

Recreational Saltwater Fishing Limits

Effective March 30, 2018

NEW YORK
STATE OF
OPPORTUNITY.

Department of
Environmental
Conservation

Before fishing you must call 1-866-933-2257 or visit <https://decals.dec.ny.gov/DECALSCitizenWeb> to register with the NYS Recreation Marine Fishing Registry.

These regulations may change, please visit <http://www.dec.ny.gov/outdoor/7894.html> for the most updated version. The official regulation by the Department of State are the official source of DEC regulations.

Anadromous river herring (7) (South of George Washington Bridge)	No possession	No possession allowed	No possession allowed
American shad	No possession	No possession allowed	No possession allowed
Atlantic sturgeon	Moratorium	No possession allowed	No possession allowed

(1) Total length is the longest straight line measurement from the tip of the snout, with the mouth closed, to the longest lobe of the tail, with the lobes squeezed together, and the fish laid flat on the measuring device. Exception: Black sea bass are measured from the tip of the snout (or jaw), with the mouth closed, to the farthest extremity of the tail, not including the tail filament.

(2) A party/charter boat customer who lands and possesses more than 30 scup during September 1 - October 31 must obtain a dated original fare receipt from the licensed vessel.

(3) Summer flounder may not have heads or tails removed or be otherwise cleaned, cut, filleted, or skinned until brought to shore, with the following exception: the white side fillet or white skin only of a legal size fluke may be removed to use as bait. The carcass of the fluke with dark side completely intact must be retained for inspection of size limit and counts against the possession limit.

(4) Anglers aboard federally permitted party or charter vessels may possess any number of Atlantic cod, consistent with federal rules.

(5) The fillet length is the longest straight line measurement from end to end of any fleshy side portion of the fish cut lengthwise away from the backbone, which must have the skin intact, laid flat on the measuring device.

(6) Dressed length is the longest straight line measurement from the most anterior portion of the fish, with the head removed, to the longest lobe of the caudal fin(tail), with the caudal fin intact and with the lobes squeezed together, laid flat on the measuring device.

(7) Anadromous river herring is defined in 6 NYCRR Part 10 (except the Hudson River and its tributaries and embayments north of the George Washington Bridge at river mile 11).
