Note: The information presented in this Citizen Participation Plan was current as of the date of its approval by the New York State Department of Environmental Conservation. Portions of this Citizen Participation Plan may be revised during the site’s investigation and cleanup process.

Site Name: **Former Oak Materials Fluorglas Division - John Street**
Site Address: **3 Lyman Street**
Hoosick Falls, NY 12090
Site County: **Rensselaer County**
Site Number: **442049**

1. What is New York’s State Superfund Program?

New York’s State Superfund Program (SSF) identifies and characterizes suspected inactive hazardous waste disposal sites. Sites that pose a significant threat to public health or the environment undergo a process of investigation, evaluation, cleanup, and monitoring. Importantly, not all sites require all of the foregoing steps.

The New York State Department of Environmental Conservation (NYSDEC) administers the SSF Program with assistance and input from the New York State Department of Health (NYSDOH). When the parties responsible for the contamination of the site are known (“responsible parties”), they often pay for or perform the investigation and evaluation of cleanup options under an enforceable consent order. At sites where responsible parties cannot be found or are unable or unwilling to fund an investigation, the State pays for the investigation and may try to recover costs from a responsible party after the investigation and cleanup are complete.

The SSF program contains investigation and cleanup requirements, ensuring that cleanups protect public health and the environment. For more information about the SSF program, go online at: <http://www.dec.ny.gov/chemical/8439.html> .

2. Citizen Participation Activities

Why NYSDEC Involves the Public and Why It Is Important

NYSDEC involves the public to improve the process of investigating and cleaning up contaminated sites, and to enable citizens to participate more fully in decisions that affect their health, environment, and social well-being. NYSDEC provides opportunities for citizen involvement and encourages early two-way communication with citizens before decision makers form or adopt final positions.

Involving citizens affected and interested in site investigation and cleanup programs is important for many reasons. These include:

- Promoting the development of timely, effective site investigation and cleanup programs that protect public health and the environment
- Improving public access to, and understanding of, issues and information related to a particular site and that site’s remedial process

- Providing citizens with early and continuing opportunities to participate in NYSDEC's site investigation and cleanup process
- Ensuring that NYSDEC makes site investigation and cleanup decisions that benefit from input that reflects the interests and perspectives found within the affected community
- Encouraging dialogue to promote the exchange of information among the affected/interested public, State agencies, and other interested parties that strengthens trust among the parties, increases understanding of site and community issues and concerns, and improves decision making.

This Citizen Participation (CP) Plan provides information about how NYSDEC will inform and involve the public during the characterization and, if needed, investigation and cleanup of the site identified above. The public information and involvement program will be carried out with assistance, as appropriate, from Honeywell.

Project Contacts

Appendix A identifies NYSDEC project contact(s) to whom the public should address questions or request information about the site's characterization, investigation and cleanup program. The public's suggestions about this CP Plan and the CP program for the site are always welcome. Interested people are encouraged to share their ideas and suggestions with the project contacts at any time.

Locations of Reports and Information

The locations of the reports and information that relate to the site's characterization, investigation and/or cleanup program also are identified in Appendix A. These locations provide convenient access to important project documents for public review and comment. Some documents may be placed on the NYSDEC web site. If this occurs, NYSDEC will inform the public in fact sheets distributed about the site and by other means, as appropriate.

Site Contact List

Appendix B contains the initial site contact list. This list has been developed to keep the community informed about, and involved in, the site's investigation and cleanup process. The site contact list will be used periodically to distribute fact sheets that provide updates about the status of the project. These will include notifications of upcoming activities at the site (such as fieldwork), as well as availability of project documents and announcements about public comment periods.

The site contact list includes, at a minimum:

- chief executive officer and planning board chairperson of each county, city, town and village

- in which the site is located;
- residents, owners, and occupants of the site and properties adjacent to the site;
- the public water supplier which services the area in which the site is located;
- any person who has requested to be placed on the site contact list;
- the administrator of any school or day care facility located on or near the site for purposes of posting and/or dissemination of information at the facility;
- location(s) of reports and information.

The site contact list will be reviewed periodically and updated as appropriate. Individuals and organizations will be added to the site contact list upon request. Such requests should be submitted to the NYSDEC project contact(s) identified in Appendix A. Other additions to the site contact list may be made at the discretion of the NYSDEC project manager, in consultation with other NYSDEC staff as appropriate.

Note: The first site fact sheet (usually related to the Remedial Investigation) is distributed both by paper mailing through the postal service and through DEC Delivers, its email listserv service. The fact sheet includes instructions for signing up with the appropriate county listserv to receive future notifications about the site. See <http://www.dec.ny.gov/chemical/61092.html> .

