## 2016 Waterbody/Pollutant Delistings (Waters/Pollutants listed in 2014, but that are NOT included in the 2016 Section 303(d) List)

The following waterbody/pollutant listings were included on the previous (2014) Section 303(d) List, but are NOT included on the 2016 List. This list is presented in order to provide some continuity and ease of tracking waterbody/pollutant combinations across Section 303(d) listing cycles. The explanation for why these listings no longer appear in the List (e.g., delisting action, re-segmentation of the segment, etc.) is also presented below. Note: Some of these listings (those that remain Impaired) also appear on the list of Other Impaired Waterbody Segments Not Listed Because Development of a TMDL is Not Necessary.

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Justification
<u>Allegheny River Drainage Basin</u>							
Pa-53-25	Great Valley Cr, Middle, and minor tribs (0201-0012) DELISTED, due to reassessment indicating uses are fully supported.	Cattaraugus	River	C(T)	Aquatic Toxicity	Unknown	reassessment
Pa-53-36	Tunungwant (Tuna) Creek and tribs (0201-0002) DELISTED, due to reassessment indicating uses are fully supported.	Cattaraugus	River	C	Aquatic Toxicity	Unknown	reassessment
Pa-53-54	Olean Creek, Upper, and tribs (0201-0050) DELISTED, due to reassessment showing only minor impacts.	Cattaraugus	River	A	Aquatic Toxicity	Unknown	reassessment
Pa-53-54-11- 5-P115	Cuba Lake (0201-0016) DELISTED, due to reassessment indicating uses are fully supported.	Allegheny	Lake	B	Oxygen Demand	Unknown/Appdx B	reassessment
Pa-63-13-P133	Lower Cassadaga Lake (0202 0003) DELISTED, as a Category 4c water due to impairment that is result of invasive plants; nutrient levels are not sufficiently high to justify a listing.	Chautauqua	Lake	B	Nutrients (phosphorus)	Agriculture	4c/reassess
Pa-63-13-P133..P135	Upper Cassadaga Lake (0202-0001) DELISTED, due to reassessment indicating uses are fully supported.	Chautauqua	Lake	B	Oxygen Demand	Unknown/Appdx B	reassessment
<u>Genesee River Drainage Basin</u>							
Ont 117 (portion 1)	Genesee River, Lower, Main Stem (0401 0001)	Monroe	River	B	Phosphorus	various sources	reassessment
Ont 117 (portion 1)	Genesee River, Lower, Main Stem (0401 0001)	Monroe	River	B	Silt/Sediment	various sources	reassessment
Ont 117 (portion 2)	Genesee River, Middle, Main Stem (0401 0003)	Monroe	River	B	Oxygen Demand	Agriculture	reassessment
Ont 117 (portion 2)	Genesee River, Middle, Main Stem (0401 0003) DELISTED (4 listings), due to reassessment showing only minor impacts from these pollutants	Monroe	River	B	Phosphorus	Agriculture	reassessment
Ont 117- 27-13	Unnamed Trib to Honeoye Cr, and tribs (0402-0081) DELISTED, due to insufficient data to justify a listing; waterbody may have been originally listed in error.	Monroe	River	C	Nutrients	Agriculture	correction
Ont 117- 66- 8- 2	Bradner Creek and tribs (0404 0020) DELISTED, due to inadequate justification of the original listing.	Livingston	River	C	Phosphorus	Agriculture	correction

### Previously Listed Waters Impaired for Oxygen Demand Where the Oxygen Demanding Substance has been Identified

A number of waterbodies had been listed on previous Lists for both *Oxygen Demand* and the specific oxygen-demanding substance (typically *Phosphorus* or *Nitrogen*) causing the dissolved oxygen impairment. To eliminate this redundancy, such waterbodies are now included on the List with the causal pollutant and a note that the impairment includes Low D.O. For waters where the New York State Water Quality Standards for dissolved oxygen are exceeded and a specific oxygen demanding pollutant has not been identified, these waters will continue to be listed for *Oxygen Demand*. The waterbodies where the separate/redundant listing for Oxygen Demand had been removed are listed below.

Ont 158-12- 9	Beeman Creek and tribs (0102-0030)	Erie	River	C	Oxygen Demand	Onsite WTS	2004
