(716) 823-8188

Description:
South Towns Sewage Treatment plant has operated two fluidized bed sludge incinerators since 1982. The operator has submitted an updated application for a State Facility Permit. Included in this permit are the New Source Performance Standards codified in 40 cfr part 60 subpart O, Standards of Performance for Sewage Treatment Plants, The National Emission Standards for Mercury and Beryllium, subparts E and C respectively, and the Clean Water Act requirements for sludge incinerators under 40 cfr 503 subpart E.

Conditions in the permit for operation and maintenance of a multistage wet scrubber insure compliance with 40 cfr subpart O, particulate standard of 1.30 lb/dry ton sludge feed, and the 20 % opacity standard.. Scrubber Differential Pressure, exhaust gas oxygen content, sludge feed rate and sludge characteristics are monitored in accordance with the rule. The rule does allow for less monitoring if emissions of particulate is demonstrated to be less than 0.75 lb/ton dry sludge feed. South Towns has stack tested the incinerators twice, once in 1982 and the other in 1995. Both times the particulate results were below 0.75 lb/ton. If particulate emissions ever exceed 0.75 lb/ton then additional monitoring in accordance with 40 cfr 60.153 (d) will be required.

The National Emission Standards for Hazardous Air Pollutants, 40 cfr part 61 subpart E, Mercury Emissions, allows compliance with the 3200 grams/24 hour operating period to be determined

FINAL
by sampling the sludge for mercury content and assumes that all of the mercury exits the stack upon combustion. Heavy metal content in sludge is very low. Mercury results from stack testing in 1995 list the discharge result as 9.6 grams of Mercury/day for both incinerators operating, well below the allowable. Sludge is sampled and analyzed once every other month to demonstrate continuous compliance.

The National Emission Standards for Hazardous Air Pollutants-40 cfr part 61, subpart C, Beryllium emissions, limits emissions to 10 grams/day. Stack test results of the South Towns sewage sludge incinerator in 1995 for Beryllium were 0.0135 g/day/ incinerator, well below the allowable. Sludge is sampled and analyzed once every other month to demonstrate continuous compliance.

The source is also subject the Clean Water Act part 503 regulations which regulates disposal of sewage sludge. Section 503 E regulates incineration of sludge and requires the use of a Hydrocarbon Analyzer to determine compliance with the 100 ppm as propane standard. The regulation also required stack testing and modeling of heavy metal emissions. The Stack test and modeling to determine the dispersion factor is detailed in a report dated February 13, 1996 from South Towns. Due to the low metal content of the sludge the facility easily maintains compliance with the metals emissions portion of this regulation. Sampling of sludge bi-monthly for heavy metals insures continuous compliance. Annual reports summarizing the information collected to determine compliance with this rule are due by February 19 of each year. This rule is included on the DEC side of the permit.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: DAVID S DENK
DIVISION OF ENVIRONMENTAL PERMITS
270 MICHIGAN AVE
BUFFALO, NY 14203-2999

Authorized Signature: _______________________________ Date: __/__/______
New York State Department of Environmental Conservation  
Facility DEC ID: 9144800012  

Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees, and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.

FINAL
LIST OF CONDITIONS

DEC GENERAL CONDITIONS
General Provisions
Facility Inspection by the Department
Relationship of this Permit to Other Department Orders and Determinations
Applications for Permit Renewals and Modifications
Permit Modifications, Suspensions and Revocations by the Department
Facility Level
Submission of Applications for Permit Modification or Renewal - REGION 9 HEADQUARTERS
Total Hydrocarbon Continuous Emission Monitor Requirement
Operating Combustion Temperature
Frequency of monitoring arsenic, cadmium, chromium, lead, and nickel in sewage sludge.
Reporting and Recordkeeping Requirements
Condition 1: Facility Inspection by the Department
Applicable State Requirement: ECL 19-0305

Item 1.1: The permitted site or facility, including relevant records, is subject to inspection at reasonable hours and intervals by an authorized representative of the Department of Environmental Conservation (the Department) to determine whether the permittee is complying with this permit and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and SAPA 401(3).

Item 1.2: The permittee shall provide a person to accompany the Department's representative during an inspection to the permit area when requested by the Department.

Item 1.3: A copy of this permit, including all referenced maps, drawings and special conditions, must be available for inspection by the Department at all times at the project site or facility. Failure to produce a copy of the permit upon request by a Department representative is a violation of this permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations
Applicable State Requirement: ECL 3-0301.2(m)

Item 2.1: Unless expressly provided for by the Department, issuance of this permit does not modify, supersede or rescind any order or determination previously issued by the Department or any of the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for Permit Renewals and Modifications
Applicable State Requirement: 6NYCRR 621.13

Item 3.1: The permittee must submit a separate written application to the Department for renewal, modification or transfer of this permit. Such application must include any forms or supplemental information the Department requires. Any renewal, modification or transfer granted by the Department must be in writing.

Item 3.2: The permittee must submit a renewal application at least 180 days before expiration of permits for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility Permits.

Item 3.3: Permits are transferrable with the approval of the department unless specifically prohibited by the statute, regulation or another permit condition. Applications for permit transfer should be submitted prior to actual
Condition 4: Permit Modifications, Suspensions and Revocations by the Department

Applicable State Requirement: 6NYCRR 621.14

Item 4.1:
The Department reserves the right to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of Applications for Permit Modification or Renewal -REGION 9

HEADQUARTERS

Applicable State Requirement: 6NYCRR 621.5(a)

Item 5.1:
Submission of applications for permit modification or renewal are to be submitted to:
NYSDEC Regional Permit Administrator
Region 9 Headquarters
Division of Environmental Permits
270 Michigan Avenue
Buffalo, NY 14203-2999
(716) 851-7165

Condition 6: Total Hydrocarbon Continuous Emission Monitor Requirement

Applicable State Requirement: 40CFR 503-E.44

Item 6.1:
Total Hydrocarbons in the exit gas from a sewage sludge incinerator stack must be continuously measured and recorded using a flame ionization detection instrument referenced to propane unless a Carbon Monoxide monitor is used per the requirements of 40cfr 503.40(c). The instrument shall be installed, calibrated, operated, and maintained per manufacturer specifications; shall have a heated sampling line maintained at a temperature of 150 degrees Celsius or higher at all times; and shall be calibrated at least once every 24-hour operating period using propane.

An instrument that continuously measures and records the oxygen concentration in the sewage sludge incinerator stack exit gas shall be installed calibrated, operated, and maintained per manufacturers...
An instrument that continuously measures and records information used to determine the moisture content in the sewage sludge incinerator stack exit gas shall be installed calibrated, operated, and maintained per manufacturers specifications.

An instrument that continuously measures and records combustion temperatures shall be installed, calibrated, operated, and maintained per manufacturers specifications.

The monthly average concentration for total hydrocarbons in the exit gas from a sewage sludge incinerator stack, corrected for zero percent moisture using the correction factor from equation (7) and to seven percent oxygen using the correction factor from equation (8), shall not exceed 100 parts per million on a volumetric basis when measured using the instrument required by section 503.45(a). (Equations 7 and 8 are in section 503.45. Any deviations shall be reported annually.

**Condition 7: Operating Combustion Temperature**

**Applicable State Requirement:** 40CFR 503-E.45

**Item 7.1:**

Operation of a sewage sludge incinerator shall not cause the operating combustion temperature for the sewage sludge incinerator to exceed the performance test combustion temperature by more than 20 percent. An instrument that continuously measures and records combustion temperatures shall be installed, calibrated, operated, and maintained for a sewage sludge incinerator. Any deviations to this condition shall be reported annually.

**Condition 8: Frequency of monitoring arsenic, cadmium, chromium, lead, and nickel in sewage sludge.**

**Applicable State Requirement:** 40CFR 503-E.46

**Item 8.1:**

Frequency of monitoring for arsenic, cadmium, chromium, lead, and nickel in sewage sludge fed to a sewage sludge incinerator shall be the frequency in table 1 of 40 CFR 503.46. Equal or greater than 1,500 metric tons per 365 day period, (dry weight basis) but less than 15,000, sample sludge once per 60 days (six times per year). Reports summarizing results due by February 19 of each year.

After the sewage sludge has been monitored for two years at the specified frequency, the permitting authority may reduce the frequency of monitoring arsenic, cadmium, chromium, lead, and nickel.

**Condition 9: Reporting and Recordkeeping Requirements**

**Applicable State Requirement:** 40CFR 503-E.48

**Item 9.1:**

Record-keeping

The person who fires sewage sludge in an incinerator shall develop the following information and shall retain this information for five years.

1) The concentration of lead, arsenic, cadmium, chromium, and nickel in the sewage sludge fed to the...
incinerator.
2) The total hydrocarbons concentrations in the exit gas from the sewage sludge incinerator.
3) Information that indicates the requirements in the National Emission Standard for beryllium in subpart C of 40 cfr part 61 are met.
4) Information that indicates the requirements in the National Emission Standards for mercury in subpart E of 40 cfr part 61 are met.
5) The operating combustion temperatures for the sewage sludge incinerator.
6) Values for the air pollution control device operating parameters.
7) The oxygen concentration and information used to measure moisture content in the exit gas from the sewage sludge incinerator stack.
8) The sewage sludge feed rate.
9) The stack height for the sewage sludge incinerator.
10) The dispersion factor for the site where the sewage sludge incinerator is located.
11) The control efficiency for lead, arsenic, cadmium, chromium, and nickel for each sewage sludge incinerator.
12) The risk specific concentration for chromium calculated using equation(6), if applicable.
13) A calibration and maintenance log for the instruments used to measure the total hydrocarbons concentration and oxygen concentration in the exit gas from the sewage sludge incinerator stack, the information needed to determine moisture content in in the exit gas , and the combustion temperatures.

Reporting.

Class 1 sludge management facilities, POTWs ( as defined in 40 cfr 501.2) with a design flow rate equal to or greater than one million gallons per day, and POTWs that serve a population of 10,000 people of greater shall submit the information to the USEPA region 2 office and the Regional NYSDEC office by February 19 of each year.

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Sealing - 6NYCRR Part 200.5
The Commissioner may seal an air contamination source to prevent its operation if compliance with 6 NYCRR Chapter III is not met within the time provided by an order of the Commissioner issued in the case of the violation. Sealing means labeling or tagging a source to notify any person that operation of the source is prohibited, and also includes physical means of preventing the operation of an air contamination source without resulting in destruction of any equipment associated with such source, and includes, but is not limited to, bolting, chaining or wiring shut control panels, apertures or conduits associated with such source.

No person shall operate any air contamination source sealed by the Commissioner in accordance with this section unless a modification has been made which enables such source to comply with all requirements applicable to such modification.

Unless authorized by the Commissioner, no person shall remove or alter any seal affixed to any contamination source in accordance with this section.

Item B: Acceptable Ambient Air Quality - 6NYCRR Part 200.6
Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Item C: Maintenance of Equipment - 6NYCRR Part 200.7
Any person who owns or operates an air contamination
source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications, required to operate such device effectively.

**Item D:** Unpermitted Emission Sources - 6NYCRR Part 201-1.2

If an existing emission source was subject to the permitting requirements of 6NYCRR Part 201 at the time of construction or modification, and the owner and/or operator failed to apply for a permit for such emission source then the following provisions apply:

(a) The owner and/or operator must apply for a permit for such emission source or register the facility in accordance with the provisions of Part 201.

(b) The emission source or facility is subject to all regulations that were applicable to it at the time of construction or modification and any subsequent requirements applicable to existing sources or facilities.

**Item E:** Emergency Defense - 6NYCRR Part 201-1.5

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;
(2) The equipment at the permitted facility causing the emergency was at the time being properly operated;
(3) During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(4) The facility owner and/or operator notified the Department within two working days after the event.
occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.

(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item F: Recycling and Salvage - 6NYCRR Part 201-1.7

Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of 6 NYCRR.

Item G: Prohibition of Reintroduction of Collected Contaminants to the Air - 6NYCRR Part 201-1.8

No person shall unnecessarily remove, handle, or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Item H: Proof of Eligibility for Sources Defined as Exempt Activities - 6 NYCCR Part 201-3.2(a)

The owner and/or operator of an emission source or unit that is eligible to be exempt, may be required to certify that it operates within the specific criteria described in 6 NYCCR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCCR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item I: Proof of Eligibility for Sources Defined as Trivial Activities - 6 NYCCR Part 201-3.3(a)

The owner and/or operator of an emission source or unit that is listed as being trivial in 6 NYCCR Part 201 may be required to certify that it operates within the specific
criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item J: Required Emission Tests - 6 NYCRR Part 202-1.1

An acceptable report of measured emissions shall be submitted, as may be required by the Commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation. Failure to submit a report acceptable to the Commissioner within the time stated shall be sufficient reason for the Commissioner to suspend or deny an operating permit. Notification and acceptable procedures are specified in 6NYCRR Part 202-1.

Item K: Visible Emissions Limited - 6 NYCRR Part 211.3

Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

Item L: Open Fires - 6 NYCRR Part 215

No person shall burn, cause, suffer, allow or permit the burning in an open fire of garbage, rubbish for salvage, or rubbish generated by industrial or commercial activities.

Item M: Permit Exclusion - ECL 19-0305

The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not
limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item N:  **Federally Enforceable Requirements - 40 CFR 70.6(b)**
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

**FEDERAL APPLICABLE REQUIREMENTS**
The following conditions are federally enforceable.

**Condition 1:**  **Compliance Demonstration**
Effective between the dates of 05/15/2006 and Permit Expiration Date

**Applicable Federal Requirement:** 40CFR 60.152(a)(1), NSPS Subpart O

**Item 1.1:**
The Compliance Demonstration activity will be performed for:

- Emission Unit: 0-INCIN
- Regulated Contaminant(s): CAS No: 0NY075-00-0 PARTICULATES

**Item 1.2:**
Compliance Demonstration shall include the following monitoring:

- Monitoring Type: INTERMITTENT EMISSION TESTING
- Monitoring Description:
  - § 60.152 Standard for particulate matter.
  - (a) On and after the date on which the performance test required to be conducted by §60.8 is completed, no owner
or operator of any sewage sludge incinerator subject to
the provisions of this subpart shall discharge or cause
the discharge into the atmosphere of:
(1) Particulate matter at a rate in excess of 0.65 g/kg
dry sludge input (1.30 lb/ton dry sludge input)

Parameter Monitored: PARTICULATES
Upper Permit Limit: 1.30   pounds per ton
Reference Test Method: EPA approved methods
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING
DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2007.
Subsequent reports are due every 12 calendar month(s).

Condition 2:   Compliance Demonstration
Effective between the dates of  05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.152(a)(2), NSPS Subpart O

Item 2.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN

Item 2.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL
DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
§ 60.152 Standard for particulate matter.
(a) On and after the date on which the performance test
required to be conducted by §60.8 is completed, no owner
or operator of any sewage sludge incinerator subject to
the provisions of this subpart shall discharge or cause
the discharge into the atmosphere of:

(2) Any gases which exhibit 20 percent opacity or
greater.

Parameter Monitored: OPACITY
Upper Permit Limit: 20   percent
Reference Test Method: EPA method 22 or method 9
Monitoring Frequency: DAILY
Averaging Method: 6 MINUTE AVERAGE
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2007.
Subsequent reports are due every 12 calendar month(s).

Condition 3: Access to sludge charged for sampling
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.153(a)(2), NSPS Subpart O

Item 3.1:
This Condition applies to Emission Unit: 0-INCIN

Item 3.2:
§ 60.153 Monitoring of operations.
(a) The owner or operator of any sludge incinerator subject to the provisions of this subpart shall:

(2) Provide access to the sludge charged so that a well-mixed representative grab sample of the sludge can be obtained.

