Public Fishing Rights Maps

West Kill

Fish Species Present

Brown Trout

Rainbow Trout

Brook Trout

Description of Fishery

The West Kill flows for 11 miles before entering Schoharie Creek just below the village of Lexington. Wild trout are found throughout the stream, but they are most abundant in the upper 8 miles. Wild brown trout can be found in all sections of the stream, but rainbow trout are found mostly in the lower reaches, and brook trout numbers increase as one heads upstream. In addition, approximately 700 yearling brown trout are stocked in the lower 3 miles of stream.

Note:

Statewide fishing regulations apply throughout the West Kill watershed.

Location

Greene County

About Public Fishing Rights

Public Fishing Rights (PFR's) are permanent easements purchased by the NYSDEC from willing landowners, giving anglers the right to fish and walk along the bank (usually a 33' strip on one or both banks of the stream). This right is for the purpose of fishing only and no other purpose. Treat the land with respect to insure the continuation of this right and privilege. Fishing privileges may be available on some other private lands with permission of the land owner. Courtesy toward the land-owner and respect for their property will insure their continued use.

These generalized location maps are intended to aid anglers in finding PFR segments and are not survey quality. Width of displayed PFR may be wider than reality to make it more visible on the maps. Please look for this PFR sign to ensure that you are in the right location and have legal access to the stream bank.

