CSO LTCP Workshop Need Survey

The New York State Department of Environmental Conservation (NYSDEC) in conjunction with the US Environmental Protection Agency (USEPA) is planning a one or two-day interactive workshop on Combined Sewer Overflows (CSO) Long Term Control Plan (LTCP). The intent of this workshop is to invite Publicly Owned Treatment Works (POTW), Wastewater Treatment Plant (WWTP) operators, municipalities, consultants, and any interested persons involve in CSO LTCP development and implementation to discuss various ways to efficiently implement plans that will meet the CSO Control Policy.

The two agencies acknowledged that some municipalities continue to make progress in the development and implementation CSO plans that will meet the CSO Control Policy while some municipalities are facing some challenges.

The workshop will focus on the following group of topics:

- Facilities currently developing LTCP needing technical and/or regulatory guidance;
- Facilities currently implementing LTCP needing technical and/or regulatory guidance;
- Facilities already completed implementation but need regulatory and/or technical assistance in post implementation.

This workshop is **free**. Professional Engineering and Continue Education credits will be offered to presenters and to attendees who completed the workshop.

In order to fully understand the areas of challenges and to know how best to organize this workshop, we invite you to complete this survey and return it, no later than February 8, 2008, either by e-mail to pjkolako@gw.dec.state.ny.us or by regular mail to:
