2017 SUPPLEMENTAL APPLICATION FOR SHELLFISH DIGGER'S PERMIT

This Supplemental Application for a Shellfish Digger's Permit to be issued pursuant to the provisions of Sections 13-0309, 13-0311 and 13-0319 of the Environmental Conservation Law and Part 42 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York, includes the following special conditions or provisions which shall apply to all shellfish digger's permits issued for 2016:

SHELLFISH HARVESTING, IDENTIFICATION AND HANDLING REQUIREMENTS:

Condition Nos. 1-11 Apply To All Diggers:

1. The permittee shall be in compliance with the applicable shellfish handling, storage, transportation, tagging or labeling, record keeping and requirements for the shellfish activity or activities for which this permit is issued pursuant to 6 NYCRR Part 42 "Sanitary Control over Shellfish."
2. All shellfish harvester tags must include the ***time of harvest*** for all shellfish taken (time of harvest begins on each day when the first shellstock is taken from the water). **Time of harvest must be written in indelible ink on each tag and the tag must be affixed to the container prior to the placement of any shellfish into the container.**

Once a container has been completely filled as intended, a new ***time of harvest*** begins when the next lot of shellfish is removed from the water. **All shellfish tags must be fully completed prior to leaving the area of harvest.**

NOTE: All shellfish harvested from LS1 east of Eatons Neck Point must be tagged or labeled LS1 East.

3. Shellfish shall not be placed or held in containers that are not self-draining. **Under no circumstances shall shellfish be allowed to sit in standing or stagnant water.** This provision does not apply to placement of shellfish in an ice slurry for rapid cooling of shellfish when the water temperature of the ice slurry is less than or equal to 45°F (7.2°C). Water used for the production of an ice slurry must be obtained from the same certified shellfish harvest area where the shellfish were taken (harvested). Any ice used must be drinking water quality or from an approved source.
4. From **May 1 through October 31**, both dates inclusive, shellfish harvested from New York waters must be shaded at all times, from the time of harvest while onboard the vessel and during transport in any boat, vehicle or other means of conveyance, from the harvest area to the original dealer.
5. **All oysters** harvested from any certified shellfish lands for food consumption between the dates of **May 1 through September 30, both dates inclusive**, must be **immediately** culled and placed under temperature control through icing, mechanical refrigeration maintained at 33°F (0.6°C) to 45°F (7.2°C) or other cooling method approved by the Department **upon commencement of time of harvest.**
 - a. For this condition, ***time of harvest*** begins when each lot of **oysters** is taken from the water and no longer submerged. **Time of harvest must be written in indelible ink on each tag and the tag must be affixed to the container prior to the placement of any oysters into the container.**
 - b. All oysters shall be immediately culled and maintained under temperature control (cooling) throughout the harvest day once the ***time of harvest*** (start of harvest) begins. Once a container has been completely filled as intended, a new ***time of harvest*** begins when the next lot of shellfish is removed from the water.
 - c. ***Time of harvest*** must be identified on your shellfish harvester tag(s) and harvest log. **All shellfish tags must be fully completed prior to leaving the area of harvest.**
6. All harvesters shall maintain a log book that indicates the common name of shellfish harvested, quantities (net weights, numerical counts or standard measures) of shellfish harvested, the harvest date, an identification of the areas from which shellfish were harvested, time of harvest, and the names and permit numbers of all purchasers of shellfish (identify disposition of shellfish). **The log book must be completed prior to landing shellfish on a daily basis** and must be made immediately available to the Department or an enforcement officer upon request.
7. The Department shall have the right to inspect any facility, building, structure, property or conveyance used for any activity undertaken by the permittee pursuant to this permit and as described in 6 NYCRR Part 42.
8. The Department shall have the right to take samples, without payment, of any shellfish, water, chemicals, food ingredients and other substances for examinations as required pursuant to 6 NYCRR Part 42.
9. The Department shall have the right to inspect and/or copy any tags, labels, harvester logs, shipping invoices or other records required to be kept as a requirement of this permit and pursuant to 6 NYCRR Part 42.
10. The violation of any conditions of this permit or related provision of 6 NYCRR Part 42 may result in permit modification, suspension, or revocation and/or seizure of any lot, quantity or shipment of shellfish and/or related materials associated with such violation.
11. The shellfish digger's permit shall be made available for inspection by the Department at all times from the date of issue through the date of expiration and while conducting any related activity described in 6 NYCRR Part 42 or any applicable sections of the Environmental Conservation Law.

Condition No. 12 Applies To Harvest Of Oysters And Hard Clams Under A Vp Control Plan Only:

12. When the Department has determined that a *Vibrio parahaemolyticus* (Vp) Control Plan is required for particular harvest areas, for the protection of public health, the following requirements must also be met by all shellfish harvesters working in the affected areas. **These requirements shall apply from May 1 through September 30, both dates inclusive:**
- a. Shellfish harvesters working in shellfish lands specified in a Vp Control Plan (as specified in Condition No. 12b below) must adhere to all harvesting requirements included in the Vp Control Plan.
 - b. The requirements specified in Condition No. 12 shall apply to all commercial harvesters when they take **hard clams and oysters** for food consumption from any of the following certified shellfish lands (harvest areas) which are subject to a Vp Control Plan: New York State harvest areas identified as **NS1, NS2, NS3** and that portion of **LS1, lying west of Eatons Neck Point** (Town of Huntington); refer to the map on the bottom of this page. Other areas will be added as necessary if they are the source of shellfish linked to Vp illnesses in 2016.
 - c. Hard clams and oysters harvested for food consumption from any certified areas identified in Condition No. 12b must be **immediately** culled and placed under temperature control through icing, mechanical refrigeration maintained at 33°F (0.6°C) to 45°F (7.2°C) or other cooling method approved by the Department **upon commencement of time of harvest.**
 - d. For this condition, **time of harvest** begins when hard clams or oysters are taken from the water and no longer submerged. **Time of harvest must be written in indelible ink on each tag and the tag must be affixed to the container prior to the placement of any hard clams and/or oysters into the container.**
 - e. All oysters and/or hard clams shall be immediately culled and maintained under temperature control (cooling) throughout the harvest day once the **time of harvest** (start of harvest) begins. Once a container has been completely filled as intended, a new **time of harvest** begins when the next lot of shellfish is removed from the water.
 - f. **Time of harvest must be identified on your shellfish harvester tag(s) and harvest log. All shellfish tags must be fully completed prior to leaving the area of harvest.**
 - g. Any ice used must be of drinking water quality or from an approved source. Saltwater used in an ice slurry shall only be from the certified harvest area where the lot of clams or oysters was harvested.
 - h. All hard clams and oysters harvested from **LS1 west of Eatons Neck Point shall be tagged or labeled LS1 West**; all hard clams and oysters harvested from LS1 east of Eatons Neck Point shall be tagged or labeled LS1 East. Hard clams and oysters harvested from LS1 West shall not be comingled with hard clams or oysters harvested from LS1 East.
 - i. All oysters and hard clams must be cooled to an internal temperature of 60°F (15.6°C) or less prior to sale to the original dealer.

This supplemental document is part of the permit application for marine permits. By signing below, I affirm and acknowledge that I have read and understand these conditions that apply to shellfish harvest, identification and handling requirements. These conditions are issued as additional requirements under my 2016 shellfish harvester (digger) permit. A shellfish digger permit will not be issued without the digger's name, permit number, signature and date provided in the spaces below.