Subsequent fact sheets about the site will be distributed exclusively through the listserv except for households without internet access that have indicated the need to continue to receive site information in paper form. Please advise the NYSDEC site project manager identified in Appendix A if this is the case. Paper mailings may continue during the investigation and cleanup process for some sites, based on public interest and need.

CP Activities

The table at the end of this section identifies the CP activities, at a minimum, that have been and will be conducted during the site's cauterization, and if necessary, investigation and cleanup program. The flowchart in Appendix D generally shows how these CP activities integrate with the site characterization, investigation and cleanup process. CP activities may be adjusted as appropriate based on the level of public inquiry. The NYSDEC will assess, on an ongoing basis, community outreach needs and implement appropriate measures, such as holding public availability sessions or issuing remedial progress updates as warranted. The public is informed about these CP activities through fact sheets and notices distributed at significant points during the program. Elements of the investigation and cleanup process that match up with the CP activities are explained briefly in Section 5.

- **Notices and fact sheets** help the interested and affected public to understand contamination issues related to a site, and the nature and progress of efforts to characterize, investigate and clean up a site.
- **Public forums, comment periods and contact with project managers** provide opportunities for the public to contribute information, opinions and perspectives that have

potential to influence decisions about a site's characterization, and if need, investigation and cleanup.

The public is encouraged to contact project staff at any time during the site's characterization, investigation and cleanup process with questions, comments, or requests for information.

This CP Plan may be revised due to changes in major issues of public concern identified in Section 3 or in the nature and scope of characterization, investigation and cleanup activities. Modifications may include additions to the site contact list and changes in planned citizen participation activities.

Technical Assistance Grant

To the extent that, and at such time as, the Department determines that the Site constitutes a significant threat to public health or the environment, a qualifying community group may apply for a Technical Assistance Grant (TAG). The purpose of a TAG is to provide funds to the qualifying community group to obtain independent technical assistance. This assistance helps the TAG recipient to interpret and understand existing environmental information about the nature and extent of contamination related to the site and the development/implementation of a remedy.

An eligible community group must certify that its membership represents the interests of the community affected by the site(s), and that its members' health, economic well-being, or enjoyment of the environment may be affected by a release or threatened release of contamination at the site.

For more information about TAGs, go online at: <http://www.dec.ny.gov/regulations/2590.html> .

Note: The table identifying the typical citizen participation activities related to a site's characterization, investigation and cleanup program follows on the next page. At the conclusion of the Site Characterization, the NYSDEC will evaluate whether the site poses a significant threat. If the NYSDEC determines that the Site does not pose a significant threat, then the identified activities after the Site Characterization stage will not be necessary. To the extent that the NYSDEC determines that the Site constitutes a significant threat to public health or the environment, a remedial investigation work plan will be developed and the activities through Site Reclassification as outlined will occur as noted.

Citizen Participation Activities	Timing of CP Activity(ies)
Before Start of Site Characterization (SC):	
<ul style="list-style-type: none"> • Prepare site contact list • Establish document repository • Prepare Citizen Participation (CP) Plan • Place approved SC Work Plan in document repository • Distribute fact sheet to site contact list that announces availability of SC Work Plan and describes upcoming SC field work 	<p>Before start of SC. Note: Draft CP Plan must be submitted to NYSDEC within 20 days of effective date of Consent Order. CP Plan must be approved by NYSDEC before distribution.</p>
Before Start of Remedial Investigation (RI):	
<ul style="list-style-type: none"> • Distribute fact sheet to site contact list that announces availability of RI Work Plan and describes upcoming RI field work 	
When NYSDEC Approves Remedial Investigation Report:	
<ul style="list-style-type: none"> • Distribute fact sheet to site contact list that describes RI results • Place approved RI Report in document repository 	<p>When NYSDEC approves RI Report</p>
When NYSDEC Releases Proposed Remedial Action Plan (PRAP)	
<ul style="list-style-type: none"> • Place PRAP in document repository • Distribute fact sheet to site contact list that describes PRAP and announces 30-day comment period and public meeting • Conduct 30-day public comment period • Hold public meeting about PRAP 	<p>When NYSDEC releases PRAP. Comment period begins/ends as per dates identified in fact sheet. Public meeting is held during the comment period.</p>
When NYSDEC Issues Record of Decision (ROD):	
<ul style="list-style-type: none"> • Place ROD in document repository • Distribute notice to site contact list that announces availability of ROD. ROD includes responsiveness summary of significant comments about PRAP 	<p>When NYSDEC issues ROD</p>
Before Start of Remedial Action:	
<ul style="list-style-type: none"> • Distribute fact sheet to site contact list that describes upcoming remedial action 	<p>Before start of remedial action at the site</p>
When NYSDEC Certifies Cleanup Requirements Achieved:	
<ul style="list-style-type: none"> • Distribute fact sheet to site contact list that announces cleanup requirements achieved • If Certificate of Completion (COC) is issued, announce in fact sheet • If COC is issued, place copy in document repository 	<p>When NYSDEC certifies cleanup requirements achieved, or within 10 days after NYSDEC issues COC or other similar site closure document</p>
If NYSDEC Lists the Site on the Registry of Contaminated Sites or Reclassifies the Site on such Registry	
<ul style="list-style-type: none"> • If listing or reclassifying site, may announce in fact sheet announcing the listing or reclassification and the basis for the decision 	<p>In a timely manner relative to the listing/ reclassification of the site</p>
If NYSDEC Proposes to Delist the Site from the Registry of Contaminated Sites	
<ul style="list-style-type: none"> • Publish notice in Environmental Notice Bulletin about proposal and 30-day public comment period • Distribute notice to site contact list. May announce proposal in fact sheet announcing achievement of cleanup requirements • Conduct 30-day public comment period about proposed delist • Distribute notice to site contact list when site is delisted 	<p>At time NYSDEC proposes to delist the site</p>

