Description:
This Air State Facility permit represents an activated carbon regeneration furnace owned by the City of North Tonawanda and leased to Calgon Carbon Corporation. Calgon will only process spent carbon from municipal water treatment, other food grade, or potable water application sources. The sludge incinerator, which is not represented in this permit, has not operated in many years and the City currently has no plans to initiate operation at this time.

This modification incorporates changes to monitoring conditions as a result of the stack test conducted on July 23, 2014.

Processes described are the activated carbon regeneration furnace (emission point 00001) and the baghouse (emission point 00003) associated with carbon loading and unloading activities. The activated carbon regeneration furnace is vented to a venturi scrubber and 2-stage impingement scrubber with mist eliminator for particulate and acid gas control.
Particulate emissions generated from the carbon regeneration furnace can consist of hazardous metals including hexavalent chromium, mercury and lead and are assigned an 'A' environmental rating. In accordance with 6NYCRR, Part 212-2.1(b) and Table 4 of 6NYCRR, Part 212-2.3(b) a minimum overall control efficiency of 99% will be required for particulate matter. A stack test was conducted and determined the overall efficiency of the scrubber system to be greater than 99 percent.

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, the General Conditions specified and any Special Conditions included as part of this permit.

Permit Administrator: LISA M CZECHOWICZ
NYSDEC - REGION 9
270 MICHIGAN AVE
BUFFALO, NY 14203-2915

Authorized Signature: _____________________________ Date: ___ / ___ / _____
Notification of Other State Permittee Obligations

Item A: Permittee Accepts Legal Responsibility and Agrees to Indemnification

The permittee expressly agrees to indemnify and hold harmless the Department of Environmental Conservation of the State of New York, its representatives, employees and agents ("DEC") for all claims, suits, actions, and damages, to the extent attributable to the permittee's acts or omissions in connection with the compliance permittee's undertaking of activities in connection with, or operation and maintenance of, the facility or facilities authorized by the permit whether in compliance or not in any compliance with the terms and conditions of the permit. This indemnification does not extend to any claims, suits, actions, or damages to the extent attributable to DEC's own negligent or intentional acts or omissions, or to any claims, suits, or actions naming the DEC and arising under article 78 of the New York Civil Practice Laws and Rules or any citizen suit or civil rights provision under federal or state laws.

Item B: Permittee's Contractors to Comply with Permit

The permittee is responsible for informing its independent contractors, employees, agents and assigns of their responsibility to comply with this permit, including all special conditions while acting as the permittee's agent with respect to the permitted activities, and such persons shall be subject to the same sanctions for violations of the Environmental Conservation Law as those prescribed for the permittee.

Item C: Permittee Responsible for Obtaining Other Required Permits

The permittee is responsible for obtaining any other permits, approvals, lands, easements and rights-of-way that may be required to carry out the activities that are authorized by this permit.

Item D: No Right to Trespass or Interfere with Riparian Rights

This permit does not convey to the permittee any right to trespass upon the lands or interfere with the riparian rights of others in order to perform the permitted work nor does it authorize the impairment of any rights, title, or interest in real or personal property held or vested in a person not a party to the permit.
LIST OF CONDITIONS

DEC GENERAL CONDITIONS

General Provisions
Facility Inspection by the Department
Relationship of this Permit to Other Department Orders and Determinations
Applications for permit renewals, modifications and transfers
Permit modifications, suspensions or revocations by the Department

Facility Level
Submission of application for permit modification or renewal-REGION 9 HEADQUARTERS
DEC GENERAL CONDITIONS

***** General Provisions *****

GENERAL CONDITIONS - Apply to ALL Authorized Permits.

Condition 1: Facility Inspection by the Department

Applicable State Requirement: ECL 19-0305

Item 1.1:
The permitted site or facility, including relevant records, is subject to inspection at reasonable
hours and intervals by an authorized representative of the Department of Environmental
Conservation (the Department) to determine whether the permittee is complying with this permit
and the ECL. Such representative may order the work suspended pursuant to ECL 71-0301 and
SAPA 401(3).

Item 1.2:
The permittee shall provide a person to accompany the Department's representative during an
inspection to the permit area when requested by the Department.

Item 1.3:
A copy of this permit, including all referenced maps, drawings and special conditions, must be
available for inspection by the Department at all times at the project site or facility. Failure to
produce a copy of the permit upon request by a Department representative is a violation of this
permit.