Condition 4: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.153(d), NSPS Subpart O

Item 4.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN

Item 4.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
(d) The owner or operator of any multiple hearth, fluidized bed, or electric sludge incinerator subject to the provisions of this subpart from which the particulate matter emission rate measured during the performance test required under §60.154(d) is less than or equal to 0.38 g/kg of dry sludge input (0.75 lb/ton) shall be required to comply with the requirements in paragraphs (a), (b), and (c) of this section during all periods of this incinerator following the performance test except that:

(1) Continuous operation of the monitoring devices and data recorders in paragraphs (a)(1), (b)(3), and (b)(4) of
this section shall not be required.
(2) Daily sampling and analysis of sludge feed in paragraph (b)(5) of this section shall not be required.
(3) Record keeping specified in paragraph (c)(3) of this section shall not be required.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION

Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2006.
Subsequent reports are due every 6 calendar month(s).

Condition 5: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.154, NSPS Subpart O

Item 5.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 5.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Stack testing of the incinerators to determine compliance with 40 CFR 60 subpart O, New Source Performance Standards for Sewage Treatment Plants, was conducted in April, 1982 and in August of 1995. Both tests demonstrated emissions of particulates to be less than 0.75 lb/ton dry sludge input. If future stack testing for particulates results in emissions greater than 0.75 lb/ton dry sludge input but less than the standard of 1.30 lb/ton dry sludge input then additional monitoring of operations as described under 40 CFR 60.153(a), (b), and (c) will be required. No additional monitoring or reporting required.

Upper Permit Limit: 1.30 pounds per ton
Reference Test Method: EPA approved methods
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING
DESCRIPTION
Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2007.
Subsequent reports are due every 12 calendar month(s).

Condition 6: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 61.32(a), NESHAP Subpart C

Item 6.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN

Regulated Contaminant(s):
CAS No: 007440-41-7 BERYLLIUM

Item 6.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
40 cfr 503 regulations require sampling and analyzing sludge prior to incineration twice per month for all 503 metals that include Beryllium. 40 cfr 61.32 states that samples shall be taken over such a period or periods as necessary to accurately determine the maximum emissions which will occur in a 24 hour period. The sampling of twice per month will satisfy this requirement.

Parameter Monitored: BERYLLIUM
Upper Permit Limit: 10 grams per day
Monitoring Frequency: BI-MONTHLY (ONCE EVERY 2 MONTHS)
Averaging Method: 24-HOUR AVERAGE
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2007.
Subsequent reports are due every 12 calendar month(s).

Condition 7: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date
Item 7.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN

Regulated Contaminant(s):
CAS No: 007439-97-6  MERCURY

Item 7.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
40 cfr 61-E.50 limits emissions of Mercury from Sewage Sludge Incinerators to 3200 grams/24-hour period. The demonstration of compliance is required upon start-up or within 90 days of regulation applicability. The regulation also requires sampling at intervals of at least once per year if results are over 1600 grams of mercury per 24 hour period. Stack test data from 1982 and 1995 measured average emissions well below 1600 grams/24 hour period. 40 cfr 503 regulations require sampling and analysis of sludge prior to incineration twice per month for all 503 metals that include mercury. This data may be used to determine compliance with this condition.

Parameter Monitored: MERCURY
Upper Permit Limit: 3200  grams per day
Monitoring Frequency: BI-MONTHLY (ONCE EVERY 2 MONTHS)
Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2007.
Subsequent reports are due every 12 calendar month(s).

Condition 9:  Compliance Demonstration
Effective between the dates of  05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.153(b)(1), NSPS Subpart O

Item 9.1:
The Compliance Demonstration activity will be performed for:
Item 9.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
For incinerators equipped with a wet scrubbing device, install, calibrate, maintain and operate a monitoring device that continuously measures and records the pressure drop of the gas flow through the wet scrubbing device. Where a combination of wet scrubbers is used in series, the pressure drop of the gas flow through the combined system shall be continuously monitored. The device used to monitor scrubber pressure drop shall be certified by the manufacturer to be accurate within ±250 pascals (±1 inch water gauge) and shall be calibrated on an annual basis in accordance with the manufacturer's instructions.

The operator shall submit to the USEPA Administrator and Regional NYSDEC office semiannually a report that contains the following:
For incinerators that achieved an average particulate matter emission rate of 0.75 lb/ton dry sludge input or less during the most recent performance test a report of average scrubber pressure drop measurements for each period of 15 minutes duration or more during which the pressure drop of the scrubber was less than 30 percent from the average scrubber pressure drop measured during the recent performance test.

Parameter Monitored: PRESSURE CHANGE
Lower Permit Limit: 31 inches of water
Monitoring Frequency: CONTINUOUS
Averaging Method: 15-MINUTE RUNNING LIMIT
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2006.
Subsequent reports are due every 6 calendar month(s).

Condition 8: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.153(b)(2), NSPS Subpart O
Item 8.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN  Emission Point: XSTAK

Item 8.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Install, calibrate, maintain and operate a monitoring device that continuously measures and records the oxygen content of the incinerator exhaust gas. The oxygen monitor shall be located upstream of any rabble shaft cooling air inlet into the incinerator exhaust gas stream, fan, ambient air recirculation damper, or any other source of dilution air. The oxygen monitoring device shall be certified by the manufacturer to have a relative accuracy of ±5 percent over its operating range and shall be calibrated according to method(s) prescribed by the manufacturer at least once each 24-hour operating period.

The operator shall submit to the USEPA Administrator and NYSDEC Regional office semiannually a report in writing which contains the following:
A record of average oxygen content in the incinerator exhaust gas for each period of 1-hour duration or more that the oxygen content of the incinerator exhaust gas exceeds the average oxygen content measured during the recent performance test by more than 3 percent.

Parameter Monitored: OXYGEN CONTENT
Upper Permit Limit: 11.8  percent
Monitoring Frequency: CONTINUOUS
Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2006.
Subsequent reports are due every 6 calendar month(s).

Condition 11:  Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date
Applicable Federal Requirement: 40CFR 60.153(b)(1), NSPS Subpart O

**Item 11.1:**
The Compliance Demonstration activity will be performed for:

- Emission Unit: 0-INCIN
- Emission Point: YSTAK

**Item 11.2:**
Compliance Demonstration shall include the following monitoring:

**Monitoring Type:** MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

**Monitoring Description:**
For incinerators equipped with a wet scrubbing device, install, calibrate, maintain and operate a monitoring device that continuously measures and records the pressure drop of the gas flow through the wet scrubbing device. Where a combination of wet scrubbers is used in series, the pressure drop of the gas flow through the combined system shall be continuously monitored. The device used to monitor scrubber pressure drop shall be certified by the manufacturer to be accurate within ±250 pascals (±1 inch water gauge) and shall be calibrated on an annual basis in accordance with the manufacturer's instructions.

The operator shall submit to the USEPA Administrator and Regional NYSDEC office semiannually a report that contains the following:

For incinerators that achieved an average particulate matter emission rate of 0.75 lb/ton dry sludge input or less during the most recent performance test a report of average scrubber pressure drop measurements for each period of 15 minutes duration or more during which the pressure drop of the scrubber was less than 30 percent from the average scrubber pressure drop measured during the recent performance test.

