## **Acknowledgments**

Responsive Management would like to thank the U.S. Furbearer Conservation Technical Working Group of the Association of Fish and Wildlife Agencies; Bryant White, Trapping Policy Program Manager of the Association of Fish and Wildlife Agencies; the states' furbearer coordinators; and trapping experts from the National Trappers Association and the Furtakers of America for their input, support, and guidance on this project.

Of special note are several individuals who took extra measures to allow their state to participate, including Matt Meshriy of the California Department of Fish and Wildlife, Steve Nadeau of the Idaho Department of Fish and Game, Jennifer Hogue Manuel of the Louisiana Department of Wildlife and Fisheries, Adam Bump of the Michigan Wildlife Division, Jason Abraham of the Minnesota Department of Natural Resources, Patrick Tate and Kent A. Gustafson of the New Hampshire Fish and Game Department, Jerrod Davis of the Oklahoma Department of Wildlife and Conservation, Jonah Evans of the Texas Parks and Wildlife Department, Brian Flock of the Tennessee Wildlife Resources Agency, Bob Inman and John Vore of Montana Fish, Wildlife and Parks, and Jordan Petchenik of the Wisconsin Department of Natural Resources.

## **EXECUTIVE SUMMARY**

Regulated trapping in the United States remains important for managing numerous wildlife species and habitats, protecting public and private property, protecting endangered and threatened wildlife, and restoring wildlife populations. Regulated trapping also is a legal, state-sanctioned sustainable use of wildlife resources. This study was conducted for the Association of Fish and Wildlife Agencies (AFWA) to collect updated information and trend data regarding the use of traps nationally, regionally, and by state.

The results of this study are built upon a set of probability-based random samples of United States trappers from 48 states (one state does not have trapping licenses or hunting licenses with furbearer privileges, and one state could not participate in the study). A multi-modal data collection method was used to allow trappers to complete the survey in the way most convenient to them. Contacts were made by letter on AFWA letterhead, by email, and by telephone. In this manner, complete coverage was achieved because all trappers in the database had either a postal address, an email address, or telephone number. Note that only after a probability-based random sample was selected were attempts made at contacting those people who had been selected. The sample was designed to ensure a 95% confidence level and a low sampling error for the total population of licensed trappers in each region. The survey was administered from August to October 2015. (A full discussion of the contact procedures and the administration of the survey can be found in the body of the report.)

The analysis of data was performed using SPSS as well as proprietary software developed by Responsive Management. For the entire sample of 6,668 trappers, the unweighted sampling error is at most plus or minus 1.18 percentage points.

## ESTIMATED NUMBER OF TRAPPERS

- Through a combination of data provided by the states and data provided by the survey, Responsive Management estimates that there were 176,573 trappers in the United States in the 2014-2015 seasons. The tabulation shows the estimates in the regions; the Midwest leads the nation in number of trappers.
  - This number of trappers estimated in this study is higher than the number estimated in the 2004 report (142,287).

**Executive Summary Table 1. Estimated Number of Trappers**

Region	Estimated Number of Trappers (2014-2015)
National	*176,573
Alaska	6,560
West	22,652
Midwest	95,318
South	29,894
Northeast	*22,149

\*Excludes Delaware.

## GENERAL TRAPPING INFORMATION

- Respondents were asked how many days they trapped during the 2014-2015 season: a little more than a third (38%) did so for less than 30 days (but at least 1 day); meanwhile, 24% did so for 60 or more days. The mean number of days trapped was 36.7 days. Note that 10% of respondents did not trap during the 2014-2015 season.
  - Trappers in the West and the South had the highest mean days of trapping (44.9 and 43.5 days, respectively).
- During the past 15 years, just under half of respondents (49%) trapped no more than 5 of the 15 years. The mean number of years trapped in the past 15 years is 7.4 years.
  - The Alaska region's trappers were the most avid over the past 15 years, with a mean of 9.0 years trapping; 23% had trapped in all 15 years.

- Trappers were asked about trapping in their home state and outside their home state.
  - Nearly all (99.6%) of trappers responded that they trap in their home state during a typical trapping season; only 0.3% of trappers responded that they do *not* trap in their home state during a typical trapping season.
  - A small percentage of trappers trap outside their home state (3%).
    - Out-of-state trapping is most common among South region trappers (5%).
- Private land predominates in trapping: 64% use private land primarily, compared to 11% who use public land primarily (note that 25% use both about equally).
  - In the Alaska region, public land predominates, with 61% using public land mostly and 94% using public land at least half the time. On the other hand, private land use is highest in the South (74% use private land mostly, and 96% use it at least half the time) and the Midwest (72% use private land mostly, and 93% use it at least half the time).
- Respondents were asked to indicate the number of traps and the number of snares they have out each day during a typical trapping season.
  - Just under half (46%) have fewer than 20 traps out. The mean number of traps used each day is 27.6.
  - The majority of trappers do not typically have snares out (63%). Otherwise, 23% say that they typically have fewer than 20 snares out. The mean number of snares used each day is 26.4.
    - Alaska region's trappers had the highest mean number of traps and snares used each day (30.8 traps, 35.3 snares).

- A majority of trappers (60%) had been contacted by a landowner to trap nuisance wildlife.
  - Another question asked about the proportion of each trapper's activity that involves removal of nuisance wildlife: for 70% of trappers, removal of nuisance wildlife plays some part in their trapping, although typically only about a quarter of their trapping (in the question regarding what percent of their trapping they attributed to nuisance wildlife removal, the mean of trappers' responses is 26.8 percent—in other words, just over a quarter of their trapping involves nuisance wildlife removal). Nonetheless, 18% of trappers in the survey gave a response of more than half—in other words, for this 18% of trappers, *most* of their trapping involves nuisance wildlife removal.
    - Trappers in the Alaska region are quite different from their peers in the lower 48 states regarding trapping of nuisance wildlife: only 30% of Alaska trappers say that removal of nuisance wildlife plays some part in their trapping, compared to 68% to 74% in the regions in the lower 48 states.

## TRAPPING INCOME

- Just under a quarter of trappers (21%) responded that their trapping has been a *very* or *somewhat* important source of income over the past 3 years. The large majority of them (78%) say it has not been at all important.
  - Trappers in the Alaska and West regions were the most reliant on trapping income.
- Trappers most often said they sell furs using a local fur dealer (48%), at a Canadian auction (17%), or at an in-state auction (13%); note that 23% have not sold furs.
  - Local fur traders were the most commonly used means of selling furs in every region.

## **TRAPPING EXPENDITURES**

- Trappers were asked about their expenses in the previous 12 months. The data show the overall results (i.e., all expenses together) and the results for four categories of expenses: 1) traps and lures; 2) other trapping equipment, such as tools, skinning knives, chest or hip waders, trap baskets, wires, and boots; 3) travel expenses, such as gasoline, oil, vehicle repairs, lodging, and trapping licenses; and 4) major trapping-related purchases, such as 4-wheelers, snowmobiles, boats, and motors.
- Overall, the mean of expenditures is \$1,694.24.
    - Mean expenditures were highest in the Alaska and West regions (both at over \$2,000) and were lowest in the Midwest region (\$1,273).
  - In the previous 12 months, 77% of trappers reported spending on traps and lures. The mean spent on traps and lures is \$246.36.
    - The West had the highest mean expenditures for traps and lures (\$319.90).
  - About two-thirds of trappers (65%) spent on other equipment, such as tools, skinning knives, and so forth, in the previous 12 months. The mean spent is \$149.24.
    - The West had the highest mean expenditures for other equipment (\$171.14).
  - A large percentage of trappers (83%) spent on travel expenses for trapping in the previous 12 months. The mean spent on travel is \$344.86.
    - The Alaska region and the West had the highest mean travel expenditures (\$845.63 and \$700.81, respectively).
  - Finally, 15% of trappers spent on major trapping-related items, such as 4-wheelers, snowmobiles, boats, and motors. The mean spent on this category is \$730.85.
    - The Alaska region and the West had the highest mean expenditures for major trapping-related items (\$1,241.35 and \$1,015.96, respectively).

