Remedial Construction Process

- Excavation per remedial design plans, following safe practices
- Backfill with approved clean fill and topsoil
- Restoration of hardscape features (concrete and asphalt)
- Installation of sod, sheds, fences, etc.
- Restoration of landscaping features and plantings, etc.
- Warranty on restoration features
What to Expect During Construction

• Typical schedule: Monday to Friday, 7:30 a.m. to 6:00 p.m.
• Dust and vibration monitoring during excavation; use of dust control measures as needed
• Clean loading practices and standard decontamination procedures for project equipment
• Construction noise from equipment such as small excavators and small dump trucks
• Vehicles entering and exiting project staging areas on State Street, Middle Street and Lehigh Street
• Occasional temporary road closures; flagman directing traffic as needed
