

## New York State Species of Greatest Conservation Need

This list is a revision of the Species of Greatest Conservation Need (SGCN) list, which is part of New York's current Comprehensive Wildlife Conservation Strategy (CWCS). For the development of the State Wildlife Action Plan (SWAP), SGCN and additional nominated species were filtered through a model that evaluated their current status based on factors including abundance and population trends.

### Species of Greatest Conservation Need

---

#### High Priority SGCN

The status of these species is known and conservation action is needed in the next ten years. These species are experiencing a population decline, or have identified threats that may put them in jeopardy, and are in need of timely management intervention or they are likely to reach critical population levels in New York.