Condition 2: Relationship of this Permit to Other Department Orders and Determinations

Applicable State Requirement: ECL 3-0301 (2) (m)

Item 2.1:
Unless expressly provided for by the Department, issuance of this permit does not modify,
supersede or rescind any order or determination previously issued by the Department or any of
the terms, conditions or requirements contained in such order or determination.

Condition 3: Applications for permit renewals, modifications and transfers

Applicable State Requirement: 6 NYCRR 621.11

Item 3.1:
The permittee must submit a separate written application to the Department for renewal,
modification or transfer of this permit. Such application must include any forms or supplemental
information the Department requires. Any renewal, modification or transfer granted by the
Department must be in writing.

Item 3.2:
The permittee must submit a renewal application at least 180 days before expiration of permits
for Title V Facility Permits, or at least 30 days before expiration of permits for State Facility
Permits.

Item 3.3:
Permits are transferrable with the approval of the department unless specifically prohibited by
the statute, regulation or another permit condition. Applications for permit transfer should be
submitted prior to actual transfer of ownership.
Condition 4: Permit modifications, suspensions or revocations by the Department
Applicable State Requirement: 6 NYCRR 621.13

Item 4.1:
The Department reserves the right to exercise all available authority to modify, suspend, or revoke this permit in accordance with 6NYCRR Part 621. The grounds for modification, suspension or revocation include:

a) materially false or inaccurate statements in the permit application or supporting papers;
b) failure by the permittee to comply with any terms or conditions of the permit;
c) exceeding the scope of the project as described in the permit application;
d) newly discovered material information or a material change in environmental conditions, relevant technology or applicable law or regulations since the issuance of the existing permit;
e) noncompliance with previously issued permit conditions, orders of the commissioner, any provisions of the Environmental Conservation Law or regulations of the Department related to the permitted activity.

**** Facility Level ****

Condition 5: Submission of application for permit modification or renewal-REGION 9
HEADQUARTERS
Applicable State Requirement: 6 NYCRR 621.6 (a)

Item 5.1:
Submission of applications for permit modification or renewal are to be submitted to:
NYSDEC Regional Permit Administrator
Region 9 Headquarters
Division of Environmental Permits
270 Michigan Avenue
Buffalo, NY 14203-2915
(716) 851-7165

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Sealing - 6 NYCRR 200.5

The Commissioner may seal an air contamination source to prevent its operation if compliance with 6 NYCRR Chapter III is not met within the time provided by an order of the Commissioner issued in the case of the violation. Sealing means labeling or tagging a source to notify any person that operation of the source is prohibited, and also includes physical means of preventing the operation of an air contamination source without resulting in destruction of any equipment associated with such source, and includes, but is not limited to, bolting, chaining or wiring shut control panels, apertures or conduits associated with such source.

No person shall operate any air contamination source sealed by the Commissioner in accordance with this section unless a modification has been made which enables such source to comply with all requirements applicable to such modification.

Unless authorized by the Commissioner, no person shall remove or alter any seal affixed to any contamination source in accordance with this section.

Item B: Acceptable Ambient Air Quality - 6 NYCRR 200.6

Notwithstanding the provisions of 6 NYCRR Chapter III, Subchapter A, no person shall allow or permit any air contamination source to emit air contaminants in quantities which alone or in combination with emissions from other air contamination sources would contravene any applicable ambient air quality standard and/or cause air pollution. In such cases where contravention occurs or may occur, the Commissioner shall specify the degree and/or method of emission control required.

Item C: Maintenance of Equipment - 6 NYCRR 200.7

Any person who owns or operates an air contamination source which is equipped with an emission control device shall operate such device and keep it in a satisfactory state of maintenance and repair in accordance with ordinary and necessary practices, standards and procedures, inclusive of manufacturer's specifications,
Item D: Unpermitted Emission Sources - 6 NYCRR 201-1.2

If an existing emission source was subject to the permitting requirements of 6 NYCRR Part 201 at the time of construction or modification, and the owner and/or operator failed to apply for a permit for such emission source then the following provisions apply:

(a) The owner and/or operator must apply for a permit for such emission source or register the facility in accordance with the provisions of Part 201.

(b) The emission source or facility is subject to all regulations that were applicable to it at the time of construction or modification and any subsequent requirements applicable to existing sources or facilities.