**Parameter Monitored:** PRESSURE CHANGE
**Lower Permit Limit:** 31 inches of water
**Monitoring Frequency:** CONTINUOUS
**Averaging Method:** 15-MINUTE RUNNING LIMIT
**Reporting Requirements:** SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2006.
Subsequent reports are due every 6 calendar month(s).
Condition 10: Compliance Demonstration
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable Federal Requirement: 40CFR 60.153(b)(2), NSPS Subpart O

Item 10.1:
The Compliance Demonstration activity will be performed for:

Emission Unit: 0-INCIN  Emission Point: YSTAK

Item 10.2:
Compliance Demonstration shall include the following monitoring:

- Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
- Monitoring Description:
  Install, calibrate, maintain and operate a monitoring device that continuously measures and records the oxygen content of the incinerator exhaust gas. The oxygen monitor shall be located upstream of any rabble shaft cooling air inlet into the incinerator exhaust gas stream, fan, ambient air recirculation damper, or any other source of dilution air. The oxygen monitoring device shall be certified by the manufacturer to have a relative accuracy of ±5 percent over its operating range and shall be calibrated according to method(s) prescribed by the manufacturer at least once each 24-hour operating period.

  The operator shall submit to the USEPA Administrator and NYSDEC Regional office semiannually a report in writing which contains the following:
  A record of average oxygen content in the incinerator exhaust gas for each period of 1-hour duration or more that the oxygen content of the incinerator exhaust gas exceeds the average oxygen content measured during the recent performance test by more than 3 percent.

Parameter Monitored: OXYGEN CONTENT
Upper Permit Limit: 11.8 percent
Monitoring Frequency: CONTINUOUS
Averaging Method: 1 HOUR MAXIMUM - NOT TO BE EXCEEDED AT ANY TIME
Reporting Requirements: SEMI-ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 7/30/2006.
Subsequent reports are due every 6 calendar month(s).
STATE ONLY ENFORCEABLE CONDITIONS  
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Public Access to Recordkeeping for Facilities With State Facility Permits - 6NYCRR Part 201-1.10(a)
Where emission source owners and/or operators keep records pursuant to compliance with the operational flexibility requirements of 6 NYCRR Subpart 201-5.4(b)(1), and/or the emission capping requirements of 6 NYCRR Subparts 201-7.2(d), 201-7.3(f), 201-7.3(g), 201-7.3(h)(5), 201-7.3(i) and 201-7.3(j), the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records. Emission source owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department of receipt of the request.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or
STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state only enforceable.

Condition 12: Contaminant List
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable State Requirement: ECL 19-0301

Item 12.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit (emission limits, control requirements or compliance monitoring conditions).

- CAS No: 007440-41-7
  Name: BERYLLIUM

- CAS No: 007439-97-6
  Name: MERCURY

- CAS No: 0NY075-00-0
  Name: PARTICULATES

Condition 13: Unavoidable noncompliance and violations
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 201-1.4

Item 13.1:
At the discretion of the commissioner a violation of any applicable emission standard for necessary scheduled equipment maintenance, start-up/shutdown conditions and malfunctions or upsets may be excused if such violations are unavoidable. The following actions and recordkeeping and reporting requirements must be adhered to in such circumstances.

(a) The facility owner and/or operator shall compile and maintain records of all equipment maintenance or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the commissioner’s representative when requested to do so in writing or when so required by a condition of a permit issued for the corresponding air contamination source except where conditions elsewhere in this permit which contain more stringent reporting and notification provisions for an applicable requirement, in which case they supersede those stated here. Such reports shall describe why the violation was unavoidable and shall include the time, frequency and duration of the maintenance and/or start-up/shutdown activities and the identification of air contaminants, and the estimated emission rates. If a facility owner and/or operator is subject to continuous stack monitoring and quarterly reporting requirements, he need not submit reports for equipment maintenance or start-up/shutdown for the facility to the commissioner’s representative.
(b) In the event that emissions of air contaminants in excess of any emission standard in 6 NYCRR Chapter III Subchapter A occur due to a malfunction, the facility owner and/or operator shall report such malfunction by telephone to the commissioner's representative as soon as possible during normal working hours, but in any event not later than two working days after becoming aware that the malfunction occurred. Within 30 days thereafter, when requested in writing by the commissioner's representative, the facility owner and/or operator shall submit a written report to the commissioner's representative describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates. These reporting requirements are superceded by conditions elsewhere in this permit which contain reporting and notification provisions for applicable requirements more stringent than those above.

