

### Oneida Indian Nation Land In Trust Application – Contiguity Analysis

Group	Number of Patches <sup>1</sup>	Average Acreage Per Patch	Average Number of Parcels Per Patch	Maximum Distance Between Parcels
Group 1 (99 parcels)	38 <sup>2</sup>	89.4	4	5.5 miles
Group 2 (241 parcels)	118 <sup>2</sup>	54.7	3	22 miles
Group 3 (104 parcels)	65 <sup>2</sup>	111.3	3	18.5 miles
Groups 1, 2 & 3 (444 parcels)	198	86.3	3	22 miles

**Notes**

1. A patch is defined as one or more contiguous parcels of OIN-owned land. OIN-owned land separated by non-OIN land or public roadways is not considered contiguous and is part of distinct patches.
2. The sum of the number of patches for each group is greater than the number of patches for cumulative Groups 1, 2 & 3 because the cumulative assessment accounts for parcels considered contiguous that might be in different groups.
