

**New York State Department of Environmental Conservation
Waste Tire Stockpile Assessment Summary Sheet - Site 6-06**

Harris Junkyard Town of Lowville

Region 6, Lewis County

Site Setup:

Small Junkyard in a rural setting. Site is currently relatively inaccessible due to piles of scrap and wet conditions.

Number of tires: 2,000 estimated.

The tires are in two small piles and one larger pile all within a scrap handling area.

Condition of tires: Over half the tires are still on rims and roughly 200 are still on rims on axles. Vegetation within the scrap handling area is not an issue.

Access to Site: Driveway from road to tires.

Driveways are unpaved dirt tracks on a glacial till soil type. Slopes run 6% to 15 % all up hill from main road.

The access corridor is essentially grass meadow with dirt track. If removal is attempted during a wet season the access will become prohibitively difficult.

Concerns: Fire vectors