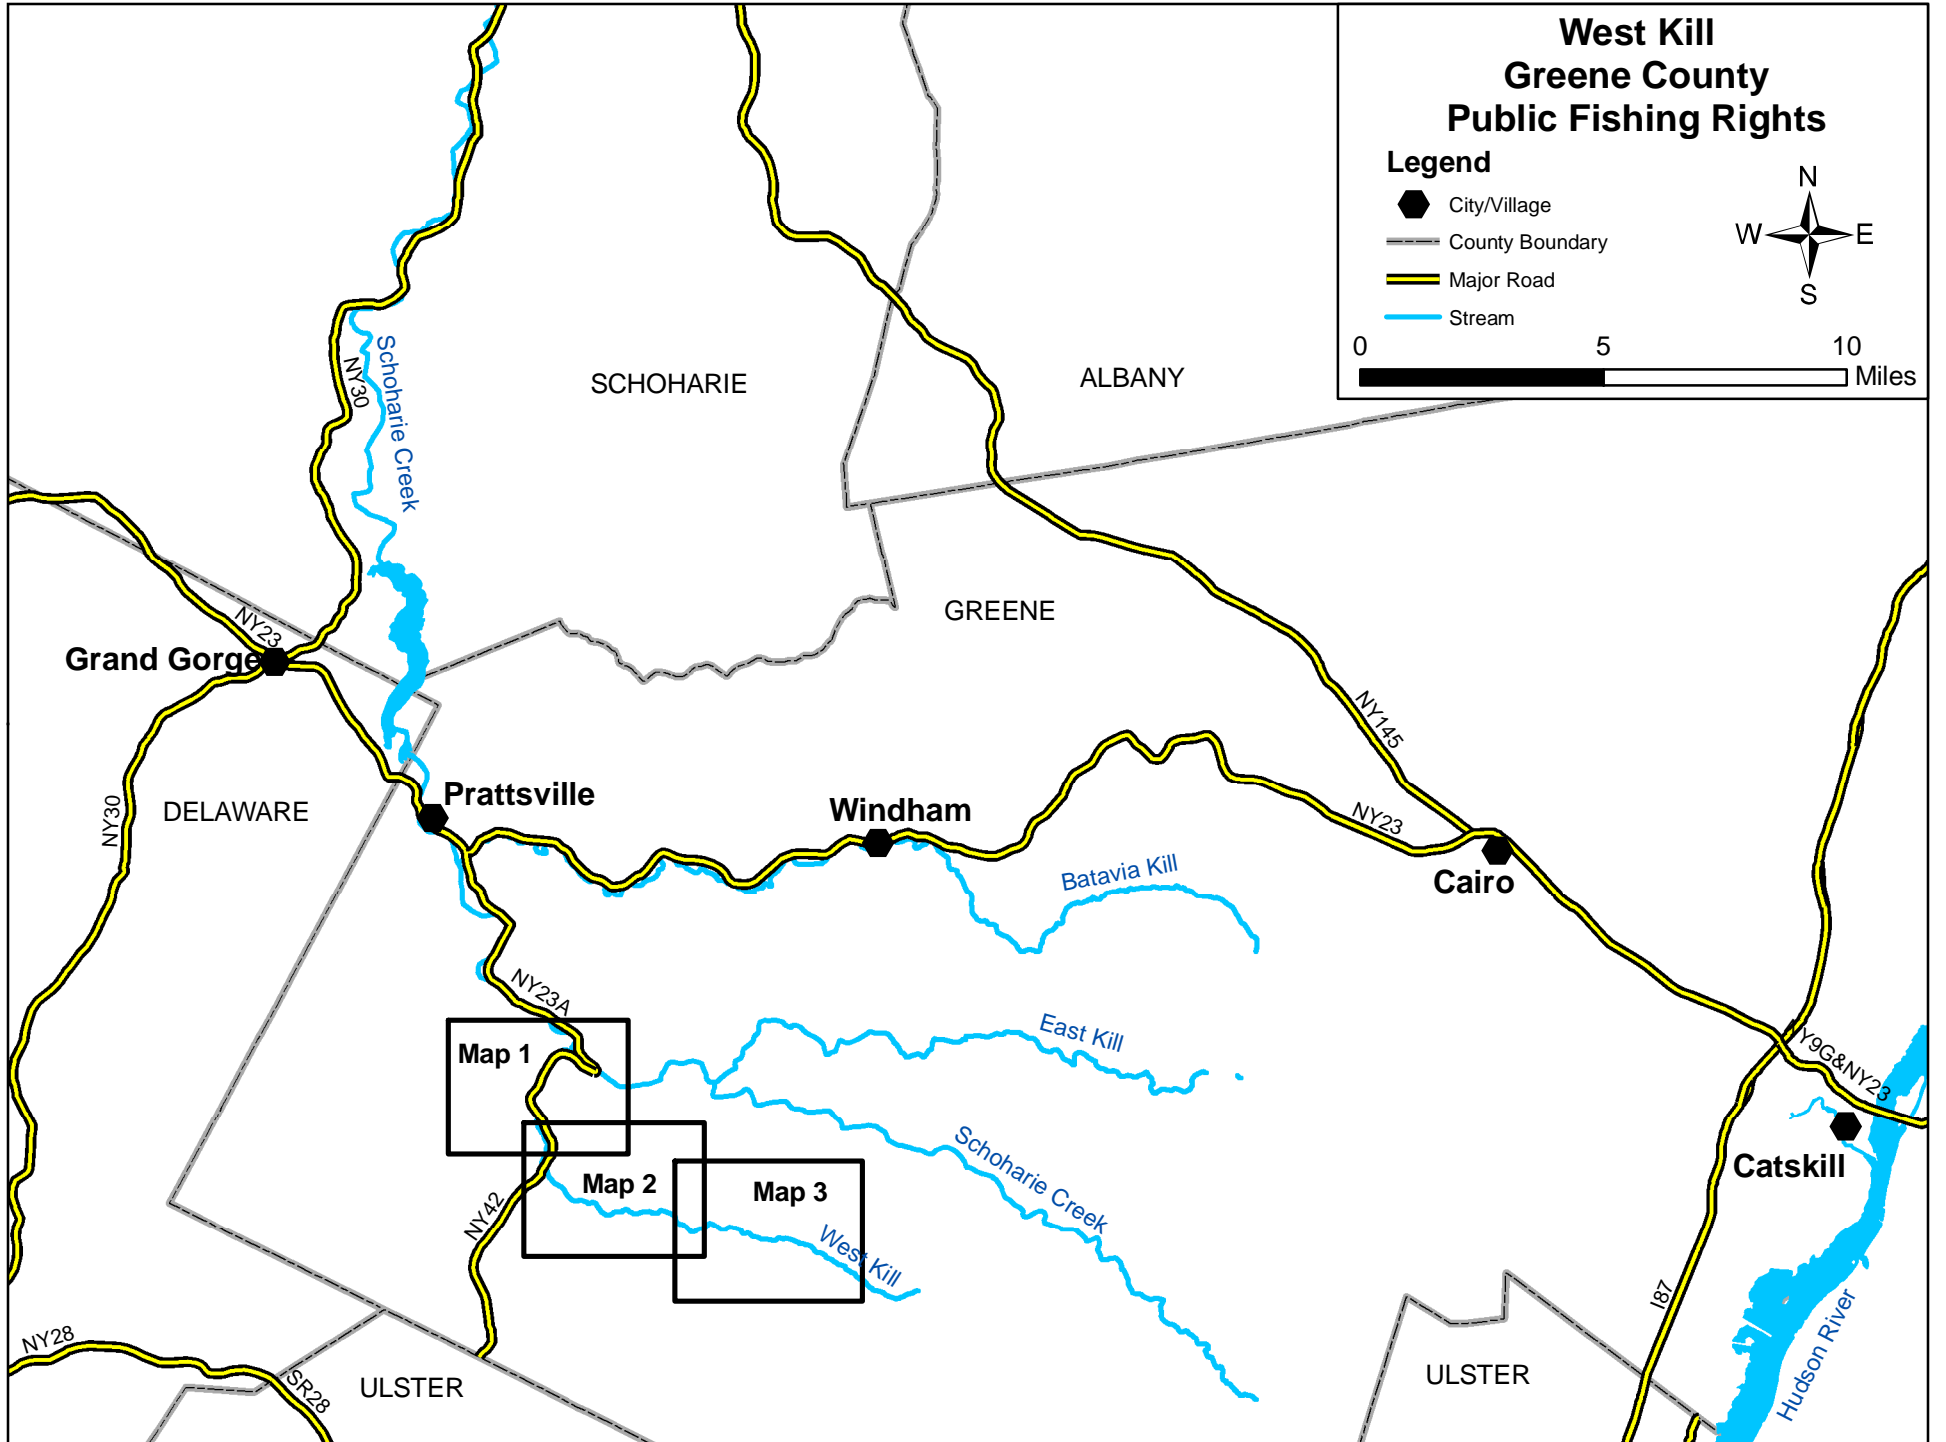

For more information on this creek or if you believe PFR marked areas on these maps are incorrect or missing PFR signs, please call the Region 4 Fisheries office: (607) 652-7366.
