This is not a comprehensive list and there may be additional requirements that go beyond this general checklist for pesticide applications in New York State. For example, there are posting, contracting, and permitting requirements for certain types of applications that are not included on this checklist. It is necessary to review the ECL Article 33, Article 15, and the regulatory requirements of 6NYCRR Part 320-329 to ensure compliance. Links to the ECL and regulations can be found on the New York State Department of Environmental Conservation's Website at: <http://www.dec.ny.gov/chemical/298.html>. If you have difficulty determining which sections apply to you, please contact the Bureau of Pest Management, Compliance and Laboratory Services Section at 518-402-8727 or your local DEC regional office.