(c) The Department may also require the owner and/or operator to include in reports described under (a) and (b) above an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions depending on the deviation of the malfunction and the air contaminants emitted.

(d) In the event of maintenance, start-up/shutdown or malfunction conditions which result in emissions exceeding any applicable emission standard, the facility owner and/or operator shall take appropriate action to prevent emissions which will result in contravention of any applicable ambient air quality standard. Reasonably available control technology, as determined by the commissioner, shall be applied during any maintenance, start-up/shutdown or malfunction condition subject to this paragraph.

(e) In order to have a violation of a federal regulation (such as a new source performance standard or national emissions standard for hazardous air pollutants) excused, the specific federal regulation must provide for an affirmative defense during start-up, shutdowns, malfunctions or upsets.

Condition 14: Emission Unit Definition
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 201-5

Item 14.1: The facility is authorized to perform regulated processes under this permit for:
Emission Unit: 0-INCIN
Emission Unit Description: 2-Fluidized bed type incinerators utilizing # 2 fuel oil as an auxiliary fuel source for the combustion of municipal sewage sludge. Emissions are controlled with multistage wet scrubbers.

Building(s): stawtp

Condition 15: Air pollution prohibited
Effective between the dates of 05/15/2006 and Permit Expiration Date

Applicable State Requirement: 6NYCRR 211.2
Item 15.1:
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

**** Emission Unit Level ****

Condition 16:  Emission Point Definition By Emission Unit
Effective between the dates of  05/15/2006 and Permit Expiration Date

Applicable State Requirement:  6NYCRR 201-5

Item 16.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit:  0-INClCIN

Emission Point:  XSTAK
Height (ft.): 46  Diameter (in.): 15
NYTMN (km.): 4744  NYTME (km.): 184.8  Building: stawtp

Emission Point:  YSTAK
Height (ft.): 46  Diameter (in.): 15
NYTMN (km.): 4744  NYTME (km.): 184.8  Building: stawtp

Condition 17:  Process Definition By Emission Unit
Effective between the dates of  05/15/2006 and Permit Expiration Date

Applicable State Requirement:  6NYCRR 201-5

Item 17.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit:  0-INClCIN
Process:  XIN  Source Classification Code: 5-01-005-16
Process Description:
Dewatered sewage sludge using emulsion polymers (17-25% TS) is ram fed into fluidized bed of sand for incineration. # 2 oil is added as required as an auxiliary fuel source. Fluidizing air is added to the process by a blower discharging air through a heat exchanger and into
the reactor. Sludge and oil combus in the fluidized sand bed. Combustion gases leave the reactor and then pass through a multi stage wet scrubber where ash is removed from the gases. Exhaust gases pass through the stack to atmosphere. Ash is discharged into an ash thickener. Thickened ash is dried in a drying bed.

Emission Source/Control: XSCRB - Control
Control Type: WET SCRUBBER

Emission Source/Control: XINCI - Incinerator
Design Capacity: 18.75 tons per day
Waste Feed Method: AUTOMATIC RAM FEED
Waste Type: SEWAGE SLUDGE

Item 17.2:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 0-INCIN
Process: YIN
Source Classification Code: 5-01-005-16
Process Description:
Dewatered sewage sludge using emulsion polymers (17-25% TS) is ram fed into fluidized bed of sand for incineration. #2 oil is added as required as an auxiliary fuel source. Fluidizing air is added to the process by a blower discharging air through a heat exchanger and into the reactor. Sludge and oil combust in the fluidized sand bed. Combustion gases leave the reactor and then pass through a multi stage wet scrubber where ash is removed from the gases. Exhaust gases pass through the stack to atmosphere. Ash is discharged into an ash thickener. Thickened ash is dried in a drying bed.

Emission Source/Control: YSCRB - Control
Control Type: WET SCRUBBER

Emission Source/Control: YINCI - Incinerator
Design Capacity: 18.75 tons per day
Waste Feed Method: AUTOMATIC RAM FEED
Waste Type: SEWAGE SLUDGE
