(315) 265-4000

Facility: POTSDAM SPECIALTY PAPER INC
547A SISSONVILLE RD
POTSDAM, NY 13676

Description:
The Department has received a request for a permit modification to operate air pollution sources and has drafted pursuant to Article 19 (Air Pollution Control) of the Environmental Conservation Law, a State Facility Permit Modification for the facility located at 547A Sissonville Rd., Potsdam, St. Lawrence County, New York. Potsdam Specialty Paper Inc. (PSPI) manufactures various specialty papers from purchased pulp. Facility operations include boilers and a 6 ton per hour paper machine. The primary Standard Industrial Classification representative of this facility is 2621, Paper Mills.

The facility is permitted for the operation of three emission units: O-PAPER, O-COMBS, and U-COATR. Operation of these emission units include two boilers, three pulpers, a paper machine, and two off-line paper coating machines.

This modification is to address the addition of the second off line paper coating machine. In addition to the addition of equipment to the facility permit, this modification will address changes to 6 NYCRR Part 212.
By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator:        THOMAS G VOSS
                              NYSDEC - REGION 6
                              317 WASHINGTON ST
                              WATERTOWN, NY 13601-3787

Authorized Signature: _________________________________    Date: ___ / ___ / ______
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

DEC GENERAL CONDITIONS

GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers
Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.
Condition 1-1: Applications for permit renewals, modifications and transfers

Applicable State Requirement: 6 NYCRR 621.11

Item 1-1.1:
The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 1-1.2:
The permittee must submit a renewal application at least 180 days before the expiration of permits for Title V and State Facility Permits.

Item 1-1.3
Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual transfer of ownership.

Condition 4: Permit modifications, suspensions or revocations by the Department

Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of application for permit modification or renewal-REGION 6

HEADQUARTERS

Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:
Submission of applications for permit modification or renewal are to be submitted to:

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Sealing - 6 NYCRR 200.5
The Commissioner may seal an air contamination source to prevent its operation if compliance with 6 NYCRR Chapter III is not met within the time provided by an order of the Commissioner issued in the case of the violation. Sealing means labeling or tagging a source to notify any person that operation of the source is prohibited, and also includes physical means of preventing the operation of an air contamination source without resulting in destruction of any equipment associated with such source, and includes, but is not limited to, bolting, chaining or wiring shut control panels, apertures or conduits associated with such source.

No person shall operate any air contamination source sealed by the Commissioner in accordance with this section unless a modification has been made which enables such source to comply with all requirements applicable to such modification.

Unless authorized by the Commissioner, no person shall remove or alter any seal affixed to any contamination source in accordance with this section.

Item B: Acceptable Ambient Air Quality - 6 NYCRR 200.6
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Item C: Maintenance of Equipment - 6 NYCRR 200.7
Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications,
required to operate such device effectively.

**Item D: Unpermitted Emission Sources - 6 NYCRR 201-1.2**

If an existing emission source was subject to the permitting requirements of 6 NYCRR Part 201 at the time of construction or modification, and the owner and/or operator failed to apply for a permit for such emission source then the following provisions apply:

(a) The owner and/or operator must apply for a permit for such emission source or register the facility in accordance with the provisions of Part 201.

(b) The emission source or facility is subject to all regulations that were applicable to it at the time of construction or modification and any subsequent requirements applicable to existing sources or facilities.

**Item E: Recycling and Salvage - 6 NYCRR 201-1.7**

Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of 6 NYCRR.

**Item F: Prohibition of Reintroduction of Collected Contaminants to the Air - 6 NYCRR 201-1.8**

No person shall unnecessarily remove, handle, or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

**Item G: Proof of Eligibility for Sources Defined as Exempt Activities - 6 NYCRR 201-3.2 (a)**

The owner and/or operator of an emission source or unit that is eligible to be exempt, may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

**Item H: Proof of Eligibility for Sources Defined as Trivial**
Activities - 6 NYCRR 201-3.3 (a)
The owner and/or operator of an emission source or unit that is listed as being trivial in 6 NYCRR Part 201 may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item I:  Required Emission Tests - 6 NYCRR 202-1.1
An acceptable report of measured emissions shall be submitted, as may be required by the Commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation. Failure to submit a report acceptable to the Commissioner within the time stated shall be sufficient reason for the Commissioner to suspend or deny an operating permit. Notification and acceptable procedures are specified in 6 NYCRR Subpart 202-1.

Item J:  Open Fires Prohibitions - 6 NYCRR 215.2
Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item K: Permit Exclusion - ECL 19-0305
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item L: Federally Enforceable Requirements - 40 CFR 70.6 (b)
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

FEDERAL APPLICABLE REQUIREMENTS
The following conditions are federally enforceable.

Condition 1: Open Fires - Prohibitions
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 215.2

Item 1.1:
Except as allowed by Title 6 NYCRR Section 215.3, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item 1.2
Per Section 215.3, burning in an open fire, provided it is not contrary to other law or regulation, will be allowed as follows:
(a) On-site burning in any town with a total population less than 20,000 of downed limbs and branches (including branches with attached leaves or needles) less than six inches in diameter and eight feet in length between May 15th and the following March 15th. For the purposes of this subdivision, the total population of a town shall include the population of any village or portion thereof located within the town. However, this subdivision shall not be construed to allow burning within any village.
(b) Barbecue grills, maple sugar arches and similar outdoor cooking devices when actually used for cooking or processing food.
(c) Small fires used for cooking and camp fires provided that only charcoal or untreated wood is used as fuel and the fire is not left unattended until extinguished.
(d) On-site burning of agricultural wastes as part of a valid agricultural operation on contiguous agricultural lands larger than five acres actively devoted to agricultural or horticultural use, provided such waste is actually grown or generated on those lands and such waste is capable of being fully burned within a 24-hour period.
(e) The use of liquid petroleum fueled smudge pots to prevent frost damage to crops.
(f) Ceremonial or celebratory bonfires where not otherwise prohibited by law, provided that only untreated wood or other agricultural products are used as fuel and the fire is not left unattended until extinguished.
(g) Small fires that are used to dispose of a flag or religious item, and small fires or other smoke producing process where not otherwise prohibited by law that are used in connection with a religious ceremony.
(h) Burning on an emergency basis of explosive or other dangerous or contraband materials by police or other public safety organization.
(i) Prescribed burns performed according to Part 194 of this Title.
(j) Fire training, including firefighting, fire rescue, and fire/arson investigation training, performed under applicable rules and guidelines of the New York State Department of State's Office of Fire Prevention and Control. For fire training performed on acquired structures, the structures must be emptied and stripped of any material that is toxic, hazardous or likely to emit toxic smoke (such as asbestos, asphalt shingles and vinyl siding or other vinyl products) prior to burning and must be at least 300 feet from other occupied structures. No more than one structure per lot or within a 300 foot radius (whichever is bigger) may be burned in a training exercise.

(k) Individual open fires as approved by the Director of the Division of Air Resources as may be required in response to an outbreak of a plant or animal disease upon request by the commissioner of the Department of Agriculture and Markets, or for the destruction of invasive plant and insect species.

(l) Individual open fires that are otherwise authorized under the environmental conservation law, or by rule or regulation of the Department.

**Condition 3: Capping Monitoring Condition**

**Effective between the dates of 04/07/2014 and 03/31/2024**

**Applicable Federal Requirement:** 6 NYCRR 201-7.1

**Item 3.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 201-6

**Item 3.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

**Item 3.3:**
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**Item 3.4:**
On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 3.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.
Item 3.6:
The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 3.7:
Compliance Demonstration shall include the following monitoring:

Capping: Yes
Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
PSP1 will maintain actual facility wide VOC emissions below 49.9 tpy on a 12 month rolling basis. This will be demonstrated by maintaining records of fuel usage, paper production and material usage. Emission calculations will be tracked and evaluated monthly in accordance with Department approved emission factors and mass balance calculations.

Monitoring Frequency: MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 12 calendar month(s).

Condition 4: Capping Monitoring Condition
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 201-7.1

Item 4.1:
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

6 NYCRR Subpart 201-6

Item 4.2:
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.

Item 4.3:
The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 4.4:
On an annual basis, unless otherwise specified below, beginning one year after the granting of an
emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

**Item 4.5:**
The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

**Item 4.6:**
The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):

- CAS No: 007446-09-5 SULFUR DIOXIDE

**Item 4.7:**
Compliance Demonstration shall include the following monitoring:

- Capping: Yes
- Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
- Monitoring Description:
  - PSPI will maintain actual facility-wide sulfur dioxide emissions below 99.9 tpy on a 12-month rolling basis. This will be demonstrated by maintaining records of fuel usage. Emission calculations will be tracked and evaluated monthly in accordance with Department approved emission factors.

Monitoring Frequency: MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 12 calendar month(s).

**Condition 5: Capping Monitoring Condition**
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement:6 NYCRR 201-7.1

**Item 5.1:**
Under the authority of 6 NYCRR Part 201-7, this condition contains an emission cap for the purpose of limiting emissions from the facility, emission unit or process to avoid being subject to the following applicable requirement(s) that the facility, emission unit or process would otherwise be subject to:

- 6 NYCRR Subpart 201-6

**Item 5.2:**
Operation of this facility shall take place in accordance with the approved criteria, emission limits, terms, conditions and standards in this permit.
Item 5.3: The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

Item 5.4: On an annual basis, unless otherwise specified below, beginning one year after the granting of an emissions cap, the responsible official shall provide a certification to the Department that the facility has operated all emission units within the limits imposed by the emission cap. This certification shall include a brief summary of the emissions subject to the cap for that time period and a comparison to the threshold levels that would require compliance with an applicable requirement.

Item 5.5: The emission of pollutants that exceed the applicability thresholds for an applicable requirement, for which the facility has obtained an emissions cap, constitutes a violation of Part 201 and of the Act.

Item 5.6: The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY210-00-0 OXIDES OF NITROGEN

Item 5.7: Compliance Demonstration shall include the following monitoring:

Capping: Yes
Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
PSPI will maintain actual facility-wide NOx emissions below 99.9 tpy on a 12-month rolling basis. This will be demonstrated by maintaining records of fuel usage. Emission calculations will be tracked and evaluated monthly in accordance with Department approved emission factors.

Monitoring Frequency: MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 12 calendar month(s).

Condition 6: Air pollution prohibited
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 211.1

Item 6.1:
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**Condition 1-1: Compliance Demonstration**

*Effective between the dates of 09/01/2018 and 03/31/2024*

**Applicable Federal Requirement:** 6 NYCRR Part 212

**Item 1-1.1:**
The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

- **Emission Unit:** U-COATR

  - **Emission Unit:** U-COATR
    - **Emission Point:** 00134

  - **Regulated Contaminant(s):**
    - **CAS No:** 000079-06-1 ETHYLENE CARBOXAMIDE

**Item 1-1.2:**
Compliance Demonstration shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

**Monitoring Description:**
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point for any air contaminant listed in Section 212-2.2 Table 2 - High Toxicity Air Contaminant List, the facility owner or operator shall either limit the actual annual emissions from all process operations at the facility so as to not exceed the mass emission limits listed for the individual HTAC; or demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 - Degree of Air Cleaning Required for Non-Criteria Air Contaminants, of this Part for the environmental rating assigned to the contaminant by the Department.

Emissions of Acrylamide (CAS No: 000079-06-1) from this facility, at the specified emission point listed in this condition, shall not exceed 8 pounds per year during any consecutive 12 month period. This limit is established with consideration of AERMOD modeling, which included operational restrictions on the facility and the environmental rating of acrylamide.
Acrylamide has been assigned an environmental rating of "B". This decision was made as a result of facility location, modeling concentrations, distance to discrete receptors, and good engineering judgement. The facility emission rate potential demonstrates compliance with the degree of air cleaning required as outlined in Table 4 of 6 NYCRR Part 212-2.3 (b).

The source owner shall determine compliance with this Acrylamide limit by maintaining records of usage of coating containing acrylamide. Emission rate calculations will be tracked and evaluated on a monthly basis in accordance with Department approved mass balance calculations.

The most recent calculated monthly Acrylamide emissions shall be added to the previous 11 month total to calculate a 12 month rolling total. Records shall be kept on site in a form acceptable to the Department upon request. All records must be kept on site for no less than five years from the date of record. At no time during the term of this permit may this acrylamide emission limit be exceeded. Should the facility desire a less stringent emission limit a modification application must be submitted to the Department and a public noticing period completed.

Work Practice Type: PROCESS MATERIAL THRUPUT
Process Material: COATING MIXED
Upper Permit Limit: 8 pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2019.
Subsequent reports are due every 12 calendar month(s).

Condition 1-2: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR Part 212

Item 1-2.1:
The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

Emission Unit: 0-PAPER Emission Point: 00011

Regulated Contaminant(s):
CAS No: 000079-06-1 ETHYLENE CARBOXAMIDE
Item 1-2.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point for any air contaminant listed in Section 212-2.2 Table 2 - High Toxicity Air Contaminant List, the facility owner or operator shall either limit the actual annual emissions from all process operations at the facility so as to not exceed the mass emission limits listed for the individual HTAC; or demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 - Degree of Air Cleaning Required for Non-Criteria Air Contaminants, of this Part for the environmental rating assigned to the contaminant by the Department.

Emissions of Acrylamide (CAS No: 000079-06-1) from this facility, at the specified emission point listed in this condition, shall not exceed 17 pounds per year during any consecutive 12 month period. This limit is established with consideration of AERMOD modeling, which included operational restrictions on the facility and the environmental rating of acrylamide.

Acrylamide has been assigned an environmental rating of "B". This decision was made as a result of facility location, modeling concentrations, distance to discrete receptors, and good engineering judgement. The facility emission rate potential demonstrates compliance with the degree of air cleaning required as outlined in Table 4 of 6 NYCRR Part 212-2.3 (b).

The source owner shall determine compliance with this Acrylamide limit by maintaining records of usage of coating containing acrylamide. Emission rate calculations will be tracked and evaluated on a monthly basis in accordance with Department approved mass balance calculations.

The most recent calculated monthly Acrylamide emissions shall be added to the previous 11 month total to calculate a 12 month rolling total. Records shall be kept on site in a form acceptable to the Department upon request. All records must be kept on site for no less than five years from the date of record. At no time during the term of this permit may this acrylamide emission limit be exceeded. Should the facility desire a less stringent emission limit a modification application must be
submitted to the Department and a public noticing period completed.

Work Practice Type: PROCESS MATERIAL THRUPUT
Process Material: COATING MIXED
Upper Permit Limit: 17 pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2019.
Subsequent reports are due every 12 calendar month(s).

Condition 1-3: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR Part 212

Item 1-3.1:
The Compliance Demonstration activity will be performed for the facility:
The Compliance Demonstration applies to:

Emission Unit: U-COATR

Emission Unit: U-COATR Emission Point: 00134

Regulated Contaminant(s):
CAS No: 000050-00-0 FORMALDEHYDE

Item 1-3.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point for any air contaminant listed in Section 212-2.2 Table 2 - High Toxicity Air Contaminant List, the facility owner or operator shall either limit the actual annual emissions from all process operations at the facility so as to not exceed the mass emission limits listed for the individual HTAC; or demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 - Degree of Air Cleaning Required for Non-Criteria Air Contaminants, of this Part for the environmental rating assigned to the contaminant by the Department.

Emissions of Formaldehyde from this facility, at the specified emission point listed in this condition, shall not exceed 48 pounds per year during any consecutive 12
 month period. This limit is established with consideration of AERMOD modeling, which included operational restrictions on the facility and the environmental rating of formaldehyde.

Formaldehyde has been assigned an environmental rating of "B". This decision was made as a result of facility location, modeling concentrations, distance to discrete receptors, and good engineering judgement. The facility emission rate potential demonstrates compliance with the degree of air cleaning required as outlined in Table 4 of 6 NYCRR Part 212-2.3 (b).

The source owner shall determine compliance with this Formaldehyde limit by maintaining records of usage of coating containing formaldehyde. Emission rate calculations will be tracked and evaluated on a monthly basis in accordance with Department approved mass balance calculations.

The most recent calculated monthly Formaldehyde emissions shall be added to the previous 11 month total to calculate a 12 month rolling total. Records shall be kept on site in a form acceptable to the Department upon request. All records must be kept on site for no less than five years from the date of record. At no time during the term of this permit may this formaldehyde emission limit be exceeded. Should the facility desire a less stringent emission limit a modification application must be submitted to the Department and a public noticing period completed.

Work Practice Type: PROCESS MATERIAL THRUPUT
Process Material: COATING MIXED
Upper Permit Limit: 48  pounds per year
Monitoring Frequency: MONTHLY
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2019.
Subsequent reports are due every 12 calendar month(s).

Condition 1-4:  Compliance Demonstration
Effective between the dates of  09/01/2018 and 03/31/2024

Applicable Federal Requirement:6 NYCRR Part 212

Item 1-4.1:
The Compliance Demonstration activity will be performed for the facility: The Compliance Demonstration applies to:

Emission Unit: 0-PAPER    Emission Point: 00011
Regulated Contaminant(s):
   CAS No: 000050-00-0 FORMALDEHYDE

Item 1-4.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Emissions of air contaminants to the outdoor atmosphere from any process emission source or emission point for any air contaminant listed in Section 212-2.2 Table 2 - High Toxicity Air Contaminant List, the facility owner or operator shall either limit the actual annual emissions from all process operations at the facility so as to not exceed the mass emission limits listed for the individual HTAC; or demonstrate compliance with the air cleaning requirements for the HTAC as specified in Subdivision 212-2.3(b), Table 4 - Degree of Air Cleaning Required for Non-Criteria Air Contaminants, of this Part for the environmental rating assigned to the contaminant by the Department.

Emissions of Formaldehyde from this facility, at the specified emission point listed in this condition, shall not exceed 549 pounds per year during any consecutive 12 month period. This limit is established with consideration of AERMOD modeling, which included operational restrictions on the facility and the environmental rating of formaldehyde.

Formaldehyde has been assigned an environmental rating of "B". This decision was made as a result of facility location, modeling concentrations, distance to discrete receptors, and good engineering judgement. The facility emission rate potential demonstrates compliance with the degree of air cleaning required as outlined in Table 4 of 6 NYCRR Part 212-2.3 (b).

The source owner shall determine compliance with this Formaldehyde limit by maintaining records of usage of coating containing formaldehyde. Emission rate calculations will be tracked and evaluated on a monthly basis in accordance with Department approved mass balance calculations.

The most recent calculated monthly Formaldehyde emissions shall be added to the previous 11 month total to calculate a 12 month rolling total. Records shall be kept on site in a form acceptable to the Department upon request. All records must be kept on site for no less than five years.
from the date of record. At no time during the term of this permit may this formaldehyde emission limit be exceeded. Should the facility desire a less stringent emission limit a modification application must be submitted to the Department and a public noticing period completed.

Work Practice Type: PROCESS MATERIAL THRUPUT  
Process Material: COATING MIXED  
Upper Permit Limit: 549 pounds per year  
Monitoring Frequency: MONTHLY  
Averaging Method: ANNUAL MAXIMUM ROLLED MONTHLY  
Reporting Requirements: ANNUALLY (CALENDAR)  
Reports due 30 days after the reporting period.  
The initial report is due 1/30/2019.  
Subsequent reports are due every 12 calendar month(s).

**Condition 7: Compliance Demonstration**  
Effective between the dates of 04/07/2014 and 03/31/2024

**Applicable Federal Requirement:** 6 NYCRR 225-1.2 (e)

**Item 7.1:**  
The Compliance Demonstration activity will be performed for the Facility.

**Item 7.2:**  
Compliance Demonstration shall include the following monitoring:

**Monitoring Type:** WORK PRACTICE INVOLVING SPECIFIC OPERATIONS

**Monitoring Description:**  
Owners and/or operators of any stationary combustion installation that fires residual oil are limited to the purchase of residual oil with a sulfur content of 0.50% sulfur on or after July 1, 2014 and to the firing of residual oil with a sulfur content of 0.50% on or after July 1, 2016.

Data collected pursuant to this Subpart must be tabulated and summarized in a form acceptable to the Department, and must be retained for at least five years. The owner of a Title V facility must furnish to the Department such records and summaries, on a semiannual calendar basis, within 30 days after the end of the semiannual period. All other facility owners or distributors must submit these records and summaries upon request of the Department.

Work Practice Type: PARAMETER OF PROCESS MATERIAL  
Process Material: RESIDUAL FUEL (#4, #5 AND/OR #6 FUEL OIL)  
Parameter Monitored: SULFUR CONTENT  
Upper Permit Limit: 0.50 percent by weight
Monitoring Frequency: PER DELIVERY
Averaging Method: MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME (INSTANTANEOUS/DISCRETE OR GRAB)
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 8: Record Availability
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 225-1.6 (d)

Item 8.1: Facility owners required to maintain and retain records pursuant to this Subpart must make such records available for inspection by the Department.

Condition 9: Compliance Demonstration
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 227-1.3

Item 9.1:
The Compliance Demonstration activity will be performed for the Facility.

Item 9.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES

Monitoring Description:
Operators of oil-fired boilers which are not exempt from permitting and where a continuous opacity monitor is not utilized for measuring smoke emissions, shall be required to perform the following:

1) Observe the stack for each boiler which is operating on oil once per day for visible emissions. This observation(s) must be conducted during daylight hours except during adverse weather conditions (fog, rain, or snow).

2) The results of each observation must be recorded in a bound logbook or other format acceptable to the Department. The following data must be recorded for each stack:
   - date and time of day
   - observer's name
   - identity of emission point
   - weather condition
   - was a plume observed?

Inclement weather conditions shall be recorded for those days when observations are prohibited. This logbook must
be retained at the facility for five (5) years after the date of the last entry.

3) If the operator observes any visible emissions (other than steam - see below) two consecutive days firing oil (the firing of other fuels in between days of firing oil does not count as an interruption in the consecutive days of firing oil), then a Method 9 analysis (based upon a 6-minute mean) of the affected emission point(s) must be conducted within two (2) business days of such occurrence. The results of the Method 9 analysis must be recorded in the logbook. The operator must contact the Regional Air Pollution Control Engineer within one (1) business day of performing the Method 9 analysis if the opacity standard is contravened. Upon notification, any corrective actions or future compliance schedules shall be presented to the Department for acceptance.

** NOTE ** Steam plumes generally form after leaving the top of the stack (this is known as a detached plume). The distance between the stack and the beginning of the detached plume may vary, however, there is (normally) a distinctive distance between the plume and stack. Steam plumes are white in color and have a billowy consistency. Steam plumes dissipate within a short distance of the stack (the colder the air the longer the steam plume will last) and leave no dispersion trail downwind of the stack.

Monitoring Frequency: DAILY
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2015.
Subsequent reports are due every 12 calendar month(s).

**Condition 10:** Compliance Demonstration
Effective between the dates of 04/07/2014 and 03/31/2024

**Applicable Federal Requirement:** 6 NYCRR 227-1.7

**Item 10.1:**
The Compliance Demonstration activity will be performed for the Facility.

**Item 10.2:**
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
(a) Emission data. Any person who owns or operates a stationary combustion installation described in 6 NYCRR Part 227-1 shall provide pertinent data concerning emissions when so requested by the commissioner.
(b) Test methods. Sampling, compositing and analysis of fuel samples shall be carried out in accordance with the most recent ASTM standard methods or equivalent methods acceptable to the commissioner.

Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 1-5: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 228-1.3 (a)

Item 1-5.1:
The Compliance Demonstration activity will be performed for the Facility.

Item 1-5.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
No person shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the performance of a Method 9 opacity observation at any time during facility operation.

The permittee will conduct daily observations of visible emissions from the emission unit, process, etc. to which this condition applies. The observation(s) must be conducted during daylight hours except during adverse weather conditions (fog, rain, or snow).

The results of each observation must be recorded in a bound logbook or other format acceptable to the Department. The following data must be recorded for each stack:
- date and time of day
- observer's name
- identity of emission point
- weather conditions
- was a plume observed?

Inclement weather conditions shall be recorded for those days when observations are prohibited. This logbook must be retained at the facility for five (5) years after the date of the last entry. If the operator observes any visible emissions (other than steam) the permittee will immediately investigate any such occurrence and take
corrective action, as necessary, to reduce or eliminate the emissions. If visible emissions above those that are normal and in compliance continue to be present after corrective actions are made, the permittee will immediately notify the Department and conduct a Method 9 assessment within 24 hours to determine the degree of opacity.

Records of these observations, investigations and corrective actions will be kept on site in a format acceptable to the Department.

Parameter Monitored: OPACITY
Upper Permit Limit: 20 percent
Monitoring Frequency: UPON REQUEST OF REGULATORY AGENCY
Averaging Method: 6 MINUTE AVERAGE
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 11: Applicability
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable Federal Requirement: 40CFR 63, Subpart ZZZZ

Item 11.1:
Facilities that have reciprocating internal combustion engines must comply with applicable portions of 40 CFR 63 subpart ZZZZ.

**** Emission Unit Level ****

Condition 1-6: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 212-1.6 (a)

Item 1-6.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-PAPER

Item 1-6.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
No person shall cause or allow emissions having an average opacity during any six consecutive minutes of 20 percent or greater from any process emission source, except only the emission of uncombined water. The Department reserves the right to perform or require the
The permittee will conduct observations of visible emissions from the emission unit, process, etc. to which this condition applies at the monitoring frequency stated below while the process is in operation. The permittee will immediately investigate any instance where there is cause to believe that visible emissions above those that are normal and in compliance are occurring or have occurred from a process source.

If visible emissions above those that are normal (this may be zero percent opacity for many or all emission sources) and in compliance with section 212-1.6 are detected, the permittee shall determine the cause, take necessary corrective action(s), and verify that the excess visible emissions problem has been resolved.

If visible emissions above those that are normal and in compliance continue to be present after corrections have been made, the permittee will immediately notify the Department and conduct a Method 9 assessment within 24 hours to determine the degree of opacity.

Records of observations, investigations, and corrective actions shall be kept on site in a format acceptable to the Department.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 1-7: Compliance Demonstration Effective between the dates of 09/01/2018 and 03/31/2024 Applicable Federal Requirement: 6 NYCRR 212-2.4 (b)

Item 1-7.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-PAPER

Regulated Contaminant(s):
   CAS No: 0NY075-00-0 PARTICULATES

Item 1-7.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
   Emissions of solid particulates are limited to 0.050
grains of particulates per cubic foot of exhaust gas, expressed at standard conditions on a dry gas basis. Compliance testing will be conducted at the discretion of the Department.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.050 grains per dscf
Reference Test Method: EPA Method 5
Monitoring Frequency: UPON REQUEST OF REGULATORY AGENCY
Averaging Method: AVERAGING METHOD AS PER REFERENCE TEST METHOD INDICATED
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 1-8: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 228-1.4 (d)

Item 1-8.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: U-COATR Emission Point: 00134

Regulated Contaminant(s):
CAS No: 0NY998-00-0 VOC

Item 1-8.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The Off-Line Paper Coating Machine is a "Class D" Coating Operation, 6 NYCRR Subpart 228-1.4(d), because it is in the Paper, Film, and Foil category, not located in the New York Metropolitan area and located at a facility with PTE's greater than or equal to 10 tons of VOC per year. Coating used in "Class D" paper coating operations are required to contain not more than 0.08 kg VOC/kg coating or lb VOC/lb coating. The VOC content limits can be met by averaging the VOC content of the materials used on a single surface coating line (daily with-in-line averaging).

PSPI will maintain and provide to the Department upon request a certification from the coating supplier/manufacturer that lists the parameters to determine the VOC content of each coating. In addition, PSPI will maintain records of purchase, usage or production of coating material, including solvents. PSPI will submit these records to the Department, if requested, within 90 days of receiving the request.
Condition 1-9: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 228-1.3

Item 1-9.1: The Compliance Demonstration activity will be performed for:

- Emission Unit: U-COATR
- Emission Point: 00134
- Process: APL

Item 1-9.2: Compliance Demonstration shall include the following monitoring:

- Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
- Monitoring Description:
  - Opacity limit for facilities operating a coating line: No person shall cause or allow emissions to the outdoor atmosphere having an average opacity of 20 percent or greater for any consecutive six-minute period.

- Parameter Monitored: OPACITY
- Upper Permit Limit: 20 percent
- Monitoring Frequency: UPON REQUEST OF REGULATORY AGENCY
- Averaging Method: 6 MINUTE AVERAGE
- Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY

Condition 1-10: Compliance Demonstration
Effective between the dates of 09/01/2018 and 03/31/2024

Applicable Federal Requirement: 6 NYCRR 227-1.3

Item 1-10.1: The Compliance Demonstration activity will be performed for:

- Emission Unit: U-COATR
- Emission Point: 00134
- Process: DRY

Item 1-10.2: Compliance Demonstration shall include the following monitoring:

- Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
- Monitoring Description:
  - No person shall operate a stationary combustion installation which exhibits greater than 20 percent opacity (six minute average), expect for one six-minute period per hour of not more than 27 percent opacity. The
facility will conduct EPA Method 9 upon request by the Department.

Parameter Monitored: OPACITY
Upper Permit Limit: 20 percent
Reference Test Method: Method 9
Monitoring Frequency: UPON REQUEST OF REGULATORY AGENCY
Averaging Method: 6 MINUTE AVERAGE
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY
STATE ONLY ENFORCEABLE CONDITIONS
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Emergency Defense - 6 NYCRR 201-1.5

An emergency, as defined by subpart 201-2, constitutes an affirmative defense to penalties sought in an enforcement action brought by the Department for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner or operator can identify the cause(s) of the emergency;
(2) The equipment at the permitted facility causing the emergency was at the time being properly operated and maintained;
(3) During the period of the emergency the facility owner or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) The facility owner or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item B: Public Access to Recordkeeping for Facilities With State Facility Permits - 6 NYCRR 201-1.10 (a)

Where facility owners and/or operators keep records pursuant to compliance with the requirements of 6 NYCRR Subpart 201-5.4, and/or the emission capping requirements of 6 NYCRR Subpart 201-7, the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records.
Facility owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department.

Item C: **General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5**

Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

**STATE ONLY APPLICABLE REQUIREMENTS**

The following conditions are state only enforceable.

**Condition 14: Contaminant List**

Effective between the dates of 04/07/2014 and 03/31/2024

**Applicable State Requirement:ECL 19-0301**

**Item 14.1:**

Emissions of the following contaminants are subject to contaminant specific requirements in this permit (emission limits, control requirements or compliance monitoring conditions).

- **CAS No: 000050-00-0**
  - Name: FORMALDEHYDE

- **CAS No: 000079-06-1**
  - Name: ETHYLENE CARBOXYAMIDE

- **CAS No: 007446-09-5**
  - Name: SULFUR DIOXIDE

- **CAS No: 0NY075-00-0**
Name: PARTICULATES
CAS No: 0NY210-00-0
Name: OXIDES OF NITROGEN
CAS No: 0NY998-00-0
Name: VOC

Condition 15: Malfunctions and start-up/shutdown activities
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable State Requirement: 6 NYCRR 201-1.4

Item 15.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred. When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

Condition 16: Emission Unit Definition
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable State Requirement: 6 NYCRR Subpart 201-5

Item 16.1 (From Mod 1):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-PAPER
Emission Unit Description:
This emission unit consists of three pulpers (primary, Broke and Hi-Lo), two vacuum pumps, a Pre-Dryer, Size Press, Infrared Dryer, and After Dryer used to produce various types of paper. The entire emission unit is subject to 6 NYCRR 212.

Building(s): BASE
BTRRM
MCHRMM

Item 16.2 (From Mod 1):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: U-COATR
Emission Unit Description:
This emission unit consists of the Off-Line Paper Coating Machine. The Off-Line Paper Coating Machine will have two drying sections: Dryer #1 (5.0 MMBTU/hr design heat input rate), and Dryer #2 (4.0 MMBTU/hr design heat input rate) to cure the coating materials applied to the paper sheet in the coating section. The emission unit is subject to 6 NYCRR 212.

Building(s): POT

Item 16.3 (From Mod 0):
The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-COMBS
Emission Unit Description:
This emission unit consists of Boiler #1 (45.7 MMBtu/hr), Boiler #4 (111 MMBtu/hr) and the Infrared Dryer (12.6 MMBtu/hr). Boiler #1 and #4 are capable of firing both natural gas and No. 6 fuel oil. The Infrared Dryer fires natural gas exclusively.

Building(s): MCHRMM
STEAM

Condition 17: Renewal deadlines for state facility permits
Effective between the dates of 04/07/2014 and 03/31/2024

Applicable State Requirement: 6 NYCRR 201-5.2 (c)

Item 17.1:
The owner or operator of a facility having an issued state facility permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

**Condition 18: Compliance Demonstration**

*Effective between the dates of 04/07/2014 and 03/31/2024*

**Applicable State Requirement:** 6 NYCRR 201-5.3 (c)

**Item 18.1:**
The Compliance Demonstration activity will be performed for the Facility.

**Item 18.2:**
Compliance Demonstration shall include the following monitoring:

- **Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
- **Monitoring Description:**
  - Any reports or submissions required by this permit shall be submitted to the Regional Air Pollution Control Engineer (RAPCE) at the following address:

  Division of Air Resources  
  NYS Dept. of Environmental Conservation  
  Region 6  
  State Office Building  
  317 Washington Ave.  
  Watertown, NY 13601

- **Reporting Requirements:** ANNUALLY (CALENDAR)
  - Reports due 30 days after the reporting period.
  - The initial report is due 1/30/2015.
  - Subsequent reports are due every 12 calendar month(s).

**Condition 19: Visible Emissions Limited**

*Effective between the dates of 04/07/2014 and 03/31/2024*

**Applicable State Requirement:** 6 NYCRR 211.2

**Item 19.1:**
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

**Condition 1-11: Compliance Demonstration**

*Effective between the dates of 09/01/2018 and 03/31/2024*

**Applicable State Requirement:** 6 NYCRR 211.2

**Item 1-11.1:**
The Compliance Demonstration activity will be performed for the Facility.
Item 1-11.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Except as permitted by a specific part of Title 6 of the
NYCRR, no person shall cause or allow any air
contamination source to emit any material having an
opacity equal to or greater than 20 percent (six minute
average) except for one continuous six-minute period per
hour of not more than 57 percent opacity.

Operators of air contamination sources that are not exempt
from permitting and where a continuous opacity monitor is
not utilized for measuring smoke emissions, shall be
required to perform the following:

1) Observe the stack(s) or vent(s) once per day for
visible emissions. This observation(s) must be conducted
during daylight hours except during adverse weather
conditions (fog, rain, or snow).

2) The results of each observation must be recorded in a
bound logbook or other format acceptable to the
Department. The following data must be recorded for each
stack:
   - weather condition
   - was a plume observed?

This logbook must be retained at the facility for five (5)
years after the date of the last entry.

3) If the operator observes any visible emissions (other
than steam - see below) two consecutive days, then a
Method 9 analysis (based upon a 6-minute mean) of the
affected emission point(s) must be conducted within two
(2) business days of such occurrence. The results of the
Method 9 analysis must be recorded in the logbook. The
operator must contact the Regional Air Pollution Control
Engineer within one (1) business day of performing the
Method 9 analysis if the opacity standard is contravened.
Upon notification, any corrective actions or future
compliance schedules shall be presented to the Department
for acceptance.

** NOTE ** Steam plumes generally form after leaving the
top of the stack (this is known as a detached plume). The
distance between the stack and the beginning of the
detached plume may vary, however, there is (normally) a
distinctive distance between the plume and stack. Steam

Air Pollution Control Permit Conditions
Mod 1/Active Page 31 FINAL
plumes are white in color and have a billowy consistency. Steam plumes dissipate within a short distance of the stack (the colder the air the longer the steam plume will last) and leave no dispersion trail downwind of the stack.

