Joint Permit Application and Supplement Sheet

JOINT APPLICATION FORM - PAGE 2 OF 2

Submit this completed page as part of your Application.

7. Project Description and Purpose: Provide a complete narrative description of the proposed work and its purpose. Attach additional page(s) if necessary. Include: description of current site conditions and how the site will be modified by the proposed project; structures and fill materials to be installed; type and quantity of materials to be used (i.e., cubic yds or square ft of fill material below ordinary high water, or of structures below mean high water); area of excavation or dredging, volumes of material to be removed and location of dredged material disposal or use; work methods and type of equipment to be used; pollution control methods and mitigation activities proposed to compensate for resource impacts; and where applicable, the phasing of activities.

Please see Attachment A for Project Description and Purpose.

Proposed Use: <input type="checkbox"/> Private <input type="checkbox"/> Public <input checked="" type="checkbox"/> Commercial	Will Project Occupy Federal, State or Municipal Land? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, please specify.
Has Work Begun on Project? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes, explain.	
Proposed Start Date: 9/28/13	Estimated Completion Date: 12/12/35

8. List Previous Permit / Application Numbers (if any) and Dates:
See Attachment A.

9. Will this project require additional Federal, State, or Local Permits Yes No If Yes, please list:
including zoning changes?
NRC Licenses DPR-26 and DPR-64

10. Based on the permits and determinations requested and project location, check all the boxes corresponding to each of the Agencies and Offices to which you are filing an application. For Agency addresses and areas covered, refer to the Agency Contact Information on the Application Instructions - Page 2.

New York State
Department of Environmental Conservation

Subject to DEC staff's compliance with all applicable laws and regulations governing access to and inspection of the facility,

PERMISSION TO INSPECT PROPERTY

By signing this permission form for submission with an application for a permit(s) to the Department of Environmental Conservation ("DEC"), the signer consents to inspection by DEC staff of the project site or facility for which a permit is sought and, to the extent necessary, areas adjacent to the project site or facility. This consent allows DEC staff to enter upon and pass through such property in order to inspect the project site or facility, ~~without permission,~~ between the hours of 7:00 a.m. and 7:00 p.m., Monday through Friday. If DEC staff should wish to conduct an inspection at any other times, DEC staff will so notify the applicant and will obtain a separate consent for such an inspection.

Inspections may take place as part of the application review prior to a decision to grant or deny the permit(s) sought. By signing this consent form, the signer agrees that this consent remains in effect as long as the application is pending, and is effective regardless of whether the ~~signer, applicant or agent is present at the time of the inspection. It is understood that the project site is not to be inspected with any "Class A" or "Class B" permit. This consent is not intended to be used for any other purpose than the inspection of the project site by DEC staff. If you have any questions, please contact the DEC staff member who provided you with this form.~~

Subject to DEC staff's compliance with all applicable laws and regulations,

The signer further agrees that during an inspection, DEC staff may, among other things, take measurements, may analyze physical characteristics of the site including, but not limited to, soils and vegetation (taking samples for analysis), and may make drawings and take photographs.

Failure to grant consent for an inspection is grounds for, and may result in, denial of the permit(s) sought by the application.

Permission is granted for inspection of property located at the following address(es):

*By signing this form, I affirm under penalty of perjury that I am authorized to give consent to entry by DEC staff as described above. I understand that false statements made herein are punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.**

Print Name and Title Signature Date

*The signer of this form must be an individual or authorized representative of a legal entity that:
• owns fee title and is in possession of the property identified above;
• maintains possessory interest in the property through a lease, rental agreement or other legally binding agreement; or
• is provided permission to act on behalf of an individual or legal entity possessing fee title or other possessory interest in the property for the purpose of consenting to inspection of such property.

Response to 5 (Property Tax Map Section/Block/Lot Number)

Parts of 43.06-01-01, 43.10-01-01, 43.10-02-01, 43.10-02-02, and 43.14-02-01

Response to 9. Project Description and Purpose:

In accordance with 10 CFR Part 50, Entergy Nuclear Operations, Inc. (Entergy) has applied to the Nuclear Regulatory Commission (NRC) for renewal of the Indian Point Unit 2 (IP2) and Indian Point Unit 3 (IP3) Operating Licenses for an additional twenty years of operation. Nuclear power plants are initially licensed by the NRC to operate up to 40 years, but these licenses may be renewed [10 CFR 50.51] for periods of up to 20 years. The current IP2 and IP3 Operating License expiration dates are September 28, 2013 and December 12, 2015, respectively. NYSDEC issued a Section 401 Water Quality Certification for the initial Operating Licenses for IP2 on December 7, 1970 and IP3 on May 2, 1975, respectively (see Attachment C to this application that was included in the IP2 and IP3 Environmental Report to the NRC).

The proposed action is to extend the IP2 and IP3 Operating Licenses until 2033 and 2035, respectively. IP2 and IP3 are located on the east bank of the Hudson River in the Village of Buchanan, NY. The facility is at latitude 41° 16' 7", longitude 73° 57' 19". Collectively, Entergy's Indian Point facility is referred to as the Indian Point Energy Center (IPEC). No changes in operations that would significantly alter its discharges or discharge characteristics during the 20 year license renewal term are anticipated.

The site currently operates under SPDES permit number NY0004472 (the "Current Permit"). The Current Permit contains an expiration date of October 1, 1992. However, in accordance with the New York State Administrative Procedures Act, a timely and complete SPDES permit renewal application was filed 180 days prior to the Current Permit's expiration date and, therefore, the Current Permit continues in effect under New York administrative law until a new, final permit is issued by NYSDEC. The Current Permit was provided as Attachment C in the IP2 and IP3 Environmental Report to the NRC and is provided in Attachment E to this application. This permit provides a description of relevant IPEC discharges and discharge limitations.

In 1992, to resolve litigation involving, among others, the previous owners of IP2 and IP3 and NYSDEC, a Stipulation of Settlement and Judicial Consent Order was entered in New York Supreme Court and subsequently amended on four separate occasions, ultimately expiring on February 1, 1998 (the "Fourth Amended Consent Order"). The prior owners of IP2 and IP3 voluntarily agreed to continue operations in accordance with the Fourth Amended Consent Order (in conjunction with the current SPDES Permit) until a new SPDES Permit was finalized for IP2 and IP3. A copy of the Fourth Amended Consent Order is provided in Attachment E.

IP2 and IP3 operate and will continue to operate in compliance with its NYSDEC SPDES discharge permit(s), as they may be renewed or modified from time to time during the NRC license renewal period.
