July 20, 2016

Inactive Hazardous Waste Disposal Site Classification Notice

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). As of the date of this notice, the site identified above, and located on a map on the reverse side of this page, was added to the Registry as a Class 2 site that presents a significant threat to public health and/or the environment for the following reason(s):

The site includes an active dry cleaner where it has been determined that on-site soil and groundwater are contaminated by volatile organic compounds tetrachloroethene and trichloroethene. Additional investigation is needed to define the nature and extent of contamination, to evaluate potential human exposure pathways, and to determine the appropriate remedial actions that will need to be implemented to prevent and abate exposure to the contamination.

DEC will keep you informed throughout the investigation and cleanup of the site.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.

FOR MORE SITE INFORMATION

Additional information about this site can be found using DEC's "Environmental Site Remediation Database Search" engine which is located on the internet at:

www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3

Comments and questions are always welcome and should be directed as follows:
