Description:

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: Nancy M Baker
NYSDEC - REGION 4
1130 N WESTCOTT RD
SCHENECTADY, NY 12306-2014

Authorized Signature: ___________________________ Date: ___ / ___ / _____
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS

**** General Provisions ****

For the purpose of your Title V permit, the following section contains state-only enforceable terms and conditions.

GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 21-1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 21-1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 21-1.2:
The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 21-1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 5-1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 5-1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 5-1.2:
The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 5-1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable
Facility DEC ID: 4012400001

hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:  
The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1.3:  
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 5-2: Relationship of this Permit to Other Department Orders and Determinations  
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 5-2.1:  
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 21-2: Relationship of this Permit to Other Department Orders and Determinations  
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 21-2.1:  
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations  
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:  
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 5-3: Applications for permit renewals, modifications and transfers  
Applicable State Requirement: 6 NYCRR 621.11

Item 5-3.1:  
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 5-3.2:  
The permittee must submit a renewal application at least 180 days before expiration of permits.
for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 5-3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 21-3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 21-3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 21-3.2:
The permittee must submit a renewal application at least 180 days before the expiration of permits for Title V and State Facility Permits.

Condition 5: Permit modifications, suspensions or revocations by the Department
Applicable State Requirement: 6 NYCRR 621.13

Item 5.1:
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:
a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

Condition 5-4: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 5-4.1:
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

Condition 4: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

Condition 12-1: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 12-1.1:
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification,
Suspension or revocation include:

- a) materially false or inaccurate statements in the permit application or supporting papers;
- b) failure by the permittee to comply with any terms or conditions of the permit;
- c) exceeding the scope of the project as described in the permit application;
- d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

Condition 21-4: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 21-4.1: The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

- a) materially false or inaccurate statements in the permit application or supporting papers;
- b) failure by the permittee to comply with any terms or conditions of the permit;
- c) exceeding the scope of the project as described in the permit application;
- d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
- e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 6: Submission of application for permit modification or renewal-REGION 4 HEADQUARTERS

Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 6.1: Submission of applications for permit modification or renewal are to be submitted to:

NYSDEC Regional Permit Administrator
Region 4 Headquarters
Division of Environmental Permits
1130 North Westcott Rd.
Schenectady, NY 12306-2014

(518) 35...
Item 12-2.1:
Plans and Schedule
1) Project Schedule: The permittee shall construct and operate the Ravena Plant Modernization Project (the project) in accordance with the project schedule in Figure 1-3 on Page 1-9 of the Final Environmental Impact Statement (FEIS).

2) Conformance with Plans: The permittee shall construct and operate the project in accordance with the FEIS Appendix A Design Plans:

<table>
<thead>
<tr>
<th>D</th>
<th>RVN 000 C902</th>
<th>Rev A</th>
<th>6/15/2010</th>
</tr>
</thead>
</table>

As-builts will be prepared upon the completion of construction to document any Department approved deviations for the Design Plans in Appendix A.

Air Pollution Control
3) Waste Heat Recovery Facility: The permittee shall construct and operate a new six megawatt (MW) waste heat recovery cogeneration unit in accordance with the Phase 2 project schedule in Figure 1-3 on page 1-9 of the FEIS and startup no later than 12/31/2019. The permittee shall install and operate the cogeneration unit in accordance with:

4) Enclose Raw Material Piles: The permittee shall enclose the limestone raw material pile in accordance with the Phase 2 project schedule in Figure 1-3 on page 1-9 of the FEIS no later than 12/31/2019. The permittee shall enclose the limestone raw material pile as indicated on or in accordance with:

The facility plans and the graphic depiction of the proposed facility represented in the DEIS (see graphic depiction Lafarge Modernization Project FEIS Cover - simulated photo, and Appendix A Design Drawings: D RVN 000 C902 A), August 2010.

The Air Title V application, Tab C submitted September 2010.

This enclosure will result in new emission points in accordance with Tab C of the September 2010 submitted Air Title V application, dust collector #3, emission point 13802, and dust collector #4, emission point 13803 which are both in emission unit #0-21000 as shown on drawing RVN 138 L011 in Tab J of the April 2009 air application.

5) Particulate Monitoring: The permittee shall install, maintain and operate two PM10/PM2.5 monitors in accordance with the requirements in Chapter 20, Section 20.8.4, August 2010 Draft Environmental Impact Statement for a period of 365 days commencing upon the operation of the new kiln near the Ravena Plant site. As depicted on Figure 22-2PM (Attachment A) one monitor shall be installed and operated at the northwestern edge of the Ravena Plant site (location is on Lafarge property adjacent to the intersection of the Old Ravena Road bridge over the railroad tracks), and one shall be installed and operated at the Ravena-Coeymans-Selkirk High School with the specific location to be determined. The permittee shall submit a monitoring protocol to the Department for review and approval no less than 120 days before installation. Data shall be provided to the Department in electronic form on a monthly basis by no later than the 15th day of the following month. The Department reserves the right to require continued operation of these air monitors based upon the data collected. If the data confirms that both sites are below the annual average standard and there are no exceedances of the daily standard, the Department will allow Lafarge to discontinue the monitoring program. If the data indicates marginal compliance with the annual standard and/or exceedances of the daily standard, the Department will require the monitoring program to continue.

6) Tire Derived Fuel: Tire Derived Fuel (TDF) is authorized in the existing currently operating cement kilns only if constructed and operated in strict accordance with the permit application documents listed below:

Environmental Assessment Form and all attachments and figures (signed 7/19/2005).

Beneficial Use Determination including all Appendices, Application or Modification of Part 360 Permit – Tire Storage Facility Permit (11/22/2004) and all appendices, attachments and plans.

Revised Title V Air Permit Application, May 3, 2005.

Revised Application for Mid-Kiln Firing of Tire Derived Fuel – Lafarge Building Material, Inc.,
Facility DEC ID: 4012400001

Ravena NY (January, 2005).

Plans – Tire Derived Fuel – Parking/Storage, Haul Road Handling and Feed Drawings 607B205 (3/31/06), 607B207 (3/31/06), 607B215 (3/31/06), 607B216 (3/31/06), RVN663D001 (3/14/06), RVN663D002 (9/20/05), RVND003 (4/14/06), RVN663D004 (9/23/05), RVN663D005 (10/7/05).

Letter from William Clarke NYSDEC to Lafarge, June 28, 2005.

Visual
7) Tower/Stack Design and Exhaust Plume: The permittee shall construct the pre-heater/pre-calciner structure in accordance with the “Partially Enclosed Tower/Stack Structure” (PET/SS) as described in the FEIS in Chapter 9 Section 9.5, page 9-53 and Chapter 25 pages 25-9, 25-12 and depicted graphically in Figures 9-36 through 9-44 inclusive, Figure 25-7, graphic depiction Lafarge Modernization Project FEIS Cover - simulated photo and the Design Plans in Appendix A listed in Special Condition 2 above. The permittee shall implement the operating parameters as described on page 9-75 (including Table 9-3) of the FEIS.

8) Existing Stack Demolition: The permittee shall adhere to the stack demolition schedule in accordance with the project schedule in Figure 1-3 on page 1-9 of the FEIS.

9) Landscaping Schedule: Within 120 days of the effective date this permit, the permittee shall prepare and submit a visual enhancement and screening landscaping plan – including an implementation schedule - to the Department for review and approval.

Noise
10) Noise: The permittee shall not exceed the total noise levels and increase (or incremental) in noise levels due to the construction and operation of the modernized Ravena Plant as shown in the FEIS Tables 22-8 through 22-20 inclusive and Section 22.6.5 on page 22-23 with Table 22-7. The receptors identified in these tables are shown in the FEIS Figures 22-2, 22-3 and 22-4.

Wildlife and Habitat
11) Wildlife Management Plan: Within 180 days of the effective date of this permit, the permittee shall submit to the Department for review and approval a 2011 update of the “2006 Wildlife Management Plan Update” prepared by a professional wildlife biologist or ecologist and which has been revised in response to 6/7/2011 Department comments including an updated current map covering undeveloped lands keyed to the updated management plan. Additional changes to the plan shall be made by the permittee as directed by the Department in order to achieve an approvable document. The permittee shall implement the department approved plan within 30 days of approval.

12) Bat/Bird Monitoring Plan: Within 180 days of the effective date of this permit, the permittee shall submit to the Department for review and approval, a protocol for monitoring bird and bat strikes on the preheater/precalciner tower during the first spring and fall migration period following construction of the tower. The monitoring protocol shall be prepared by a professional wildlife biologist or ecologist and incorporate monitoring methods contained in recent scientific studies intended to evaluate post-construction bird mortalities associated with wind turbines, communication towers, and other structures, and shall contain a Literature Cited
section referencing relevant studies, projects or recommendations. The March 2010 report submitted to the US Fish & Wildlife Service (USFWS) by the Wind Turbine Guidelines Advisory Committee shall be considered in the report and referenced. Within 30 days after the end of the first migration period (Spring or Fall) following the construction of the tower the permittee shall submit for review and approval an interim report to the Department including any recommendations with an implementation schedule to minimize to the maximum extent practicable bat and/or bird mortality if found to occur during the monitoring period. Within 60 days of the end of the second post construction migration season which follows the first (i.e. Spring followed by Fall or Fall followed by Spring) the permittee shall submit for review and approval a final report to the Department including any recommendations with an implementation schedule to minimize to the maximum extent practicable bat and/or bird mortality if found to occur during the monitoring period.

**Condition 7: Tire derived fuel**

**Applicable State Requirement:** 6 NYCRR 621.4 (g)

**Item 7.1:**
The permittee shall construct and operate the approved project to use Tire Derived Fuel (TDF) in firing the cement kilns in strict accordance with the permit application including supporting documentation such as, but not limited to, modeling. Such documents are listed below:

*Environmental Assessment Form and all attachments and figures (signed 7/19/2005).
*Beneficial Use Determination including all Appendices, Application for Modification of Part 360 Permit - Tire Storage Facility Permit (11/22/2004) and all appendices, attachments and plans.
*Revised Title V Air Permit Application, May 3, 2005
*Plans - Tire Derived Fuel - Parking/Storage, Haul Road Handling and Feed Drawings 607B205 (3/31/06), 607B207 (3/31/06), 607B215 (3/31/06), 607B216 (3/31/06), RVN663D001 (3/14/06), RVN663D002 (9/20/05), RVND003 (4/14/06), RVN663D004(9/23/05), RVN663D005 (10/7/05).
*Letter from William Clarke, NYSDEC to Lafarge, June 28, 2005
*Letter from Lafarge to Mr. Thomas Haley, NYSDEC, June 21, 2004

Where there is a conflict between specific parts of the application and specific permit conditions the specific permit conditions shall supercede and apply. (See also 6 NYCRR 201-6.3.)

FEDERALLY ENFORCEABLE CONDITIONS
Renewal 1/Mod 21/FINAL

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
The items listed below are not subject to the annual compliance certification requirements under Title V. Permittees may also have other obligations under regulations of general applicability.

Item A: Public Access to Recordkeeping for Title V Facilities - 6 NYCRR 201-1.10 (b)
The Department will make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the Act, except for information entitled to confidential treatment pursuant to 6 NYCRR Part 616 - Public Access to records and Section 114(c) of the Act.

Item B: Timely Application for the Renewal of Title V Permits - 6 NYCRR 201-6.2 (a) (4)
Owners and/or operators of facilities having an issued Title V permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Item C: Certification by a Responsible Official - 6 NYCRR 201-6.2 (d) (12)
Any application, form, report or compliance certification required to be submitted pursuant to the federally enforceable portions of this permit shall contain a certification of truth, accuracy and completeness by a responsible official. This certification shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Item D: Requirement to Comply With All Conditions - 6 NYCRR 201-6.4 (a) (2)
The permittee must comply with all conditions of the Title V facility permit. Any permit non-compliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

Item E: Permit Revocation, Modification, Reopening, Reissuance or Termination, and Associated Information Submission Requirements - 6 NYCRR 201-6.4 (a) (3)
This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and
reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

**Item F:** **Cessation or Reduction of Permitted Activity Not a Defense - 6 NYCRR 201-6.4 (a) (5)**

It shall not be a defense for a permittee in an enforcement action to claim that a cessation or reduction in the permitted activity would have been necessary in order to maintain compliance with the conditions of this permit.

**Item G:** **Property Rights - 6 NYCRR 201-6.4 (a) (6)**

This permit does not convey any property rights of any sort or any exclusive privilege.

**Item H:** **Severability - 6 NYCRR 201-6.4 (a) (9)**

If any provisions, parts or conditions of this permit are found to be invalid or are the subject of a challenge, the remainder of this permit shall continue to be valid.

**Item I:** **Permit Shield - 6 NYCRR 201-6.4 (g)**

All permittees granted a Title V facility permit shall be covered under the protection of a permit shield, except as provided under 6 NYCRR Subpart 201-6. Compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that such applicable requirements are included and are specifically identified in the permit, or the Department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the major stationary source, and the permit includes the determination or a concise summary thereof. Nothing herein shall preclude the Department from revising or revoking the permit pursuant to 6 NYCRR Part 621 or from exercising its summary abatement authority. Nothing in this permit shall alter or affect the following:

i. The ability of the Department to seek to bring suit on behalf of the State of New York, or the Administrator to seek to bring suit on behalf of the United States, to immediately restrain any person causing or contributing to pollution presenting an imminent and substantial endangerment to public health, welfare or the environment to stop the emission of air pollutants causing or contributing to such pollution;

ii. The liability of a permittee of the Title V
facility for any violation of applicable requirements prior to or at the time of permit issuance;

iii. The applicable requirements of Title IV of the Act;

iv. The ability of the Department or the Administrator to obtain information from the permittee concerning the ability to enter, inspect and monitor the facility.

**Item J: Reopening for Cause - 6 NYCRR 201-6.4 (i)**

This Title V permit shall be reopened and revised under any of the following circumstances:

i. When additional applicable requirements under the act become applicable to a title V facility with a remaining permit term of three or more years, a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended by the department pursuant to the provisions of section 201-6.6 of this Subpart.

ii. The Department or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

iii. The Department or the Administrator determines that the Title V permit must be revised or reopened to assure compliance with applicable requirements.

iv. If the permitted facility is an "affected source" subject to the requirements of Title IV of the Act, and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

Proceedings to reopen and issue Title V facility permits shall follow the same procedures as apply to initial permit issuance but shall affect only those parts of the permit for which cause to reopen exists.

Reopenings shall not be initiated before a notice of such intent is provided to the facility by the Department at least thirty days in advance of the date that the permit
is to be reopened, except that the Department may provide a shorter time period in the case of an emergency.

**Item K: Permit Exclusion - ECL 19-0305**
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

**Item L: Federally Enforceable Requirements - 40 CFR 70.6 (b)**
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

**MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS SUBJECT TO ANNUAL CERTIFICATIONS AT ALL TIMES**
The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements at all times.

**Condition 1: Acceptable Ambient Air Quality**
*Effective between the dates of 09/13/2010 and Permit Expiration Date*

Applicable Federal Requirement:6 NYCRR 200.6

**Item 1.1:**
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where
contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

**Condition 20-1: Fees**  
Effective between the dates of 12/09/2014 and Permit Expiration Date  

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (a) (7)

**Item 20-1.1:**  
The owner and/or operator of a stationary source shall pay fees to the Department consistent with the fee schedule authorized by ECL 72-0303.

**Condition 20-2: Recordkeeping and Reporting of Compliance Monitoring**  
Effective between the dates of 12/09/2014 and Permit Expiration Date  

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c)

**Item 20-2.1:**  
The following information must be included in any required compliance monitoring records and reports:

(i) The date, place, and time of sampling or measurements;

(ii) The date(s) analyses were performed;

(iii) The company or entity that performed the analyses;

(iv) The analytical techniques or methods used including quality assurance and quality control procedures if required;

(v) The results of such analyses including quality assurance data where required; and

(vi) The operating conditions as existing at the time of sampling or measurement.

Any deviation from permit requirements must be clearly identified in all records and reports. Reports must be certified by a responsible official, consistent with Section 201-6.2 of Part 201.

**Condition 20-3: Records of Monitoring, Sampling, and Measurement**  
Effective between the dates of 12/09/2014 and Permit Expiration Date  

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c) (2)

**Item 20-3.1:**  
Compliance monitoring and recordkeeping shall be conducted according to the terms and conditions contained in this permit and shall follow all quality assurance requirements found in applicable regulations. Records of all monitoring data and support information must be retained for a period of at least 5 years from the date of the monitoring, sampling, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all
reports required by the permit.

**Condition 20-4: Compliance Certification**

*Effective between the dates of 12/09/2014 and Permit Expiration Date*

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (c) (3) (ii)

**Item 20-4.1:**
The Compliance Certification activity will be performed for the Facility.

**Item 20-4.2:**
Compliance Certification shall include the following monitoring:

- Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
- Monitoring Description:

  To meet the requirements of this facility permit with respect to reporting, the permittee must:

  Submit reports of any required monitoring at a minimum frequency of every 6 months, based on a calendar year reporting schedule. These reports shall be submitted to the Department within 30 days after the end of a reporting period. All instances of deviations from permit requirements must be clearly identified in such reports. All required reports must be certified by the responsible official for this facility.

  Notify the Department and report permit deviations and incidences of noncompliance stating the probable cause of such deviations, and any corrective actions or preventive measures taken. Where the underlying applicable requirement contains a definition of prompt or otherwise specifies a time frame for reporting deviations, that definition or time frame shall govern. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations shall be submitted to the permitting authority based on the following schedule:

  1. For emissions of a hazardous air pollutant (as identified in an applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.

  2. For emissions of any regulated air pollutant, excluding those listed in paragraph (1) of this section, that continue for more than two hours in excess of permit requirements, the report must be made within 48 hours.

  3. For all other deviations from permit requirements,
the report shall be contained in the 6 month monitoring report required above.

(4) This permit may contain a more stringent reporting requirement than required by paragraphs (1), (2) or (3) above. If more stringent reporting requirements have been placed in this permit or exist in applicable requirements that apply to this facility, the more stringent reporting requirement shall apply.

If above paragraphs (1) or (2) are met, the source must notify the permitting authority by telephone during normal business hours at the Regional Office of jurisdiction for this permit, attention Regional Air Pollution Control Engineer (RAPCE) according to the timetable listed in paragraphs (1) and (2) of this section. For deviations and incidences that must be reported outside of normal business hours, on weekends, or holidays, the DEC Spill Hotline phone number at 1-800-457-7362 shall be used. A written notice, certified by a responsible official consistent with 6 NYCRR Part 201-6.2(d)(12), must be submitted within 10 working days of an occurrence for deviations reported under (1) and (2). All deviations reported under paragraphs (1) and (2) of this section must also be identified in the 6 month monitoring report required above.

The provisions of 6 NYCRR 201-1.4 shall apply if the permittee seeks to have a violation excused unless otherwise limited by regulation. In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets. Notwithstanding any recordkeeping and reporting requirements in 6 NYCRR 201-1.4, reports of any deviations shall not be on a less frequent basis than the reporting periods described in paragraphs (1) and (4) above.

In the case of any condition contained in this permit with a reporting requirement of "Upon request by regulatory agency" the permittee shall include in the semiannual report, a statement for each such condition that the monitoring or recordkeeping was performed as required or requested and a listing of all instances of deviations from these requirements.

In the case of any emission testing performed during the previous six month reporting period, either due to a request by the Department, EPA, or a regulatory requirement, the permittee shall include in the semiannual
report a summary of the testing results and shall indicate whether or not the Department or EPA has approved the results.

All semiannual reports may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). Mailing addresses for the above referenced persons are contained in the monitoring condition for 6 NYCRR Part 201-6.4(e), contained elsewhere in this permit.

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2015.  
Subsequent reports are due every 6 calendar month(s).

**Condition 20-5: Compliance Certification**  
*Effective between the dates of 12/09/2014 and Permit Expiration Date*

**Applicable Federal Requirement:** 6 NYCRR 201-6.4 (e)

**Item 20-5.1:**  
The Compliance Certification activity will be performed for the Facility.

**Item 20-5.2:**  
Compliance Certification shall include the following monitoring:

**Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES  
**Monitoring Description:**  
Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:  
- the identification of each term or condition of the permit that is the basis of the certification;  
- the compliance status;  
- whether compliance was continuous or intermittent;  
- the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related recordkeeping and reporting requirements of this permit;  
- such other facts as the Department may require to determine the compliance status of the facility as
specified in any special permit terms or conditions; and
- such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards, or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters. The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All annual compliance certifications may be submitted electronically or physically. Electronic reports shall be submitted using the Department’s Air Compliance and Emissions Electronic-Reporting system (ACE). If the facility owner or operator elects to send physical copies instead, two copies shall be sent to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office) and one copy shall be sent to the Administrator (or his or her representative). The mailing addresses for the above referenced persons are:

Chief – Stationary Source Compliance Section
USEPA Region 2
Air Compliance Branch
290 Broadway
New York, NY 10007-1866

The address for the RAPCE is as follows:

Regional Air Pollution Control Engineer
NYSDEC Region 4 Headquarters
1130 North Westcott Road
Schenectady, NY 12306-2014

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance  
625 Broadway  
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY  
Reporting Requirements: ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2011.  
Subsequent reports are due on the same day each year

**Condition 6: Compliance Certification**  
**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 202-2.1

**Item 6.1:**  
The Compliance Certification activity will be performed for the Facility.

**Item 6.2:**  
Compliance Certification shall include the following monitoring:

- Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
- Monitoring Description:  
  Emission statements shall be submitted on or before April 15th each year for emissions of the previous calendar year.

- Monitoring Frequency: ANNUALLY  
- Reporting Requirements: ANNUALLY (CALENDAR)  
- Reports due by April 15th for previous calendar year

**Condition 7: Recordkeeping requirements**  
**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 202-2.5

**Item 7.1:**  
(a) The following records shall be maintained for at least five years:

1. a copy of each emission statement submitted to the department; and
2. records indicating how the information submitted in the emission statement was determined, including any calculations, data, measurements, and estimates used.

(b) These records shall be made available at the facility to the representatives of the department upon request during normal business hours.

**Condition 8: Open Fires - Prohibitions**  
**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 215.2
Item 8.1:
Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item 8.2
Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.
(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.
(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.
(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.
(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.
(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.
(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.
(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.
(i) Prescribed burns performed according to Part 194 of this Title.
(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.
(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.
(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

MANDATORY FEDERALLY ENFORCEABLE PERMIT CONDITIONS
SUBJECT TO ANNUAL CERTIFICATIONS ONLY IF APPLICABLE
The following federally enforceable permit conditions are mandatory for all Title V permits and are subject to annual compliance certification requirements only if effectuated during the reporting period.

[NOTE: The corresponding annual compliance certification for those conditions not effectuated during the reporting period shall be specified as "not applicable".]

**Condition 9: Maintenance of Equipment**

Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 200.7

**Item 9.1:**

Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.

**Condition 20-6: Recycling and Salvage**

Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-1.7

**Item 20-6.1:**

Where practical, the owner or operator of an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of the ECL.

**Condition 11: Prohibition of Reintroduction of Collected Contaminants to the air**

Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-1.8

**Item 11.1:**

No person shall unnecessarily remove, handle or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

**Condition 20-7: Exempt Sources - Proof of Eligibility**

Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-3.2 (a)

**Item 20-7.1:**

The owner or operator of an emission source or activity that is listed as being exempt may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all records necessary for demonstrating compliance with this Subpart on-site for a period of five years, and make them available to representatives of the department upon request.

**Condition 20-8: Trivial Sources - Proof of Eligibility**
Air Pollution Control Permit Conditions

Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-3.3 (a)

Item 20-8.1:
The owner or operator of an emission source or activity that is listed as being trivial in this Section may be required to certify that it is operated within the specific criteria described in this Subpart. The owner or operator of any such emission source or activity must maintain all required records on-site for a period of five years and make them available to representatives of the department upon request.

Condition 20-9: Requirement to Provide Information
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (4)

Item 20-9.1:
The owner and/or operator shall furnish to the department, within a reasonable time, any information that the department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to the administrator along with a claim of confidentiality, if the administrator initiated the request for information or otherwise has need of it.

Condition 20-10: Right to Inspect
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-6.4 (a) (8)

Item 20-10.1:
The department or an authorized representative shall be allowed upon presentation of credentials and other documents as may be required by law to:

(i) enter upon the permittee's premises where a facility subject to the permitting requirements of this Subpart is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(ii) have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(iii) inspect at reasonable times any emission sources, equipment (including monitoring and air pollution control equipment), practices, and operations regulated or required under the permit; and

(iv) sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

Condition 20-11: Off Permit Changes
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 6 NYCRR 201-6.4 (f) (6)

Item 20-11.1:
No permit revision will be required for operating changes that contravene an express permit term, provided that such changes would not violate applicable requirements as defined under this Part or contravene federally enforceable monitoring (including test methods), recordkeeping, reporting, or compliance certification permit terms and conditions. Such changes may be made without requiring a permit revision, if the changes are not modifications under any provision of title I of the act and the changes do not exceed the emissions allowable under the permit (whether expressed therein as a rate of emissions or in terms of total emissions) provided that the facility provides the administrator and the department with written notification as required below in advance of the proposed changes within a minimum of seven days. The facility owner or operator, and the department shall attach each such notice to their copy of the relevant permit.

(i) For each such change, the written notification required above shall include a brief description of the change within the permitted facility, the date on which the change will occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the change.

(ii) The permit shield described in section 6 NYCRR 201-6.4 shall not apply to any change made pursuant to this paragraph.

Condition 18: Required Emissions Tests
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 202-1.1

Item 18.1:
For the purpose of ascertaining compliance or non-compliance with any air pollution control code, rule or regulation, the commissioner may require the person who owns such air contamination source to submit an acceptable report of measured emissions within a stated time.

Condition 20: Accidental release provisions.
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 40 CFR Part 68

Item 20.1:
If a chemical is listed in Tables 1, 2, 3 or 4 of 40 CFR §68.130 is present in a process in quantities greater than the threshold quantity listed in Tables 1, 2, 3 or 4, the following requirements will apply:

a) The owner or operator shall comply with the provisions of 40 CFR Part 68 and;

b) The owner or operator shall submit at the time of permit issuance (if not previously submitted) one of the following, if such quantities are present:
1) A compliance schedule for meeting the requirements of 40 CFR Part 68 by the date provided in 40 CFR §68.10(a) or,

2) A certification statement that the source is in compliance with all requirements of 40 CFR Part 68, including the registration and submission of the Risk Management Plan. Information should be submitted to:

Risk Management Plan Reporting Center
C/O CSC
8400 Corporate Dr
Carrollton, Md. 20785

**Condition 21: Recycling and Emissions Reduction**

Effective between the dates of 09/13/2010 and Permit Expiration Date

**Applicable Federal Requirement:** 40CFR 82, Subpart F

**Item 21.1:**
The permittee shall comply with all applicable provisions of 40 CFR Part 82.

The following conditions are subject to annual compliance certification requirements for Title V permits only.

**Condition 22: Compliance Certification**

Effective between the dates of 09/13/2010 and Permit Expiration Date

**Applicable Federal Requirement:** 6 NYCRR 200.7

**Item 22.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

**Item 22.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The "Precipitator Maintenance Plan" submitted to the Department December 15, 1992 (written by Lawrence Stevens)
of J. R. Hall, Ltd.) and the applicable recommendations of Chapter III, Parts 3 and 4 of the "2007 Evaluation Performance of the Kilns and Electrostatic Precipitators" dated June 29, 2007 (by TRK Engineering Services, Carlisle, MA) shall be implemented.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

**Condition 23:** Emission Unit Definition

**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-6

**Item 23.1 (From Mod 20):**
The facility is authorized to perform regulated processes under this permit for:
- **Emission Unit:** 0-20000
- **Emission Unit Description:**
  
  THIS UNIT CONSISTS OF EXISTING SOURCES INVOLVED IN THE HANDLING OF THE RAW MATERIALS AND SOLID FUELS AT THE FACILITY.

  **Building(s):** 2NDCRUSHER

**Item 23.2 (From Mod 20):**
The facility is authorized to perform regulated processes under this permit for:
- **Emission Unit:** 0-21000
- **Emission Unit Description:**
  
  THIS UNIT CONSISTS OF NEW RAW MATERIALS AND ADDITIVES, STORAGE EQUIPMENT, INCLUDING A NEW SECONDARY CRUSHER AND SCREEN.

  **Building(s):** NEW2NDCR
  PREBLEND
  RAWMAT1
  RAWMAT2

**Item 23.3 (From Mod 12):**
The facility is authorized to perform regulated processes under this permit for:
- **Emission Unit:** 0-22000
- **Emission Unit Description:**
  
  THIS UNIT CONSISTS OF THE NEW COAL HANDLING, STORAGE, AND PROCESSING SOURCES.

  **Building(s):** ASF
  COALBH
  COALRAW1
  PFSILO

**Item 23.4 (From Mod 20):**
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-33000
Emission Unit Description:
THIS UNIT CONSISTS OF THE NEW RAW MILL AND KILN FEED SOURCES.

Building(s): BLEND
PREHEAT
RAWMILL
RMCYCLON

Item 23.5(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-41100
Emission Unit Description:
THIS UNIT CONSISTS OF THE NEW KILN SYSTEM AND CLINKER COOLER INCLUDING THE KILN, IN-LINE RAW MILL, PREHEATER/PRECALCINER, SOLID FUEL MILL, ALKALI BYPASS, AND CLINKER COOLER, ALL VENTED THROUGH THE MAIN KILN STACK.

Building(s): PREHEAT

Item 23.6(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-41200
Emission Unit Description:
THIS UNIT CONSISTS OF THE KILN AND BYPASS DUCT SYSTEM AND ASSOCIATED DUST COLLECTORS.

Building(s): BYPASS
SCRUBBER

Item 23.7(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-42000
Emission Unit Description:
THIS UNIT CONSISTS OF EXISTING CLINKER DRAG CONVEYORS, BUCKET ELEVATORS, STORAGE SILOS NOS. 8 AND 11 AND ASSOCIATED DUST COLLECTORS. THE DUST SCOOP SYSTEMS CURRENTLY PERMITTED AS PART OF THIS UNIT WILL BE REMOVED.

Building(s): DISCHENDBG
MILLBLDING
PUGBLDG

Item 23.8(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-43000
Emission Unit Description:
THIS UNIT CONSISTS OF THE NEW CLINKER HANDLING AND STORAGE EQUIPMENT AND ASSOCIATED DUST COLLECTORS.

Building(s): CLINK1
CLINK2
CLINKER
COOLER
HOTBIN

Item 23.9 (From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-51000
Emission Unit Description:
THIS UNIT CONSISTS OF EXISTING AND MODIFIED EQUIPMENT ASSOCIATED WITH FINISH MILL NO. 1. THIS INCLUDES FEED BELTS TO THE CEMENT MILL, CONVEYING EQUIPMENT AFTER THE MILL (BUCKET ELEVATOR AND AIR SLIDES), THE MILL 1 SEPARATOR AND CEMENT COOLER. ALL OF THE COMPONENTS OF THE CEMENT MILL 1 SYSTEM ARE CONTAINED IN THE MILL BUILDING.

Building(s): MILLBLDG
MILLBLDING

Item 23.10 (From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-52000
Emission Unit Description:

Building(s): MILLBLDING

Item 23.11 (From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-53000
Emission Unit Description:
THIS UNIT CONSISTS OF EXISTING AND MODIFIED EQUIPMENT ASSOCIATED WITH FINISH MILL NO. 3. THIS INCLUDES FEED BELTS TO THE CEMENT MILL, THE MILL, CONVEYING EQUIPMENT AFTER THE MILL (BUCKET ELEVATOR AND AIR SLIDES), THE MILL 3 SEPARATOR AND
CEMENT COOLER. COMPONENTS OF THE CEMENT MILL 1 SYSTEM ARE CONTAINED IN THE MILL BUILDING.

Building(s): MILLBLDG
MILLBLDING

Item 23.12(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-54000
Emission Unit Description:
EMISSION UNIT 054000 CONSISTS OF THE CEMENT MILL 4 SYSTEM. THIS INCLUDES FEED BELTS TO THE CEMENT MILL, THE MILL, CONVEYING EQUIPMENT AFTER THE MILL (BUCKET ELEVATOR AND AIR SLIDES), THE TWO MILL 4 SEPARATORS AND CEMENT COOLER. ALL OF THE COMPONENTS OF THE CEMENT MILL 4 SYSTEM ARE CONTAINED IN THE MILL BUILDING.

Building(s): MILLBLDING

Item 23.13(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-55000
Emission Unit Description:
THIS UNIT CONSISTS OF ALL EQUIPMENT ASSOCIATED WITH NEW FINISH MILL NO. 5 INCLUDING THE ADDITIVE STORAGE AND MILL FEED SYSTEMS.

Building(s): FM5
FM5BH
FMBINS
MILLBLDG

Item 23.14(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-71000
Emission Unit Description:
THIS UNIT CONSISTS OF EXISTING CEMENT STORAGE, LOADOUT AND PRODUCT SHIPMENT ACTIVITIES AT THE FACILITY. SPECIFICALLY, THIS INCLUDES THE CUSTOMER SILOS, NORTH AND SOUTH TRUCK LOADING SPOUTS, THE RAILCAR LOADING SPOUTS LOCATED AT THE CUSTOMER SILOS, AND THE EAST AND WEST BAGGING MACHINES LOCATED IN THE PACKHOUSE AS WELL AS THE REVERSIBLE CONVEYORS WHICH TRANSFER PRODUCT TO THESE AREAS. MISCELLANEOUS EMISSION SOURCES ASSOCIATED WITH THE PACKHOUSE (BAG SHREDDER AND VACUUM) ARE
Item 23.15(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
   Emission Unit: 0-71100
   Emission Unit Description:
   THIS UNIT CONSISTS OF THE NEW CEMENT TRANSFER SYSTEM.

   Building(s): CUSTOSILOS

Item 23.16(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
   Emission Unit: 0-72000
   Emission Unit Description:
   THIS UNIT CONSISTS OF EXISTING COVERED BELT CONVEYORS USED TO TRANSPORT FINISHED CEMENT BETWEEN THE CUSTOMER AND BUFFER SILOS AND FROM THE SILOS TO THE WHARF AREA FOR BARGE SHIPMENT. IT ALSO INCLUDES THE BUFFER SILOS. THE BELT THAT TRANSFERS PRODUCT BETWEEN THE CUSTOMER AND BUFFER SILOS IS LOCATED AT THE NORTH END OF THE BUFFER SILOS. THE THREE BELTS WHICH TRANSPORT PRODUCT TO THE WHARF ARE BELTS 8A, 8B, AND 9. PARTICULATE EMISSIONS FROM ALL TRANSFER POINTS ARE CONTROLLED BY BAGHOUSES.

   Building(s): BUFFESILOS

Item 23.17(From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
   Emission Unit: 0-90000
   Emission Unit Description:
   EMISSION UNIT 090000 CONTAINS EXISTING EMISSION SOURCES INVOLVED IN THE FACILITY’S QUARRY OPERATIONS. THIS INCLUDES THE PRIMARY CRUSHER LOCATED IN THE PRIMARY CRUSHER BUILDING.

   Building(s): PRCRUSHER

Item 23.18(From Mod 12):
The facility is authorized to perform regulated processes under this permit for:
   Emission Unit: 0-91000
   Emission Unit Description:
   THIS UNIT CONSISTS OF THE PLANT ROADS AND PILES OUTSIDE THE QUARRY.
Item 23.19 (From Mod 20):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: EMISSION UNIT 100000 CONTAINS EXISTING EMISSION SOURCES INVOLVED IN THE FACILITY'S WHARF OPERATIONS. THIS INCLUDES THE TRANSFER OF FINISHED PRODUCT FROM BELT 9 TO BARGES. PARTICULATE EMISSIONS FROM THIS TRANSFER IS CONTROLLED BY A BAGHOUSE.

Building(s): WHARF AREA

Condition 20-12: Progress Reports Due Semiannually
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 6 NYCRR 201-6.4 (d) (4)

Item 20-12.1:
Progress reports consistent with an applicable schedule of compliance are to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the department. Such progress reports shall contain the following:

(i) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(ii) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

Condition 20-13: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 6 NYCRR 201-6.4 (f)

Item 20-13.1:
The Compliance Certification activity will be performed for the Facility.

Item 20-13.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Alternate Operating Scenario and a Protocol for alternate fuels/raw materials as allowed under 6NYCRR Subdivision 201-6.4(f).

Protocol For Use of Non-Hazardous Alternate Fuels And Raw Materials:
This protocol (provided by 6 NYCRR 201-6.4(f) shall be used to evaluate the use of alternate non-hazardous fuels and raw materials in the manufacture of Portland cement. The kiln systems traditionally burn a mixture of coal and petroleum coke as well as distillate fuel. The raw feed to the existing kilns (K12) is a slurry, which contains the following components: a calcium source; silica sources; alumina sources; and iron sources. Gypsum is also a raw material added to the clinker in the finish mills.

The following protocol outlines procedures for evaluating proposed alternate fuels and raw materials for compliance with applicable requirements and for notifying the NYSDEC of proposed fuel and raw material changes.

Lafarge shall adhere to the following criteria when evaluating the use of proposed alternate fuels and/or raw materials:

1. Paragraph 201-6.4(f)(1) criteria.

2. Proposed alternate material shall not be classified as a RCRA hazardous waste according to 40 CFR 261. This determination may be made by lab analyses and/or engineering judgment.

3. Proposed alternate materials shall not be medical wastes according to 40 CFR 259.

4. Proposed alternate materials must be determined to be acceptable in accordance with Lafarge's Alternate Fuels and Raw Materials Management Program.

5. The use of an alternate fuel shall not cause the as-burned sulfur content in solid fuel to exceed the limits in Subpart 225-1.
6. Use of fuels other than natural gas, coal, petroleum coke, oil, and tire derived fuel will not be authorized under the Operational Flexibility Condition.

7. The storage and handling of alternate non-hazardous materials shall be conducted such that fugitive emissions are minimized in accordance with 6 NYCRR Part 211.

8. Kiln stack emissions shall not exceed the following limitations when burning alternate non-hazardous fuels and/or when processing alternate non-hazardous raw materials:

a. Particulate matter emissions of 0.05 gr/dscf per 6 NYCRR Subdivision 220-1.2(b).

b. Average six-minute opacity levels of 20 % per 6 NYCRR Subdivision220-1.4(a).

c. Oxides of nitrogen emissions limits established in this permit.

d. The mercury cap established in this permit.

e. Any limitations promulgated under 40 CFR Part 63 Subpart LLL

f. The carbon monoxide cap.

9. The most current DAR-1 AGC/SGC Tables shall be used as a guideline where there is an emission rate increase for a particular contaminant or the emission of a new contaminant. Predicted ambient impacts are compared to guideline values to assess the acceptability of a proposed new source. The word guideline is stressed because these values are developed to aid in the regulatory decision making process...

Toxicity ratings and Annual Guideline Concentration (AGC) and Short-term Guideline Concentration (SGC) for each contaminant are
found in the tables. Refined modeling may be used.

Emissions estimates for alternate materials use shall be determined using published emissions factors, performing mass balance calculations, performing stack testing and/or by engineering judgment.

If stack testing is to be performed, the NYSDEC will be notified.

Proposed alternative fuels and/or raw materials shall not increase toxic emission rates.

After evaluating proposed alternate fuel(s) and/or raw materials(s), Lafarge shall notify the NYSDEC in writing of its intention to use the alternate material that meets the criteria outlined above. The report to the NYSDEC shall include:

1. A characterization of the material (including any results of stack testing)
2. The intended substitution rate of the material
3. A description of the method of introduction into the kilns
4. Operating parameters associated with the material's introduction into the kilns
5. Calculated emission estimates (see above)
6. Documentation of the DAR-1 analysis

This protocol does not eliminate Lafarge's obligation to comply with applicable rules nor does this protocol eliminate the need to seek the appropriate pre-construction permits applicable.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 25: Compliance Certification
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 201-6.5 (e)

Item 25.1:
The Compliance Certification activity will be performed for the Facility.

Item 25.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Requirements for compliance certifications with terms and conditions contained in this facility permit include the following:

i. Compliance certifications shall contain:
   - the identification of each term or condition of the permit that is the basis of the certification;
   - the compliance status;
   - whether compliance was continuous or intermittent;
   - the method(s) used for determining the compliance status of the facility, currently and over the reporting period consistent with the monitoring and related recordkeeping and reporting requirements of this permit;
   - such other facts as the Department may require to determine the compliance status of the facility as specified in any special permit terms or conditions; and
   - such additional requirements as may be specified elsewhere in this permit related to compliance certification.

ii. The responsible official must include in the annual certification report all terms and conditions contained in this permit which are identified as being subject to certification, including emission limitations, standards, or work practices. That is, the provisions labeled herein as "Compliance Certification" are not the only provisions of this permit for which an annual certification is required.

iii. Compliance certifications shall be submitted annually. Certification reports are due 30 days after the anniversary date of four consecutive calendar quarters. The first report is due 30 days after the calendar quarter that occurs just prior to the permit anniversary date, unless another quarter has been acceptable by the Department.

iv. All compliance certifications shall be submitted to the Administrator (or his or her representative) as well...
as two copies to the Department (one copy to the regional air pollution control engineer (RAPCE) in the regional office and one copy to the Bureau of Quality Assurance (BQA) in the DEC central office). Please send annual compliance certifications to Chief of the Stationary Source Compliance Section, the Region 2 EPA representative for the Administrator, at the following address:

USEPA Region 2
Air Compliance Branch
290 Broadway
New York, NY 10007-1866

The address for the RAPCE is as follows:

1130 North Westcott Road
Schenectady, NY 12306-2014

The address for the BQA is as follows:

NYSDEC
Bureau of Quality Assurance
625 Broadway
Albany, NY 12233-3258

Monitoring Frequency: ANNUALLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due on the same day each year

**Condition 20-14: Facility Permissible Emissions**
**Effective between the dates of 12/09/2014 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Applicaton Specific Data**

**Condition 12-4: Capping Monitoring Condition**
**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Item 12-4.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-8

**Item 12-4.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 12-4.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 12-4.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 12-4.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 12-4.6:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-20000 Emission Point: 34301
- Emission Unit: 0-20000 Emission Point: 46014
- Emission Unit: 0-20000 Emission Point: 46015

**Regulated Contaminant(s):**
- CAS No: 0NY075-00-0
- PARTICULATES

**Item 12-4.7:**
Compliance Certification shall include the following monitoring:
Capping: Yes
Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Tests of all emission points must be performed no later than 6 months after initial startup of the new kiln system.

Parameter Monitored: PARTICULATES
Upper Permit Limit: .01 grains per dscf
Reference Test Method: Method 5
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 12-5: Capping Monitoring Condition
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 12-5.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-8

Item 12-5.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 12-5.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 12-5.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 12-5.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part
201 and of the Act.

**Item 12-5.6:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

    CAS No: 007446-09-5 SULFUR DIOXIDE
    CAS No: 0NY210-00-0 OXIDES OF NITROGEN
    CAS No: 0NY998-00-0 VOC

Item 20-15.2:
Compliance Certification shall include the following monitoring:
Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
A 3 run stack test shall be performed for the listed contaminants within 180 days of first firing TDF.

Existing Kiln:
Unless TDF testing for both kilns is completed within 180 days of first firing of TDF in the 1st kiln using TDF, a second 3 run stack test shall be performed for the same listed contaminants within 180 days of first TDF firing in the 2nd kiln.

New Kiln:
Shall be monitored utilizing CEMS as in the permit.

Plant operating data including coal, petroleum coke and tire usage and kiln feed input and clinker output shall be collected. See separate permit conditions under Part 202-1.2 concerning notification and protocol submittal and under Part 202-1.3 concerning acceptable protocols and report submittal.

After the test report is completed, the results shall be compared with the baseline stack test to project if it is expected that the Net Emission Increase (see definition in Part 231-2.1) is greater than Significant Net Emission Increase Threshold (see table in Part 231-2.12).

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 20-16: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 202-1.1

Item 20-16.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-41000 Emission Point: 43101
Process: K12

Emission Unit: 0-41100 Emission Point: 33401
Process: KLN

Regulated Contaminant(s):
CAS No: 000050-00-0 FORMALDEHYDE
Item 20-16.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
A 3 run stack test shall be performed for the listed contaminants within 180 days of first firing TDF in accordance with 40 CFR 52 A 21(b)(3)(viii).

Appropriate stack testing methods shall be performed for the various contaminants, including Method 5 for filterable particulates, Method 202 for the condensable particulate fraction for PM-10, Method 29 for metals, Method 23 for dioxin and PCB, and Methods 18 and 106 for benzene and vinyl chloride and other methods approved by the Department.

Existing Kiln:
Unless TDF testing for both kilns is completed within 180 days of first firing of TDF in the 1st kiln using TDF, a second 3 run stack test shall be performed for the same
listed contaminants within 180 days of first TDF firing in the 2nd kiln.

New Kiln:
Shall be monitored utilizing CEMS as required in 40CFR 63 Subpart LLL and Methods 202, 29, 23, 18 and 16, as applicable.

Plant operating data including coal, petroleum coke and tire usage and kiln feed input and clinker output shall be collected. See separate permit conditions under Part 202-1.2 concerning notification and protocol submittal and under Part 202-1.3 concerning acceptable protocols and report submittal.

Additionally, testing shall be performed for: total non-methane hydrocarbons and PAHs.

The PCB testing shall include simultaneous comparison tests for PCDD/PCDF and PCBs.

After the test report is completed, the results for SO2, PM, PM-10, lead, fluorides shall all be compared with the baseline stack test to project if a major modification (see definition in 40 CFR 52 A 21 (b)(2)) is expected.

Reference Test Method: SEE MONITORING DESCRIPTION
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 28: Notification
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 202-1.2

Item 28.1:
A person who is required by the commissioner to submit a stack test report shall notify the commissioner, in writing, not less than 30 days prior to the test, of the time and date of the test. Such notification shall also include the acceptable procedures to be used to stack test including sampling and analytical procedures. Such person shall allow the commissioner, or his representative, free access to observe stack testing being conducted by such person.

Condition 29: Acceptable procedures
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 202-1.3 (a)

Item 29.1:
Emission testing, sampling and analytical determinations to ascertain compliance with this Subchapter shall be conducted in accordance with test methods acceptable to the commissioner. The Reference Methods contained in part 60, appendix A and part 61, appendix B of title 40 of
the Code of Federal Regulations and all future technical revisions, additions or corrections made thereto shall be considered as acceptable test methods for those sources and contaminants for which they are expressly applicable, except where the commissioner has issued a specific method to be used instead of a Reference Method contained in these Federal regulations or where the commissioner determines that one or more alternate methods are also acceptable. The person who owns or operates an air contamination source shall submit the emission test report in triplicate, to the commissioner within 60 days after the completion of tests. In the event such source owner/operator can demonstrate to the commissioner such time is not sufficient, he may request in writing and be granted an extension. Where an opacity emission standard is applicable to the source tested, the emission test report shall include the opacity observation.

**Condition 12-79: Visible Emissions Limited**

**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 211.2

**Item 12-79.1:**
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

**Condition 30: Compliance Certification**

**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 212.3 (b)

**Item 30.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES
Item 30.2: Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
In instances where determination of permissible emission rate using process weight is not applicable (see Table 5) and for an environmental rating of B or C, no person will cause or allow emissions of solid particulates that exceed 0.15 grains of particulates per cubic foot of exhaust gas, corrected for dilution air and expressed at standard conditions on a dry gas basis.

Parameter Monitored: PARTICULATES
Upper Permit Limit: .15 grains per dscf
Reference Test Method: Method 5
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: 1-HOUR AVERAGE
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 31: Compliance Certification
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 212.4 (c)

Item 31.1: The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-20000  Emission Point: 46012
Emission Unit: 0-20000  Emission Point: 46013
Emission Unit: 0-20000  Emission Point: 46014
Emission Unit: 0-20000  Emission Point: 46015

Emission Unit: 0-42000  Emission Point: 43106
Emission Unit: 0-42000  Emission Point: 46018
Item 31.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Emissions from any process emission source for which an application for a permit to construct is received by the department after July 1, 1973, are restricted as follows:

In instances where determination of permissible emission rate using process weight is not applicable (see Table 5) and for an environmental rating of B or C, no person will cause or allow emissions of solid particulates that exceed 0.050 grains of particulates per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis, except as provided in section 201.6 of this Title.

Parameter Monitored: PARTICULATES
Upper Permit Limit: .05 grains per dscf
Reference Test Method: Method 5
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: 1-HOUR AVERAGE
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 32: Compliance Certification
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 212.6 (a)

Item 32.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-20000
Item 32.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
No person shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the performance of a Method 9 opacity evaluation at any time during facility operation.

The permittee will conduct observations of visible emissions from the emission unit, process, etc. to which this condition applies at the monitoring frequency stated below while the process is in operation. The permittee will investigate, in a timely manner, any instance where there is cause to believe that visible emissions have the potential to exceed the opacity standard.

The permittee shall investigate the cause, make any necessary corrections, and verify that the excess visible emissions problem has been corrected. If visible emissions with the potential to exceed the standard continue, the permittee will conduct a Method 9 assessment within the next operating day of the sources associated with the potential noncompliance to determine the degree of opacity and will notify the NYSDEC if the method 9 test indicates that the opacity standard is not met.

Records of visible emissions observations (or any follow-up method 9 tests), investigations and corrective actions will be kept on-site. Should the Department determine that permittee's record keeping format is inadequate to demonstrate compliance with this condition, it shall provide written notice to the permittee stating the inadequacies, and permittee shall have 90 days to revise its prospective record keeping format in a manner acceptable to the Department.

Monitoring Frequency: MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2011.
Subsequent reports are due every 6 calendar month(s).

Condition 20-17: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 6 NYCRR 220-1.4 (c)

Item 20-17.1: The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
   CAS No: 0NY075-00-0 PARTICULATES

Item 20-17.2: Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
   Any person who owns or operates an area, parking lot, clinker gallery, railcar loading shed, conveyor tunnel, access road, stockpile, building opening or refuse disposal area, at a Portland cement plan that has the potential to emit visible emissions for one continuous hour or longer, must apply corrective measures to eliminate such potential.

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 20-18: Compliance Certification Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.6 (b) (1)

Item 20-18.1: The Compliance Certification activity will be performed for the facility:

Emission Unit: 0-41000   Emission Point: 43101
Process: K12

Regulated Contaminant(s):
   CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 20-18.2: Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
   NOx emissions limited. The 5.2 pounds per ton of clinker NOx limit supplements the facility's existing NOx compliance strategy which includes the Linkman system, selective non catalytic reduction, dust insufflation, which together with this limit, is approved as RACT

Manufacturer Name/Model Number: Hartman & Braun model URAS 14; serial number 3.249611.3
Parameter Monitored: OXIDES OF NITROGEN  
Upper Permit Limit: 5.2  pounds per ton  
Reference Test Method: USEPA Method 7E  
Monitoring Frequency: CONTINUOUS  
Averaging Method: 30 DAY ROLLING AVERAGE, ROLLED DAILY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2015.  
Subsequent reports are due every 6 calendar month(s).

Condition 20-19:  Compliance Certification  
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 225-1.2

Item 20-19.1:  
The Compliance Certification activity will be performed for the Facility.  
Regulated Contaminant(s):  
CAS No: 007446-09-5  SULFUR DIOXIDE

Item 20-19.2:  
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS  
Monitoring Description:  
No person will sell, offer for sale, purchase or use any solid fuel which contains sulfur in a quantity exceeding the following limitation.  
Daily CEM data in lb SO2/ton clinker multiplied by daily production (in tons of clinker per day) yields lb SO2 for the applicable day.

Work Practice Type: PARAMETER OF PROCESS MATERIAL  
Process Material: OTHER SOLID FUELS  
Parameter Monitored: SULFUR DIOXIDE  
Upper Permit Limit: 3.4  pounds per million Btus  
Reference Test Method: Method 19  
Monitoring Frequency: CONTINUOUS  
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2015.  
Subsequent reports are due every 6 calendar month(s).

Condition 20-20:  Compliance Certification  
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 225-1.2
Item 20-20.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007446-09-5  SULFUR DIOXIDE

Item 20-20.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
Any solid fuel which contains sulfur in a quantity exceeding the limit below shall not be burned.

Daily CEM data in lb SO2/ton clinker multiplied by daily production (in tons of clinker per day) yields lb SO2 for the applicable day.

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: OTHER SOLID FUELS
Parameter Monitored: SULFUR DIOXIDE
Upper Permit Limit: 5  pounds per million Btus
Reference Test Method: Method 19
Monitoring Frequency: CONTINUOUS
Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 20-21:  Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 225-1.2

Item 20-21.1:
The Compliance Certification activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 007446-09-5  SULFUR DIOXIDE

Item 20-21.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
No person will sell, offer for sale, purchase or use any solid fuel which contains sulfur in a quantity exceeding the following limitation.
Daily CEM data in lb SO2/ton clinker multiplied by daily production (in tons of clinker per day) yields lb SO2 for the applicable day.

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: OTHER SOLID FUELS
Parameter Monitored: SULFUR DIOXIDE
Upper Permit Limit: 3.8 pounds per million Btus
Reference Test Method: Method 19
Monitoring Frequency: CONTINUOUS
Averaging Method: 3-MONTH AVERAGE ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

**Condition 12-10: Compliance Certification**
**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 225-1.2 (d)

**Item 12-10.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-41000  Emission Point: 43101

Emission Unit: 0-41100  Emission Point: 33401

Regulated Contaminant(s):
CAS No: 007704-34-9 SULFUR

**Item 12-10.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS
Monitoring Description:
Sulfur content of the fuel oil burned at the facility shall not exceed 1.5% by weight per 6 NYCRR 225-1.2(d), Table 2.

Work Practice Type: PARAMETER OF PROCESS MATERIAL
Process Material: OIL (NOT ELSEWHERE CLASSIFIED)
Parameter Monitored: SULFUR CONTENT
Upper Permit Limit: 1.5 percent by weight
Monitoring Frequency: PER DELIVERY
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)
Reporting Requirements: QUARTERLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 10/30/2011. Subsequent reports are due every 3 calendar month(s).

**Condition 12-14: Kiln restriction**  
Effective between the dates of 07/19/2011 and Permit Expiration Date  
Applicable Federal Requirement: 6 NYCRR Subpart 231-8

**Item 12-14.1:**  
Upon commencing production of clinker from the new kiln (EU 41100), the facility shall immediately discontinue use of the old kilns (EU 41000). Upon startup of the finish mills (EU 55000), the facility shall discontinue use of two existing cement mills.

**Condition 12-16: Compliance Certification**  
Effective between the dates of 07/19/2011 and Permit Expiration Date  
Applicable Federal Requirement: 6 NYCRR Subpart 231-8

**Item 12-16.1:**  
The Compliance Certification activity will be performed for the facility:  
The Compliance Certification applies to:  
- Emission Unit: 0-41100  
- Emission Point: 33401  
- Process: KLN  
- Regulated Contaminant(s):  
  - CAS No: 000124-38-9 CARBON DIOXIDE

**Item 12-16.2:**  
Compliance Certification shall include the following monitoring:  
- Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS  
- Monitoring Description:  
  Kiln system emissions shall not exceed 1900 pounds (or .95 tons) of CO2 equivalent per ton of clinker, rolling 12 month average. Compliance shall be determined in accordance with the procedures use by Lafarge in reporting their GHG emissions pursuant to 40 CFR Part 98.

- Work Practice Type: PARAMETER OF PROCESS MATERIAL  
- Process Material: CLINKER  
- Parameter Monitored: CARBON DIOXIDE  
- Upper Permit Limit: 1900 pounds per ton  
- Monitoring Frequency: CONTINUOUS  
- Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
- Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
- Reports due 30 days after the reporting period.  
The initial report is due 1/30/2012.  
Subsequent reports are due every 6 calendar month(s).
Condition 12-17: Compliance Certification  
Effective between the dates of 07/19/2011 and Permit Expiration Date  

Applicable Federal Requirement: 6 NYCRR Subpart 231-8  

Item 12-17.1:  
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:  

Emission Unit: 0-41100  

Item 12-17.2:  
Compliance Certification shall include the following monitoring:  

Monitoring Type: WORK PRACTICE INVOLVING SPECIFIC OPERATIONS  
Monitoring Description:  
Clinker throughput limit.  

Work Practice Type: PROCESS MATERIAL THRUPUT  
Process Material: CLINKER  
Upper Permit Limit: 2810000 tons per year  
Monitoring Frequency: HOURLY  
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2012.  
Subsequent reports are due every 6 calendar month(s).  

Condition 12-18: Permit Requirements  
Effective between the dates of 07/19/2011 and Permit Expiration Date  

Applicable Federal Requirement: 6 NYCRR 243-1.6 (a)  

Item 12-18.1:  
This Condition applies to:  

Emission Unit: 041000  
Emission Unit: 041100  

Item 12-18.2:  
The CAIR designated representative of each CAIR NOx Ozone Season source shall:  
(i) submit to the department a complete CAIR permit application under section 243-3.3 in accordance with the deadlines specified in section 243-3.2; and  
(ii) submit in a timely manner any supplemental information that the department determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.  

The owners and operators of each CAIR NOx Ozone Season source shall have a CAIR permit issued by the department under Subpart 243-3 for the source and operate the source and the unit
in compliance with such CAIR permit.

**Condition 12-19: Monitoring requirements**  
**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 243-1.6 (b)

**Item 12-19.1:**  
This Condition applies to:

- Emission Unit: 041000
- Emission Unit: 041100

**Item 12-19.2:**  
The emissions measurements recorded and reported in accordance with Subpart 243-8 shall be used to determine compliance by each CAIR NOx Ozone Season source with the CAIR NOx Ozone Season emissions limitation under subdivision (c) of this section.

**Condition 12-20: NOx Ozone Season Emission Requirements**  
**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 243-1.6 (c)

**Item 12-20.1:**  
This Condition applies to:

- Emission Unit: 041000
- Emission Unit: 041100

**Item 12-20.2:**  
As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NOx Ozone Season source and each CAIR NOx Ozone Season unit at the source shall hold, in the source's compliance account, CAIR NOx Ozone Season allowances available for compliance deductions for the control period under section 243-6.5(a) in an amount not less than the tons of total nitrogen oxides emissions for the control period from all CAIR NOx Ozone Season units at the source, as determined in accordance with Subpart 243-8. The CAIR NOx ozone season is the period beginning May 1 of a calendar year, except as provided in section 243-1.6(c)(2), and ending on September 30 of the same year, inclusive.

A CAIR NOx Ozone Season unit shall be subject to the requirements under paragraph (c)(1) of this section for the control period starting on the later of May 1, 2009 or the deadline for meeting the unit's monitor certification requirements under sections 243-8.1(b)(1), (2), (3), or (7) and for each control period thereafter.

A CAIR NOx Ozone Season allowance shall not be deducted, for compliance with the requirements under paragraph (c)(1) of this section, for a control period in a calendar year before the year for which the CAIR NOx Ozone Season allowance was allocated.
CAIR NOx Ozone Season allowances shall be held in, deducted from, or transferred into or among CAIR NOx Ozone Season Allowance Tracking System accounts in accordance with Subparts 243-6, 243-7, and 243-9.

A CAIR NOx Ozone Season allowance is a limited authorization to emit one ton of nitrogen oxides in accordance with the CAIR NOx Ozone Season Trading Program. No provision of the CAIR NOx Ozone Season Trading Program, the CAIR permit application, the CAIR permit, or an exemption under section 243-1.5 and no provision of law shall be construed to limit the authority of the State or the United States to terminate or limit such authorization.

A CAIR NOx Ozone Season allowance does not constitute a property right.

Upon recordation by the Administrator under Subpart 243-6, 243-7, or 243-9, every allocation, transfer, or deduction of a CAIR NOx Ozone Season allowance to or from a CAIR NOx Ozone Season source's compliance account is incorporated automatically in any CAIR permit of the source.

**Condition 12-21: Excess emission requirements**

**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 243-1.6 (d)

**Item 12-21.1:**
This Condition applies to:

- Emission Unit: 041000
- Emission Unit: 041100

**Item 12-21.2:**
If a CAIR NOx Ozone Season source emits nitrogen oxides during any control period in excess of the CAIR NOx Ozone Season emissions limitation, then:

1. the owners and operators of the source and each CAIR NOx Ozone Season unit at the source shall surrender the CAIR NOx Ozone Season allowances required for deduction under section 243-6.5(d)(1) and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Act or applicable State law; and

2. each ton of such excess emissions and each day of such control period shall constitute a separate violation of this Subpart, the Act, and applicable State law.

**Condition 12-22: Recordkeeping and reporting requirements**

**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 243-1.6 (e)

**Item 12-22.1:**
This Condition applies to:
Item 12-22.2:  
Unless otherwise provided, the owners and operators of the CAIR NOx Ozone Season source and each CAIR NOx Ozone Season unit at the source shall keep on site at the source each of the following documents for a period of five years from the date the document is created. This period may be extended for cause, at any time before the end of five years, in writing by the department or the Administrator.

(i) The certificate of representation under section 243-2.4 for the CAIR designated representative for the source and each CAIR NOx Ozone Season unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such five-year period until such documents are superseded because of the submission of a new certificate of representation under section 243-2.4 changing the CAIR designated representative.

(ii) All emissions monitoring information, in accordance with Subpart 243-8, provided that to the extent that Subpart 243-8 provides for a three-year period for recordkeeping, the three-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR NOx Ozone Season Trading Program.

(iv) Copies of all documents used to complete a CAIR permit application and any other submission under the CAIR NOx Ozone Season Trading Program or to demonstrate compliance with the requirements of the CAIR NOx Ozone Season Trading Program.

Condition 12-23:  Authorization and responsibilities of CAIR designated representative

Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 243-2.1

Item 12-23.1:  
This Condition applies to:

Emission Unit: 041000

Emission Unit: 041100

Item 12-23.2:  
Except as provided under section 243-2.2, each CAIR NOx Ozone Season source, including all CAIR NOx Ozone Season units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NOx Ozone Season Trading Program concerning the source or any CAIR NOx Ozone Season unit at the source.

The CAIR designated representative of the CAIR NOx Ozone Season source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NOx Ozone Season units at the source and shall act in accordance with the certification statement in section
Upon receipt by the Administrator of a complete certificate of representation under section 243-2.4, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NOx Ozone Season source represented and each CAIR NOx Ozone Season unit at the source in all matters pertaining to the CAIR NOx Ozone Season Trading Program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the department, the Administrator, or a court regarding the source or unit.

No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NOx Ozone Season Allowance Tracking System account will be established for a CAIR NOx Ozone Season unit at a source, until the Administrator has received a complete certificate of representation under section 243-2.4 for a CAIR designated representative of the source and the CAIR NOx Ozone Season units at the source.

Each submission under the CAIR NOx Ozone Season Trading Program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NOx Ozone Season source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

**Condition 12-24: Certificate of representation**
**Effective between the dates of 07/19/2011 and Permit Expiration Date**

Applicable Federal Requirement: 6 NYCRR 243-2.4

**Item 12-24.1:**
This Condition applies to:

- Emission Unit: 041000
- Emission Unit: 041100

**Item 12-24.2:**
Unless otherwise required by the department or the Administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the department or the Administrator. Neither the department nor the Administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

**Condition 12-25: General requirements**
Air Pollution Control Permit Conditions

Renewal 1/Mod 21/Active

Page 56   FINAL
Item 12-26.2:
No owner or operator of a CAIR NOx Ozone Season unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this Subpart without having obtained prior written approval in accordance with section 243-8.6.

No owner or operator of a CAIR NOx Ozone Season unit shall operate the unit so as to discharge, or allow to be discharged, NOx emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this Subpart and 40 CFR Part 75.

No owner or operator of a CAIR NOx Ozone Season unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NOx mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this Subpart and 40 CFR Part 75.

No owner or operator of a CAIR NOx Ozone Season unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this Subpart, except under any one of the following circumstances:
(i) during the period that the unit is covered by an exemption under section 243-1.5 that is in effect;
(ii) the owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this Subpart and 40 CFR Part 75, by the department for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or
(iii) the CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with section 243-8.2(d)(3)(i).

Condition 12-27: Quarterly reports
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 243-8.5 (d)

Item 12-27.1:
This Condition applies to:

Emission Unit: 041000

Emission Unit: 041100

Item 12-27.2:
The CAIR designated representative shall submit quarterly reports, as follows:

If the CAIR NOx Ozone Season unit is subject to an Acid Rain emissions limitation or a CAIR NOx emissions limitation or if the owner or operator of such unit chooses to report on an annual basis under this Subpart, the CAIR designated representative shall meet the requirements of
Subpart H of 40 CFR Part 75 (concerning monitoring of NOx mass emissions) for such unit for the entire year and shall report the NOx mass emissions data and heat input data for such unit, in an electronic quarterly report in a format prescribed by the Administrator, for each calendar quarter beginning with:

(i) for a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 through June 30, 2008;

(ii) for a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under section 243-8.1(b), unless that quarter is the third or fourth quarter of 2007 or the first quarter of 2008, in which case reporting shall commence in the quarter covering May 1, 2008 through June 30, 2008.

The CAIR designated representative shall submit each quarterly report to the Administrator within 30 days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in 40 CFR 75.73(f).

For CAIR NOx Ozone Season units that are also subject to an Acid Rain emissions limitation or the CAIR NOx Annual Trading Program, CAIR SO2 Trading Program, or the Mercury Reduction Program for Coal-Fired Electric Utility Steam Generating Units (6 NYCRR Part 246), quarterly reports shall include the applicable data and information required by Subparts F through I of 40 CFR Part 75 as applicable, in addition to the NOx mass emission data, heat input data, and other information required by this Subpart.

**Condition 12-28: Compliance certification**

*Effective between the dates of 07/19/2011 and Permit Expiration Date*

*Applicable Federal Requirement: 6 NYCRR 243-8.5 (e)*

**Item 12-28.1:**
This Condition applies to:

- Emission Unit: 041000
- Emission Unit: 041100

**Item 12-28.2:**
The CAIR designated representative shall submit to the Administrator a compliance certification (in a format prescribed by the Administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit's emissions are correctly and fully monitored. The certification shall state that:

1. the monitoring data submitted were recorded in accordance with the applicable requirements of this Subpart and 40 CFR Part 75, including the quality assurance procedures and specifications;

2. for a unit with add-on NOx emission controls and for all hours where NOx data are substituted in accordance with 40 CFR 75.34(a)(1), the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under appendix B to 40 CFR Part 75 and the substitute data values do not systematically...
underestimate NOx emissions; and

(3) for a unit that is reporting on a control period basis under subparagraph (d)(2)(ii) of this section, the NOx emission rate and NOx concentration values substituted for missing data under Subpart D of 40 CFR Part 75 are calculated using only values from a control period and do not systematically underestimate NOx emissions.

**Condition 12-29: Compliance Certification**

**Effective between the dates of 07/19/2011 and Permit Expiration Date**

**Applicable Federal Requirement:** 40 CFR 60.254(b), NSPS Subpart Y

**Item 12-29.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-22000 Emission Point: 63302
- Emission Unit: 0-22000 Emission Point: 63303
- Emission Unit: 0-22000 Emission Point: 63304
- Emission Unit: 0-22000 Emission Point: 63305
- Emission Unit: 0-22000 Emission Point: 63306
- Emission Unit: 0-22000 Emission Point: 63307
- Emission Unit: 0-22000 Emission Point: 63308
- Emission Unit: 0-22000 Emission Point: 63309
- Emission Unit: 0-22000 Emission Point: 66001
- Emission Unit: 0-22000 Emission Point: 66002

**Regulated Contaminant(s):**
CAS No: 0NY075-00-0 PARTICULATES

**Item 12-29.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

**Monitoring Description:**
On and after the date on which the performance test is conducted or required to be completed under 40CFR60.8, whichever date comes first, an owner or operator of any coal processing and conveying equipment, coal storage system, or coal transfer and loading system processing coal constructed, reconstructed, or modified after April 28, 2008, must meet the requirements in
40CFR60.254(b)(1)-(3), as applicable to the affected facility.

Except as provided in 40CFR60.254(b)(3), the owner or operator must not cause to be discharged into the atmosphere from the affected facility any gases which exhibit 10 percent opacity or greater. The monitoring shall be conducted according to the schedule listed in §60.255(b)(2) or may meet one of the alternative standards listed in 60.255(f)(2) or 60.255(g).

Parameter Monitored: OPACITY
Upper Permit Limit: 10 percent
Reference Test Method: EPA Method 9
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: 6 MINUTE AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-30: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.254(b), NSPS Subpart Y

Item 12-30.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-22000 Emission Point: 63302
Emission Unit: 0-22000 Emission Point: 63303
Emission Unit: 0-22000 Emission Point: 63304
Emission Unit: 0-22000 Emission Point: 63305
Emission Unit: 0-22000 Emission Point: 63306
Emission Unit: 0-22000 Emission Point: 63307
Emission Unit: 0-22000 Emission Point: 63308
Emission Unit: 0-22000 Emission Point: 63309
Emission Unit: 0-22000 Emission Point: 66001
Emission Unit: 0-22000 Emission Point: 66002

Regulated Contaminant(s):
Item 12-30.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:

On and after the date on which the performance test is conducted or required to be completed under §60.8, whichever date comes first, an owner or operator of any coal processing and conveying equipment, coal storage system, or coal transfer and loading system processing coal constructed, reconstructed, or modified after April 28, 2008, must meet the requirements in §60.254(b)(1)-(3), as applicable to the affected facility.

The owner or operator must not cause to be discharged into the atmosphere from any mechanical vent on an affected facility gases which contain particulate matter in excess of 0.023 g/dscm (0.010 gr/dscf).

The monitoring shall be conducted according to the schedule listed in §60.255(b)(1) and using the methods listed in §60.257.

Emission points 63304, 63305, 63307, 63307, 63308 have potential emissions less than 1.1 tpy and qualify for testing requirement exemptions under §60.255(d).

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.01 grains per dscf
Reference Test Method: EPA Method 5, 5B, 5D or 17
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-31: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.670(a), NSPS Subpart OOO

Item 12-31.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-21000 Emission Point: 11501
Emission Unit: 0-21000  Emission Point: 13801
Emission Unit: 0-21000  Emission Point: 13802
Emission Unit: 0-21000  Emission Point: 13803
Emission Unit: 0-21000  Emission Point: 23301
Emission Unit: 0-21000  Emission Point: 23302

Regulated Contaminant(s):
   CAS No: 0NY075-00-0 PARTICULATES

Item 12-31.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
For affected facilities (as defined in §60.670 and 60.671) that commenced construction, reconstruction, or modification on or after April 22, 2008, the facility must not emit particulate matter at an emission rate of 0.014 gr/dscf or more for the following operations:
- any stack emissions venting any transfer point on belt conveyors
- any transfer point on a conveyor belt or any other affected facility is enclosed in a building
- any building enclosing any transfer point on a conveyor belt or any other affected facility emissions.

Compliance with this standard will be determined by conducting a stack emission test following a protocol and according to a schedule acceptable to the Department and according to the provisions in §60.8 and 60.675. This must be done within 60 days after the facility achieves the maximum production rate at which the facility will be operated, but not later than 180 days after initial startup.

Upper Permit Limit: 0.014 grains per dscf
Reference Test Method: SEE MONITORING DESCRIPTION
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).
Condition 12-32: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.674(c), NSPS Subpart OOO

Item 12-32.1: The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-21000 Emission Point: 23301
- Emission Unit: 0-21000 Emission Point: 23302

Item 12-32.2: Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Except as specified in paragraph (d) or (e) of 40 CFR 60.674, the owner or operator of any affected facility for which construction, modification, or reconstruction commenced on or after April 22, 2008, that uses a baghouse to control emissions must conduct quarterly 30-minute visible emissions inspections using EPA Method 22 (40 CFR part 60, Appendix A-7). The Method 22 (40 CFR part 60, Appendix A-7) test shall be conducted while the baghouse is operating. The test is successful if no visible emissions are observed. If any visible emissions are observed, the owner or operator of the affected facility must initiate corrective action within 24 hours to return the baghouse to normal operation. The owner or operator must record each Method 22 (40 CFR part 60, Appendix A-7) test, including the date and any corrective actions taken, in the logbook required under §60.676(b). The owner or operator of the affected facility may establish a different baghouse-specific success level for the visible emissions test (other than no visible emissions) by conducting a PM performance test according to §60.675(b) simultaneously with a Method 22 (40 CFR part 60, Appendix A-7) to determine what constitutes normal visible emissions from that affected facility's baghouse when it is in compliance with the applicable PM concentration limit in Table 2 of this subpart. The revised visible emissions success level must be incorporated into the permit for the affected facility.

Parameter Monitored: OPACITY
Upper Permit Limit: 7 percent
Monitoring Frequency: QUARTERLY
Averaging Method: AVERAGING METHOD - SEE MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

**Condition 12-33:** New source definition
Effective between the dates of 07/19/2011 and Permit Expiration Date

**Applicable Federal Requirement:** 40CFR 63.1341, NESHAP Subpart LLL

**Item 12-33.1:**
This Condition applies to:

- Emission Unit: 041000  Emission Point: 43101
  Process: K12

- Emission Unit: 041100  Emission Point: 33401
  Process: KLN

**Item 12-33.2:**
For the purposes of the Portland Cement NESHAP (40 CFR Part 63, Subpart LLL), New source is defined as any source that commenced construction after May 6, 2009.

Existing source is defined as any source that commenced construction before May 7, 2009.

These dates shall be used in determining the applicability of the kiln, clinker cooler, and raw material dryer emission limits for mercury, PM, THC, and HCl, and the requirements for open clinker storage piles.

**Condition 47:** Part 63 General Provisions requirements
Effective between the dates of 09/13/2010 and Permit Expiration Date

**Applicable Federal Requirement:** 40CFR 63.1342, Subpart LLL

**Item 47.1:**
Owners or operators of affected sources subject to 40CFR63 Subpart LLL must also comply with the requirements of Subpart A of Part 63, according to the applicability of Subpart A to such sources, as identified in Table 1 of Subpart LLL. Subpart A is the General Provisions for the NESHAP for Source Categories regulations. The General Provisions contain requirements for performance testing, monitoring, notification, recordkeeping, reporting, and control devices that may apply to the source.

**Condition 20-23:** Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

**Applicable Federal Requirement:** 40CFR 63.1343(b)(1), Subpart LLL

**Item 20-23.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:
Item 20-23.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
If the facility operates a kiln, then the facility shall meet an emission limit for dioxins and furans of 0.2 ng/dscm (TEQ) corrected to 7% oxygen when the average temperature at the inlet to the first particulate matter control device during the dioxins and furans performance test is greater than 400°F; and 0.4 ng/dscm (TEQ) corrected to 7% oxygen during normal operations, if the average temperature at the inlet to the first particulate matter control device (fabric filter or electrostatic precipitator) during the dioxin/furan performance test is 400°F or less.

Initial compliance with this limit shall be determined according to the provisions in §63.1349(b)(3). The owner/operator shall conduct separate performance tests while the raw mill is operating and the raw mill is not operating. The D/F concentration must be determined for each run and the arithmetic average of the concentrations measured for the three runs must be calculated to determine compliance.

The facility must also demonstrate initial compliance with the temperature operating limits specified in §63.1344 by using the performance test methods and procedures listed in §63.1349(b)(3)(ii)-(iv).

Continuous compliance shall be determined by continuously monitoring and recording the temperature of specified gas streams such that it meets the requirements of §63.1350(g).

Reference Test Method: Method 23
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION
Condition 20-29: Compliance Certification
            Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1346, Subpart LLL

Item 20-29.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-41000
  Process: K12
  Emission Source: 4KLN1

- Emission Unit: 0-41000
  Process: K12
  Emission Source: 4KLN2

Regulated Contaminant(s):
  CAS No: 001746-01-6 2,3,7,8-TETRACHLORODIBENZO-P-DIOXIN

Item 20-29.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of a kiln subject to a dioxin/furan (D/F) emission limitation under §63.1343 must operate the kiln such that the temperature of the gas at the inlet to the kiln particulate matter control device (PMCD) and alkali bypass PMCD, if applicable, does not exceed the applicable temperature limit specified during the performance testing done in accordance with the provisions in §63.1349(b)(3)(iv).

The owner/operator of the in-line kiln/raw mill must operate such that the applicable temperature limit established during the performance test, with or without the raw mill operating, is not exceeded, except during periods of startup and shutdown, by more than 10%.

If the in-line kiln/raw mill is equipped with an alkali bypass, the applicable temperature limit for the alkali bypass specified above and established during the performance test, with or without the raw mill operating, is not exceeded, except during periods of startup and shutdown when the temperature limit may be exceeded by no more than 10%.

Continuous compliance shall be demonstrated using the provisions in §63.1348(b)(4) which requires a continuous temperature monitoring device that meets the requirements of §63.1350(g).
Reference Test Method: EPA Method 23 of Appendix A-7 of part 60
Monitoring Frequency: CONTINUOUS
Averaging Method: 3-HOUR ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 20-31: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1347, Subpart LLL

Item 20-31.1:
The Compliance Certification activity will be performed for the Facility.

Item 20-31.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The facility must prepare, for each affected source subject to the provisions of subpart LLL of 40 CFR Part 63, a written operations and maintenance (O&M) plan. The plan must be submitted to NYSDEC for review and approval as part of the application for a Part 70 permit and must include the following information:

1- Procedures for proper operation and maintenance of the affected source and air pollution control devices in order to meet the emission limits and operating limits including fugitive dust control measures for open clinker piles of §§63.1343-63.1348. The O&M plan must address periods of startup and shutdown.

2- Corrective actions to be taken when required by §6.1350(f)(3).

3- Procedures to be used during an inspection of the components of the combustion system of each kiln and each in-line kiln raw mill located at the facility at least once per year. Failure to comply with any provision in the O&M plan is a violation of the standard.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 12-41: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1350(f), Subpart LLL
Item 12-41.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-20000
- Emission Unit: 0-21000, Emission Point: 23303
- Emission Unit: 0-21000, Emission Point: 23304
- Emission Unit: 0-21000, Emission Point: 23305
- Emission Unit: 0-21000, Emission Point: 23306
- Emission Unit: 0-21000, Emission Point: 23307
- Emission Unit: 0-21000, Emission Point: 23601
- Emission Unit: 0-21000, Emission Point: 23602
- Emission Unit: 0-21000, Emission Point: 23603
- Emission Unit: 0-21000, Emission Point: 23604
- Emission Unit: 0-21000, Emission Point: 23608
- Emission Unit: 0-31000
- Emission Unit: 0-32000
- Emission Unit: 0-33000
- Emission Unit: 0-41200
- Emission Unit: 0-42000
- Emission Unit: 0-43000
- Emission Unit: 0-51000, Emission Point: 52101
- Emission Unit: 0-52000, Emission Point: 52201
- Emission Unit: 0-53000, Emission Point: 52301
- Emission Unit: 0-54000, Emission Point: 52401
- Emission Unit: 0-55000, Emission Point: 40301
- Emission Unit: 0-55000, Emission Point: 40302
- Emission Unit: 0-55000, Emission Point: 40303
Item 12-41.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
If the facility is subject to an opacity standard in §63.1345, the facility must conduct required emissions monitoring in accordance with §63.1350(f)(1), and in accordance with the operation and maintenance plan required by §63.1347. The facility must also develop an opacity emissions monitoring plan in accordance with §63.1350(o).

The facility must conduct a monthly 10-minute visible emissions (VE) test of each affected source (except raw mills and finish mills) in accordance with Method 22 of appendix A-7 of Part 60. The performance test must be
done while the affected source is in operation.

If no VE's are observed in six consecutive monthly tests for any affected source, the facility may decrease the frequency of performance testing from monthly to semi-annually for that affected source. If VE's are observed during any semi-annual test, the facility must resume monthly monitoring and maintain that schedule until no VE's are observed for six consecutive monthly tests.

If no VE's are observed during the semi-annual test for any affected source, the facility may decrease the frequency of performance testing to annually for that affected source. If VE's are observed during any semi-annual test, the facility must resume monthly monitoring and maintain that schedule until no VE's are observed for six consecutive monthly tests.

If VE's are observed during any Method 22 performance test, the facility must conduct five 6-minute averages of opacity according to Method 9 of appendix A-4 of part 60. The Method 9 must be performed within 1 hour of any observation of VE's.

The requirement to conduct Method 22 VE monitoring under this condition does not apply to any totally enclosed conveying system transfer point, regardless of the location of the transfer point. Totally enclosed conveying system transfer point must mean a conveying system transfer point that is enclosed on all sides, top, and bottom. The enclosures for these transfer points must be operated and maintained as total enclosures on a continuing basis in accordance with the facility operations and maintenance plan.

If any partially enclosed or unenclosed conveying system transfer point is located in a building, the facility must have the option to conduct a Method 22 performance test for each such conveying system transfer point located within the building, or for the building itself.

If VE's from a building are monitored, the requirements above apply to the monitoring of the building and the facility must also test VE's from each side, roof, and vent of the building for at least 10 minutes.

Parameter Monitored: OPACITY
Upper Permit Limit: 10 percent
Reference Test Method: EPA Methods 9 and 22
Monitoring Frequency: MONTHLY
Averaging Method: AVERAGING METHOD - SEE MONITORING
DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-43: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1350(f), Subpart LLL

Item 12-43.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-51000 Emission Point: 41603
- Emission Unit: 0-51000 Emission Point: 53101
- Emission Unit: 0-51000 Emission Point: 53102
- Emission Unit: 0-52000 Emission Point: 53202
- Emission Unit: 0-53000 Emission Point: 43603
- Emission Unit: 0-53000 Emission Point: 43604
- Emission Unit: 0-53000 Emission Point: 53301
- Emission Unit: 0-53000 Emission Point: 53302
- Emission Unit: 0-54000 Emission Point: 53401
- Emission Unit: 0-54000 Emission Point: 53402
- Emission Unit: 0-54000 Emission Point: 53403
- Emission Unit: 0-55000 Emission Point: 46304

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 12-43.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
If the owner or operator chooses to install a continuous opacity monitoring system (COMS) in lieu of conducting the daily visual emissions testing required under §63.1350(f)(2), then the COMS must be installed at the outlet of the PM control device of the raw mill or finish
mill and the COMS must be installed, maintained, calibrated, and operated as required by the general provisions in 40 CFR 63, subpart A and according to PS–1 of appendix B to 40 Part 60.

Parameter Monitored: OPACITY
Upper Permit Limit: 10 percent
Reference Test Method: PS-1
Monitoring Frequency: CONTINUOUS
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

**Condition 20-34: Compliance Certification**

**Effective between the dates of 12/09/2014 and Permit Expiration Date**

**Applicable Federal Requirement:** 40CFR 63.1350(f), Subpart LLL

**Item 20-34.1:**
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-51000 Emission Point: 41603
- Emission Unit: 0-51000 Emission Point: 53101
- Emission Unit: 0-51000 Emission Point: 53102
- Emission Unit: 0-52000 Emission Point: 53201
- Emission Unit: 0-52000 Emission Point: 53202
- Emission Unit: 0-53000 Emission Point: 43603
- Emission Unit: 0-53000 Emission Point: 43604
- Emission Unit: 0-53000 Emission Point: 53301
- Emission Unit: 0-53000 Emission Point: 53302
- Emission Unit: 0-54000 Emission Point: 53401
- Emission Unit: 0-54000 Emission Point: 53402
- Emission Unit: 0-54000 Emission Point: 53403
- Emission Unit: 0-55000 Emission Point: 46304
Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 20-34.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
If the facility is subject to an opacity standard in §63.1345, the facility must conduct required emissions monitoring in accordance with §63.1350(f)(2), and in accordance with the operation and maintenance plan required by §63.1347. If applicable, an opacity monitoring plan must be developed in accordance with §63.1350(p)(1) to (p)(4) and (o)(5).

For a raw mill or a finish mill, the facility must monitor opacity by conducting daily visible emissions (VE) observations of the mill sweep and air separator particulate matter control device (PMCD) of these affected sources in accordance with Method 22 of appendix A-7 to part 60. The duration of the Method 22 performance test must be 6 minutes.

Within 24 hours of the end of the Method 22 performance test in which VE's were observed, the facility must conduct a follow up Method 22 performance test of each stack from which VE's were observed during the previous Method 22 performance test.

If VE's are observed during the follow-up Method 22 performance test from any stack from which VE's were observed during the previous Method 22 performance test, the facility must conduct a visual opacity test of each stack from which emissions were observed during the follow up Method 22 performance test in accordance with Method 9 of appendix A-4 to part 60. The duration of the Method 9 test must be 30 minutes.

If visible emissions are observed during any Method 22 visible emission tests, must initiate within one hour the corrective actions specified in the operation and mainenance plan as required in 63.1347. The requirements under (f)(2) do not apply to any specific raw mill or finish mill equipped with a COMS or BLDS.

Parameter Monitored: OPACITY
Upper Permit Limit: 10 percent
Reference Test Method: EPA Methods 9 and 22
Monitoring Frequency: DAILY
Averaging Method: AVERAGING METHOD - SEE MONITORING
DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 12-45: Notification Requirements
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40 CFR 63.1353, Subpart LLL

Item 12-45.1:
The notification provisions of 40 CFR 63 Subpart A that apply and those that do not apply to owners and operators of affected sources subject to Subpart LLL are listed in Table 1 of 40 CFR 63, Subpart LLL. Each owner or operator subject to the requirements of Subpart LLL shall comply with the notifications requirements are follows:

- Initial notifications are required by 40 CFR 63.9(b) through (d)
- Notification of performance tests
- Notification of opacity and visible emission observations
- Notification of the date that the continuous emission monitor performance evaluation is scheduled to begin
- Notification of compliance status.

Condition 20-35: Recordkeeping Requirements
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 40 CFR 63.1355, Subpart LLL

Item 20-35.1:
(a) The owner or operator shall maintain files of all information (including all reports and notifications) required by this section recorded in a form suitable and readily available for inspection and review as required by 40 CFR 63.10(b)(1). The files shall be retained for at least five years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. At a minimum, the most recent two years of data shall be retained on site. The remaining three years of data may be retained off site. The files may be maintained on microfilm, on a computer, on floppy disks, on magnetic tape, or on microfiche.

(b) The owner or operator shall maintain records for each affected source as required by 40 CFR 63.10(b)(2) and (b)(3) of this part; and

(1) All documentation supporting initial notifications and notifications of compliance status under 40 CFR 63.9;

(2) All records of applicability determination, including supporting analyses; and

(3) If the owner or operator has been granted a waiver under 40 CFR 63.8(f)(6), any information demonstrating whether a source is meeting the requirements for a waiver of recordkeeping or reporting requirements.

(c) In addition to the recordkeeping requirements in paragraph (b) of this section, the owner or operator of an affected source equipped with a continuous monitoring system shall maintain all...
records required by 40 CFR 63.10(c).

(d) You must keep annual records of the amount of CKD which is removed from the kiln system and either disposed of as solid waste or otherwise recycled for a beneficial use outside of the kiln system.

(e) You must keep records of the daily clinker production rates and kiln feed rates.

(f) You must keep records of the occurrence and duration of each startup or shutdown.

(g)(1) You must keep records of the occurrence and duration of each malfunction of operation (i.e., process equipment) or the air pollution control and monitoring equipment.

(g)(2) You must keep records of actions taken during periods of malfunction to minimize emissions in accordance with §63.1348(d) including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation.

h) For each exceedance from an emissions standard or established operating parameter limit, you must keep records of the date, duration and description of each exceedance and the specific actions taken for each exceedance including inspections, corrective actions and repeat performance test and the results of those actions.

**** Emission Unit Level ****

Condition 60: Emission Point Definition By Emission Unit

Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR Subpart 201-6

NYTMN (km.): 4705.829
NYTME (km.): 597.649
Building: BUFFESILOS

Item 60.18 (From Mod 12):
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-90000
Air Pollution Control Permit Conditions

Renewal 1/Mod 21/Active    Page 88    FINAL
Item 61.3 (From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-20000
Process: LMS  Source Classification Code: 3-05-007-12
Process Description:
STORAGE AND TRANSFER OF LIMESTONE FROM THE SILOS TO THE MILLING MACHINES.

Emission Source/Control: 1LMST - Process

Item 61.4 (From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-20000
Process: MAS  Source Classification Code: 3-05-007-18
Process Description:
TRANSFER OF MATERIAL INTO AND OUT OF THE MASONARY FRINGE SILO. THIS PROCESS IS VENTED BY A DUST COLLECTOR LOCATED ON TOP OF THE MASONARY FRINGE SILO.

Emission Source/Control: 2DC01 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2DC02 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 1LMST - Process

Emission Source/Control: 2C7OF - Process

Emission Source/Control: 2C7ON - Process

Emission Source/Control: 2CRSH - Process

Emission Source/Control: 2CRWF - Process

Item 61.5 (From Mod 0):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-20000
Process: RX1  Source Classification Code: 3-05-007-12
Process Description:
TRANSFER OF RAW MATERIALS THROUGH THE SECONDARY CRUSHER AND ONTO CONVEYOR #7. CALCUIUM SOURCES (LIMESTONE), SOLID FUELS, AND IRON SOURCES ARE TRANSFERRED THROUGH THE SECONDARY CRUSHER AND ONLY CONVEYOR #7.

Emission Source/Control: 2DC01 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2C7ON - Process

Emission Source/Control: 2CRSH - Process

Emission Source/Control: 2CRWF - Process

Item 61.6 (From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-20000
Process: RX2  Source Classification Code: 3-05-007-12
Process Description:
TRANSFER OF RAW MATERIALS (CALCIUM SOURCES, SOLID FUEL, AND IRON SOURCES) FROM CONVEYOR 7 DISCHARGE CHUTE TO THE SHUTTLE BELT LOAD CHUTE.

Emission Source/Control: 2DC01 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2DC02 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2C7OF - Process

Emission Source/Control: 2C7ON - Process

Emission Source/Control: 2CRSH - Process

Emission Source/Control: 2CRWF - Process

Item 61.7 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-21000
Process: ADS  Source Classification Code: 3-05-006-99
Process Description: New storage silos for additive materials.

Emission Source/Control: DC007 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC008 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC011 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2ADR1 - Process
Design Capacity: 275 tons per hour
Emission Source/Control: 2ADR2 - Process  
Design Capacity: 275 tons per hour

Emission Source/Control: 2ADS1 - Process  
Design Capacity: 275 tons per hour

Emission Source/Control: 2ADS2 - Process  
Design Capacity: 275 tons per hour

Emission Source/Control: 2ADS3 - Process  
Design Capacity: 275 tons per hour

**Item 61.8 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-21000  
Process: ADT  Source Classification Code: 3-05-006-12  
Process Description: Transfer of additives to additive silos (new).

Emission Source/Control: DC081 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC082 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 2ADT1 - Process  
Design Capacity: 2,754 tons per hour

Emission Source/Control: 2ADT2 - Process  
Design Capacity: 275 tons per hour

**Item 61.9 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-21000  
Process: CR2  Source Classification Code: 3-05-006-10  
Process Description: New secondary crusher.

Emission Source/Control: DC001 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 2NDCR - Process  
Design Capacity: 1,540 tons per hour

**Item 61.10 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-21000  
Process: LSS  Source Classification Code: 3-05-006-99  
Process Description: New limestone silos.

Emission Source/Control: DC005 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC006 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC010 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2LSIL - Process
Design Capacity: 1,540 tons per hour

Emission Source/Control: 2LSR1 - Process
Design Capacity: 1,540 tons per hour

Emission Source/Control: 2LSR2 - Process
Design Capacity: 1,540 tons per hour

Emission Source/Control: 2LSTR - Process
Design Capacity: 1,540 tons per hour

Item 61.11(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-21000
Process: PBL    Source Classification Code: 3-05-006-12
Process Description:
    New pre-blend system (transfer to pre-homo/RM feed bins, circular stacker feed, pre-homo reclaim).

Emission Source/Control: DC002 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC003 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC004 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2PBCS - Process
Design Capacity: 1,210 tons per hour

Emission Source/Control: 2PBRC - Process
Design Capacity: 1,210 tons per hour

Emission Source/Control: 2PBTR - Process
Design Capacity: 1,210 tons per hour

Item 61.12(From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-22000
Process: ASF    Source Classification Code: 3-05-102-99
Process Description: Alternate solid fuels handling and storage (new).

Emission Source/Control: DC076 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC077 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2ASFB - Process
Design Capacity: 44 tons per hour

Emission Source/Control: 2ASFQ - Process
Design Capacity: 44 tons per hour

Item 61.13(From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-22000
Process: CLB Source Classification Code: 3-05-101-03
Process Description: Pulverized fuel transfer (new).

Emission Source/Control: DC074 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC075 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC094 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2PF01 - Process
Design Capacity: 59 tons per hour

Emission Source/Control: 2PF02 - Process
Design Capacity: 59 tons per hour

Emission Source/Control: 2PFBH - Process
Design Capacity: 59 tons per hour

Item 61.14(From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-22000
Process: CLR Source Classification Code: 3-05-102-03
Process Description: Raw coal/coke storage (new).

Emission Source/Control: DC070 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC071 - Control
Control Type: FABRIC FILTER
Emission Source/Control: DC108 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2CKRB - Process
Design Capacity: 550 tons per hour

Emission Source/Control: 2CLR8 - Process
Design Capacity: 550 tons per hour

Emission Source/Control: 2CPR8 - Process
Design Capacity: 550 tons per hour

Item 61.15(From Mod 12):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-22000
Process: PFS Source Classification Code: 3-05-102-03
Process Description: Pulverized fuel storage (new).

Emission Source/Control: DC072 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC073 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 2PFS1 - Process
Design Capacity: 59 tons per hour

Emission Source/Control: 2PFS2 - Process
Design Capacity: 59 tons per hour

Item 61.16(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-31000
Process: RM1 Source Classification Code: 3-05-007-12
Process Description: TRANSFER OF RAW MATERIAL TO RAW MILL 1 USING RAW MILL 1 FEED BELT.

Emission Source/Control: 3M1FB - Process

Item 61.17(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-31000
Process: TC1 Source Classification Code: 3-05-007-10
Process Description: TERTIARY CRUSHING OF RAW MATERIAL PRIOR TO RAW MILL 1.

Emission Source/Control: 3DC01 - Control
Control Type: WET SCRUBBER

Emission Source/Control: 3M1TC - Process

Item 61.18(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-32000  
Process: RM2  
Source Classification Code: 3-05-007-12  
Process Description: TRANSFER OF RAW MATERIAL TO RAW MILL 2 USING RAW MILL 2 FEED BELT.

Emission Source/Control: 3M2FB - Process

Item 61.19(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-32000  
Process: TC2  
Source Classification Code: 3-05-007-10  
Process Description: TERTIARY CRUSHING OF RAW MATERIAL PRIOR TO RAW MILL 2.

Emission Source/Control: 3DC02 - Control  
Control Type: WET SCRUBBER

Emission Source/Control: 3M2TC - Process

Item 61.20(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-33000  
Process: KFP  
Source Classification Code: 3-05-006-12  
Process Description: Transfer of kiln feed to preheater tower (new).

Emission Source/Control: DC019 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC020 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC104 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 3KFBE - Process  
Design Capacity: 697 tons per hour

Emission Source/Control: 3KFPH - Process  
Design Capacity: 697 tons per hour

Emission Source/Control: 3KFPS - Process
Design Capacity: 697 tons per hour

**Item 61.21 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-33000
- **Process:** RMB
- **Source Classification Code:** 3-05-006-12
- **Process Description:** Raw meal blending (new).

- **Emission Source/Control:** DC016 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** DC017 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** DC021 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** DC085 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** DC088 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** DC089 - Control
  - **Control Type:** FABRIC FILTER

- **Emission Source/Control:** 3BLSB - Process
  - **Design Capacity:** 697 tons per hour

- **Emission Source/Control:** 3RMBE - Process
  - **Design Capacity:** 697 tons per hour

- **Emission Source/Control:** 3RMBL - Process
  - **Design Capacity:** 697 tons per hour

- **Emission Source/Control:** 3RMBS - Process
  - **Design Capacity:** 697 tons per hour

- **Emission Source/Control:** 3RMPH - Process
  - **Design Capacity:** 697 tons per hour

**Item 61.22 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-33000
- **Process:** RMR
- **Source Classification Code:** 3-05-006-12
- **Process Description:** Raw meal transfer (new).

- **Emission Source/Control:** DC015 - Control
  - **Control Type:** FABRIC FILTER
Item 61.23 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-33000
Process: RMT  Source Classification Code: 3-05-006-12
Process Description: Raw meal transfer (new).

Emission Source/Control: DC013 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC014 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC083 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 3RMEB - Process
Design Capacity: 697 tons per hour

Emission Source/Control: 3RMEH - Process
Design Capacity: 697 tons per hour

Emission Source/Control: 3RMRH - Process
Design Capacity: 697 tons per hour

Item 61.24 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41000
Process: CC1  Source Classification Code: 3-05-007-14
Process Description: CLINKER FROM KILN 1 IS AIR-COOLED IN CLINKER COOLER 1. PARTICULATE EMISSIONS ARE CONTROLLED BY A FABRIC FILTER DUST COLLECTOR. THE CLINKER COOLER IS LOCATED IN THE KILN DISCHARGE END BUILDING.

Emission Source/Control: 4DC01 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 4CLC1 - Process

Item 61.25 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41000
Process: CC2  Source Classification Code: 3-05-007-14
Process Description: CLINKER FROM KILN 2 IS AIR-COOLED IN
CLINKER COOLER 2. PARTICULATE EMISSIONS ARE CONTROLLED BY A FABRIC FILTER DUST COLLECTOR. THE CLINKER COOLER IS LOCATED IN THE KILN DISCHARGE END BUILDING.

Emission Source/Control: 4DC02 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 4CLC2 - Process

**Item 61.26(From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-41000
- **Process:** K12
- **Source Classification Code:** 3-05-007-06
- **Process Description:**
  Manufacture of clinker by two rotary wet process kilns. In the wet process, the kilns are primarily fed a water-based slurry. The water is driven off in the kiln and the raw feed is converted to clinker. Particulate emissions are controlled by two electrostatic precipitator units, each consisting of two units (lower and upper). Both ESPs are connected to a single, main stack (EP 43101).

  The SNCR installation will be designed to allow atomized reagent (ammonia or urea) to be injected into each kiln system at a location that allows for optimal NOx reduction and minimal ammonia or urea slip.

  During normal production operation, the kilns use a solid fuel mixture of coal and/or coke or fuel oil. When the kilns are started up, fuel oil is used to preheat them before resuming normal production operations. See separate permit condition under part 201-6.5(f) for the protocol for use of non-hazardous alternate fuels and raw materials.

  As a solid fuel, the kilns may also utilize tire-derived-fuel (TDF) which may be fired in the kiln through a mid-kiln injection system and associated conveying and handling equipment. TDF may be used to replace up to 20% of the fossil solid fuel heat input (approximately 6 tires per revolution) for each of the two cement kilns.

  TDF will not be used during kiln start up and shut down (start up and shut down as defined in the facility's start up, shutdown, malfunction (SSM) plan); usage will be ceased during malfunction (malfunction as defined in the SSM plan). The SSM plan shall be revised to address TDF firing. TDF will not be fired without NYSDEC approval of
the revised SSM plan.

A mixing fan will be installed in the kilns to aid TDF combustion.

Emission Source/Control: 4ESP1 - Control
Control Type: ELECTROSTATIC PRECIPITATOR

Emission Source/Control: 4ESP2 - Control
Control Type: ELECTROSTATIC PRECIPITATOR

Emission Source/Control: 4KLN1 - Process

Emission Source/Control: 4KLN2 - Process

**Item 61.27 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41100
Process: CCL Source Classification Code: 3-05-006-14
Process Description: New clinker cooler.

Emission Source/Control: DCCCL - Control
Control Type: FABRIC FILTER

Emission Source/Control: 4CCL3 - Process
Design Capacity: 367 tons per hour

**Item 61.28 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41100
Process: KLN Source Classification Code: 3-05-006-06
Process Description:
New kiln, in-line raw mill, bypass and solid fuel mill.
Kiln fuels include Coal, Petroleum Coke, Tire-Derived Fuel, Fuel Oil and Natural Gas.

Emission Source/Control: DC023 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DCCML - Control
Control Type: FABRIC FILTER

Emission Source/Control: SCRUB - Control
Control Type: WET SCRUBBER

Emission Source/Control: 4CMIL - Process
Design Capacity: 59.1 tons per hour

Emission Source/Control: 4KBYP - Process
Emission Source/Control: 4KLN3 - Process

**Item 61.29 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41200
Process: BYP Source Classification Code: 3-05-006-99
Process Description: Bypass dust handling and storage (new).

Emission Source/Control: DC024 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC025 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 4BYPB - Process

Emission Source/Control: 4BYPH - Process
Design Capacity: 10 tons per hour

**Item 61.30 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-41200
Process: CKD Source Classification Code: 3-05-006-99
Process Description: CKD handling and storage (new).

Emission Source/Control: DC084 - Control

Emission Source/Control: 4K2DS - Process

Item 61.34 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-42000
Process: PEL
Source Classification Code: 3-05-007-99

Process Description:
TRANSFER OF CKD TO THE PELLETIZER SYSTEM. DUST WILL BE PENUMATICALLY CONVEYED (VIA EXISTING EQUIPMENT) FROM THE DUST WASTE SILO IN THE KILN FEED END BUILDING TO AN INTERMEDIATE DUST STORAGE SILO FOR THE PELLETIZER SYSTEM. DUST WILL BE TRANSFERRED FROM THE SILO TO THE PELLETIZER UNIT VIA SCREW CONVEYOR. ALL TRANSFER POINTS ARE TO BE CONTROLLED BY A FABRIC FILTER (4DC11). THIS SYSTEM IS TO BE INSTALLED IN APRIL 1998. THIS PROCESS IS CONSIDERED TO BE AN ALTERNATE OPERATING SCENARIO FOR TITLE V PURPOSES AND FURTHER DETAIL IS PROVIDED IN APPENDIX F.

Emission Source/Control: 4DC11 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 4PELL - Process

Item 61.35 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-42000
Process: PUG
Source Classification Code: 3-05-007-99

Process Description:
TRANSFER OF CKD TO THE PUG MILL SYSTEM. DUST WILL BE PENUMATICALLY CONVEYED FROM THE DUST WASTE SILO IN THE KILN FEED END BUILDING TO AN INTERMEDIATE DUST STORAGE SILO FOR THE PUG MILL SYSTEM. DUST WILL BE TRANSFERRED FROM THE SILO TO THE PUG MILL VIA AN AIR SLIDE. ALL TRANSFER POINTS ARE CONTROLLED BY A FABRIC FILTER (4DC11). THE PUG MILL'S FUNCTION IS TO PRE-CONDITION THE DUST PRIOR TO REMOVAL.
Emission Source/Control: 4DC11 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 04PUG - Process

**Item 61.36 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-43000
Process: CLD  Source Classification Code: 3-05-006-16
Process Description: Clinker cooler discharge (new).

Emission Source/Control: DC026 - Control
Control Type: FABRIC FILTER

Emission Source/Control: DC028 - Control

Emission Source/Control: 4CHBT - Process  
Design Capacity: 367  tons per hour

**Item 61.39 (From Mod 20):**

This permit authorizes the following regulated processes for the cited Emission Unit:

**Emission Unit: 0-51000**

Process: CM1  
Source Classification Code: 3-05-007-17  
Process Description:  
GRINDING OF CLINKER TO PRODUCE FINISHED PORTLAND CEMENT. THIS PROCESS IS LOCATED IN THE MILL BUILDING.

Emission Source/Control: 5DC02 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 51MIL - Process

**Item 61.40 (From Mod 20):**

This permit authorizes the following regulated processes for the cited Emission Unit:

**Emission Unit: 0-51000**

Process: FM1  
Source Classification Code: 3-05-006-17  
Process Description:  
New dust collectors, including high efficiency separator, for modified FM1.

Emission Source/Control: DC105 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC107 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 5FM1D - Process

Emission Source/Control: 5FM1H - Process  
Design Capacity: 99  tons per hour
Item 61.41 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-51000
Process: FX1
Source Classification Code: 3-05-007-16
Process Description:
TRANSFER OF CLINKER TO CEMENT MILL 1 AND THE TRANSFER OF FINISHED CEMENT THROUGH THE CEMENT MILL 1 SYSTEM'S SEPARATOR, BUCKET ELEVATOR, AIRSLIDES, CEMENT COOLER, AND THE HOPPER ABOVE THE FK PUMP WHICH TRANSPORTS IT TO THE CUSTOMER AND BUFFER STORAGE SILOS. THE ENTIRE CEMENT MILL 1 SYSTEM IS CONTAINED IN THE MILL BUILDING.

Emission Source/Control: 51FBC - Process

Emission Source/Control: 51MHC - Process

Emission Source/Control: 51SEP - Process

Item 61.42 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-52000
Process: CM2
Source Classification Code: 3-05-007-17
Process Description:
GRINDING OF CLINKER TO PRODUCE FINISHED PORTLAND CEMENT. THIS PROCESS IS LOCATED IN THE MILL BUILDING.

Emission Source/Control: 5DC05 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 52MIL - Process

Item 61.43 (From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-52000
Process: FX2
Source Classification Code: 3-05-007-16
Process Description:
TRANSFER OF CLINKER TO CEMENT MILL 2 AND
THE TRANSFER OF FINISHED CEMENT THROUGH THE
CEMENT MILL 2 SYSTEM'S SEPARATOR, BUCKET
ELEVATOR, AIRSLIDES, CEMENT COOLER, AND THE
HOPPER ABOVE THE FK PUMP WHICH TRANSPORTS
IT TO THE CUSTOMER AND BUFFER STORAGE SILOS.
THE ENTIRE CEMENT MILL 2 SYSTEM IS
CONTAINED IN THE MILL BUILDING.

Emission Source/Control:  5DC04 - Control
Control Type: FABRIC FILTER

Emission Source/Control:  5DC06 - Control
Control Type: FABRIC FILTER

Emission Source/Control:  52AUX - Process

Emission Source/Control:  52BE1 - Process

Emission Source/Control:  52FBH - Process

Emission Source/Control:  52MHC - Process

Emission Source/Control:  52SEP - Process

**Item 61.44(From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-53000
Process: CM3 Source Classification Code: 3-05-007-17
Process Description:
GRINDING OF CLINKER TO PRODUCE FINISHED
PORTLAND CEMENT. THIS PROCESS IS LOCATED
IN THE MILL BUILDING.

Emission Source/Control:  5DC09 - Control
Control Type: FABRIC FILTER

Emission Source/Control:  53MIL - Process

**Item 61.45(From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-53000
Process: FM3 Source Classification Code: 3-05-006-17
Process Description:
New dust collectors including HES, for modified FM3.

Emission Source/Control:  DC079 - Control
Control Type: FABRIC FILTER
Emission Source/Control:  DC106 - Control  
Control Type:  FABRIC FILTER

Emission Source/Control:  5FM3D - Process

Emission Source/Control:  5FM3H - Process
Design Capacity:  99  tons per hour

Item 61.46(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:  0-53000  
Process:  FX3  
Source Classification Code:  3-05-007-16
Process Description:
TRANFER OF CLINKER TO CEMENT MILL 3 AND  
THE TRANSFER OF FINISHED CEMENT THROUGH THE  
CEMENT MILL 3 SYSTEM'S SEPARATOR, BUCKET  
ELEVATOR, AIRSLIDES, CEMENT COOLER, AND THE  
HOPPER ABOVE THE FK PUMP WHICH TRANSPORTS  
IT TO THE CUSTOMER AND BUFFER STORAGE SILOS  
.  THE ENTIRE CEMENT MILL 3 SYSTEM IS  
CONTAINED IN THE MILL BUILDING

Emission Source/Control:  5DC08 - Control  
Control Type:  FABRIC FILTER

Emission Source/Control:  5DC10 - Control  
Control Type:  FABRIC FILTER

Emission Source/Control:  53AS1 - Process

Emission Source/Control:  53AUX - Process

Emission Source/Control:  53BE1 - Process

Emission Source/Control:  53BIN - Process

Emission Source/Control:  53FBC - Process

Emission Source/Control:  53MHC - Process

Emission Source/Control:  53SEP - Process

Item 61.47(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:  0-54000  
Process:  CM4  
Source Classification Code:  3-05-007-17
Process Description:
GRINDING OF CLINKER TO PRODUCE FINISHED  
PORTLAND CEMENT.  THIS PROCESS IS LOCATED  
IN THE MILL BUILDLING.
Emission Source/Control:   5DC12 - Control  
Control Type: FABRIC FILTER

Emission Source/Control:   54MIL - Process

Item 61.48(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:    0-54000  
Process: FX4  
Source Classification Code: 3-05-007-16  
Process Description:
TRANSFER OF CLINKER TO CEMENT MILL 4 AND  
THE TRANSFER OF FINISHED CEMENT THROUGH THE  
CEMENT MILL 4 SYSTEM'S BUCKET ELEVATOR,  
AIRSLIDES, CEMENT COOLER, AND THE HOPPER  
ABOVE THE FK PUMP WHICH TRANSPORTS IT TO  
THE CUSTOMER AND BUFFER STORAGE SILOS. THE  
ENTIRE CEMENT MILL 4 SYSTEM IS CONTAINED  
IN THE MILL BUILDING.

Emission Source/Control:   5DC11 - Control  
Control Type: FABRIC FILTER

Emission Source/Control:   54AUX - Process

Emission Source/Control:   54BE1 - Process

Emission Source/Control:   54FBC - Process

Emission Source/Control:   54MHC - Process

Item 61.49(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:    0-54000  
Process: FX5  
Source Classification Code: 3-05-007-29  
Process Description:
SEPARATION BY PARTICLE SIZE OF FINISHED  
CEMENT FROM CEMENT MILL 4 BY TWO SEPARATORS  
- CM4 SEPARATOR 1 (SOUTH) AND CM4 SEPARATOR  
2 (NORTH). THIS PROCESS ALSO INCLUDES THE  
AIRSLIDES WHICH CONVEY THE CEMENT TO THE  
SEPARATORS AS THEY ARE CONTROLLED BY THE SA  
ME DUST COLLECTORS THAT CONTROL PARTICULATE  
EMISSIONS FOR THE SEPARATORS. THIS PROCESS  
IS LOCATED IN THE MILL BUILDING.

Emission Source/Control:   5DC13 - Control  
Control Type: FABRIC FILTER

Emission Source/Control:   5DC14 - Control
Control Type: FABRIC FILTER

Emission Source/Control: 54SP1 - Process

Emission Source/Control: 54SP2 - Process

**Item 61.50 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-55000
- **Process:** FAD
- **Source Classification Code:** 3-05-006-17
- **Process Description:** Transfer of FM5 additives (new).

  - Emission Source/Control: DC035 - Control
    - Control Type: FABRIC FILTER
  
  - Emission Source/Control: DC036 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: 5FAD1 - Process
    - Design Capacity: 270 tons per hour

  - Emission Source/Control: 5FAD2 - Process
    - Design Capacity: 270 tons per hour

**Item 61.51 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-55000
- **Process:** FBF
- **Source Classification Code:** 3-05-006-17
- **Process Description:** New FM5 feed bins.

  - Emission Source/Control: DC056 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC057 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC095 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC096 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC097 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC098 - Control
    - Control Type: FABRIC FILTER

  - Emission Source/Control: DC099 - Control
    - Control Type: FABRIC FILTER
Emission Source/Control: 5ADB1 - Process  
Design Capacity: 270  tons per hour

Emission Source/Control: 5ADB2 - Process  
Design Capacity: 270  tons per hour

Emission Source/Control: 5ADBR - Process  
Design Capacity: 270  tons per hour

Emission Source/Control: 5ADFM - Process  
Design Capacity: 270  tons per hour

Emission Source/Control: 5CKBE - Process

Emission Source/Control: 5CKBR - Process

Emission Source/Control: 5CKSF - Process  
Design Capacity: 270  tons per hour

Item 61.52(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-55000  
Process: FBH  
Source Classification Code: 3-05-006-17  
Process Description: New FM5 discharge.

Emission Source/Control: DC059 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC092 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: 5FCKD - Process  
Design Capacity: 270  tons per hour

Emission Source/Control: 5FMST - Process  
Design Capacity: 270  tons per hour

Item 61.53(From Mod 20):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-55000  
Process: FM5  
Source Classification Code: 3-05-006-17  
Process Description: New FM5 feed and reject bin/bin reclaim.

Emission Source/Control: DC058 - Control  
Control Type: FABRIC FILTER

Emission Source/Control: DC060 - Control  
Control Type: FABRIC FILTER
Emission Source/Control: 5FM5F - Process  
Design Capacity: 270 tons per hour

Emission Source/Control: 5FMRJ - Process  
Design Capacity: 270 tons per hour

**Item 61.54 (From Mod 20):**  
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-71000  
Process: BAG  
Source Classification Code: 3-05-007-19  
Process Description:  
FILLING OF BAGS OF CEMENT VIA TWO BAGGING MACHINES DESIGNATED AS EAST AND WEST. THE WEST BAGGING MACHINE SYSTEM (EMISSION SOURCE 71WBM) CONSISTS OF A BUCKET ELEVATOR (#630202); A ROTEX SCREEN (#630106); THE SURGE BIN OVER THE BAGGING MACHINE; THE BAGGING MACHINE ITSELF (#630102). THE EAST BAGGING MACHINE SYSTEM (EMISSION SOURCE 71EBM) CONSISTS OF A BUCKET ELEVATOR (#630201); A ROTEX SCREEN (#630105); THE SURGE BIN OVER THE BAGGING MACHINE; THE BAGGING MACHINE (#630101). THIS ENTIRE PROCESS IS LOCATED IN THE PACKHOUSE.

Emission Source/Control: 62BS3 - Process

Emission Source/Control: 62BS5 - Process

**Item 61.65 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-90000  Source Classification Code: 3-05-007-09
Process: PCR
Process Description:
PRIMARY CRUSHING OF calcium sources (e.g., LIMESTONE) USED IN CEMENT MANUFACTURE.
Air Pollution Control Permit Conditions

Permit ID: 4-0124-00001/00112  Facility DEC ID: 4012400001

Emission Source/Control: 09PCD - Process

**Item 61.66 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-90000
- **Process:** PCS
- **Source Classification Code:** 3-05-007-09
- **Process Description:** Primary crushing of calcium sources (e.g. limestone) used in cement manufacturing.

- **Emission Source/Control:** 4PC02 - Control
- **Control Type:** DUST COLLECTOR

- **Emission Source/Control:** 9PRCR - Process

**Item 61.67 (From Mod 12):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 0-91000
- **Process:** ROD
- **Source Classification Code:** 3-05-025-04
- **Process Description:** Fugitive particulate emissions.

- **Emission Source/Control:** TRCKS - Process

**Item 61.68 (From Mod 20):**
This permit authorizes the following regulated processes for the cited Emission Unit:

- **Emission Unit:** 1-00000
- **Process:** CMB
- **Source Classification Code:** 3-05-007-16
- **Process Description:** TRANSFER OF FINISHED CEMENT FROM BELT 9 TO BARGES LOCATED IN THE WHARF AREA.

- **Emission Source/Control:** 10DC1 - Control
- **Control Type:** FABRIC FILTER

- **Emission Source/Control:** 109BG - Process

**Condition 12-47:** Emission Unit Permissible Emissions
Effective between the dates of 07/19/2011 and Permit Expiration Date

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Item 12-47.1:**
The sum of emissions from all regulated processes specified in this permit for the emission unit cited shall not exceed the following Potential to Emit (PTE) rates for each regulated contaminant:

- **Emission Unit:** 0-22000

- **CAS No:** 0NY075000 (From Mod 12)
Name: PARTICULATES
PTE(s): 25,910 pounds per year 2.96 pounds per hour
CAS No: 0NY075005 (From Mod 12)

Name: PM-10
PTE(s): 2.42 pounds per hour 21,230 pounds per year

Emission Unit: 0-91000
CAS No: 0NY075000 (From Mod 12)
Name: PARTICULATES
PTE(s): 170,700 pounds per year 19.5 pounds per hour
CAS No: 0NY075005 (From Mod 12)
Name: PM-10
PTE(s): 47,890 pounds per year 5.47 pounds per hour

**Condition 20-37: Compliance Certification**
**Effective between the dates of 12/09/2014 and Permit Expiration Date**

**Applicable Federal Requirement:** 6 NYCRR 220-1.2 (b)

**Item 20-37.1:**
The Compliance Certification activity will be performed for:

Emission Unit: 0-41000

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

**Item 20-37.2:**
Compliance Certification shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING

Monitoring Description:
Except as provided in 6 NYCRR Part 220-1.3, the facility shall not cause or allow emission of particulates to the outdoor atmosphere from a portland cement kiln or clinker cooler in excess of the following emission rates:

(b) for process weight per hour in excess of 100,000 pounds, 0.05 grains per standard cubic foot of gas on a dry basis.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.05 grains per dscf
Reference Test Method: EPA Method 5
Condition 63: Part 63 General Provisions requirements
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1342, Subpart LLL

Item 63.1:
This Condition applies to Emission Unit: 0-41000

Item 63.2:
Owners or operators of affected sources subject to 40CFR63 Subpart LLL must also comply with the requirements of Subpart A of Part 63, according to the applicability of Subpart A to such sources, as identified in Table 1 of Subpart LLL. Subpart A is the General Provisions for the NESHAP for Source Categories regulations. The General Provisions contain requirements for performance testing, monitoring, notification, recordkeeping, reporting, and control devices that may apply to the source.

Condition 20-38: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1350(g), NESHAP Subpart LLL

Item 20-38.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41000
- Process: K12

Regulated Contaminant(s):
- CAS No: 001746-01-6 2,3,7,8-TETRACHLORODIBENZO-P-DIOXIN

Item 20-38.2:
Compliance Certification shall include the following monitoring:

- Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
- Monitoring Description:
  If the facility is subject to a dioxin/furan (D/F) emission limit, the facility must demonstrate continuous compliance by meeting the requirements in this condition, and meeting the parameter monitoring requirements listed in §63.1350(m)(1)-(4) and the emission monitoring plan provisions listed in §63.1350(p)(1)-(4).

  The facility must install, calibrate, maintain, and continuously operate a continuous monitoring system (CMS) to record the temperature of the exhaust gases from the kiln and alkali bypass, if applicable, at the inlet to, or
upstream of, the kiln and/or alkali bypass particulate matter control devices.

The temperature recorder response range must include zero and 1.5 times the average temperature established according to the requirements in §63.1349(b)(3)(iv).

The calibration reference for the temperature measurement must be a National Institute of Standards of Technology calibrated reference thermocouple-potentiometer system or alternate reference, subject to approval by the EPA Administrator.

The calibration of all thermocouples and other temperature sensors must be verified at least once every three months.

The facility must monitor and continuously record the temperature of the exhaust gases from the kiln, in-line kiln/raw mill, and alkali bypass, if applicable, at the inlet to the kiln, in-line kiln/raw mill and/or alkali bypass particulate matter control device.

The required minimum data collection frequency must be one minute.

Calculate the rolling three hour average temperature using the average of 180 successive one minute average temperatures. See 63.1349(b)(3).

When the operating status of the raw mill of the in-line kiln/raw mill is changed from off to on or from on to off, the calculation of the 3-hour rolling average temperature must begin anew, without considering previous recordings.

**Monitoring Frequency:** CONTINUOUS  
**Averaging Method:** 3-HOUR ROLLING AVERAGE  
**Reporting Requirements:** SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2015.  
Subsequent reports are due every 6 calendar month(s).

**Condition 20-39:** Capping Monitoring Condition  
Effective between the dates of 12/09/2014 and Permit Expiration Date

**Applicable Federal Requirement:** 6 NYCRR Subpart 201-7

**Item 20-39.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

40 CFR 52.21

**Item 20-39.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 20-39.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 20-39.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 20-39.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 20-39.6:**
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41000
- Emission Point: 43101
- Process: K12

  Regulated Contaminant(s):
  - CAS No: 000630-08-0
  - CARBON MONOXIDE

**Item 20-39.7:**
Compliance Certification shall include the following monitoring:

- Capping: Yes
- Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
- Monitoring Description:
  The CEMS data during the first 10 years after firing of TDF (beginning 180 days after first firing of TDF as required by 40 CFR 52 A 21(r)(6)(iii)) shall be used to determine if there is a major modification (see definition in 40 CFR 52 A 21 (b)(2)). The net emission increase (see definition in 40 CFR 52 A 21 (b)(3)) resulting from the
firing of TDF shall remain less than the upper limit shown below and therefore shall not be significant, thus there shall not be a major modification. Reporting shall be annually and shall comply with 40 CFR 52A 21(r)(6)(v).

Manufacturer Name/Model Number: not available
Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 1081 tons per year
Reference Test Method: 40 CFR 60, B, PS-4
Monitoring Frequency: CONTINUOUS
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 20-44: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.4 (a)

Item 20-44.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-41000
Emission Point: 43101
Process: K12
Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 20-44.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
Except as provided in 6 NYCRR 220-1.4(b), no person shall cause or allow emissions to the atmosphere of any material that has an average six-minute opacity of 20% or greater, except uncombined water, from a portland cement kiln, portland cement kiln with in-line raw mill, clinker cooler, or any other confined processes at a portland cement plant.

Upper Permit Limit: 20 percent
Monitoring Frequency: CONTINUOUS
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 20-45: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 6 NYCRR 220-1.6 (a)

Item 20-45.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

- Emission Unit: 0-41000
  - Process: K12
  - Emission Point: 43101

- Emission Unit: 0-41100
  - Process: KLN
  - Emission Point: 33401

Regulated Contaminant(s):
- CAS No: 007446-09-5 SULFUR DIOXIDE

Item 20-45.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of a Portland cement kiln may purchase and use fuel with sulfur content exceeding the fuel sulfur limitations required by Subpart 225-1 of this Title, provided that the burning of such fuel will not result in emissions of sulfur compounds (expressed as sulfur dioxide) to the outdoor atmosphere at a rate greater than would result through the use of fuels otherwise mandated by Subpart 225-1.

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 20-46: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.7 (a)

Item 20-46.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41000
  - Process: K12
  - Emission Point: 43101

Regulated Contaminant(s):
- CAS No: 0NY075-00-0 PARTICULATES

Item 20-46.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The owner or operator of a Portland cement kiln or
clinker cooler must maintain a file of daily clinker production rates, kiln feed rates, and any particulate emission measurements. The production and feed rates must be summarized monthly. The records and summary must be retained for at least five years following the date of such records and summaries and must be made available for inspection by the department during normal business hours.

Monitoring Frequency: DAILY
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 75: Compliance Certification**
**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable Federal Requirement:** 40 CFR 52.21(r), Subpart A

**Item 75.1:**
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41000
- Emission Point: 43101
- Process: K12

- Regulated Contaminant(s):
  - CAS No: 000630-08-0
  - CARBON MONOXIDE

**Item 75.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES

**Monitoring Description:**
Records shall be maintained of any periods when the CEMS is inoperative. A CEMS performance report shall be submitted semi-annually (the format of 40 CFR 60 A 7(d) will be used). A file shall be maintained of CEMS measurements, calibrations, audits, adjustments and maintenance.

A CEMS Design and Installation Plan shall be submitted concurrently with the certification test protocol. The existing CEMS Quality Assurance (QA) Plan shall be updated with carbon monoxide monitor QA information and submitted to the Department within 60 days of submittal of the CEM certification report. Air Guide 34, dated 04/01/95, shall be used in preparing these plans.

**Monitoring Frequency:** AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

**Reporting Requirements:** AS REQUIRED - SEE MONITORING DESCRIPTION

**Condition 77: Compliance Certification**
**Effective between the dates of 09/13/2010 and Permit Expiration Date**
Applicable Federal Requirement: 40 CFR 63.10(e)(3)(i), Subpart A

Item 77.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41000
- Emission Point: 43101
- Process: K12

Regulated Contaminant(s):
- CAS No: 0NY075-00-0 PARTICULATES

Item 77.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
A monthly kiln stack opacity excess emissions report shall be submitted. This report does not include the CEMS performance report which is a separate report submitted quarterly. The report shall include the items referenced in 40 CFR 63 A 10 (e)(3)(v). These items are: 40 CFR 63 A 10 (c)(7), (c)(8), (c)(10), (c)(11), (c)(13). These items do not include the CEMS items.

(c)(7): The specific ID (ie, the date and time of commencement and completion) of each period of excess opacity that occurs during start ups, shutdowns, and malfunctions.
(c)(8): The specific ID (ie, the date and time of commencement and completion) of each period of excess opacity that occurs during periods other than start ups, shutdowns, and malfunctions.
(c)(10): The nature and cause of any malfunction (if known).
(c)(11): The corrective action taken or preventive measures adopted.
(c)(13): The total process operating time during the month.

Monitoring Frequency: MONTHLY
Reporting Requirements: MONTHLY (CALENDAR)
Reports due 20 days after the reporting period.
The initial report is due 10/20/2010.
Subsequent reports are due every 1 calendar month(s).

Condition 12-64: Capping Monitoring Condition
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 12-64.1:

Air Pollution Control Permit Conditions
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-6

**Item 12-64.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 12-64.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 12-64.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 12-64.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 12-64.6:**
The Compliance Certification activity will be performed for:

- **Emission Unit:** 0-41100
- **Regulated Contaminant(s):**
  - CAS No: 0NY998-00-0 VOC

**Item 12-64.7:**
Compliance Certification shall include the following monitoring:

- **Capping:** Yes
- **Monitoring Type:** CONTINUOUS EMISSION MONITORING (CEM)
- **Monitoring Description:**
  - CAP of VOC to avoid Part 231. Continuous emission monitoring.

- **Manufacturer Name/Model Number:** TBD
- **Parameter Monitored:** VOC
- **Upper Permit Limit:** 254.4 tons per year
- **Reference Test Method:** PS8
Monitoring Frequency: CONTINUOUS
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-65: Capping Monitoring Condition
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR Subpart 201-7

Item 12-65.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 231-8

Item 12-65.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 12-65.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 12-65.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 12-65.5:
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 12-65.6:
The Compliance Certification activity will be performed for:

Emission Unit: 0-41100

Regulated Contaminant(s):
CAS No: 0NY075-00-5 PM-10
Item 12-65.7:
Compliance Certification shall include the following monitoring:

- Capping: Yes
- Monitoring Type: INTERMITTENT EMISSION TESTING
- Monitoring Description:
  - Initial stack test 6 months after start up of new kiln to demonstrate compliance with netting calculations for condensibles per test method M202

Parameter Monitored: PM-10
Upper Permit Limit: 56 tons per year
Reference Test Method: M202
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 12-66: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR Subpart 231-8

Item 12-66.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41100
- Regulated Contaminant(s):
  - CAS No: 000630-08-0 CARBON MONOXIDE

Item 12-66.2:
Compliance Certification shall include the following monitoring:

- Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
- Monitoring Description:
  - Continuous emissions monitoring for CO. Allowable emission rate is 2.5 lb of CO per ton of clinker for BACT.

Manufacturer Name/Model Number: tbd
Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 2.5 pounds per ton
Reference Test Method: PS4B
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 20-52: Compliance Certification
Item 20-52.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-41100
Process: KLN

Regulated Contaminant(s):
CAS No: 000630-08-0 CARBON MONOXIDE

Item 20-52.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
Continuous emissions monitoring for CO. Allowable emission rate is 2.5 lb of CO per ton of clinker for BACT.

Manufacturer Name/Model Number: tbd
Parameter Monitored: CARBON MONOXIDE
Upper Permit Limit: 2.5 pounds per ton
Reference Test Method: PS4B
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

Condition 12-67:  Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement:40CFR 63.1343(b)(1), Subpart LLL

Item 12-67.1:
The Compliance Certification activity will be performed for the facility:
The Compliance Certification applies to:

Emission Unit: 0-41100  Emission Point: 33401
Process: KLN

Regulated Contaminant(s):
CAS No: 007647-01-0 HYDROGEN CHLORIDE

Item 12-67.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:

If the facility operates a new kiln, then the kiln shall meet an emission limit for hydrochloric acid (HCl) of 3 ppmvd corrected to 7% oxygen. This limit shall be met at all times including during normal operations.

The facility shall demonstrate compliance according to one of the following options:

1) The facility shall initially conduct a performance test according to the provisions listed in §63.1348(a)(6) and §63.1349(b)(6)(ii). Continuous compliance shall be demonstrated using a continuous emissions monitor according to the provisions in §63.1348(b)(8) which requires the facility to demonstrate compliance based on a 30 day rolling average, or

2) If the facility uses a wet scrubber, the facility may choose to demonstrate compliance with this limit initially according to the provisions listed in §63.1348(a)(6) which requires the facility to conduct a performance test according to the provisions in §63.1349(b)(6)(i). The facility shall also establish site-specific parameter limits and continuously monitor the parameters listed in §63.1350(m)(5)-(7).

Parameter Monitored: HYDROGEN CHLORIDE  
Upper Permit Limit: 3 parts per million by volume (dry, corrected to 7% O2)  
Reference Test Method: Perf. Spec. 15 or 63.1350(m)(5) and (m)(7)  
Monitoring Frequency: CONTINUOUS  
Averaging Method: 30-DAY ROLLING AVERAGE  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period. The initial report is due 1/30/2012. Subsequent reports are due every 6 calendar month(s).

Condition 12-70: Compliance Certification  
Effective between the dates of 07/19/2011 and Permit Expiration Date  
Applicable Federal Requirement: 40CFR 60.62(a)(3), NSPS Subpart F

Item 12-70.1:  
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41100  
- Emission Point: 33401  
- Process: KLN  
- Regulated Contaminant(s): CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 12-70.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)

Monitoring Description:
On and after the date on which the performance test required by §60.8 is completed, the new kiln shall not exceed an emission limit for nitrogen oxide (NOx) of 1.50 pounds per ton of clinker on a 30-operating day rolling average if the kiln commences construction, reconstruction, or modification after June 16, 2008. This limit does not apply to any alkali bypass installed on the kiln.

An operating day includes all valid data obtained in any daily 24-hour period during which the kiln operates and excludes any measurements made during the daily 24-hour period when the kiln was not operating.

The facility will demonstrate compliance with this limit by installing, maintaining, calibrating, and operating a continuous emission monitor (CEM) for NOx as required in §60.63(d). NOx emissions from the alkali bypass do not need to be monitored, and NOx emission monitoring of the kiln exhaust may be done upstream of any comingled alkali bypass gases.

The facility shall determine hourly clinker production by one of the two methods described in §60.63(b)(1).

The CEM device must be installed and operated according to the procedures listed in §60.63(f) and (g).

Parameter Monitored: OXIDES OF NITROGEN
Upper Permit Limit: 1.50 pounds per ton
Monitoring Frequency: CONTINUOUS
Averaging Method: 30 DAY ROLLING AVERAGE, ROLLED DAILY
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-71: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40 CFR 60.62(a)(4), NSPS Subpart F

Item 12-71.1: The Compliance Certification activity will be performed for:

Emission Unit: 0-41100          Emission Point: 33401
Process: KLN

Air Pollution Control Permit Conditions
Renewal 1/Mod 21/Active          Page 131     FINAL
Regulated Contaminant(s):
- CAS No: 007446-09-5  SULFUR DIOXIDE

Item 12-71.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
On and after the date on which the performance test required by §60.8 is completed, the new kiln shall not exceed an emission limit for sulfur dioxide (SO2) of 0.4 pounds per ton of clinker on a 30-operating day rolling average if the kiln commences construction, reconstruction, or modification after June 16, 2008, unless the facility is demonstrating a 90% SO2 emission reduction across the control device.

An operating day includes all valid data obtained in any daily 24-hour period during which the kiln operates and excludes any measurements made during the daily 24-hour period when the kiln was not operating.

The facility will demonstrate compliance with this limit by installing, maintaining, calibrating, and operating a continuous emission monitor (CEM) for SO2 as required in §60.63(e). If the facility is complying with the alternative 90% SO2 emissions reduction emission limit, the facility must also continuously monitor and record the concentration by volume of SO2 present at the wet scrubber inlet.

The facility shall determine hourly clinker production by one of the two methods described in §60.63(b)(1).

The CEM device must be installed and operated according to the procedures listed in §60.63(f) and (g).

Parameter Monitored: SULFUR DIOXIDE
Upper Permit Limit: 0.4 pounds per ton
Reference Test Method: 40 CFR 60, Appendix B and 60.63(f)
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-73: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1343(b)(1), Subpart LLL
Item 12-73.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41100
- Emission Point: 33401
- Process: KLN

Regulated Contaminant(s):
- CAS No: 0NY075-00-0 PARTICULATES

Item 12-73.2:
Compliance Certification shall include the following monitoring:

- Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
- Monitoring Description:
  If the facility has a new kiln operating under normal conditions, then the kiln shall meet an emission limit for particulate matter (PM) of 0.01 lb/ton clinker produced.

The facility shall demonstrate compliance with this limit according to the provisions listed in §63.1348(a)(1) which requires the facility to install, operate, calibrate, and maintain a PM CEMS in accordance with the provisions listed in §63.1350(b). The clinker production rate shall be calculated using the provisions listed in §63.1350(d). The initial compliance demonstration will be based on the first 30 operating days of production with the PM CEMS installed.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.01 pounds per ton
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 12-74: Compliance Certification
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 63.1343(b)(1), Subpart L.L.L

Item 12-74.1:
The Compliance Certification activity will be performed for:

- Emission Unit: 0-41100
- Emission Point: 33401
- Process: KLN

Regulated Contaminant(s):
Item 12-74.2: Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)
Monitoring Description:
If the facility has a new kiln, then the kiln shall meet an emission limit for total hydrocarbons (THC) of 24 ppmvd during normal operations.

The facility shall initially demonstrate compliance with this limit by using the performance test methods and procedures in §63.1349(b)(4)(i). The average THC concentration obtained during the first 30 operating days must be used to demonstrate compliance.

The facility shall then install, calibrate, operate, and maintain a THC continuous emission monitor (CEM) in accordance with the provisions in §63.1350(i) in order to continuously demonstrate compliance with the total organic HAP emission limit. The THC concentration will be calculated on a 30-day rolling average.

Any source subject to the 24 ppmvd limit for THC may elect to meet an alternative limit of 9 ppmvd for total organic HAP. If the source demonstrates compliance with the 9 ppmvd limit for total organic HAP under the requirements of §63.1349, then the source's THC limit will be adjusted to equal the average THC concentration measured during the performance test for total organic HAP.

Parameter Monitored: 40 CFR 63 - TOTAL HYDROCARBONS (THC)
Upper Permit Limit: 24 parts per million by volume (dry, corrected to 7% O2)
Reference Test Method: Perf. Spec. 8 of 40 CFR 60 appendix B
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).

Condition 20-54: Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 40 CFR 63.1343(b)(1), Subpart LLL

Item 20-54.1: The Compliance Certification activity will be performed for:

Emission Unit: 0-41100
Emission Point: 33401
Process: KLN

Regulated Contaminant(s):
- CAS No: 0NY504-00-0
- 40 CFR 63 - TOTAL HYDROCARBONS (THC)

**Item 20-54.2:**
Compliance Certification shall include the following monitoring:

**Monitoring Type:** CONTINUOUS EMISSION MONITORING (CEM)

**Monitoring Description:**
If the facility has a new kiln, then the kiln shall meet an emission limit for total hydrocarbons (THC) of 24 ppmvd during normal operations.

The facility shall initially demonstrate compliance with this limit by using the performance test methods and procedures in §63.1349(b)(4)(i). Use the THC CEMs to conduct the initial compliance test for the first 30 kiln operating days of kiln operation after the compliance date of the rule. See §63.1348(a).

The average THC concentration obtained during the first 30 operating days must be used to demonstrate compliance. The facility shall then install, calibrate, operate, and maintain a THC continuous emission monitor (CEM) in accordance with the provisions in §63.1350(i) in order to continuously demonstrate compliance with the total organic HAP emission limit. The THC concentration will be calculated on a 30-day rolling average.

Any source subject to the 24 ppmvd limit for THC may elect to meet an alternative limit of 12 ppmvd for total organic HAP. If the source demonstrates compliance with the 12 ppmvd limit for total organic HAP under the requirements of §63.1349, then the source's THC limit will be adjusted to equal the average THC concentration measured during the performance test for total organic HAP.

Manufacturer Name/Model Number: tbd
Parameter Monitored: 40 CFR 63 - TOTAL HYDROCARBONS (THC)
Upper Permit Limit: 24 parts per million by volume (dry, corrected to 7% O2)
Reference Test Method: Perf. Spec. 8 of 40 CFR 60 appendix B
Monitoring Frequency: CONTINUOUS
Averaging Method: 30-DAY ROLLING AVERAGE
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 6 calendar month(s).

**Condition 20-55:** Compliance Certification
Effective between the dates of 12/09/2014 and Permit Expiration Date
Applicable Federal Requirement: 40CFR 63.1343(b)(1), Subpart LLL

Item 20-55.1:
The Compliance Certification activity will be performed for:

Emission Unit: 0-41100  
Emission Point: 33401  
Process: KLN

Regulated Contaminant(s):
CAS No: 0NY075-00-0  PARTICULATES

Item 20-55.2:
Compliance Certification shall include the following monitoring:

Monitoring Type: CONTINUOUS EMISSION MONITORING (CEM)  
Monitoring Description:
If the facility has a new kiln operating under normal conditions, then the kiln shall meet an emission limit for particulate matter (PM) of 0.02 lb/ton clinker produced.

The facility shall demonstrate compliance with this limit according to the provisions listed in §63.1348(a)(1) which requires the facility to install, operate, calibrate, and maintain a PM CPMS (continuous parametric monitoring system) in accordance with the provisions listed in §63.1350(b). The clinker production rate shall be calculated using the provisions listed in §63.1350(d). The initial compliance demonstration will be based on test methods and procedures in 63.1349(b)(1).

Manufacturer Name/Model Number: tbd  
Parameter Monitored: PARTICULATES  
Upper Permit Limit: .02 pounds per ton  
Reference Test Method: Method 5 or 5I of 40 CFR 60, App. A  
Monitoring Frequency: CONTINUOUS  
Averaging Method: 3-HOUR BLOCK AVERAGE  
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period. The initial report is due 1/30/2015. Subsequent reports are due every 6 calendar month(s).

Condition 20-57: Particulate emissions from dust dumps
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.5 (a)

Item 20-57.1:
This Condition applies to Emission Unit: 0-42000

Item 20-57.2:
The owner or operator of any portland cement dust dump must operate such dust dump in a manner which will minimize the horizontal dimensions of the working face.

Condition 20-58: Particulate emissions from dust dumps
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.5 (b)

Item 20-58.1:
This Condition applies to Emission Unit: 0-42000

Item 20-58.2:
In cases where the dust dump is within 1500 feet of any receptor, the owner/operator must seal the dust dump either by crusting or backfill twice per year.

Condition 20-59: Particulate emissions from dust dumps
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable Federal Requirement: 6 NYCRR 220-1.5 (c)

Item 20-59.1:
This Condition applies to Emission Unit: 0-42000

Item 20-59.2:
If dumping procedures do not provide adequate protection from dust reentrainment, the owner/operator must install a windbreak. If visible emissions still reach the property line, the owner/operator must precondition the waste dust.
STATE ONLY ENFORCEABLE CONDITIONS

**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;
(2) The equipment at the permitted facility causing the emergency was at the time being properly operated;
(3) During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) The facility owner and/or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and
standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state applicable requirements and are not subject to compliance certification requirements unless otherwise noted or required under 6 NYCRR Part 201.

Condition 84: Contaminant List
Effective between the dates of 09/13/2010 and Permit Expiration Date

Applicable State Requirement: ECL 19-0301

Item 84.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit (emission limits, control requirements or compliance monitoring conditions).

CAS No: 000050-00-0
Name: FORMALDEHYDE

CAS No: 000071-43-2
Name: BENZENE

CAS No: 000074-82-8
Name: METHANE

CAS No: 000075-01-4
Name: VINYL CHLORIDE

CAS No: 000075-07-0
Name: ACETALDEHYDE

CAS No: 000107-02-8
Name: ACROLEIN

CAS No: 000124-38-9
Name: CARBON DIOXIDE
CAS No: 000630-08-0
Name: CARBON MONOXIDE

CAS No: 001336-36-3
Name: POLYCHLORINATED BIPHENYL

CAS No: 001746-01-6
Name: 2,3,7,8-TETRACHLORODIBENZO-P-DIOXIN

CAS No: 007439-92-1
Name: LEAD

CAS No: 007439-96-5
Name: MANGANESE

CAS No: 007439-97-6
Name: MERCURY

CAS No: 007440-22-4
Name: SILVER

CAS No: 007440-28-0
Name: THALLIUM

CAS No: 007440-36-0
Name: ANTIMONY

CAS No: 007440-38-2
Name: ARSENIC

CAS No: 007440-39-3
Name: BARIUM

CAS No: 007440-41-7
Name: BERYLLIUM

CAS No: 007440-43-9

CAS No: 007440-50-8
Name: COPPER

CAS No: 007440-62-2
Name: VANADIUM
Condition 20-60: Malfunctions and start-up/shutdown activities
Effective between the dates of 12/09/2014 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 201-1.4

Item 20-60.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result
in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred. When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

**Condition 85: Unavoidable noncompliance and violations**

**Effective between the dates of 09/13/2010 and Permit Expiration Date**

**Applicable State Requirement:** 6 NYCRR 201-1.4

**Item 85.1:**

At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

(a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner’s representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supercede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports.
for equipment maintenance or start-up/shutdown for the facility to the commissioner's representative.

(b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superseded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those above.

(c) The Department may also require the owner and/or operator to include in reports described under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.

(d) In the event of maintenance, start-up/shutdown or malfunction conditions which result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner, shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.

(e) In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

Condition 12-8: Air pollution prohibited
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 211.1

Item 12-8.1: No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

Condition 12-9: Compliance Demonstration
Effective between the dates of 07/19/2011 and Permit Expiration Date

Applicable State Requirement: 6 NYCRR 211.1
Item 12-9.1:
The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 12-9.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The facility shall comply with all of the plant-wide control methods and the contingency measures of its Fugitive Dust Control Plan (FDCP) approved by the Department.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2012.
Subsequent reports are due every 6 calendar month(s).