Parameter Monitored: OPACITY  
Upper Permit Limit: 57 percent  
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION  
Averaging Method: ONE CONTINUOUS 6-MINUTE PERIOD PER HOUR  
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**** Emission Unit Level ****

Condition 20: Emission Point Definition By Emission Unit  
Effective between the dates of 04/07/2014 and 03/31/2024  
Applicable State Requirement: 6 NYCRR Subpart 201-5

Item 20.1(From Mod 1):
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-PAPER  
Emission Point: 00011  
Height (ft.): 115  
Diameter (in.): 38  
NYTMN (km.): 4951.155  
NYTME (km.): 500.264  
Building: MCHRM

Item 20.2(From Mod 1):
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: U-COATR  
Emission Point: 00134  
Height (ft.): 35  
Diameter (in.): 36  
NYTMN (km.): 4951.182  
NYTME (km.): 500.401  
Building: POT

Item 20.3(From Mod 0):
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 0-COMBS  
Emission Point: 00004  
Height (ft.): 70  
Diameter (in.): 45  
NYTMN (km.): 4950.941  
NYTME (km.): 500.209  
Building: STEAM  
Emission Point: 00005  
Height (ft.): 33  
Length (in.): 26  
Width (in.): 26
NYTMN (km.): 4950.945  NYTME (km.): 500.282  Building: MCHRM

Emission Point:  0A001
    Height (ft.): 135  Diameter (in.): 96
NYTMN (km.): 4950.93  NYTME (km.): 500.23  Building: STEAM

**Item 20.4 (From Mod 0):**
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit:  0-PAPER

Emission Point:  00007
    Height (ft.): 29  Diameter (in.): 43
NYTMN (km.): 4950.962  NYTME (km.): 500.262  Building: MCHRM

Emission Point:  00008
    Height (ft.): 29  Diameter (in.): 43
NYTMN (km.): 4950.964  NYTME (km.): 500.266  Building: MCHRM

Emission Point:  00009
    Height (ft.): 29  Diameter (in.): 43
NYTMN (km.): 4950.967  NYTME (km.): 500.273  Building: MCHRM

Emission Point:  00010
    Height (ft.): 29  Diameter (in.): 43
NYTMN (km.): 4950.969  NYTME (km.): 500.278  Building: MCHRM

Emission Point:  00014
    Height (ft.): 115  Diameter (in.): 30
NYTMN (km.): 4950.936  NYTME (km.): 500.239  Building: MCHRM

Emission Point:  00015
    Height (ft.): 30  Diameter (in.): 48
NYTMN (km.): 4950.979  NYTME (km.): 500.259  Building: BTRRM

Emission Point:  00053
    Height (ft.): 28  Diameter (in.): 30
NYTMN (km.): 4951.001  NYTME (km.): 500.263  Building: BTRRM

**Condition 21:**  Process Definition By Emission Unit
Effective between the dates of  04/07/2014 and 03/31/2024

Applicable State Requirement: 6 NYCRR Subpart 201-5

**Item 21.1 (From Mod 1):**
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:  0-PAPER
Process: P01
    Process Description:
This process consists of three pulpers (primary, Broke and Hi-Lo), two vacuum pumps, a Pre-Dryer, Size Press,
Infrared Dryer, and After Dryer used to produce various types of paper.

Emission Source/Control: AFTDR - Process
Emission Source/Control: PREDR - Process
Emission Source/Control: PULP1 - Process
Emission Source/Control: PULP2 - Process
Emission Source/Control: PULP3 - Process
Emission Source/Control: SIZEP - Process
Emission Source/Control: VACP1 - Process
Emission Source/Control: VACP2 - Process

Item 21.2 (From Mod 1):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-COATR
Process: APL  
Source Classification Code: 3-07-011-99
Process Description:
This process is the applicator section of the Off-Line Paper Coating Machine. Air collected from this section exhausts through the stack emission point EP00134.

Emission Source/Control: COAT1 - Process
Design Capacity: 1,200 feet per minute

Item 21.3 (From Mod 1):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: U-COATR
Process: DRY  
Source Classification Code: 1-05-001-06
Process Description:
This process is combustion of natural gas in Dryer #1 and Dryer #2 in the Off-Line Paper Coating Machine. Both dryers exhaust through the stack emission point EP00134.

Emission Source/Control: DRY01 - Combustion
Design Capacity: 5 million BTUs per hour

Emission Source/Control: DRY02 - Combustion
Design Capacity: 4 million BTUs per hour

Item 21.4 (From Mod 0):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-COMBS
Process: BRG
Process Description:
  This is Boiler # 1 and Boiler # 4 firing natural gas.
  Boiler # 1 and Boiler # 4 exhaust to EP 0A001 and EP 00004 respectively.

Emission Source/Control:   B0001 - Combustion
Design Capacity: 45.7  million Btu per hour

Emission Source/Control:   B0004 - Combustion
Design Capacity: 111  million Btu per hour

Item 21.5(From Mod 0):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:    0-COMBS
Process: BRO
Process Description:
  This process is Boiler # 1 and Boiler # 4 firing No. 6 fuel oil. Boiler # 1 and Boiler # 4 exhaust to EP0A001 and EP 00004 respectively.

Emission Source/Control:   B0001 - Combustion
Design Capacity: 45.7  million Btu per hour

Emission Source/Control:   B0004 - Combustion
Design Capacity: 111  million Btu per hour

Item 21.6(From Mod 0):
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:    0-COMBS
Process: IRD
Process Description:
  This process is the Infrared Dryer combustion emissions from firing natural gas. The Infrared Dryer combustion emissions exhaust to EP00005.

Emission Source/Control:   IRDRY - Combustion
Design Capacity: 12.6  million Btu per hour
