Inactive Hazardous Waste Disposal Site Boundary Modification Notice

The Inactive Hazardous Waste Disposal Site Program (State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). As of the date of this notice, the boundary of the site identified above, and located on a map on the reverse side of this page, was modified in the Registry for the following reason(s):

The proposed site boundary is to be extended to include an additional 4.2 acres of land along the southern embankment of Smokes Creek. The original site boundary was based on tax map parcels for the site, yet information gathered during the remedial investigation has indicated that disposal of site-related ash has occurred on the southern embankment of the creek.

DEC will continue to keep you informed throughout the investigation and cleanup of the site.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.
