Buck Take Objectives

Notes: The Buck Take Objective (BTO) for a WMU represents the number of antlered bucks expected to be harvested per square mile when the deer population is at the desired level. BTOs are based upon recommendations of local stakeholders in each WMU. BTOs are not the estimated take for a particular hunting season but rather help guide the direction of population management efforts in an area. In many Adirondack and highly suburban units, deer populations are strongly influenced by factors other than hunting (winter mortality, deer vehicle collisions, lack of hunter access), and no BTO has been established for these units. In WMUs with mandatory antler restrictions, buck takes are no longer a valid index of relative deer populations.

- **Female Fawns**: 12,855
- **Total**: 202,973
New York’s third Youth Deer Hunt was held over Columbus Day weekend, October 11-13, 2014. During the youth deer hunt, 14-15 year old junior hunters could take 1 deer, antlered or antlerless, with a firearm when properly accompanied by a licensed and experienced adult mentor. See the Youth Deer Hunt Photo Gallery for pictures of successful junior hunters.

Key Results:

- 1,222 deer taken (51% antlered and 49% antlerless deer)
- 7,931 junior hunters participated, approximately 67% of eligible junior hunters
- Average harvest density was 2.7 deer per 100 square miles

Estimated deer harvest during the 2015 Youth Deer Hunt in New York.

Note: samples from Long Island are included in the state totals only. DEC determines deer age by examining tooth wear and replacement patterns of hunter-killed deer in each WMU. In 2015, DEC checked 13,936 deer throughout New York.
Antler Point Distribution by Buck Age Class - 2015

**New York State**

- Northern NY
- Central-Western NY
- Southeastern NY

Indices of Relative Deer Herd Condition and Habitat Quality

- Yearling Antler Beam Diameter (mm)
- % Yearling Bucks with Legal Spike Antlers (≥ 3 inches long)

**Note:** samples from Long Island are included in the state total only. Antler point and age data are generated through examination of hunter-killed deer in each WMU by DEC staff. In 2015, DEC checked 13,936 deer throughout New York.
Note: Southern Zone includes Westchester County, where bowhunting season ended 12/31/15.

Deer Management Assistance Program (DMAP)

The Deer Management Assistance Program enables DEC to help landowners and resource managers implement site specific deer management on their lands. DMAP permits are valid for use only during the open deer hunting seasons and can only be used by licensed hunters. More information about DMAP can be found at www.dec.ny.gov/animals/33973.html.

¹ The number of carcass tags with each DMAP permit varies by need and property size. Individual hunters may generally only use 2 DMAP tags per permit unless specified on the permit.

² Permits may be issued for more than one category of complaint, so the sum of categories may not equal total applications approved in each region.
Deer Damage Permit Summary

Deer Damage Permits (DDPs) are issued by DEC to reduce deer-related damage on individual properties while damage is occurring, generally outside of hunting seasons. DDPs typically authorize removal of antlerless deer only, though take of antlered deer is authorized for some permits. DDPs authorize deer culling, not deer hunting. The reported take on DDPs is not included in annual deer harvest totals. More information can be found at http://www.dec.ny.gov/animals/104956.html.