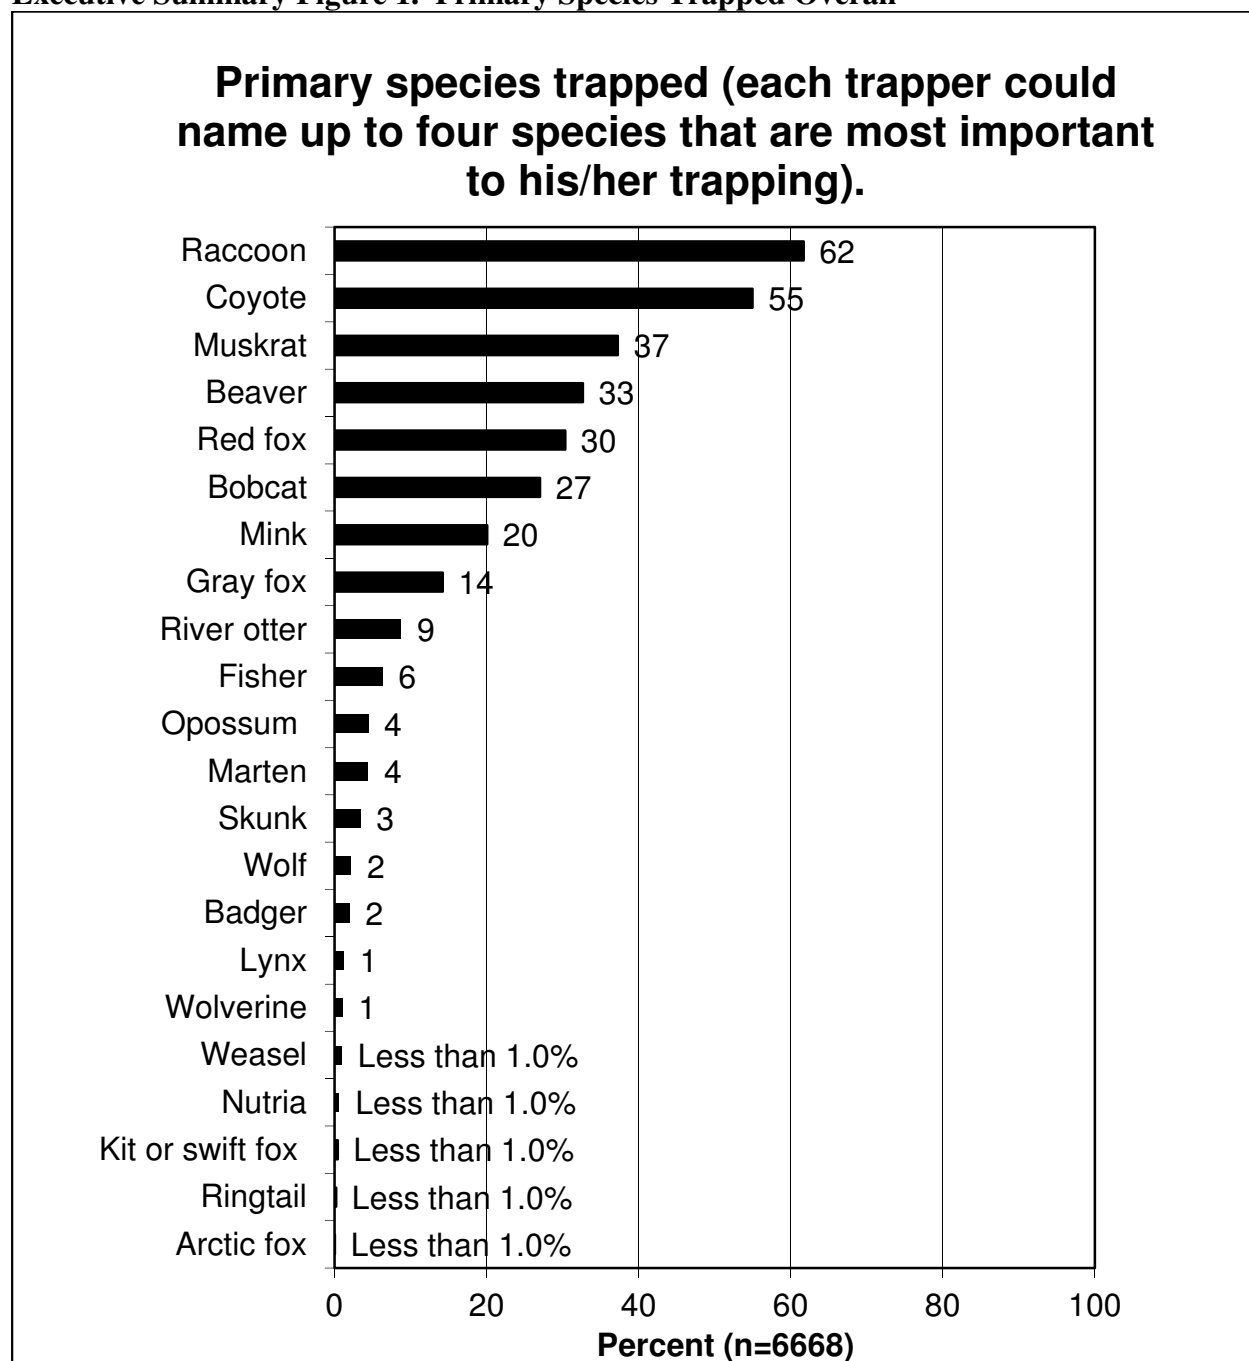

## TRAPPER EDUCATION AND ORGANIZATION MEMBERSHIP

- Well over a third (39%) of respondents have taken a trapper education course.
  - Just under half (49%) took a course sponsored by a state agency, 35% took one sponsored by a state trapper association, and 7% took one sponsored by AFWA.
    - Respondents most often took trapper education courses in the Northeast region: 79% did so, which far exceeds any other region (which range from 20% to 37%).
- Nationwide, 32% of trappers belong to a trapper organization: 26% belong to a state trapper association in their state of residence (and 2% belong to a state trapper association that is not in their state of residence), 11% belong to the National Trappers Association, and 4% belong to Fur Takers of America.
  - Trapper organization membership rates are highest in the Northeast region (42%) and the West region (37%) and are lowest in the Alaska region (24%).

## PRIMARY TARGET SPECIES

- When asked to name the top four species most important to their trapping, trappers most often selected raccoon (62%), coyote (55%), muskrat (37%), beaver (33%), red fox (30%), and bobcat (27%). (Hereinafter, these top four species are referred to as “primary species.”)

**Executive Summary Figure 1. Primary Species Trapped Overall**

**TRAP TYPES USED**

- The trap types most often used by respondents for their primary species nationwide are the #1 1/2 coil-spring (37%), the dog proof raccoon trap (37%), the #2 coil-spring (35%), the #110 bodygrip (34%), #330 bodygrip (30%), and the snare or cable restraint (26%). All other traps are used by less than a quarter of trappers. Note that multiple responses were allowed.
- The categories of traps (or trap families) are shown, as well. Foothold are used by 86% of trappers, and bodygrip are used by 60% of them. Again, note that multiple traps could be named and so, therefore, multiple responses were allowed.

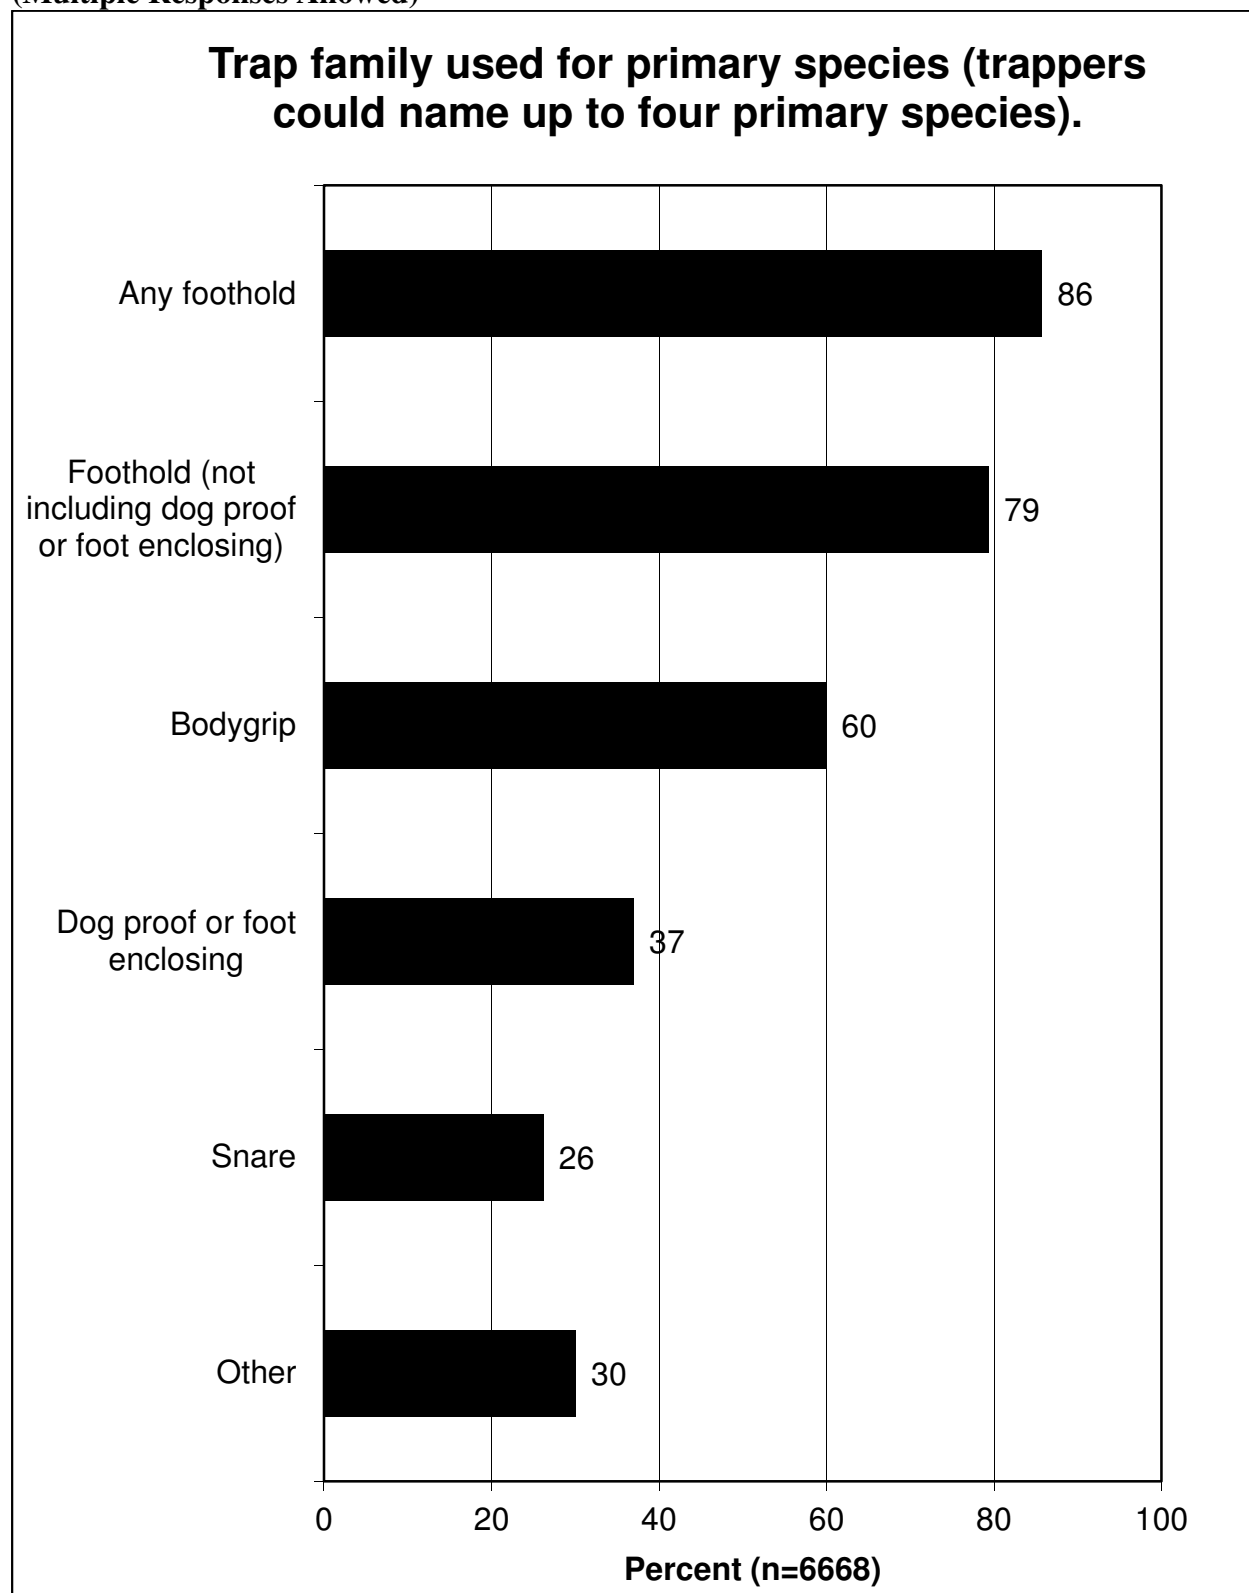

**Executive Summary Figure 2. Traps Used for Primary Species**  
**(Multiple Responses Allowed)**

**Executive Summary Figure 3. Traps Used for Primary Species, Ranked by Total (Multiple Responses Allowed)**

**Executive Summary Figure 4. Traps Family Used for Primary Species  
(Multiple Responses Allowed)**

## TRAP USE FOR PRIMARY SPECIES

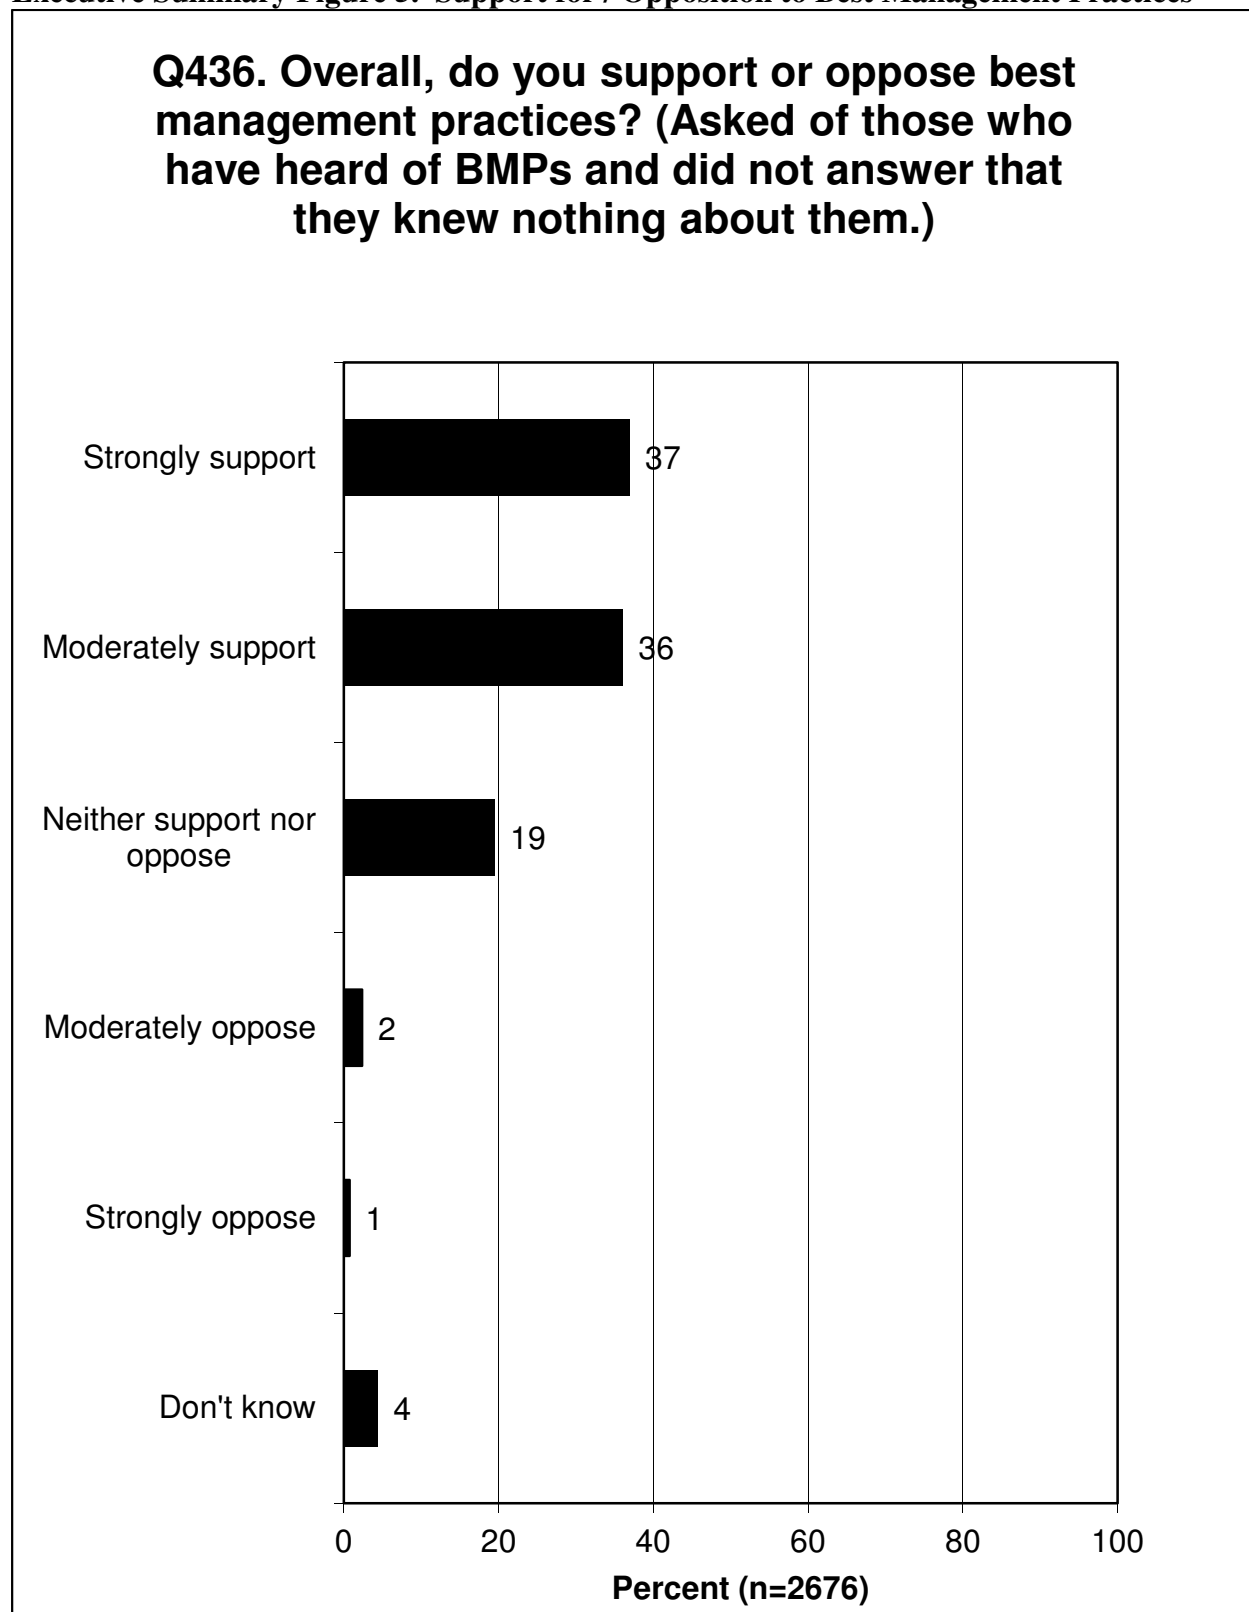

The body of the report contains detailed data for various species, including traps used for the species and extensive follow-up questions that depended on the type of trap.

## BEST MANAGEMENT PRACTICES (BMPs)

- More than two-fifths of trappers (42%) have heard of BMPs for trapping; of those who have heard of them, 64% know a *great deal* or *moderate amount* about them.
- Of those who know a great deal, a moderate amount, or a little about BMPs, a strong majority (73%) support BMPs, with 37% expressing *strong* support. Only 3% oppose BMPs.
- Among trappers who support BMPs, the most common reasons given for this support (in an open-ended question) are for humane / ethical / animal welfare reasons (34% stated this), that it is good for animal populations (24%), that it is good for the future of trapping (20%), that it is good to have guidelines (20%), and that it is good to educate the public / improve the image of trapping (17%). (The question allowed multiple responses to be given.)
- Among trappers who oppose BMPs, the most common reason given for this opposition (in an open-ended question) is that there is too much regulation or the regulation is too universal (51%)—by far the top response. (The question allowed multiple responses to be given.)
- Among trappers who have heard of BMPs, 66% currently use them and plan to continue using them.

## INTRODUCTION AND METHODOLOGY

Regulated trapping in the United States remains important for managing numerous wildlife species and habitats, protecting public and private property, protecting endangered and threatened wildlife, and restoring wildlife populations. Regulated trapping also is a legal, state-sanctioned sustainable use of wildlife resources. This study was conducted for the Association of Fish and Wildlife Agencies (AFWA) to collect updated information and trend data regarding the use of traps nationally, regionally, and by state. The regions are shown below.

**Figure 1. Trapping Study Regions**

The regions consist of:

- Alaska (by itself)
- West (AZ, CA, CO, ID, MT, NV, NM, OR, TX, UT, WA, WY)
- Midwest (IL, IN, IA, KS, MI, MN, MO, NE, ND, OH, OK, SD, WI)
- South (AL, AR, FL, GA, KY, LA, MS, NC, SC, TN, VA, WV)
- Northeast (CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT)

(Hawaii is not included in the study because the state does not issue trapping licenses or furbearer privileges; Delaware was not included in the study because the state could not provide a sample of trappers.)

The results of this study are built upon a set of probability-based random samples of United States trappers from 48 states (one state does not have trapping licenses or hunting licenses with furbearer privileges, and one state could not participate in the study). A multi-modal data collection method was used to allow trappers to complete the survey in the way most convenient to them. Contacts were made by letter on AFWA letterhead, by email, and by telephone. In this manner, complete coverage was achieved because all trappers in the database had either a postal address, an email address, or telephone number. Note that only after a probability-based random sample was selected were attempts made at contacting those people who had been selected. The sample was designed to ensure a 95% confidence level and a low sampling error for the total

population of licensed trappers in each region. Specific aspects of the research methodology are discussed below.

## **SAMPLE ACQUISITION**

Bryant White, Wildlife Biologist and Trapping Policy Program Manager of AFWA, first notified each state furbearer/trapping coordinator that AFWA was updating its 2004 study, *Ownership and Use of Traps by Trappers in the United States*. AFWA requested a database of resident trappers 16 years or older holding a trapping license during the 2014-2015 trapping season. The initial database request resulted in receipt of about half of all files needed to complete the study. Responsive Management continued contacting each state representative over a 4-month period to follow up with the initial request and to develop alternatives to enable as many states as possible to participate in the study. In many cases a confidentiality agreement guaranteeing responsible data use was drawn up and signed between Responsive Management and the state agency. Many follow-up emails and telephone calls resulted in creative, alternative options and a higher number of states being able to participate in the study.

A few states were not able to legally approve the data request despite having a signed confidentiality agreement; however, Responsive Management continued to work with state contacts to find methods of contacting trappers without needing the state to directly release trapper data. For example:

- The Tennessee Wildlife Resources Agency (TWRA) shipped Responsive Management letterhead and envelopes; Responsive Management printed and assembled the mailing, shipped the mailing back to TWRA, and the TWRA applied the trapper mailing labels. Because the only method of contact in Tennessee would be through a hard copy mailing, the letter was then sent to every resident trapper in Tennessee to ensure the highest number of completed surveys as possible.
- The Texas Parks and Wildlife Department (TPWD) could not release its data but received special administrative approval to prepare its own mailing and send a letter to trappers; the TPWD preferred to do everything in-house and use its own print shop, so Responsive Management reimbursed the agency for the cost of printing and postage.
- The New Hampshire Fish and Game Department could not release its database; however, the Department agreed to prepare and send a mailing to a random sample of trappers and mailed the letter on AFWA letterhead as well as its own agency letter to 200 randomly selected trappers.
- The Idaho Department of Fish and Game required a confidentiality agreement signed by the Western Association of Fish and Wildlife Agencies' President.
- Other states in which these types of special measures were made include California, Delaware, Louisiana, and West Virginia.

- Note that Hawaii does not issue trapping licenses or furbearer privileges and Delaware could not supply a sample of trappers. Those states did not participate in the study.

## **QUESTIONNAIRE DESIGN**

The survey questionnaire was developed cooperatively by Responsive Management and AFWA, based on the research team's experience and expertise with trapping studies; the questionnaire incorporated some content from similar trapper surveys conducted in 1992 and 2004.

Responsive Management conducted pre-tests of the questionnaire to ensure proper wording, flow, and logic in the survey. After completing an internal review, Responsive Management pre-tested the survey with a representative sample of licensed trappers and recommended revisions based on pre-test results. Bryant White of AFWA and other furbearer coordinators monitored pre-test calls and made suggested changes to the survey instrument as well. Final approval of the methodology and survey was obtained from AFWA prior to implementation.

## **CONTACT PROCEDURES**

A multi-modal data collection method was used for this study. Contacts were made by letter, email, and telephone. Note that only after a probability-based random sample was selected were attempts made at contacting those people who had been selected. The sample was designed to ensure a 95% confidence level and a low sampling error for the total population of trappers in each region.

All those in the selected random sample with an email address were sent an email with the link to the online survey. Those in the selected random sample with telephone numbers but not email addresses were contacted by telephone; at the time of the telephone contact, they could either complete the survey with an interviewer at that time or to set up a time for a scheduled callback. If neither an email address nor a telephone number was available, trappers in the selected random sample were sent hard copy letters that included a toll-free telephone number as well as a web address to the survey site. The toll-free number allowed those who had been contacted by letter to call in to the Survey Center where they could take the survey at that time, schedule another time for the interview, receive a link to the web-based survey through email, or be sent a paper copy of the survey (note that no trappers chose the postal mail/paper copy mode of the survey).

