5 years and must make the information available to department representatives.

6 NYCRR 211.2

This regulation prohibits any emissions of air contaminants to the outdoor atmosphere which may be detrimental to human, plant or animal life or to property, or which unreasonably interferes with the comfortable enjoyment of life or property regardless of the existence of any specific air quality standard or emission limit.

6 NYCRR 211.3

This condition requires that the opacity (i.e., the degree to which emissions other than water reduce the transmission of light) of the emissions from any air contamination source be less than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent.

6 NYCRR Part 215

Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

6 NYCRR 215.2

Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

40 CFR Part 68

This Part lists the regulated substances and there applicability thresholds and sets the requirements for stationary sources concerning the prevention of accidental releases of these substances.

40 CFR Part 82, Subpart F

Subpart F requires the reduction of emissions of class I and class II refrigerants to the lowest achievable level during the service, maintenance, repair, and disposal of appliances in accordance with section 608 of the Clean Air Act AmENDments of 1990. This subpart applies to any person servicing, maintaining, or repairing appliances except for motor vehicle air conditioners. It also applies to persons disposing of appliances, including motor vehicle air conditioners, refrigerant reclaimers, appliance owners, and manufacturers of appliances and recycling and recovery equipment. Those individuals, operations, or activities affected by this rule, may be required to comply with specified disposal, recycling, or recovery practices, leak repair practices, recordkeeping and/or technician certification requirements.

Facility Specific Requirements

In addition to Title V, PACTIV CORPORATION has been determined to be subject to the following regulations:

New York State Department of Environmental Conservation
Permit Review Report

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

40 CFR Part 64

The federal Compliance Assurance Monitoring (CAM) rule, 40 CFR Part 64, requires monitoring of control device, capture system, and/or process parameters to provide a reasonable assurance of compliance with emission limitations or standards. It applies to emission units that use a control device to comply with certain standards and limitations and that have potential pre-control device emissions equal to or greater than a major source threshold.

Acid Rain program requirements; stratospheric ozone protection requirements; post-1990 New Source Performance Standards, Emission Guidelines, and National Emission Standards for Hazardous Air Pollutants; and some other limitations are exempt from CAM. However, many of the exempt requirements are subject to less stringent periodic monitoring under 40 CFR Part 70 and 6NYCRR Subpart 201-6.

6 NYCRR 201-7.2

This section of Part 201-7 specifies the criteria that need to be met in order to restrict emissions to avoid Title V or other applicable requirements using federally enforceable permit conditions permit.

6 NYCRR 212.10 (c) (4) (i)

VOC removal efficiency greater than 81% is considered RACT.

6 NYCRR 212.10 (c) (4) (iii)

This rule allows those sources which cannot achieve an overall removal efficiency of 81% or use coatings that don't exceed 3.5 lbs. VOC/gallon as applied for technological or economic reasons to use process specific reasonably available control technology (RACT) demonstrations for sources of volatile organic compounds (VOC) which are acceptable to the department and have been submitted to EPA for approval as a revision to the State Implementation Plan by the department.

6 NYCRR 212.10 (e)

VOC RACT requirements and compliance monitoring.

6 NYCRR 212.11 (a)

VOC RACT requirements and compliance monitoring.

6 NYCRR 212.11 (b) (3)

VOC RACT requirements and compliance monitoring.

6 NYCRR 212.4 (a)

This rule requires compliance with the degree of control specified in Tables 2, 3 and 4 for new (after July 1, 1973) process emission sources.

6 NYCRR 212.4 (c)

This rule requires existing sources (in operation after July 1, 1973) of solid particulates with environmental rating of B or C which are not subject to Table 5 "Processes for which Permissible Emission Rate is Based on Process Weight, to be limited to an particulate emission rate not to exceed 0.05 grains per dry standard cubic foot.

6 NYCRR 212.6 (a)

This rule specifies an opacity limitation of less than 20% for any six consecutive minute period for all process emission sources.

New York State Department of Environmental Conservation
Permit Review Report

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

6 NYCRR 228.1 (d)

This citation states that any coating line that is or becomes subject to the provisions of 6 NYCRR Part 228, will remain subject to these provisions even if the annual potential to emit volatile organic compounds for the facility later falls below the thresholds set forth in this regulation.

