## Meet the Hudson River

High in the **Adirondack Mountains** a **river** begins. It starts at **Lake Tear of the Clouds**. The river's **journey** is 315 miles long. It ends at New York City near the Atlantic **Ocean**. This river is called the Hudson.

Waterfall

Lake Tear of the Clouds

The Hudson River changes during this journey. It begins as **fresh water** flowing from the mountains. Here it rushes over rapids and waterfalls.

Later the Hudson passes small towns and big cities. It grows wider and deeper. Long bridges cross the river.

The Hudson at Poughkeepsie

Blue Crab

Near the ocean, salty **seawater** enters the Hudson River. It mixes with fresh water from the mountains. A place where this happens is called an **estuary**. Here you find crabs and other animals that like salty water.

High Tide

At the seashore, **tides** make the water slowly rise and fall. At **high tide** the water's edge is far up the beach. At **low tide** it is low down on the beach. You can also see tides in the Hudson estuary. The tides and salty water show that this end of the river is an arm of the sea.

Low Tide

New York City

## Mapping the Hudson River

Maps can show us land, rivers, lakes, mountains, roads, and cities.

Maps show us where things are.

**Directions:** Read the article *Meet the Hudson River*. Then make a map of the Hudson River. Look at the article and its map if you need help.

- 1. On a clean sheet of paper draw the Hudson River.
- 2. Draw a compass rose to show directions.
- 3. Write the name of your town in the blank label below.
- 4. Cut out the labels. Paste each label in the correct place on your map. Again, if you need help look at a map of New York State or the map in the article *Meet the Hudson River*.
- 5. Draw in mountains, the Atlantic Ocean, and your town. Add bridges, the seashore, or any other places you might find on your map.
- 6. Using crayons, color in your map. Color the **Hudson River** and the **Atlantic Ocean blue**. Color the **land green**. Color the **mountains brown**. Use any color for other places on your map.