Specifically, the emails explained the purpose of the study, included a link to a web-based version of the questionnaire, and provided a deadline for survey completion. The hard copy

letters included both a link to the online questionnaire and a toll-free number, giving recipients the option to either complete the survey online or by telephone with a professional interviewer; a deadline for completion was included. Both the email and the letter included information on AFWA, which enhanced the credibility of the survey. The templates for the outgoing emails and letters are shown in Appendix A.

## **SURVEY INTERVIEWING FACILITIES**

A central polling and data collection site at Responsive Management allowed for rigorous quality control over the interviews and data collection. Responsive Management maintains its own in-house facilities, staffed by interviewers and data managers with experience conducting multi-modal surveys on natural resources and wildlife-associated recreation.

To ensure the integrity of the telephone survey data, Responsive Management has interviewers who have been trained according to the standards established by the Council of American Survey Research Organizations. Methods of instruction included lecture and role-playing. The Survey Center Managers and other professional staff conducted a project briefing with the interviewers prior to the administration of this survey. Interviewers were instructed on type of study, study goals and objectives, handling of survey questions, interview length, termination points and qualifiers for participation, interviewer instructions within the survey questionnaire, reading of the survey questions, skip patterns, and probing and clarifying techniques necessary for specific questions on the survey questionnaire.

## **SURVEYING DATES AND TIMES**

Online surveys can be taken at the time and place of most convenience to respondents. For the telephone component, Responsive Management's telephone surveying times are Monday through Friday from 9:00 a.m. to 9:00 p.m., Saturday from noon to 5:00 p.m., and Sunday from 5:00 p.m. to 9:00 p.m., local time. A five-callback design was used to maintain the representativeness of the sample, to avoid bias toward people easy to reach by telephone, and to provide an equal opportunity for all to participate. When a respondent could not be reached on the first call, subsequent calls were placed on different days of the week and at different times of the day. Similarly, those notified by email were contacted at least three times (the original contact plus reminder emails to those who did not respond initially). As noted earlier, respondents notified by email or hard copy letter had the option to complete the online

questionnaire online at their convenience or to call Responsive Management for a telephone interview. The survey was administered from August to October 2015.

## **SURVEY DATA COLLECTION AND QUALITY CONTROL**

The software used for collection of data by telephone was Questionnaire Programming Language (QPL). The survey questionnaire was programmed so that QPL branched, coded, and substituted phrases in the survey based on previous responses to ensure the integrity and consistency of the data collection. The online collection of data was through proprietary software of the contracted surveying company. The logic, branching, and wording of the survey questionnaire were identical between the telephone and web-based platforms. Paper surveys were processed through QPL. The data collected from the surveys were exported to Statistical Package for the Social Sciences (SPSS) for data analyses.

The Survey Center Managers and statisticians monitored the data collection, including monitoring some of the telephone interviews without the interviewers' knowledge, to evaluate the performance of each interviewer and ensure the integrity of the data. Online surveys could not be monitored, of course, but were reviewed for outliers. The survey questionnaire itself (both online and by telephone) contained error checkers, computation statements, and branching logic to ensure quality and consistent data. At the conclusion of the data gathering, the Survey Center Managers and/or statisticians checked each completed survey to ensure clarity and completeness.

Responsive Management obtained a total of 6,675 completed surveys overall, apportioned to the states as shown in the tabulation that follows.

**Table 1. Number Sampled in Each State**

State	Completed Surveys	State	Completed Surveys	State	Completed Surveys
Alabama	76	Maine	118	Ohio	144
Alaska	105	Maryland	102	Oklahoma	122
Arizona	53	Massachusetts	57	Oregon	103
Arkansas	101	Michigan	186	Pennsylvania	152
California	113	Minnesota	195	Rhode Island	22
Colorado	89	Mississippi	108	South Carolina	121
Connecticut	106	Missouri	241	South Dakota	323
Florida	60	Montana	103	Tennessee	63
Georgia	117	Nebraska	107	Texas	7
Idaho	120	Nevada	61	Utah	454
Illinois	124	New Hampshire	64	Vermont	113
Indiana	116	New Jersey	163	Virginia	104
Iowa	180	New Mexico	223	Washington	113
Kansas	156	New York	244	West Virginia	104
Kentucky	257	North Carolina	326	Wisconsin	267
Louisiana	107	North Dakota	154	Wyoming	131
				Total	6,675*

\*In the analyses, Texas was removed from National and Regional results because it had too few respondents; therefore, most graphs and tables show a total of 6,668.

The total sample size on some questions is less than the total because the survey asked some questions only of specific respondents in the survey. In particular, this was done when a follow-up question did not apply to some respondents. For instance, only those who used snares were asked follow-up questions about snares.

## DATA ANALYSIS

The analysis of data was performed using SPSS as well as proprietary software developed by Responsive Management.

On questions that asked respondents to provide a number (e.g., number of days trapping), the graphs/tables may show ranges of numbers rather than the precise numbers. Nonetheless, in the survey each respondent provided a precise number, and the dataset includes this precise number, even if only ranges of numbers are shown. Note that the calculation of means and medians used the precise numbers that the respondents provided.

## WEIGHTING METHODOLOGY

All national and regional results in this report are weighted, whereas all n-values are reported unweighted. In other words, each n-value reflects the actual number of trappers who responded to the question, not to their weighted value shown in the analysis.

Weighting was applied to each state to reapportion sampled data to match the population of trappers within the United States as a whole. This also produced regional proportions that matched actual regional proportions of trappers. Note that Delaware and Hawaii were not included because neither state participated in the survey; furthermore, Texas was not included because not enough trappers from that state were contacted.

**Table 2. Weighting Applied To Each State**

Region	State	n	Weighting	Region	State	n	Weighting	
Alaska	Alaska	105	2.3764	South	Alabama	76	0.1714	
West	Arizona	53	0.338		Arkansas	101	1.7113	
	California	113	0.2898		Florida	60	0.2168	
	Colorado	89	0.1485		Georgia	117	0.4701	
	Idaho	120	0.7319		Kentucky	257	0.381	
	Montana	103	2.0148		Louisiana	107	0.8709	
	Nevada	61	0.7975		Mississippi	108	0.2941	
	New Mexico	223	0.2744		North Carolina	326	0.3729	
	Oregon	103	0.4184		South Carolina	121	0.1881	
	Utah	454	0.2317		Tennessee	63	0.233	
	Washington	113	0.1579		Virginia	104	0.9575	
	Wyoming	131	0.5186		West Virginia	104	3.8629	
Midwest	Illinois	124	2.6481		Northeast	Connecticut	106	0.333
	Indiana	116	1.8684			Maine	118	0.7868
	Iowa	180	0.9399	Maryland		102	0.8006	
	Kansas	156	1.4634	Massachusetts		57	0.4584	
	Michigan	186	3.1427	New Hampshire		64	0.0689	
	Minnesota	195	0.5647	New Jersey		163	0.3038	
	Missouri	241	1.143	New York		244	1.8892	
	Nebraska	107	2.1785	Pennsylvania		152	0.3158	
	North Dakota	154	0.6013	Rhode Island		22	0.2351	
	Ohio	144	3.1342	Vermont		113	0.3403	
	Oklahoma	122	0.2787	Delaware and Hawaii did not participate in the study; Texas had too few respondents to be included in the analyses.				
	South Dakota	323	0.2687					
	Wisconsin	267	3.0526					

## SAMPLING ERROR

Throughout this report, findings of the survey are reported at a 95% confidence interval. For the entire sample of 6,668 trappers, the sampling error is at most plus or minus 1.18 percentage points. Sampling errors and population sizes are shown regionally in the tabulation that follows. (Population sizes were estimated based on data from the state agencies.)

**Table 3. Sampling Errors, Nationally and by Region**

Region	Sample Size	Population Size	Sampling Error
National	*6,668	*172,407	1.18
Alaska	105	6,560	9.49
West	1,563	18,486	2.37
Midwest	2,315	95,318	2.01
South	1,544	29,894	2.43
Northeast	1,141	22,149	2.83

\*In the analyses, Texas was removed from national and regional results because it had too few respondents; therefore, the total sample is 6,668 and the total population is 172,407 for the sampling error equation.

Sampling error was calculated using the formula described below.

**Figure 2. Sampling Error Equation**

$$B = \left( \sqrt{\frac{\frac{N_p(.25)}{N_s} - .25}{N_p - 1}} \right) (1.96)$$

Where: B = maximum sampling error (as decimal)  
 $N_p$  = population size (i.e., total number who could be surveyed)  
 $N_s$  = sample size (i.e., total number of respondents surveyed)

Derived from formula: p. 206 in Dillman, D. A. 2000. *Mail and Internet Surveys*. John Wiley & Sons, NY.

**Note:** This is a simplified version of the formula that calculates the maximum sampling error using a 50:50 split (the most conservative calculation because a 50:50 split would give maximum variation).

## METHODS OF TRAPPER ESTIMATES

The number of trappers in each state was estimated from data provided by the state fish and wildlife agencies. Most states gave estimates based on trapping licenses alone, which includes both active and inactive trappers. Because of a lack of available data, no adjustments were made to the estimates provided by the states for licensing exemptions (which could result in underestimating the number of trappers) or for licensed trappers who do not typically trap (which

could result in overestimating the number of trappers). In cases where state agencies provided databases of furbearer privileges rather than trapping licenses, the proportion of license holders who trapped were derived from the survey (the survey asked if they had trapped at least once in the previous 3 years), and that proportion was used to estimate the number of trappers in the state.

## **ADDITIONAL INFORMATION ABOUT THE PRESENTATION OF RESULTS IN THE REPORT**

In examining the results, it is important to be aware that the questionnaire included several types of questions:

- Open-ended questions are those in which no answer set is read to the respondents; rather, they can respond with anything that comes to mind from the question.
- Closed-ended questions have an answer set from which to choose.
- Single or multiple response questions: Some questions allow only a single response, while other questions allow respondents to give more than one response or choose all that apply. Those that allow more than a single response are indicated on the graphs with the label, “Multiple Responses Allowed.”
- Scaled questions: Many closed-ended questions (but not all) are in a scale, such as excellent-good-fair-poor.
- Series questions: Many questions are part of a series, and the results are primarily intended to be examined relative to the other questions in that series (although results of the questions individually can also be valuable). Typically, results of all questions in a series are shown together.

Some graphs/tables show an average, either the mean or median (or both). The mean is simply the sum of all numbers divided by the number of respondents. Because outliers (extremely high or low numbers relative to most of the other responses) may skew the mean, the median may be shown. The median is the number at which half the sample is above and the other half is below. In other words, a median of 35 years means that half the sample gave an answer of more than 35 years and the other half gave an answer of less than 35 years.

Most graphs/tables show results rounded to the nearest integer; however, all data are stored in decimal format, and all calculations are performed on unrounded numbers. For this reason, some results may not sum to exactly 100% because of this rounding. Additionally, rounding may cause apparent discrepancies of 1 percentage point between the graphs/tables and the reported results of combined responses (e.g., when “strongly support” and “moderately support” are summed to determine the total percentage in support).

Finally, some results sum to more than 100% on a graph/in a table for some questions for two reasons. The first is that sometimes multiple responses are allowed. The second reason occurs when a single-response question might be repeated for the respondent for other types of traps he/she uses. For instance, for the question, “Can you adjust pan tension on this trap?”, respondents could say “yes” regarding some traps and “no” regarding other traps. This could result in the sum of “yes” and “no” being greater than 100%. This happens in the Alaska region, where 80% are in the “yes” response, 20% are in the “no” response, and 10% are in the “don’t know” response. What this shows is that 80% of respondents who got the question use traps at least some of the time for which pan tension can be adjusted, 20% use traps at least some of the time for which pan tension cannot be adjusted, and 10% do not know. Obviously, there is a little bit of overlap wherein some trappers who got the question use both traps that have pan tension that can be adjusted and traps that have pan tension that cannot be adjusted. (Only those who used traps for which the pan tension question applies would have gotten the question.)

