**Subject:** Gallery 10 Work Plan for Pressure Testing  
**Attachments:** TEXT.htm

**FILE COPY**

Barry, Mineral Resources staff has reviewed the work plan submitted with correspondence from Kevin Bernstein dated April 11, 2012 to Peter Briggs to evaluate Gallery 10 (which includes Inergy Midstream, LLC wells 18, 52, and 57) with a hydrostatic pressure test. The Department approves the testing detailed in the work plan with the following additional requirements:

1. Inergy must use brine with the highest possible saturation percentage to conduct the test.
2. Inergy must use a chart to continuously record pressures on Well 17 during the test instead of monitoring by taking pressure readings from a gauge.

Inergy may conduct the test at any time.

Please don't hesitate to contact me at (585) 226-5376 if you have any questions.