Item E: Emergency Defense - 6 NYCRR 201-1.5

An emergency constitutes an affirmative defense to an action brought for noncompliance with emissions limitations or permit conditions for all facilities in New York State.

(a) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

1. An emergency occurred and that the facility owner and/or operator can identify the cause(s) of the emergency;

2. The equipment at the permitted facility causing the emergency was at the time being properly operated;

3. During the period of the emergency the facility owner and/or operator took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and

4. The facility owner and/or operator notified the Department within two working days after the event occurred. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(b) In any enforcement proceeding, the facility owner and/or operator seeking to establish the occurrence of an emergency has the burden of proof.
(c) This provision is in addition to any emergency or upset provision contained in any applicable requirement.

Item F: Recycling and Salvage - 6 NYCRR 201-1.7

Where practical, any person who owns or operates an air contamination source shall recycle or salvage air contaminants collected in an air cleaning device according to the requirements of 6 NYCRR.

Item G: Prohibition of Reintroduction of Collected Contaminants to the Air - 6 NYCRR 201-1.8

No person shall unnecessarily remove, handle, or cause to be handled, collected air contaminants from an air cleaning device for recycling, salvage or disposal in a manner that would reintroduce them to the outdoor atmosphere.

Item H: Proof of Eligibility for Sources Defined as Exempt Activities - 6 NYCRR 201-3.2 (a)

The owner and/or operator of an emission source or unit that is eligible to be exempt, may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item I: Proof of Eligibility for Sources Defined as Trivial Activities - 6 NYCRR 201-3.3 (a)

The owner and/or operator of an emission source or unit that is listed as being trivial in 6 NYCRR Part 201 may be required to certify that it operates within the specific criteria described in 6 NYCRR Subpart 201-3. The owner or operator of any such emission source must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility which contains emission sources or units subject to 6 NYCRR Subpart 201-3, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations, or law.

Item J: Required Emission Tests - 6 NYCRR 202-1.1
An acceptable report of measured emissions shall be submitted, as may be required by the Commissioner, to ascertain compliance or noncompliance with any air pollution code, rule, or regulation. Failure to submit a report acceptable to the Commissioner within the time stated shall be sufficient reason for the Commissioner to suspend or deny an operating permit. Notification and acceptable procedures are specified in 6 NYCRR Subpart 202-1.

Item K: Open Fires Prohibitions - 6 NYCRR 215.2
Except as allowed by section 215.3 of 6 NYCRR Part 215, no person shall burn, cause, suffer, allow or permit the burning of any materials in an open fire.

Item L: Permit Exclusion - ECL 19-0305
The issuance of this permit by the Department and the receipt thereof by the Applicant does not and shall not be construed as barring, diminishing, adjudicating or in any way affecting any legal, administrative or equitable rights or claims, actions, suits, causes of action or demands whatsoever that the Department may have against the Applicant for violations based on facts and circumstances alleged to have occurred or existed prior to the effective date of this permit, including, but not limited to, any enforcement action authorized pursuant to the provisions of applicable federal law, the Environmental Conservation Law of the State of New York (ECL) and Chapter III of the Official Compilation of the Codes, Rules and Regulations of the State of New York (NYCRR). The issuance of this permit also shall not in any way affect pending or future enforcement actions under the Clean Air Act brought by the United States or any person.

Item M: Federally Enforceable Requirements - 40 CFR 70.6 (b)
All terms and conditions in this permit required by the Act or any applicable requirement, including any provisions designed to limit a facility's potential to emit, are enforceable by the Administrator and citizens under the Act. The Department has, in this permit, specifically designated any terms and conditions that are not required under the Act or under any of its applicable requirements as being enforceable under only state regulations.

FEDERAL APPLICABLE REQUIREMENTS
The following conditions are federally enforceable.

Condition 1: Air pollution prohibited
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 211.1

Item 1.1:
No person shall cause or allow emissions of air contaminants to the outdoor atmosphere of such quantity, characteristic or duration which are injurious to human, plant or animal life or to property, or which unreasonably interfere with the comfortable enjoyment of life or property. Notwithstanding the existence of specific air quality standards or emission limits, this prohibition applies, but is not limited to, any particulate, fume, gas, mist, odor, smoke, vapor, pollen, toxic or deleterious emission, either alone or in combination with others.

Condition 2: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 211.1

Item 2.1:
The Compliance Demonstration activity will be performed for the Facility.