## ESTIMATED NUMBER OF TRAPPERS

- Through a combination of data provided by the states and data provided by the survey, Responsive Management estimates that there were 176,572 trappers in the United States in the 2014-2015 seasons. The tabulation shows the estimates in the regions; the Midwest leads the nation in number of trappers. (Note that the national and Northeast region numbers exclude Delaware, which did not participate in the study. Also note that Hawaii does not have a trapping license or trapping privileges available to residents.)
- This number of trappers estimated in this study is higher than the number estimated in the 2004 report (142,287).

**Table 4. Estimated Number of Trappers**

<b>Region</b>	<b>Estimated Number of Trappers (2014-2015)</b>
National	*176,573
Alaska	6,560
West	22,652
Midwest	95,318
South	29,894
Northeast	*22,149

\*Excludes Delaware.

## TRAPPING ACTIVITIES

### GENERAL TRAPPING INFORMATION

- Respondents were asked how many days they trapped during the 2014-2015 season: a little more than a third (38%) did so for less than 30 days (but at least 1 day); meanwhile, 24% did so for 60 or more days. The mean number of days trapped was 36.7 days. Note that 10% of respondents did not trap during the 2014-2015 season.
  - Trappers in the West and the South had the highest mean days of trapping (44.9 and 43.5 days, respectively).
  - The nationwide mean number of days trapped was 44 in 1991-1992 and 34 in 2003-2004, compared to 37 days in 2014-2015.
  
- During the past 15 years, just under half of respondents (49%) trapped no more than 5 of the 15 years. The mean number of years trapped in the past 15 years is 7.4 years.
  - The Alaska region's trappers were the most avid over the past 15 years, with a mean of 9.0 years trapping; 23% had trapped in all 15 years.
  - The mean number of years trapping out of the previous 15 years was 10.5 in the 1992 study and 9.1 in the 2004 study, compared to 7.4 years in the current study.
  
- Trappers were asked about trapping in their home state and outside their home state.
  - Nearly all (99.6%) of trappers responded that they trap in their home state during a typical trapping season; only 0.3% of trappers responded that they do *not* trap in their home state during a typical trapping season. (Note that the use of the decimal point is not meant to suggest that the data is statistically accurate to the tenth decimal place; rather, it was done because rounding to the integer would have shown 100% for "Yes" and 0% for "No.")
  - A small percentage of trappers trap outside their home state (3%).
    - Out-of-state trapping is most common among South region trappers (5%).
  
- Private land predominates in trapping: 64% use private land primarily, compared to 11% who use public land primarily (note that 25% use both about equally).
  - In the Alaska region, public land predominates, with 61% using public land mostly and 94% using public land at least half the time. On the other hand, private land use is

highest in the South (74% use private land mostly, and 96% use it at least half the time) and the Midwest (72% use private land mostly, and 93% use it at least half the time).

- Respondents were asked to indicate the number of traps and the number of snares they have out each day during a typical trapping season.
  - Just under half (46%) have fewer than 20 traps out. The mean number of traps used each day is 27.6.
  - The majority of trappers do not typically have snares out (63%). Otherwise, 23% say that they typically have fewer than 20 snares out. The mean number of snares used each day is 26.4.
    - Alaska region's trappers had the highest mean number of traps and snares used each day (30.8 traps, 35.3 snares).
- A majority of trappers (60%) had been contacted by a landowner to trap nuisance wildlife.
  - Another question asked about the proportion of each trapper's activity that involves removal of nuisance wildlife: for 70% of trappers, removal of nuisance wildlife plays some part in their trapping, although typically only about a quarter of their trapping (in the question regarding what percent of their trapping they attributed to nuisance wildlife removal, the mean of trappers' responses is 26.8 percent—in other words, just over a quarter of their trapping involves nuisance wildlife removal). Nonetheless, 18% of trappers in the survey gave a response of more than half—in other words, for this 18% of trappers, *most* of their trapping involves nuisance wildlife removal.
    - Trappers in the Alaska region are quite different from their peers in the lower 48 states regarding trapping of nuisance wildlife: only 30% of Alaska trappers say that removal of nuisance wildlife plays some part in their trapping, compared to 68% to 74% in the regions in the lower 48 states.
    - About the same percentage of trappers had been contacted by a landowner to trap nuisance wildlife in the 1992 study (63%) and the 2004 study (60%).

**TRAPPING INCOME**

- Just under a quarter of trappers (21%) responded that their trapping has been a *very* or *somewhat* important source of income over the past 3 years. The large majority of them (78%) say it has not been at all important.
  - Trappers in the Alaska and West regions were the most reliant on trapping income.
  
- Trappers most often said they sell furs using a local fur dealer (48%), at a Canadian auction (17%), or at an in-state auction (13%); note that 23% have not sold furs.
  - Local fur traders were the most commonly used means of selling furs in every region.

## **TRAPPING EXPENDITURES**

- Trappers were asked about their expenses in the previous 12 months. The data show the overall results (i.e., all expenses together) and the results for four categories of expenses: 1) traps and lures; 2) other trapping equipment, such as tools, skinning knives, chest or hip waders, trap baskets, wires, and boots; 3) travel expenses, such as gasoline, oil, vehicle repairs, lodging, and trapping licenses; and 4) major trapping-related purchases, such as 4-wheelers, snowmobiles, boats, and motors.
- Overall, the mean of expenditures is \$1,694.24.
    - Mean expenditures were highest in the Alaska and West regions (both at over \$2,000) and were lowest in the Midwest region (\$1,273).
    - Mean expenditures for the 2014-2015 trapper season, at \$1,694, were higher than those in the 1992 study (\$1,126) and the 2004 study (\$858).
  - In the previous 12 months, 77% of trappers reported spending on traps and lures. The mean spent on traps and lures is \$246.36.
    - The West had the highest mean expenditures for traps and lures (\$319.90).
    - The mean amount of \$246 spent on traps and lures was higher than that reported in the 2004 study (\$139).
  - About two-thirds of trappers (65%) spent on other equipment, such as tools, skinning knives, and so forth, in the previous 12 months. The mean spent is \$149.24.
    - The West had the highest mean expenditures for other equipment (\$171.14).
    - The mean amount of \$149 spent on other equipment was higher than that reported in the 2004 study (\$79).
  - A large percentage of trappers (83%) spent on travel expenses for trapping in the previous 12 months. The mean spent on travel is \$344.86.
    - The Alaska region and the West had the highest mean travel expenditures (\$845.63 and \$700.81, respectively).
    - The mean amount of \$345 spent on travel was higher than that reported in the 2004 study (\$268).
  - Finally, 15% of trappers spent on major trapping-related items, such as 4-wheelers, snowmobiles, boats, and motors. The mean spent on this category is \$730.85.
    - The Alaska region and the West had the highest mean expenditures for major trapping-related items (\$1,241.35 and \$1,015.96, respectively).
    - The mean amount of \$731 spent on major trapping-related purchases was higher than that reported in the 2004 study (\$361).

## TRAPPER EDUCATION AND ORGANIZATION MEMBERSHIP

- Well over a third (39%) of respondents have taken a trapper education course.
  - Just under half (49%) took a course sponsored by a state agency, 35% took one sponsored by a state trapper association, and 7% took one sponsored by AFWA.
    - Respondents most often took trapper education courses in the Northeast region: 79% did so, which far exceeds any other region (which range from 20% to 37%).
- Nationwide, 32% of trappers belong to a trapper organization: 26% belong to a state trapper association in their state of residence (and 2% belong to a state trapper association that is not in their state of residence), 11% belong to the National Trappers Association, and 4% belong to Fur Takers of America.
  - Trapper organization membership rates are highest in the Northeast region (42%) and the West region (37%) and are lowest in the Alaska region (24%).
  - The percentage of trappers who belong to a trapper organization (32%) is about the same as that reported in 2004 (32%) and 1992 (33%).

## **PRIMARY TARGET SPECIES**

- When asked to name the top four species most important to their trapping, trappers most often selected raccoon (62%), coyote (55%), muskrat (37%), beaver (33%), red fox (30%), and bobcat (27%). The graph shows the full listing. (Hereinafter, these top four species are referred to as “primary species.”)
- Tables show state-by-state results of the percentage of the state’s trappers who trap the various species.
  - The trends analysis shows that trapping of coyote has grown substantially from 2004 (when 27% of trappers targeted coyote) to 2015 (55% target coyote); meanwhile, there have been declines in trapping red fox (from 42% trapping it in 2004 to 30% in 2015) and mink (from 46% trapping it in 2004 to 20% in 2015).
  - A final set of graphs and tables in this section shows species secondarily caught. The line of questioning was specific to the species (one of four) that they named as being the primary species sought. The wording of the survey was, “What other types of animals, if any, do you most often catch in this trap when you set it for [SPECIES]?” The survey software inserted the wording of the specific species in the placeholder during the survey.

## **TRAP TYPES USED**

Results for the U.S. and each region are shown twice in this section, once grouped by trap category and once in descending order of use. See Appendix B for a description of various types of traps. Note that multiple responses were allowed, as trappers could name all the traps they use for their four primary species. For this reason, some results sum to more than 100%.

- The trap types most often used by respondents for their primary species nationwide are the #1 1/2 coil-spring (37%), the dog proof raccoon trap (37%), the #2 coil-spring (35%), the #110 bodygrip (34%), #330 bodygrip (30%), and the snare or cable restraint (26%). All other traps are used by less than a quarter of trappers. (They are shown with the traps grouped by type and then with the traps in descending order by percentage who use them.)
  - The types of traps are shown, as well. Foothold are used by 86% of trappers, and bodygrip are used by 60% of them.
  - Tables show state-by-state results of the percentage of the state's trappers who use various types of traps and snares.

## TRAP USE FOR PRIMARY SPECIES

- For each species, the following data are shown:
- A graph of traps used for the species among trappers overall.
  - A tabulation of traps used for the species in each region.
  - A tabulation of the trap family used for the species overall and in the regions.
  - A tabulation of locks used.
  - A tabulation of trends, comparing 2004 to the present survey on the top five traps for each species.
  - A tabulation of the follow-up foothold trap questions overall and in the regions.
  - A tabulation of the follow-up snare questions overall and in the regions.
  - A tabulation of the follow-up bodygrip trap questions overall and in the regions.
    - Within this section, all graphs (of types of traps used) show results wherein multiple responses are allowed. Additionally, because trappers are answering questions about multiple traps, the results of some questions sum to more than 100%. For instance, for the question, “Can you adjust pan tension on this trap?”, respondents could say “yes” regarding some traps and “no” regarding other traps. This could result in the sum of “yes” and “no” being greater than 100%. This happens in the Alaska region, where 80% are in the “yes” response, 20% are in the “no” response, and 10% are in the “don’t know” response. What this shows is that 80% of respondents who got the question use traps at least some of the time for which pan tension can be adjusted, 20% use traps at least some of the time for which pan tension cannot be adjusted, and 10% do not know. Obviously, there is a little bit of overlap wherein some trappers who got the question use both traps that have pan tension that can be adjusted and traps that have pan tension that cannot be adjusted. (Only those who used traps for which the pan tension question applies would have gotten the question.)
    - Only those regions for which there are at least 5 trappers for the given species are shown. In some instances, only one region may be shown; in such cases, it may be that other regions have a few trappers for the species, which will cause the United States total to be different than the only region shown (for instance, this occurs in Table 90 in the kit fox section where the single region shown—the West—does not match the United States total because of a few kit fox trappers in other regions at a sample size too small to be shown for those regions).

