Batavia Kill

Fish Species Present

Brook Trout

Brown Trout

Rainbow Trout

Description of Fishery

The Batavia Kill flows for 22 miles before entering Schoharie Creek just upstream of the village of Prattsville. Wild trout exist throughout the stream, but they are abundant only in the upper reaches above Batavia Pond (an in-stream impoundment) located in C.D. Lane Park. Brown and brook trout can be found above Batavia Pond, while brown trout predominate below the pond. In addition, approximately 5,800 yearling and 350 two year old brown trout are stocked in the lower 19 miles of stream. Batavia Pond is also stocked with rainbow trout, and some of those fish leave the reservoir and enter the stream.

Note:

Statewide fishing regulations apply throughout the Batavia Kill watershed.

Location

About Public Fishing Rights

Public Fishing Rights (PFR's) are permanent easements purchased by the NYSDEC from willing landowners, giving anglers the right to fish and walk along the bank (usually a 33' strip on one or both banks of the stream). This right is for the purpose of fishing only and no other purpose. Treat the land with respect to insure the continuation of this right and privilege. Fishing privileges may be available on some other private lands with permission of the land owner. Courtesy toward the land-owner and respect for their property will insure their continued use.

These generalized location maps are intended to aid anglers in finding PFR segments and are not survey quality. Width of displayed PFR may be wider than reality to make it more visible on the maps. Please look for this PFR sign to ensure that you are in the right location and have legal access to the stream bank.

For more information on this creek or if you believe PFR marked areas on these maps are incorrect or missing PFR signs, please call the Region 4 Fisheries office: (607) 652-7366.