3. Major Issues of Public Concern

The issue of public concern relative to the Site is the concentration of perfluorooctanoic acid (PFOA) detected in the Village public water supply and at private wells within the general vicinity of the Site at concentrations great than the 2016 USEPA Health Advisory of 70 nanograms per liter ng/L.

The Village of Hoosick Falls and State of New York, in concert with Saint-Gobain, took action installing an activated carbon filtration system at the Village Water Treatment Plant and conducting ongoing water quality sampling. Residences with private wells have been offered by the State of New York Point-of Entry Treatment Systems (POET). Additionally, bottled water has been provided to residents since November 2015.

Additional issues may be identified during the course of this Site's investigation and cleanup process. NYSDEC is evaluating the property for listing on the Inactive Hazardous Waste Disposal Site Registry and the location has an administrative registry classification of "P" (i.e., a potential site).

4. Site Information

Appendix C contains maps identifying the location and layout of the properties.

Site Description

The Former Oak Materials Fluorglas Division - John Street property is an approximate 0.6-acre property located at John St/3 Lyman St. in Hoosick Falls, Rensselaer County, NY. The property is vacant with most of the property covered with gravel. The property is zoned for commercial and industrial use. The property is bounded to the west by Lyman Street, to the north by John Street, and to the east and south by residential properties. The nearest surface water body (Hoosick River) is located north of the Site.

History of Site Use, Investigation, and Cleanup

The Former Oak Materials Fluorglas Division - John Street property (EPA Registry ID: 1100074729354) was reported developed in the late 1800s and was used by various businesses including the Hall-Hartwell Shirt Company and the Estellite Company, a producer of electrical fixtures until 1960 when it was acquired by Dodge Fibers Corporation. Starting in 1960 the property was used by Dodge Industries, Fluorglas Norplex Oak, and Allied Signal Laminate Systems Inc. (predecessor to Honeywell International, Inc.) for coating operations (including coating yarn and foil) as well as the production of pressure sensitive tape. Manufacturing ceased in 1995/1996 and the facility was used for storage for approximately one year. The vacant facility was demolished in 2012.

5. Investigation and Cleanup Process

Characterization/Investigation

A detailed study of the site will be performed under a work plan approved by the NYSDEC and NYSDOH. The initial detailed study is called a “Site Characterization”. It is possible that the information collected during the Site Characterization may support the conclusion that no further investigation or further action is needed to address site-related contamination. If it is determined by NYSDEC that further detailed study is necessary, it will be performed. This further detailed study is called a “Remedial Investigation”. The investigation work plan is called a “Remedial Investigation Work Plan” and will be available for public review at the “Locations of Reports and Information” identified in Appendix A.

The Remedial Investigation has several goals:

- 1) define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected;
- 2) identify the source(s) of the contamination;
- 3) assess the impact of the contamination on public health and the environment; and
- 4) provide information to support the development of a proposed remedy to address the contamination.

NYSDOH reviews and recommends activities that will be performed during the characterization and investigation to ensure that a complete picture of potential health impacts is understood. Such activities include identifying the ways contamination can reach people, such as through direct contact, eating, drinking, or breathing.