### ARCTIC FOX

Not enough trappers trapped arctic fox for the species to be shown.

**Table 53. Badger Trapping Part 1**

Badger	Answer set	United States	West	Midwest
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	44	22	62
	Offset	50	70	33
	Wide jaw	8	8	8
	Padded or rubber jaws	1	1	1
	Double jaw	0	0	0
	Toothed or studded	1	0	1
	None of these	0	1	0
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	83	88	79
	No	15	10	20
	Don't know	5	7	4
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	83	92	74
	Paws-i-trip pan	4	2	5
	Bend dog	16	10	22
	Other pan tension	1	1	1
	Don't know	0	1	0
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	82	87	78
	Swivel at trap	69	71	68
	Swivel in between	43	48	38
	Shock or lunge spring	11	16	7
	None of these	1	0	3
	Don't know	0	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	92	94	91
	On a drag	17	32	4
	As a drowning set with a slide wire or rod	0	0	0
	As some other drowning set	0	0	0
	None of these	5	0	9
	Don't know	0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 54. Badger Trapping Part 2**

Badger	Answer set	United States	West	Midwest
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	1	0	2
	1/16	1	4	0
	5/64	18	41	7
	3/32	21	12	25
	7/64	1	4	0
	1/8	31	36	28
	Other	0	0	0
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	57	56	58
	To live catch	14	4	19
	Both about equally	4	0	6
	Set without preference	23	37	17
	Don't know	1	4	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	36	56	26
	No	59	40	68
	Don't know	6	4	6
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	51	52	51
	No	46	44	47
	Don't know	3	4	2
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	63	96	46
	No	36	0	54
	Don't know	1	4	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	16	15	17
	No	74	81	71
	Don't know	10	4	12
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	60	60	60
	Staked or wired solid without entanglement	40	40	40
	On a drag	0	0	0
	None of these	0	0	0
	Don't know	0	0	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	57	57	57
	No	42	40	43
	Don't know	1	4	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 55. Badger Trapping Part 3**

Badger	Answer set	United States	West	Midwest
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	65	63	66
	Magnum	13	32	6
	Don't know	23	8	28
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	96	89	98
	Pan trigger	3	11	0
	Neither	0	0	0
	Don't know	2	0	2
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	1	5	0
	Dryland trail set	29	15	34
	Baited cubby or enclosure on the ground	54	68	49
	Elevated bait set	0	0	0
	Other type of set	12	11	12
	None of these	3	6	2
	Don't know	2	0	2

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 67. Bobcat Trapping Part 1**

Bobcat	Answer set	United States	West	Mid-west	South	North-east
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	45	31	51	48	62
	Offset	48	63	42	46	37
	Wide jaw	7	8	9	5	7
	Padded or rubber jaws	3	2	3	5	3
	Double jaw	2	1	3	2	0
	Toothed or studded	0	0	0	0	0
	None of these	1	1	1	0	1
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	84	83	83	85	90
	No	14	16	17	14	3
	Don't know	5	5	6	4	7
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	75	77	74	73	79
	Paws-i-trip pan	8	4	8	11	7
	Bend dog	18	17	20	17	15
	Other pan tension	4	7	3	3	0
	Don't know	1	1	2	1	1
What kind of trigger does this trap have? (Asked of those who use a dog proof / foot enclosing trap.)	Push trigger	100	100	100		
	Pull trigger	0	0	0		
	Push/pull trigger	0	0	0		
	Don't know	0	0	0		
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	84	78	85	88	83
	Swivel at trap	75	78	67	77	88
	Swivel in between	43	47	38	42	52
	Shock or lunge spring	17	18	12	19	22
	None of these	1	2	2	0	0
	Don't know	0	1	0	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	90	82	95	91	93
	On a drag	28	49	22	18	26
	As a drowning set with a slide wire or rod	1	1	1	2	0
	As some other drowning set	0	0	0	0	0
	None of these	2	1	2	2	0
	Don't know	0	0	0	0	1

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 68. Bobcat Trapping Part 2**

Bobcat	Answer set	United States	West	Mid-west	South	North-east
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	5	13	3	0	0
	1/16	19	17	18	22	0
	5/64	16	23	17	7	0
	3/32	30	25	26	44	0
	7/64	4	3	2	10	0
	1/8	8	4	12	5	0
	Other	0	1	0	0	0
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	63	82	63	44	0
	To live catch	22	4	25	37	50
	Both about equally	5	6	5	5	50
	Set without preference	8	7	6	15	0
	Don't know	1	0	1	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	54	80	43	45	50
	No	45	19	57	52	50
	Don't know	1	0	0	2	0
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	67	55	72	70	100
	No	31	40	26	29	0
	Don't know	3	4	3	1	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	82	81	81	86	100
	No	18	19	19	13	0
	Don't know	0	0	0	2	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	40	36	47	34	0
	No	58	63	52	64	100
	Don't know	2	1	1	2	0
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	49	61	47	39	100
	Staked or wired solid without entanglement	44	27	49	50	0
	On a drag	1	0	1	1	0
	None of these	6	7	3	9	0
	Don't know	1	4	0	0	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	55	61	51	54	100
	No	41	36	41	46	0
	Don't know	4	3	8	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 69. Bobcat Trapping Part 3**

Bobcat	Answer set	United States	West	Mid-west	South	North-east
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	80	64	80	75	91
	Magnum	13	20	12	17	15
	Don't know	8	15	8	8	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	88	72	90	72	100
	Pan trigger	11	28	10	24	0
	Neither	0	0	1	0	0
	Don't know	0	0	0	4	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	2	0	1	3	0
	Dryland trail set	13	32	10	40	0
	Baited cubby or enclosure on the ground	63	65	66	38	67
	Elevated bait set	21	0	23	8	38
	Other type of set	0	0	0	7	0
	None of these	0	4	0	0	0
	Don't know	0	0	0	4	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

	Push/pull trigger	0	0
	Don't know	0	0
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	79	79
	Swivel at trap	63	63
	Swivel in between	34	33
	Shock or lunge spring	4	4
	None of these	4	4
	Don't know	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	95	96
	On a drag	22	21
	As a drowning set with a slide wire or rod	0	0
	As some other drowning set	0	0
	None of these	0	0
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 103. Lynx Trapping Part 2**

Lynx	Answer set	United States	Alaska
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	0	0
	1/16	38	38
	5/64	8	8
	3/32	15	15
	7/64	0	0
	1/8	0	0
	Other	8	8
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	77	77
	To live catch	8	8
	Both about equally	0	0
	Set without preference	15	15
	Don't know	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	31	31
	No	62	62
	Don't know	8	8
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	15	15
	No	85	85
	Don't know	0	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	62	62
	No	31	31
	Don't know	8	8
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	15	15
	No	85	85
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	23	23
	Staked or wired solid without entanglement	54	54
	On a drag	15	15
	None of these	0	0
	Don't know	8	8
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	54	54
	No	46	46
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 104. Lynx Trapping Part 3**

Lynx	Answer set	United States	Alaska
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	75	75
	Magnum	25	25
	Don't know	0	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	100	100
	Pan trigger	0	0
	Neither	0	0
	Don't know	0	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	0	0
	Dryland trail set	25	25
	Baited cubby or enclosure on the ground	75	75
	Elevated bait set	0	0
	Other type of set	0	0
	None of these	0	0
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 123. Muskrat Trapping Part 1**

Muskrat	Answer set	United States	Alaska	West	Mid-west	South	North-east
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	93	100	89	94	91	90
	Offset	2	0	8	2	1	2
	Wide jaw	1	0	1	1	1	1
	Padded or rubber jaws	0	0	0	0	0	0
	Double jaw	2	0	3	1	7	2
	Toothed or studded	0	0	0	0	0	0
	None of these	2	0	1	2	0	2
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	67	75	74	65	76	65
	No	32	25	27	34	24	31
	Don't know	4	0	3	4	4	4
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	67	33	69	65	62	77
	Paws-i-trip pan	2	0	4	1	4	1
	Bend dog	29	33	26	33	21	16
	Other pan tension	3	33	1	2	6	5
	Don't know	1	0	1	1	7	0
What kind of trigger does this trap have? (Asked of those who use a dog proof / foot enclosing trap.)	Push trigger	15		100	0		0
	Pull trigger	0		0	0		0
	Push/pull trigger	4		0	0		100
	Don't know	81		0	100		0
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	55	75	65	54	69	43
	Swivel at trap	60	50	57	60	68	57
	Swivel in between	16	0	23	15	22	17
	Shock or lunge spring	1	0	1	1	2	1
	None of these	13	25	8	14	6	14
	Don't know	2	0	0	2	3	4
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	60	50	57	62	60	55
	On a drag	2	50	4	2	4	3
	As a drowning set with a slide wire or rod	36	0	43	35	35	39
	As some other drowning set	37	25	33	38	25	39
	None of these	1	0	0	1	1	0
	Don't know	0	0	0	0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 124. Muskrat Trapping Part 2**

Muskrat	Answer set	United States	Alaska	West	Mid-west	South	North-east
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	20		53	0	0	19
	1/16	46		0	100	47	52
	5/64	3		0	0	0	6
	3/32	11		47	0	0	6
	7/64	4		0	0	26	0
	1/8	8		0	0	27	6
	Other	0		0	0	0	0
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	33		66	100	0	25
	To live catch	29		18	0	53	29
	Both about equally	17		0	0	0	29
	Set without preference	16		16	0	21	17
	Don't know	4		0	0	26	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	13		50	0	27	0
	No	83		50	100	47	100
	Don't know	4		0	0	26	0
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	35		34	0	47	36
	No	65		66	100	53	64
	Don't know	0		0	0	0	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	82		100	0	74	88
	No	14		0	100	0	12
	Don't know	4		0	0	26	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	42		18	0	47	52
	No	54		82	100	27	48
	Don't know	4		0	0	26	0
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	42		16	100	47	42
	Staked or wired solid without entanglement	47		69	0	27	52
	On a drag	0		0	0	0	0
	None of these	6		16	0	0	6
	Don't know	4		0	0	26	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	54		69	100	47	46
	No	42		31	0	27	54
	Don't know	4		0	0	26	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 125. Muskrat Trapping Part 3**

Muskrat	Answer set	United States	Alaska	West	Mid-west	South	North-east
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	93	100	91	93	91	95
	Magnum	6	0	6	6	6	6
	Don't know	2	0	3	2	5	1
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	97	100	99	97	99	96
	Pan trigger	2	0	0	2	0	3
	Neither	0	0	0	0	0	1
	Don't know	0	0	1	0	1	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	96	100	95	95	98	97
	Dryland trail set	3	0	1	4	2	2
	Baited cubby or enclosure on the ground	1	0	1	1	1	1
	Elevated bait set	0	0	0	0	0	0
	Other type of set	0	0	3	0	0	0
	None of these	0	0	0	0	0	0
	Don't know	0	0	0	0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

	Toothed or studded	0		0	0	0
	None of these	0		0	0	0
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	77		81	71	76
	No	18		16	19	24
	Don't know	7		6	11	0
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	68		62	84	63
	Paws-i-trip pan	3		2	5	0
	Bend dog	23		27	12	37
	Other pan tension	3		5	1	0
	Don't know	3		5	1	0
What kind of trigger does this trap have? (Asked of those who use a dog proof / foot enclosing trap.)	Push trigger	36		37	41	0
	Pull trigger	46		49	36	10
	Push/pull trigger	34		33	23	79
	Don't know	5		5	4	10
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	73		70	82	80
	Swivel at trap	54		60	49	21
	Swivel in between	16		13	27	12
	Shock or lunge spring	6		2	17	0
	None of these	2		2	0	8
	Don't know	4		5	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	98		99	94	100
	On a drag	7		8	8	0
	As a drowning set with a slide wire or rod	1		1	0	3
	As some other drowning set	0		0	0	3
	None of these	1		1	2	0
	Don't know	0		0	1	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 137. Opossum Trapping Part 2**

