

2010 Stormwater Design Manual Table of Contents

Chapter 1: Introduction to the Manual	1-1
Section 1.1 Purpose of the Manual	1-1
Section 1.2 How to Use the Manual	1-1
Section 1.3 Symbols and Acronyms	1-5
Chapter 2: Impacts of New Development	2-1
Section 2.1 Declining Water Quality	2-2
Section 2.2 Diminishing Groundwater Recharge and Quality	2-7
Section 2.3 Impacts to the Stream Channel	2-8
Section 2.4 Increased Overbank Flooding	2-11
Section 2.5 Floodplain Expansion	2-12
Section 2.6 Impacts to Aquatic Organisms	2-13
Chapter 3: Stormwater Management Planning	3-1
Section 3.1 Introduction	3-1
Section 3.2 Green Infrastructure for Stormwater Mgmt	3-2
Section 3.3 Standard Stormwater Mgmt Practices for Treatment	3-7
3.3.1 Practice List	3-7
3.3.2 Criteria for Practice Addition	3-10
Section 3.4 Quantity Controls	3-11
Section 3.5 Maintenance Requirements	3-12
Section 3.6 The Five Step Process for Stormwater Site Planning and Practice Selection	3-14
Chapter 4: Unified Stormwater Sizing Criteria	4-1
Section 4.1 Introduction	4-1
Section 4.2 Water Quality Volume (WQv)	4-2
Section 4.3 Runoff Reduction Volume (RRv)	4-4
Section 4.4 Stream Channel Protection Volume Requirements	4-7
Section 4.5 Overbank Flood Control Criteria (Qp)	4-9
Section 4.6 Extreme Flood Control Criteria (Qf)	4-11
Section 4.7 Alternative Method	4-13
Section 4.8 Conveyance Criteria	4-15
Section 4.9 Stream Order Identification	4-16
Section 4.10 Downstream Analysis	4-16
Section 4.11 Stormwater Hotspots	4-17
Chapter 5: Green Infrastructure Practices	5-1
Section 5.1 Planning for Green Infrastructure: Preservation of Natural Features and Conservation Design	5-1
5.1.1 Preservation of Undisturbed Areas	5-2
5.1.2 Preservation of Buffers	5-5
5.1.3 Reduction of Clearing and Grading	5-9
5.1.4 Locating Development in Less Sensitive Areas	5-11
5.1.5 Open Space Design	5-15
5.1.6 Soil Restoration	5-20
Section 5.2 Planning for Green Infrastructure: Reduction of Impervious Cover	5-26
5.2.1 Roadway Reduction	5-27
5.2.2 Sidewalk Reduction	5-30
5.2.3 Driveway Reduction	5-32

5.2.4 Cul-de-sac Reduction	5-35
5.2.5 Building Footprint Reduction	5-38
5.2.6 Parking Area Reduction	5-40
Section 5.3 Green Infrastructure Techniques	5-44
5.3.1 Conservation of Natural Areas	5-47
5.3.2 Sheetflow to Riparian Buffers or Filter Strips	5-51
5.3.3 Vegetated Swale	5-58
5.3.4 Tree Planting/Tree Pit	5-64
5.3.5 Disconnection of Rooftop Runoff	5-69
5.3.6 Stream Daylighting	5-73
5.3.7 Rain Gardens	5-76
5.3.8 Green Roofs	5-86
5.3.9 Stormwater Planters	5-97
5.3.10 Rain Barrels and Cisterns	5-106
5.3.11 Porous Pavement	5-114
 Chapter 6: Performance Criteria 6-1	
Section 6.1 Stormwater Ponds	6-3
Section 6.2 Stormwater Wetlands	6-22
Section 6.3 Stormwater Infiltration	6-31
Section 6.4 Stormwater Filtering Systems	6-44
Section 6.5 Open Channel Systems	6-59
 Chapter 7: SMP Selection Matrices	7-1
Section 7.1 Land Use	7-3
Section 7.2 Physical Feasibility Factors	7-5
Section 7.3 Watershed/Regional Factors	7-7
Section 7.4 Stormwater Management Capability	7-11
Section 7.5 Community and Environmental Factors	7-13
 Chapter 8: Stormwater Design Example	8-1
Section 8.1 Sizing Example	8-2
Section 8.2 Pond Design Example	8-11
Section 8.3 Filter Design Example	8-27
Section 8.4 Infiltration Design Example	8-36
Section 8.5 Bioretention Design Example	8-42
 Chapter 9: Redevelopment Projects	9-1
Section 9.1 Introduction	9-1
Section 9.2 Purpose	9-3
Section 9.3 Scope and Applicability	9-4
Section 9.3.1 Application Criteria	9-5
Section 9.3.2 Sizing Criteria	9-5
Section 9.3.3 Performance Criteria	9-7
Section 9.4 How to Apply Alternative Stormwater Practices	9-8
Section 9.5 Alternative Stormwater Management Practices -Proprietary Practices	9-9
9.5.1 Evaluation of Alternative Practices	9-10
9.5.2 Recommended Application of Practice	9-11
9.5.3 Benefits	9-11
9.5.4 Feasibility/Limitations	9-11
9.5.5 Sizing and Design Guidance	9-12

9.5.6 Environmental/Landscape Elements	9-13
9.5.7 Maintenance	9-13
9.5.8 Cost	9-13
References/Further Resources	9-14
Chapter 10: Enhanced Phosphorus Removal Supplement	10-1
Section 10.1 Introduction and Overview	10-1
10.1.1 Description and Properties of Phosphorus	10-1
10.1.2 Enhanced Phosphorus Treatment Processes	10-4
10.1.3 Treatment Performance Goals	10-6
Section 10.2 Analysis of Methods and Summary of Conclusions for Sizing Standards	10-8
10.2.1 Introduction	10-8
10.2.2 Analysis of Existing and Alternate Design Standards	10-8
10.2.3 Results of Analysis of Existing and Alternate Design Standards	10-9
Section 10.3 Stormwater Sizing Criteria	10-10
10.3.1 Introduction	10-10
10.3.2 Water Quality Volume (WQv) for Enhanced Phosphorus Removal	10-11
10.3.3 Channel Protection Volume (Cpv) for Enhanced Phosphorus Removal	10-12
10.3.4 Sizing to Meet Treatment Performance Goals	10-12
10.3.5 Source Control Options	10-15
10.3.6 Redevelopment Projects	10-19
Section 10.4: Performance Criteria	10-20
Section 10.4.1 Stormwater Ponds	10-21
Section 10.4.2 Stormwater Wetlands	10-28
Section 10.4.3 Stormwater Infiltration	10-30
Section 10.4.4 Stormwater Filtering Systems	10-35
Section 10.4.5 Stormwater Open Channel Systems	10-39
Section 10.5 Design Examples	10-41
10.5.1 Introduction	10-41
10.5.2 Hydrology Sizing Method – Stone Hill Estates	10-42
10.5.3 Pond Design Example – Stone Hill Estates	10-52
10.5.4 Sand Filter Design Example	10-60
References	R-1
Glossary	G-1
Appendices	
A Guidelines for Design of Dams	A-1
B Hydrologic Analysis Tools	B-1
C SMP Construction Specifications	C-1
D Infiltration Testing Requirements	D-1
E Plan Review Checklist.....	E-1
F Construction Inspection Checklist	F-1
G Maintenance Inspection Checklists.....	G-1
H Landscaping Guidance/ Plant Lists	H-1
I Cold Climate Sizing Examples	I-1
J Geomorphic Assessment	J-1
K Miscellaneous Details	K-1
L Critical Erosive Velocities	L-1