The information collected during the site characterization and, if needed, investigation will be summarized in reports.

Feasibility Study

If a Remedial Investigation is warranted, after the investigation has begun, the responsible party, with oversight by NYSDEC, will conduct a “Feasibility Study.” This study uses information developed during the site investigation to develop and evaluate potential ways to clean up contamination related to the site. Another possibility is that the information collected during the site investigation may support the conclusion that no action, or no further action, is needed to address site-related contamination.

Proposed Remedy

The evaluation of possible remedies ends with a recommended proposal to eliminate the threat posed by contaminants at the site. NYSDEC approves or prepares this proposal, called a “Proposed Remedial Action Plan” (PRAP). The PRAP describes the remedy preferred by NYSDEC, or a no action or no further action alternative. The PRAP summarizes the decision that led to the recommendation of the preferred remedy by discussing each alternative and the

reasons for choosing or rejecting it. The goal of any cleanup plan is to protect public health and the environment. NYSDEC will present the PRAP to the public for its review and comment during a 30-day comment period and at a public meeting.

Selected Remedy

NYSDEC considers public comments as it selects the remedy to address contamination related to the site. The selected remedy will be described in a document called a “Record of Decision” (ROD). The ROD will explain why the remedy was selected and respond to public comments. This document will be placed in the location of reports and information. If the selected remedy is no action or no further action, NYSDEC may then take steps to reclassify the site or remove the site from its list of contaminated sites.

Cleanup Action

If the Record of Decision for the site calls for cleanup action, the project then moves to designing and performing the actions to address the site contamination. When cleanup actions have been completed, NYSDEC will approve or prepare a Final Engineering Report that describes the cleanup actions undertaken and certifies that cleanup requirements have been achieved or will be achieved.

Certificate of Completion

Upon approval of the Final Engineering Report, NYSDEC will issue a Certificate of Completion (COC). The COC would recognize the findings of the Final Engineering Report and note that the cleanup program achieved a cleanup level consistent with specific categories of use for the site. The recipient of the COC would be entitled to limited liability as long as it complied with the terms of the COC, and other conditions.

A COC may be modified or revoked if, for example, the recipient does not comply with the terms of the COC, or if the recipient commits fraud regarding its certification that it has met cleanup levels.

Site Management

Site management is the last phase of the site cleanup program. This phase begins when the COC is issued. Site management may be conducted by NYSDEC, or by the responsible party under NYSDEC oversight, if contamination will remain in place. Site management incorporates any institutional and engineering controls required to ensure that the remedy implemented for the site remains protective of public health and the environment. All significant activities are detailed in a Site Management Plan.

An *institutional control* is a non-physical restriction on use of the site, such as a deed restriction that would prevent or restrict certain uses of the property. An institutional control may be used

when the cleanup action leaves some contamination that makes the site suitable for some, but not all uses.

An *engineering control* is a physical barrier or method to manage contamination. Examples include: caps, covers, barriers, fences, and treatment of water supplies.

Site management also may include the operation and maintenance of a component of the remedy, such as a system that pumps and treats groundwater. Site management continues until NYSDEC determines that it is no longer needed. During the site management phase, NYSDEC may also take steps to reclassify the site or delist the site from the Registry.

Appendix A

Project Contacts and Locations of Reports and Information

Project Contacts

For information about the site's investigation and cleanup program, the public may contact any of the following project staff:

New York State Department of Environmental Conservation (NYSDEC):

Mr. Richard Mustico P.E.
Project Manager
NYSDEC Region 4
Division of Environmental Remediation
625 Broadway
Albany, NY 12233-7016
Phone: 518-402-9788

Rick Georgeson
Citizen Participation Specialist
NYSDEC 4
1130 North Westcott Road
Schenectady, NY 12306-2014
Phone: 518-357-2075

New York State Department of Health (NYSDOH):

Mr. Albert DeMarco
Project Manager
NYSDOH
2nd Floor
Government Center
Troy, NY 12180
Phone: 518-407-0400

Locations of Reports and Information

The facilities identified below are being used to provide the public with convenient access to important project documents:

Village of Hoosick Falls Library

Cheney Library
73 Classic Street
Hoosick Falls, NY 12090
Phone: 518-686-9401
Hours of Operation:
Tues.: .. 10am – 5pm
Mon/Wed/Thurs: 1pm – 8pm
Friday: .. 11am – 5pm
Saturday: 9am – 1pm
Sunday: Closed

Village of Hoosick Falls Offices

Municipal Building
24 Main Street
Hoosick Falls, NY 12090
