AMBIENT AIR QUALITY REPORT 2022

NEW YORK STATE AMBIENT AIR MONITORING PROGRAM

BUREAU OF AIR QUALITY SURVEILLANCE DIVISION OF AIR RESOURCES

Kathy Hochul, Governor | Basil Seggos, Commissioner

Summary and background information

This technical document is designed to provide summary information about the ambient air quality in New York State as it relates to the EPA's National Ambient Air Quality Standards (NAAQS). The data here is provided in the same format as the EPA NAAQS, and as such may include information at air quality monitoring Sites that have since been closed. In the footer of each page there is a key to assist in the interpretation of the data. Site numbers are the NYS internal site identifiers and are different than the AQS site numbers.

This document does not cover all pollutants measured, only those that have a NAAQS criteria. More information about the other programs for which the NYSDEC collects data, and more detailed information about the instrumentation currently available at individual site can be found in the [Monitoring Network Plan](#)

For more information about the current and historic NAAQS, standards for regulatory action, health effects of individual pollutants, and more please go to the [EPA's Criteria Air Pollutants webpage](#).

Full datasets are available for download and review from the [EPA Air Data webpage using the API](#).

For current Air Quality Index (AQI) Forecast and Current Observations for New York State, please go to the [NYSDEC's AQI webpage](#).

EPA National Ambient Air Quality Standards

| Pollutant | Standard Type | NAAQS Basis | NAAQS Statistic | Standard Level | Standard Units |
|-------------------|-----------------------|---|---------------------------------------|----------------|-------------------------------|
| Ozone | Primary and Secondary | Daily maximum of 8-hour running average | Annual 4th Maximum | 0.070 | Parts per million |
| Nitrogen dioxide | Primary | Observed values | Annual Mean | 53.00 | Parts per billion |
| Nitrogen dioxide | Primary and Secondary | Daily Maximum 1-hour average | Annual 98th Percentile | 100.0 | Parts per billion |
| Carbon monoxide | Primary | 8-Hour running average (end hour) of observed hourly values | Annual Second Non-Overlapping Maximum | 9.00 | Parts per million |
| Carbon monoxide | Primary | Observed hourly values | Annual Second Maximum | 35.00 | Parts per million |
| Lead | Primary and Secondary | Observed Values | 3-Month Rolling Average | 0.15 | Micrograms/cubic meter (LC) |
| PM _{2.5} | Primary | Quarterly Means of Daily Means | Annual Weighted Mean | 15.00 | Micrograms/cubic meter (LC) |
| PM _{2.5} | Secondary | Quarterly Means of Daily Means | Annual Weighted Mean | 12.00 | Micrograms/cubic meter (LC) |
| PM _{2.5} | Primary and Secondary | Daily Mean | Annual 98th Percentile | 35.00 | Micrograms/cubic meter (LC) |
| Sulfur dioxide | Secondary | 3-Hour block average of observed hourly values | Annual Second Maximum | 0.50 | Parts per billion |
| Sulfur dioxide | Primary | Daily maximum 1-hour average | Annual 99th Percentile | 75.00 | Parts per billion |
| PM ₁₀ | Primary and Secondary | Daily Mean | Annual Estimated Days > Standard | 150.00 | Micrograms/cubic meter (25 C) |

For more information, please see the [EPA's NAAQS Table](#).

Appendix A – Historic Site Information

As physical access, funding, and scientific understanding of the air pollution problem evolves, it is prudent that stationary air monitoring locations adapt. While every effort is made to continue the operation of a site within the NYSDEC network, it is not always possible. The following tables, broken down by NYSDEC Region, contain information about historic sites and are available to assist researchers and the public in finding more data.

Data from these monitors have been submitted to the EPA, and are available for query on the [EPA's Air Data webpage](#).

Key

| | |
|-----------------|--|
| AQS ID | The ID for the data as it resides in EPA's AQS. |
| Status | The status as of the date the report was compiled |
| Year | The year for which the most recent data is in AQS |
| Local Site Name | The local site name as it is reported in AQS |
| County | County for which the site resides |
| City | City the site resides |
| Latitude | Latitude of the site, as measured when the site was established |
| Longitude | Longitude of the site, as measured when the site was established |

For more information about the NYSDEC Air Monitoring Network, please contact the Division of Air Resources, Bureau of Air Quality Surveillance at dar.web@dec.ny.gov
