

Night Watch

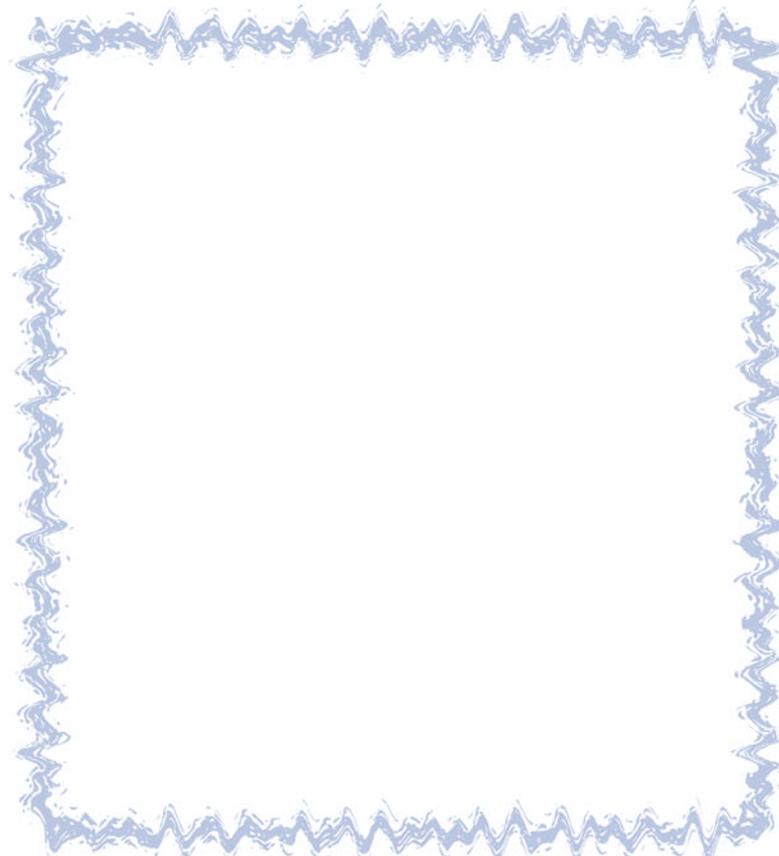

Things are happening all around us, even after dark. As you sit around your camp at night, pay attention to the sounds: crackling fire; crickets or other insects; voices; owl or loons calling; and water sounds.

Find a place where you can see the sky. Draw the shape of the moon or a star picture.

Go somewhere there is a bright light. Watch the many insects dance in the brightness.

Draw a picture of one of the insects.

Describe how you feel and what you hear at night.