Opossum	Answer set	United States	West	Mid-west	South	North-east
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	12		0	22	0
	1/16	0		0	0	0
	5/64	16		0	0	50
	3/32	26		100	22	0
	7/64	20		0	37	0
	1/8	0		0	0	0
	Other	16		0	0	50
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	30		0	56	0
	To live catch	44		0	22	100
	Both about equally	14		100	0	0
	Set without preference	12		0	22	0
	Don't know	0		0	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	14		100	0	0
	No	86		0	100	100
	Don't know	0		0	0	0
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	68		100	41	100
	No	32		0	59	0
	Don't know	0		0	0	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	80		100	63	100
	No	20		0	37	0
	Don't know	0		0	0	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	58		100	22	100
	No	42		0	78	0
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	72		100	78	50
	Staked or wired solid without entanglement	28		0	22	50
	On a drag	0		0	0	0
	None of these	0		0	0	0
	Don't know	0		0	0	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	80		100	63	100
	No	20		0	37	0
	Don't know	0		0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 138. Opossum Trapping Part 3**

Opossum	Answer set	United States	West	Mid-west	South	North-east
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	97		96	100	97
	Magnum	0		0	0	0
	Don't know	3		4	0	3
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	87		81	100	100
	Pan trigger	7		11	0	0
	Neither	5		8	0	0
	Don't know	0		0	0	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	2		4	0	0
	Dryland trail set	43		55	20	19
	Baited cubby or enclosure on the ground	50		41	78	60
	Elevated bait set	1		0	2	2
	Other type of set	4		1	0	19
	None of these	0		0	0	0
	Don't know	0		0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

	Set without preference	14	13	8	16	12	14
	Don't know	0	0	0	0	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	43	25	76	50	14	16
	No	54	75	24	47	85	79
	Don't know	2	0	0	3	1	5
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	82	38	54	91	73	93
	No	17	63	45	8	26	8
	Don't know	1	0	1	1	1	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	85	75	78	88	70	93
	No	14	25	22	12	22	9
	Don't know	1	0	1	0	8	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	39	38	36	41	30	43
	No	59	63	62	57	67	55
	Don't know	2	0	2	2	3	2
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	52	38	65	49	65	48
	Staked or wired solid without entanglement	45	50	32	50	24	49
	On a drag	1	0	0	0	1	2
	None of these	2	13	2	0	1	3
	Don't know	1	0	2	1	9	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	52	75	59	43	89	51
	No	46	25	41	54	11	48
	Don't know	3	0	1	4	0	2

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 152. Red Fox Trapping Part 3**

Red fox	Answer set	United States	Alaska	West	Mid-west	South	North-east
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	71	33	56	79	75	100
	Magnum	28	67	44	20	0	0
	Don't know	1	0	0	1	25	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	72	100	92	65	75	100
	Pan trigger	20	0	8	25	25	0
	Neither	7	0	0	9	0	0
	Don't know	1	0	0	1	0	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	0	0	0	0	0	0
	Dryland trail set	54	0	8	69	50	0
	Baited cubby or enclosure on the ground	32	67	68	21	25	100

**Table 156. Ringtail Trapping Part 1**

Ringtail	Answer set	United States	West
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	52	30
	Offset	35	51
	Wide jaw	5	8
	Padded or rubber jaws	5	7
	Double jaw	0	0
	Toothed or studded	0	0
	None of these	0	0
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	82	74
	No	8	12
	Don't know	10	15
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	90	84
	Paws-i-trip pan	0	0
	Bend dog	10	16
	Other pan tension	0	0
	Don't know	0	0
What kind of trigger does this trap have? (Asked of those who use a dog proof / foot enclosing trap.)	Push trigger	7	100
	Pull trigger	93	0
	Push/pull trigger	0	0
	Don't know	0	0
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	88	82
	Swivel at trap	85	79
	Swivel in between	30	43
	Shock or lunge spring	10	14
	None of these	0	0
	Don't know	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	95	93
	On a drag	39	56
	As a drowning set with a slide wire or rod	0	0
	As some other drowning set	0	0
	None of these	0	0
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 157. Ringtail Trapping Part 2**

Ringtail	Answer set	United States	West
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	61	0
	1/16	18	46
	5/64	21	54
	3/32	0	0
	7/64	0	0
	1/8	0	0
	Other	0	0
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	0	0
	To live catch	61	0
	Both about equally	21	54
	Set without preference	18	46
	Don't know	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	79	46
	No	82	54
	Don't know	0	0
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	100	100
	No	61	0
	Don't know	0	0
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	100	100
	No	61	0
	Don't know	0	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	82	54
	No	18	46
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	79	46
	Staked or wired solid without entanglement	82	54
	On a drag	0	0
	None of these	0	0
	Don't know	0	0
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	79	46
	No	21	54
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 158. Ringtail Trapping Part 3**

Ringtail	Answer set	United States	West
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	48	48
	Magnum	52	52
	Don't know	0	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	74	74

**Table 170. Skunk Trapping Part 1**

Skunk	Answer set	United States	West	Mid-west	South	North-east
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	83	56	90	64	100
	Offset	12	44	3	29	0
	Wide jaw	0	0	1	0	0
	Padded or rubber jaws	1	0	0	6	0
	Double jaw	0	0	0	0	0
	Toothed or studded	0	0	0	0	0
	None of these	1	0	0	4	0
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	80	74	78	92	84
	No	18	26	20	4	16
	Don't know	2	0	2	4	0
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	82	88	88	92	32
	Paws-i-trip pan	4	4	0	0	32
	Bend dog	14	26	10	8	32
	Other pan tension	1	0	2	0	0
	Don't know	1	0	0	0	5
What kind of trigger does this trap have? (Asked of those who use a dog proof / foot enclosing trap.)	Push trigger	7	0	6	56	
	Pull trigger	52	24	55	0	
	Push/pull trigger	27	76	24	44	
	Don't know	14	0	15	0	
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	87	77	89	88	85
	Swivel at trap	55	85	50	38	73
	Swivel in between	30	51	24	37	38
	Shock or lunge spring	8	4	8	12	0
	None of these	0	0	0	0	0
	Don't know	1	0	2	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	99	97	100	92	100
	On a drag	3	16	0	8	0
	As a drowning set with a slide wire or rod	1	0	0	4	0
	As some other drowning set	0	0	0	0	0
	None of these	0	0	0	4	0
	Don't know	0	0	0	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 171. Skunk Trapping Part 2**

Skunk	Answer set	United States	West	Mid-west	South	North-east
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	0		0	0	
	1/16	53		58	0	
	5/64	31		34	0	
	3/32	4		4	0	
	7/64	5		0	69	
	1/8	2		0	31	
	Other	0		0	0	
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	63		62	69	
	To live catch	0		0	0	
	Both about equally	2		0	31	
	Set without preference	35		38	0	
	Don't know	0		0	0	
Do you use a break-away device? (Asked of those who use snares.)	Yes	2		0	31	
	No	98		100	69	
	Don't know	0		0	0	
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	19		18	31	
	No	36		34	69	
	Don't know	45		49	0	
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	46		47	31	
	No	54		53	69	
	Don't know	0		0	0	
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	42		43	31	
	No	58		57	69	
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	81		82	69	
	Staked or wired solid without entanglement	19		18	31	
	On a drag	0		0	0	
	None of these	0		0	0	
	Don't know	0		0	0	
Do you personally make any of the snares that you use for (species)? (Asked of those who use snares.)	Yes	56		58	31	
	No	44		42	69	
	Don't know	0		0	0	

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 172. Skunk Trapping Part 3**

Skunk	Answer set	United States	West	Mid-west	South	North-east
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	80	75	75	69	100
	Magnum	14	0	22	31	0
	Don't know	6	25	3	0	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	91	100	83	100	100
	Pan trigger	1	0	1	0	0
	Neither	7	0	13	0	0
	Don't know	1	0	3	0	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	0	0	0	0	0
	Dryland trail set	21	9	32	31	1
	Baited cubby or enclosure on the ground	70	66	61	69	99
	Elevated bait set	0	0	0	0	0
	Other type of set	7	25	5	0	0
	None of these	0	0	0	0	0
	Don't know	1	0	3	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 189. Wolverine Trapping Part 1**

Wolverine	Answer set	United States	Alaska
By either original design or modification, are the jaws of this...? (Asked of those who use foothold traps not including dog proof traps.)	Standard or regular	60	60
	Offset	40	40
	Wide jaw	0	0
	Padded or rubber jaws	0	0
	Double jaw	0	0
	Toothed or studded	0	0
	None of these	0	0
Can you adjust pan tension on this trap? (Asked of those who use foothold traps, not including dog proof traps.)	Yes	89	90
	No	11	10
	Don't know	0	0
How do you adjust pan tension on this trap? (Asked of those who can adjust pan tension.)	Pan tension screw	67	67
	Paws-i-trip pan	0	0
	Bend dog	33	33
	Other pan tension	0	0
	Don't know	11	11
By either original design or modification, does the chain of this trap have a...? (Asked of those who use foothold traps, including dog proof traps.)	Swivel at staking end of chain	90	90
	Swivel at trap	80	80
	Swivel in between	50	50
	Shock or lunge spring	0	0
	None of these	0	0
	Don't know	0	0
When you set this trap, how do you secure it? (Asked of those who use foothold traps, including dog proof traps.)	Stake or wired solid	90	90
	On a drag	30	30
	As a drowning set with a slide wire or rod	0	0
	As some other drowning set	0	0
	None of these	0	0
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 190. Wolverine Trapping Part 2**

Wolverine	Answer set	United States	Alaska
What is the cable diameter of this snare? (Asked of those who use snares.)	3/64	0	0
	1/16	0	0
	5/64	0	0
	3/32	11	11
	7/64	44	44
	1/8	22	22
	Other	0	0
When you use this snare, do you usually set it...? (Asked of those who use snares.)	To kill	100	100
	To live catch	0	0
	Both about equally	0	0
	Set without preference	0	0
	Don't know	0	0
Do you use a break-away device? (Asked of those who use snares.)	Yes	0	0
	No	100	100
	Don't know	0	0
Do you use a deer stop or minimum loop stop? (Asked of those who use snares.)	Yes	0	0
	No	89	89
	Don't know	11	11
Do you use a swivel at the staking end? (Asked of those who use snares.)	Yes	33	33
	No	67	67
	Don't know	0	0
Do you use an in-line swivel between staking end and snare loop? (Asked of those who use snares.)	Yes	22	22
	No	78	78
When you set this snare, how do you secure it? (Asked of those who use snares.)	Staked or wired solid with entanglement	78	78
	Staked or wired solid without entanglement	0	0
	On a drag	11	11
	None of these	0	0
	Don't know	11	11
Do you personally make any of the snares with a that you use for (species)? (Asked of those who use snares.)	Yes	89	89
	No	11	11
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

**Table 191. Wolverine Trapping Part 3**

Wolverine	Answer set	United States	Alaska
Is this trap standard or magnum? (Asked of those who use bodygrip traps.)	Standard	63	63
	Magnum	37	37
	Don't know	0	0
Does this trap have a wire trigger or a pan trigger? (Asked of those who use bodygrip traps.)	Wire trigger	100	100
	Pan trigger	0	0
	Neither	0	0
	Don't know	0	0
Which of the following best describes how this trap is most often set? (Asked of those who use bodygrip traps.)	Water set	0	0
	Dryland trail set	11	11
	Baited cubby or enclosure on the ground	68	68
	Elevated bait set	21	21
	Other type of set	0	0
	None of these	0	0
	Don't know	0	0

For most questions, respondents can answer for multiple traps; on some questions, multiple responses are allowed. For this reason, some question results sum to more than 100%.

