WILMINGTON WILD FOREST BEAVER BROOK TRAIL SYSTEM

Trail Information

The Beaver Brook Trail System is comprised of approximately 9.2 miles of trails in the town of Wilmington, NY. The trails are open to mountain biking, hiking, cross country skiing, and snowshoeing. Trails can be accessed via the Beaver Brook Trailhead, located on Hardy Road approximately 2.2 miles south of its intersection with Route 86 and approximately 1.2 miles north of its intersection with Springfield Road.

This trail network was built, and is maintained, almost entirely by volunteers. Please be respectful of their work and other users as you enjoy these trails.
