Description:
The Bonsal facility, located in Calverton, N.Y., produces concrete from ground aggregate and cement. The ground aggregate is dried and then cooled. Following cooling, the dry aggregate is combined with cement; the combined materials are mixed, bagged, and palletized.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: SUSAN ACKERMAN
NYSDEC - SUNY @ STONY BROOK
50 CIRCLE RD
STONY BROOK, NY 11790-3409

Authorized Signature: _________________________________ Date: ___ / ___ / ______
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS

***** General Provisions *****

GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department’s representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations

Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers

Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.
Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of application for permit modification or renewal - REGION 1
HEADQUARTERS
Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:
Applications for permit modification or renewal are to be submitted to:
NYSDEC Regional Permit Administrator
Region 1 Headquarters
Division of Environmental Permits
Stony Brook University
50 Circle Road
Stony Brook, NY  11790-3409

**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are federally enforceable. Permittees may also have other obligations under regulations of general applicability.

Item A: Sealing - 6 NYCRR 200.5
The Commissioner may seal an air contamination source to prevent its operation if compliance with 6 NYCRR Chapter III is not met within the time provided by an order of the Commissioner issued in the case of the violation. Sealing means labeling or tagging a source to notify any person that operation of the source is prohibited, and also includes physical means of preventing the operation of an air contamination source without resulting in destruction of any equipment associated with such source, and includes, but is not limited to, bolting, chaining or wiring shut control panels, apertures or conduits associated with such source.

No person shall operate any air contamination source sealed by the Commissioner in accordance with this section unless a modification has been made which enables such source to comply with all requirements applicable to such modification.

Unless authorized by the Commissioner, no person shall remove or alter any seal affixed to any contamination source in accordance with this section.

Item B: Acceptable Ambient Air Quality - 6 NYCRR 200.6
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Item C: Maintenance of Equipment - 6 NYCRR 200.7
Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications,
required to operate such device effectively.

**Item D: Unpermitted Emission Sources - 6 NYCRR 201-1.2**

If an existing emission source was subject to the permitting requirements of 6 NYCRR Part 201 at the time of construction or modification, and the owner and/or operator failed to apply for a permit for such emission source then the following provisions apply:

(a) The owner and/or operator must apply for a permit for such emission source or register the facility in accordance with the provisions of Part 201.

(b) The emission source or facility is subject to all regulations that were applicable to it at the time of construction or modification and any subsequent requirements applicable to existing sources or facilities.

**Item E: Emergency Defense - 6 NYCRR 201-1.5**

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;

(2) The equipment at the permitted facility causing the emergency was at the time being properly operated;

(3) During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and

(4) The facility owner and/or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.
(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

**Item F:** Recycling and Salvage - 6 NYCRR 201-1.7

Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of 6 NYCRR.

**Item G:** Prohibition of Reintroduction of Collected Contaminants to the Air - 6 NYCRR 201-1.8

No person shall unnecessarily remove, handle, or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

**Item H:** Proof of Eligibility for Sources Defined as Exempt Activities - 6 NYCRR 201-3.2 (a)

The owner and/or operator of an emission source or unit that is eligible to be exempt, may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

**Item I:** Proof of Eligibility for Sources Defined as Trivial Activities - 6 NYCRR 201-3.3 (a)

The owner and/or operator of an emission source or unit that is listed as being trivial in 6 NYCRR Part 201 may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

**Item J:** Required Emission Tests - 6 NYCRR 202-1.1
An acceptable report of measured emissions shall be submitted, as may be required by the Commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation. Failure to submit a report acceptable to the Commissioner within the time stated shall be sufficient reason for the Commissioner to suspend or deny an operating permit. Notification and acceptable procedures are specified in 6 NYCRR Subpart 202-1.

Item K: Visible Emissions Limited - 6 NYCRR 211.3
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

Item L: Open Fires Prohibitions - 6 NYCRR 215.2
Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item M: Permit Exclusion - ECL 19-0305
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item N: Federally Enforceable Requirements - 40 CFR 70.6 (b)
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state
FEDERAL APPLICABLE REQUIREMENTS
The following conditions are federally enforceable.

Condition 1: Recordkeeping requirements
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 202-2.5

Item 1.1:
(a) The following records shall be maintained for at least five years:

   (1) a copy of each emission statement submitted to the department; and

   (2) records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.

(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.

Condition 2: Facility Permissible Emissions
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-7.2

Item 2.1:
The sum of emissions from the emission units specified in this permit shall not equal or exceed the following Potential To Emit (PTE) rate for each regulated contaminant:

   CAS No: 0NY075-00-5        PTE: 29,800 pounds per year
   Name: PM-10

Condition 3: Capping Monitoring Condition
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-7.2

Item 3.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

   6 NYCRR Subpart 201-6

Item 3.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 3.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 3.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 3.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 3.6:
The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY075-00-5   PM-10

Item 3.7:
Compliance Demonstration shall include the following monitoring:

Capping: Yes
Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
Monthly, the facility will calculate the rolling 12-month total PM10 emissions. PM10 emissions are capped at fifteen (15) tons for any consecutive 12 month period.

The facility will record raw material usage, dry concrete production, and hours of operation for each emission unit. Emissions will be calculated using this data and emission factors obtained from the most recent version of USEPA's AP-42 Compilation of Air Pollution Emissions Factors.

Parameter Monitored: PM-10
Upper Permit Limit: 15 tons per year
Monitoring Frequency: MONTHLY
Averaging Method: 12-month total, rolled monthly
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period. The initial report is due 1/30/2011. Subsequent reports are due every 12 calendar month(s).

**Condition 4: Notification**  
*Effective between the dates of 11/18/2010 and Permit Expiration Date*

**Applicable Federal Requirement:** 6 NYCRR 202-1.2

**Item 4.1:**  
A person who is required by the commissioner to submit a stack test report shall notify the commissioner, in writing, not less than 30 days prior to the test, of the time and date of the test. Such notification shall also include the acceptable procedures to be used to stack test including sampling and analytical procedures. Such person shall allow the commissioner, or his representative, free access to observe stack testing being conducted by such person.

**Condition 5: Compliance Demonstration**  
*Effective between the dates of 11/18/2010 and Permit Expiration Date*

**Applicable Federal Requirement:** 6 NYCRR 212.4 (c)

**Item 5.1:**  
The Compliance Demonstration activity will be performed for the facility:  
The Compliance Demonstration applies to:

- Emission Unit: 0-00001 Emission Point: 00001
- Emission Unit: 0-00001 Emission Point: 00002
- Emission Unit: 0-00001 Emission Point: 00003
- Emission Unit: 0-00001 Emission Point: 00004
- Emission Unit: 0-00002 Emission Point: 00005
- Emission Unit: 0-00003 Emission Point: 00006
- Emission Unit: 0-00004 Emission Point: 00007
- Emission Unit: 0-00005 Emission Point: 00008

**Regulated Contaminant(s):**  
CAS No: 0NY075-00-0 PARTICULATES

**Item 5.2:**  
Compliance Demonstration shall include the following monitoring:

**Monitoring Type:** INTERMITTENT EMISSION TESTING  
**Monitoring Description:**  
Emissions of solid particulates are limited to less than 0.050 grains of particulates per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis.
Compliance testing will be conducted by the facility at the request of the Department.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.050 grains per dscf
Reference Test Method: EPA Method 5
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due every 12 calendar month(s).

**Condition 6: Compliance Demonstration**
**Effective between the dates of 11/18/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 212.6 (a)

**Item 6.1:**
The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

- Emission Unit: 0-00001 Emission Point: 00001
- Emission Unit: 0-00001 Emission Point: 00002
- Emission Unit: 0-00001 Emission Point: 00003
- Emission Unit: 0-00001 Emission Point: 00004
- Emission Unit: 0-00002 Emission Point: 00005
- Emission Unit: 0-00003 Emission Point: 00006
- Emission Unit: 0-00004 Emission Point: 00007
- Emission Unit: 0-00005 Emission Point: 00008

**Item 6.2:**
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
No person shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the performance of a Method 9 opacity evaluation at any time.
during facility operation.

The permittee will conduct observations of visible emissions from the emission unit, process, etc. to which this condition applies at the monitoring frequency stated below while the process is in operation. The permittee will immediately investigate any instance where there is cause to believe that visible emissions above those that are normal and in compliance are occurring or have occurred from a process source.

If visible emissions above those that are normal (this may be zero percent opacity for many or all emission sources) and in compliance with section 212.6(a) are detected, the permittee shall determine the cause, make the necessary correction, and verify that the excess visible emissions problem has been corrected.

If visible emissions above those that are normal and in compliance continue to be present after corrections are made, the permittee will immediately notify The Department and conduct a Method 9 assessment within 24 hours to determine the degree of opacity.

Records of these observations, investigations and corrective actions will be kept on-site in a format acceptable to the Department and the semiannual progress report and annual compliance certifications required of all permittees subject to Title V must include a summary of these instances.

Monitoring Frequency: DAILY
Averaging Method: 6-MINUTE AVERAGE (METHOD 9)
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due every 12 calendar month(s).

***** Emission Unit Level *****

Condition 7: Emission Unit Permissible Emissions
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-7.2

Item 7.1:
The sum of emissions from all regulated processes specified in this permit for the emission unit cited shall not exceed the following Potential to Emit (PTE) rates for each regulated contaminant:
Emission Unit: 0-00001

CAS No: 0NY075-00-5
Name: PM-10
PTE(s): 930 pounds per year

Emission Unit: 0-00002

CAS No: 0NY075-00-5
Name: PM-10
PTE(s): 16,000 pounds per year

Emission Unit: 0-00003

CAS No: 0NY075-00-5
Name: PM-10
PTE(s): 1,250 pounds per year

Emission Unit: 0-00004

CAS No: 0NY075-00-5
Name: PM-10
PTE(s): 5,100 pounds per year

Emission Unit: 0-00005

CAS No: 0NY075-00-5
Name: PM-10
PTE(s): 17 pounds per year
STATE ONLY ENFORCEABLE CONDITIONS
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Public Access to Recordkeeping for Facilities With State Facility Permits - 6 NYCRR 201-1.10 (a)
Where emission source owners and/or operators keep records pursuant to compliance with the operational flexibility requirements of 6 NYCRR Subpart 201-5.4(b)(1) and/or the emission capping requirements of 6 NYCRR Subparts 201-7.2(d), 201-7.3(f), 201-7.3(g), 201-7.3(h)(5), 201-7.3(i) and 201-7.3(j), the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records. Emission source owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department of receipt of the request.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state only enforceable.
Condition 8: Contaminant List
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: ECL 19-0301

Item 8.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit(emission limits, control requirements or compliance monitoring conditions).

CAS No: 0NY075-00-0
Name: PARTICULATES

CAS No: 0NY075-00-5
Name: PM-10

Condition 9: Unavoidable noncompliance and violations
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 201-1.4

Item 9.1:
At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

(a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner's representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supercede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports for equipment maintenance or start-up/shutdown for the facility to the commissioner's representative.

(b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superceded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those
above.

(c) The Department may also require the owner and/or operator to include in reports described under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.

(d) In the event of maintenance, start-up/shutdown or malfunction conditions which result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner, shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.

(e) In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

**Condition 10:** Emission Unit Definition

Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR Subpart 201-5

**Item 10.1:**
The facility is authorized to perform regulated processes under this permit for:

- Emission Unit: 0-00001
- Emission Unit Description: This emission unit represents two cement storage silos that are used to store cement received at the facility. The emissions generated by each storage silo are directed to a dedicated Staclean bin vent.

  Building(s): BLDG1

**Item 10.2:**
The facility is authorized to perform regulated processes under this permit for:

- Emission Unit: 0-00002
- Emission Unit Description: This emission unit represents one 25 MMBtu/hr dual-fired Astec rotary dryer. The emissions generated by this dryer are directed to the outside air through a dedicated exhaust stack. The dryer is used to dry the ground aggregate, prior to cooling.

  Building(s): BLDG1

**Item 10.3:**
The facility is authorized to perform regulated processes under this permit for:

- Emission Unit: 0-00003
- Emission Unit Description: This emission unit represents a bagging operation.
Following the combination and mixing of the cement and the dried ground aggregate. The mixture is bagged via either the individual bagging operation or the bulk bagging machine and the bags are palletized. The emissions generated by this operation are directed to the outside air through a baghouse filter that operates with a particulate removal efficiency of 99%.

Building(s): BLDG1

**Item 10.4:**
The facility is authorized to perform regulated processes under this permit for:
- Emission Unit: 0-00004
  - Emission Unit Description: This emission unit represents the dry aggregate fluid bed cooler operation. The emissions generated by this operation are directed to a dedicated baghouse filter which operates with a particulate matter removal efficiency of 99%.

Building(s): BLDG1

**Item 10.5:**
The facility is authorized to perform regulated processes under this permit for:
- Emission Unit: 0-00005
  - Emission Unit Description: This emission unit represents the dry aggregate storage silo. The emissions generated by this operation are directed to a Staclean bin vent which operates with a particulate matter removal efficiency of 99%.

Building(s): BLDG1

**Condition 13:** Air pollution prohibited
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 211.2

**Item 13.1:**
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**Condition 11:** Compliance Demonstration
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 211.2

**Item 11.1:**
The Compliance Demonstration activity will be performed for the Facility.

**Item 11.2:**
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
- Dust Control Provision for Ground Aggregate:

  The stockpiled ground aggregate must be periodically wetted to contain dust. A three sided, eight-foot high concrete wall bunkers shall contain the aggregate. This area shall be swept with a Tennant Model 800 ride-on sweeper or equivalent, on an as-needed basis for the purpose of minimizing nuisance dust. The Department reserves the right to require additional dust control provisions if determined necessary.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due every 12 calendar month(s).

**Condition 12:** Compliance Demonstration
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 211.2

**Item 12.1:**
The Compliance Demonstration activity will be performed for the Facility.

**Item 12.2:**
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
- The baghouse will be operated at all times that process operations or PM10 emission sources are operating.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due every 12 calendar month(s).

**** Emission Unit Level ****
Condition 14: Emission Point Definition By Emission Unit
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR Subpart 201-5

Item 14.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00001

Emission Point: 00001
  Height (ft.): 61  Diameter (in.): 6
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Emission Point: 00002
  Height (ft.): 61  Diameter (in.): 6
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Emission Point: 00003
  Height (ft.): 61  Diameter (in.): 6
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Emission Point: 00004
  Height (ft.): 61  Diameter (in.): 6
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Item 14.2:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00002

Emission Point: 00005
  Height (ft.): 62  Diameter (in.): 24
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Item 14.3:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00003

Emission Point: 00006
  Height (ft.): 62  Diameter (in.): 24
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1

Item 14.4:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00004

Emission Point: 00007
  Height (ft.): 62  Diameter (in.): 24
  NYTMN (km.): 4532.015  NYTME (km.): 685.572  Building: BLDG1
Item 14.5:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-00005

Emission Point: 00008
Height (ft.): 62
Diameter (in.): 6
NYTMN (km.): 4532.015
NYTME (km.): 685.572
Building: BLDG1

Condition 15: Process Definition By Emission Unit
Effective between the dates of 11/18/2010 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR Subpart 201-5

Item 15.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00001
Process: 001
Source Classification Code: 3-05-102-02
Process Description:
This process represents four cement storage silos that are used to store cement received at the facility. The emissions generated by each storage silo are directed to a dedicated Staclean bin vent.

Emission Source/Control: BNVT1 - Control
Control Type: FABRIC FILTER

Emission Source/Control: BNVT2 - Control
Control Type: FABRIC FILTER

Emission Source/Control: BNVT3 - Control
Control Type: FABRIC FILTER

Emission Source/Control: BNVT4 - Control
Control Type: FABRIC FILTER

Emission Source/Control: STSL1 - Process

Emission Source/Control: STSL2 - Process

Emission Source/Control: STSL3 - Process

Emission Source/Control: STSL4 - Process

Item 15.2:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00002
Process: 002
Source Classification Code: 3-05-027-20
Process Description:
This process represents one 25 MMBTU/hr dual-fired Astec rotary dryer. The emissions generated by this dryer are directed to the outside air through a dedicated exhaust stack. The dryer is used to dry the ground aggregate, prior to cooling.

Emission Source/Control: BGHS1 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DRYER - Process

**Item 15.3:**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00003
Process: 003 Source Classification Code: 3-05-011-99

Process Description:
This process represents a bagging operation. Following the combination and mixing of the cement and the dried ground aggregate. The mixture is bagged via either the individual bagging operation or the bulk bagging machine and the bags are palletized. The emissions generated by this operation are directed to the outside air through a baghouse filter that operates with a particulate removal efficiency of 99%.

Emission Source/Control: BGHS2 - Control
Control Type: FABRIC FILTER

Emission Source/Control: BAGOP - Process

Emission Source/Control: BLKBG - Process

**Item 15.4:**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-00004
Process: 004 Source Classification Code: 3-05-011-99

Process Description:
This process represents the dry aggregate fluid bed cooler operation. The emissions generated by this operation are directed to a dedicated baghouse filter which operates with a particulate matter removal efficiency of 99%.

Emission Source/Control: BGHS3 - Control
Control Type: FABRIC FILTER

Emission Source/Control: COOLR - Process

**Item 15.5:**
This permit authorizes the following regulated processes for the cited Emission Unit:
Emission Unit:  0-00005
Process: 005  Source Classification Code: 3-05-102-02

Process Description:
This process represents the dry aggregate storage silo.
The emissions generated by this operation are directed to
a Staclean bin vent which operates with a particulate
matter removal efficiency of 99%.

Emission Source/Control:  BNVT5 - Control
Control Type: FABRIC FILTER

Emission Source/Control:  STSL5 - Process
