Re: *Finger Lakes LPG Storage, LLC; DEC Facility No. 8-4432-00085*

Dear Peter:

Enclosed are revised maps regarding the above-referenced project, including: (i) a Brinefield Map Showing Galleries; (ii) Vertical Cross-Section A-A' (West to East); (iii) Vertical Cross-Section B-B' (South-North); and (iv) Vertical Cross-Section C-C' (West to East). These maps have been updated to reflect the most recent sonar information for Well No. 58 (performed after additional solution mining activity), corrected API numbers (to match numbers in the Department's database), and logs previously submitted to the Department. Also enclosed is a revised table showing Cavern Volumes and Salt Tonnage Extracted or to be Extracted, which takes into account the additional solution mining activities for Well No. 58.

Finger Lakes (John Istvan and Barry Moon) has reviewed the Geomechanical Study that is part of the Application and concluded that the study is still correct with the additional diameter of Well No. 58.

Please note that the information contained in the attached maps contain confidential information or confidential and/or proprietary, trade secret or business information and should be treated as privileged and confidential and should not be released pursuant to the provisions of 6 NYCRR § 616.7.

Sincerely,

BOND, SCHOENECK & KING, PLLC