6 NYCRR 228.10

This citation specifies the procedures and protocols for the handling, storage and disposal of volatile organic compounds.

6 NYCRR 228.3 (a)

This citation prohibits the use of coatings that exceed the maximum permitted pounds of volatile organic compounds per gallon, unless a coating system meeting certain requirements is used.

6 NYCRR 228.4

This citation prohibits any person from emitting (or to allow emissions) to the outdoor atmosphere having an average opacity of 20 percent or greater for any consecutive six-minute period from any emission source subject to this Part.

6 NYCRR 228.5 (a)

This citation requires the owner or operator of any emission source subject to 6 NYCRR Part 228 to maintain and, upon request, provide the Department with a certification from the coating supplier/manufacturer which verifies the parameters used to determine the actual volatile organic compound (VOC) content of each as applied coating. In addition it requires the purchase, usage and/or production records of the coating material, including solvents and any additional information required to determine compliance with Part 228, to be maintained in a format acceptable to the Department; and upon request, submitted to the Department.

6 NYCRR 228.5 (b)

This citation requires the owner and operator of any emission source subject to Part 228 to, upon request by the Department, use Method 311 or Method 24 as presented in Appendices A of both 40 CFR Parts 63 and 60, to measure the volatile content, water content, density, volume of solids and weight of solids in order to determine the actual VOC content of an applied coating during a compliance demonstration.

6 NYCRR 228.5 (c)

This citation allows alternate sampling and analysis methods to be used, subject to the approval of the Department and the Administrator.

6 NYCRR 228.5 (d)

This citation allows representatives of the Department to obtain coating samples during reasonable business hours, for the purpose of determining compliance.

6 NYCRR 228.6

This prohibits the selling, specifying, or requiring for use, coatings at a facility with a regulated coating line if such use is prohibited by any of the provisions of Part 228. The prohibition applies to all written or oral contracts under the terms of which any coating is to be used at an affected facility.

**New York State Department of Environmental Conservation
Permit Review Report**

Permit ID: 8-3224-00108/00116

Renewal Number: 1

Modification Number: 1 05/28/2010

6 NYCRR 228.7

Table 1 lists the processes and a description of products that are regulated by Part 228 and the maximum permitted pounds of volatile organic compounds per gallon of coating at application.

6 NYCRR 229.3 (e) (2) (iv)

This section requires a tank with submerged fill for storage of volatile organic liquids

6 NYCRR 231-2.6

The provisions of Subpart 231-2 apply to new or modified major facilities. The contaminants of concern state-wide are nitrogen oxides and volatile organic compounds since New York State is located in the ozone transport region and because there are ozone non-attainment areas within the state. In the New York City metropolitan area, carbon monoxide is also a non-attainment contaminant. In addition, particulate matter less than 10 microns in size (PM-10) is a non-attainment contaminant in Manhattan County.

The requirements and criteria for creating and certifying emission reduction credits (ERCs) are set forth in section 231-2.6.

6 NYCRR 234.3 (b) (2)

The facility began operation on or after September 1, 1988. An offset lithographic printing process is used at the facility which is subject to Part 234, and which uses fountain solutions containing volatile organic compounds containing 10% by weight or less of volatile organic compounds.

In addition, an air cleaning device must be used in which 90% of the volatile organic compounds are removed from the exhaust stream.

6 NYCRR 234.3 (e)

The emissions to the outdoor atmosphere may not exceed an average opacity greater than 10% for any consecutive six-minute period from any emission source subject to Part 234.

6 NYCRR 234.4 (b) (3)

The facility is required to maintain records of purchases and usage of inks, volatile organic compounds, and solvents. The facility maintains these records in a log book for a minimum of five years.

6 NYCRR 234.5 (a)

It is prohibited to sell, specify, or require for use a non-compliant ink or coating unless a process-specific variance from the requirements of Part 234 has been granted by the DEC or where control equipment is used to comply with the requirements of Part 234.

6 NYCRR 234.5 (b)

Any person selling a coating or ink for use at a printing process subject to 6NYCRR Part 234 must, upon request, provide the user with certification of the volatile organic compound content of the coating or ink supplied.

6 NYCRR 234.6

This requirement pertains to general provisions for the handling, storage and disposal of volatile organic compounds and applies to open containers except where production, sampling, maintenance or

**New York State Department of Environmental Conservation