## BEST MANAGEMENT PRACTICES (BMPs)

- More than two-fifths of trappers (42%) have heard of BMPs for trapping; of those who have heard of them, 64% know a *great deal* or *moderate amount* about them.
  - In the 2004 study, 35% of respondents had heard of BMPs (a lower percentage than now); of those, 55% responded that they knew a great deal or moderate amount.
- Of those who know a great deal, a moderate amount, or a little about BMPs, a strong majority (73%) support BMPs, with 37% expressing *strong* support. Only 3% oppose BMPs.
  - Support for BMPs is higher than that reported in the 2004 study (69%).
- Among trappers who support BMPs, the most common reasons given for this support (in an open-ended question) are for humane / ethical / animal welfare reasons (34% stated this), that it is good for animal populations (24%), that it is good for the future of trapping (20%), that it is good to have guidelines (20%), and that it is good to educate the public / improve the image of trapping (17%).
- Among trappers who oppose BMPs, the most common reason given for this opposition (in an open-ended question) is that there is too much regulation or the regulation is too universal (51%)—by far the top response.
- Among trappers who have heard of BMPs, 66% currently use them and plan to continue using them.

## **DEMOGRAPHIC DATA**

- An overwhelming 98% of trappers are male.
  - This corresponds to previous years: 99% of trappers were male in the 2004 study.
- The mean age of trappers is 47.7 years.
- The average household income (pre-tax) of respondents most often falls within the range of \$40,000 to \$59,999 (18% gave a response in this range).

## **ABOUT THE ASSOCIATION OF FISH AND WILDLIFE AGENCIES (AFWA)**

The Association of Fish and Wildlife Agencies (AFWA) was founded in 1902. AFWA represents North America's fish and wildlife agencies to advance sound, science-based management and conservation of fish and wildlife and their habitats in the public interest.

AFWA represents its state agency members on Capitol Hill and before the Administration to advance favorable fish and wildlife conservation policy and funding and works to ensure that all entities work collaboratively on the most important issues. AFWA also provides member agencies with coordination services on cross-cutting as well as species-based programs that range from birds, fish habitat, and energy development to climate change, wildlife action plans, conservation education, leadership training, and international relations.

Working together, AFWA's member agencies are ensuring that North American fish and wildlife management has a clear and collective voice.

## **ABOUT RESPONSIVE MANAGEMENT**

Responsive Management is an internationally recognized public opinion and attitude survey research firm specializing in natural resource and outdoor recreation issues. Our mission is to help natural resource and outdoor recreation agencies and organizations better understand and work with their constituents, customers, and the public.

Utilizing our in-house, full-service telephone, mail, and web-based survey center with 50 professional interviewers, we have conducted more than 1,000 telephone surveys, mail surveys, personal interviews, and focus groups, as well as numerous marketing and communication plans, needs assessments, and program evaluations.

Clients include the federal natural resource and land management agencies, most state fish and wildlife agencies, state departments of natural resources, environmental protection agencies, state park agencies, tourism boards, most of the major conservation and sportsmen's organizations, and numerous private businesses. Responsive Management also collects attitude and opinion data for many of the nation's top universities.

Specializing in research on public attitudes toward natural resource and outdoor recreation issues, Responsive Management has completed a wide range of projects during the past 22 years, including dozens of studies of hunters, anglers, wildlife viewers, boaters, park visitors, historic site visitors, hikers, birdwatchers, campers, and rock climbers. Responsive Management has conducted studies on endangered species; waterfowl and wetlands; and the reintroduction of large predators such as wolves, grizzly bears, and the Florida panther.

Responsive Management has assisted with research on numerous natural resource ballot initiatives and referenda and has helped agencies and organizations find alternative funding and increase their membership and donations. Additionally, Responsive Management has conducted major organizational and programmatic needs assessments to assist natural resource agencies and organizations in developing more effective programs based on a solid foundation of fact.

Responsive Management has conducted research on public attitudes toward natural resources and outdoor recreation in almost every state in the United States, as well as in Canada, Australia, the United Kingdom, France, Germany, and Japan. Responsive Management has also conducted focus groups and personal interviews with residents of the African countries of Algeria, Cameroon, Mauritius, Namibia, South Africa, Tanzania, Zambia, and Zimbabwe.

Responsive Management routinely conducts surveys in Spanish and has conducted surveys in Chinese, Korean, Japanese and Vietnamese and has completed numerous studies with specific target audiences, including Hispanics; African-Americans; Asians; women; children; senior citizens; urban, suburban, and rural residents; large landowners; and farmers.

Responsive Management's research has been upheld in U.S. District Courts; used in peer-reviewed journals; and presented at major natural resource, fish and wildlife, and outdoor recreation conferences across the world. Company research has been featured in most of the nation's major media, including CNN, *The New York Times*, *The Wall Street Journal*, and on the front pages of *USA Today* and *The Washington Post*. Responsive Management's research has also been highlighted in *Newsweek* magazine.

## APPENDIX A: EMAIL AND LETTER TEMPLATES

### Template for Email Invitations to Trappers to Participate in the Survey

Dear \_\_\_\_\_,

The [STATE AGENCY] is participating in a nationwide study coordinated by the Association of Fish and Wildlife Agencies (AFWA) concerning the use of traps in the United States. As a licensed trapper, your email address was one of only a small number that have been randomly selected to help us with this study by answering a brief questionnaire. Although participation is completely voluntary, we would greatly appreciate your cooperation in this important effort. The results will help protect the ability of the states to manage furbearers through trapping.

[Click Here to Start the Survey](#)

The questions take approximately 15 minutes to complete, and our goal is to have all surveys completed by **September 22, 2015**, in order to have time to analyze data and develop a report within the study's timeline.

Please be assured that your answers will never be associated with your name, address, trapping license, or other contact information.

The [Association of Fish and Wildlife Agencies](#) (AFWA) is a nationwide association that each state fish and wildlife agency is a member of, including the [STATE AGENCY]. AFWA represents the state agencies on Capitol Hill and in other national forums to advance favorable fish and wildlife conservation policy and funding and works to ensure that all entities work collaboratively on the most important fish and wildlife issues.

Each state agency is participating in this AFWA study, and you are being asked to participate as a license holder whose privileges may include trapping. The goal of this study is for AFWA to better understand trapping participation and, more specifically, trap use, such as which types of traps and features are being used for which species, which traps are most popular, and which species are most often trapped, as well as some related trapping information, such as expenditures (to better understand the economic impact of trapping on the states), membership in trapping organizations, and more. The results of the study will be used to help protect and manage trapping opportunities in each state.

[Responsive Management](#), an independent research firm specializing in outdoor recreation and natural resource issues, has been contracted by AFWA to conduct the survey with trappers. Each state agency has provided trapping license contact information under a confidentiality agreement with Responsive Management that the contact information is used *only* for this licensed trapper study. Again, please be assured that your answers will never be associated with your name, address, trapping license, or other contact information and that your contact information will only be used for contacting you directly for this study.

Responsive Management also conducted the study previously in 2004, and a copy of the report is accessible online at <http://www.fishwildlife.org/files/AFWA-FINAL-TRAPPING-Report.pdf>.

[Click Here to Start the Survey](#)

If you have any questions, have technical issues, or need further clarification about this study please feel free to contact Responsive Management at [research@responsivemanagement.com](mailto:research@responsivemanagement.com).

Thank you in advance for your time and feedback.

Sincerely,  
Alison Lanier  
Responsive Management

Dear licensed trapper,

The [INSERT STATE AGENCY] is participating in a nationwide study coordinated by the Association of Fish and Wildlife Agencies (AFWA) concerning the use of traps in the United States. Your address was one of only a small number that have been randomly selected to help us with this study by answering a brief questionnaire. Although participation is completely voluntary, we would greatly appreciate your cooperation in this important effort. The results will help protect the ability of the states to manage furbearers through trapping. The study was previously completed in 2004, and a copy of the report is accessible online at <http://www.fishwildlife.org/files/AFWA-FINAL-TRAPPING-Report.pdf>.

Responsive Management, an independent research firm specializing in outdoor recreation and natural resource issues, has been contracted to conduct the survey with trappers. The questions take approximately 15 minutes to complete, and you may participate in several ways:

If you would like to participate online, the questionnaire can be accessed at this link: <http://sgiz.mobi/s3/TrapperSurvey>. You may also call our toll-free number at 888-810-4460 between 9:00 a.m. and 9:00 p.m. Eastern time, and an interviewer will read the questions and enter your responses. If we do not hear from you within a couple of weeks, you may receive a call from an interviewer to ask for your time in completing a telephone survey. Please be assured that your answers will never be associated with your name, address, trapping license, or other contact information. Our goal is to have all surveys completed by September 22, 2015, in order to have time to analyze data and develop a report within the study's timeline.

If you have any questions, have technical issues, or need further clarification about this study please feel free to contact me at 540-432-1888.

Thank you in advance for your time and feedback.

Sincerely,

Alison Lanier

## APPENDIX B: CATEGORIES AND TYPES OF TRAPS

### TRAPPING – TRAP LIST

#### *Foothold Traps*

- 1 #1 Coil-spring
- 2 #1 1/2 Coil-spring
- 3 #1.65 Coil-spring
- 4 #1 3/4 or 1.75 Coil-spring
- 5 #2 Coil-spring
- 6 #3 Coil-spring
- 7 #4 Coil-spring
- 8 #5 Coil-spring
- 9 #22 Coyote cuffs
- 10 #33 Coyote cuffs
- 11 MB 450
- 12 MB 550
- 13 MB 650
- 14 MB 750
- 15 Sterling MJ 500
- 16 Sterling MJ 600
- 17 Sterling MJ 800
- 18 Jake Trap (JC Connor)
- 19 TS-85 Beaver Trap
- 20 #00 Longspring
- 21 #1 Longspring
- 22 #1 stop-loss or guard trap
- 23 #1 1/2 Longspring
- 24 #2 Longspring
- 25 #3 Longspring
- 26 #4 Longspring
- 27 #5 Longspring
- 28 #7 Longspring
- 29 #11 Longspring
- 30 "Dog proof" raccoon trap (or foot enclosing trap)

#### *Snares*

- 31 Snare or cable restraint
- 32 Belisle footsnare or other footsnare

#### *Bodygrip / Rotating Jaw Traps*

- 33 #50 Bodygrip / Rotating Jaw
- 34 #60 Bodygrip / Rotating Jaw
- 35 #110 Bodygrip / Rotating Jaw
- 36 #120 Bodygrip / Rotating Jaw
- 37 #150 Bodygrip / Rotating Jaw
- 38 #155 Bodygrip / Rotating Jaw
- 39 #160 Bodygrip / Rotating Jaw
- 40 #220 Bodygrip / Rotating Jaw
- 41 #280 Bodygrip / Rotating Jaw
- 42 #330 Bodygrip / Rotating Jaw
- 43 #660 Bodygrip / Rotating Jaw
- 44 Other Bodygrip / Rotating Jaw trap size

#### *Additional Traps*

- 45 Muskrat float (submersion cage-type)
- 46 Colony trap
- 47 Cage or box trap
- 48 Other (ENTER OTHER TYPE OF TRAP)

#### Coil-spring trap

#### Longspring traps

#### Dog proof Raccoon Trap (foot enclosing trap)

#### Simple Snare

#### Bodygrip / Rotating Jaw Trap

#### Bodygrip / Rotating Jaw Trap

#### Cage or box trap
