

**New York State Department of Environmental Conservation
Waste Tire Stockpile Assessment Summary Sheet - Site 7-10**

Carl Bice (Krais Road) Junkyard Town of Pulaski

Region 7, Oswego County

Site Setup:

Tire piles are distinct but mixed with C&D waste. Limited access and piled in wooded areas.

**Number of tires: 7,500 estimated
(approximately half hidden in overgrown areas and mixed in with C&D waste.)**

Condition of tires:

Mostly passenger tires in distinct piles. Majority of tires clean and mixed in with C&D waste. Mixture of rimmed and unrimmed tires.

Access to site:

Access road off Krais Road, which is a dead end. Access road is very muddy; limited access due to feeder streams leading to wetland and stream. Some piles blocked by junk and trees growing in piles.

Concerns:

Limited fire access, damage to wetland and trout stream from runoff. Estimate may be low due to unknown quantity buried and intermixed with C&D material. The site is within a freshwater wetland and adjacent to a protected trout stream.