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES

Item 2.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The permittee shall immediately address any carbon spills outside the facility including but not limited to outside storage areas, parking lots, roadways, and loading docks. The main public road at the driveway from the facility shall at all times be kept clean of dust/dirt which may be tracked off-site by trucks.

The permittee will maintain the level of housekeeping in the process areas so that fugitive emissions are not emitted from the building.

Monitoring Frequency: CONTINUOUS
Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

**** Emission Unit Level ****

Condition 3: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)
Item 3.1:
The Compliance Demonstration activity will be performed for:

- Emission Unit: 1-CARBR
- Process: 01A

Regulated Contaminant(s):
- CAS No: 0NY075-00-5 PM-10

Item 3.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: INTERMITTENT EMISSION TESTING
Monitoring Description:
Particulate emissions generated from the carbon regeneration furnace may consist of hazardous metals including hexavalent chromium, mercury and lead and therefore shall be assigned an 'A' environmental rating. A stack test (inlet and outlet) was conducted on July 14, 2014 and demonstrated the overall removal efficiency of the scrubber system to be greater than 99% (99.6) for particulate matter.

Parameter Monitored: DEGREE OF AIR CLEANING
Lower Permit Limit: 99 percent reduction
Reference Test Method: RM 5/RM202/RM 201A
Monitoring Frequency: SINGLE OCCURRENCE
Averaging Method: MINIMUM - NOT TO FALL BELOW STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2016.
Subsequent reports are due every 12 calendar month(s).

Condition 4: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

Item 4.1:
The Compliance Demonstration activity will be performed for:

- Emission Unit: 1-CARBR
- Process: 01A

Item 4.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
The furnace shall not process any raw material which contains chlorinated dioxins, dibenzofurans, or acrylonitrile. No hazardous waste as defined by 6NYCRR, Part 373 may be handled or processed at this facility.

The permittee shall keep on-site records of the amount of carbon treated and a representative analysis of incoming spent carbon received which demonstrates the characteristics of the waste carbon to be processed.

These records are to be kept on-site for five years and shall be made available to any Department representative for review during normal business hours.

An annual deviation report is to be submitted to the Region 9 Division of Air Resources no later than January 31 for the previous reporting year. The report is to identify exceptions to the monitoring requirements for pressure drop, temperature, scrubber flow and waste stream.

Any new carbon streams other than what was processed during the stack test must be first approved by this Department.

Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2016.
Subsequent reports are due every 12 calendar month(s).

**Condition 5:** Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

**Item 5.1:**
The Compliance Demonstration activity will be performed for:

Emission Unit: 1-CARBR
Process: 01A

Regulated Contaminant(s):
CAS No: 0NY075-00-0 PARTICULATES
Item 5.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
The pressure drop across the scrubber is continuously maintained at a minimum 12.5” w.c. across the venturi at all times when the regeneration furnace is in operation. The venturi throat area is controlled automatically depending on the gas flow to maintain the required pressure drop. From the venturi gases are directed to an impingement plate scrubber followed by a mist eliminator.

The monitoring devices and any recorders shall be calibrated or serviced and replaced as needed and operated in accordance with the manufacturer's recommendations, instructions and operating manuals. The permittee shall collect and record the following information each day:

a. The pressure drop across the scrubber, in inches of water.
b. The scrubber flow rate, in gallons per minute.
c. A log of the downtime for the control device, monitoring equipment, and associated regen furnace.

This facility shall implement and maintain a Preventative Maintenance & Inspection (PM) plan for the impingement plate scrubber and venturi scrubber used to control emissions from the carbon regeneration furnace. This plan shall be in accordance with the manufacturers recommendations. The impingement scrubber and venturi scrubber PM plan shall include, at minimum, quarterly inspection and recording of:

a. visible liquid leaks;
b. system gas leaks;
c. pressure drop across scrubber;
d. water flow; and
e. pressure drop.

An internal inspection for abrasion, corrosion or buildup on fans, ducts, and pipes shall be conducted annually.

These records and other data recorded during inspections of the scrubbers shall be retained on-site for a period of not less than five years and shall be made available to
any Department representative for review during normal business hours.

This facility shall submit annual reports of any leaks and/or operating parameters found during the daily inspections which are not within normal operating ranges specified by the manufacturer of the scrubber.

An annual deviation report is to be submitted to the Region 9 Division of Air Resources, no later than January 31 for the previous reporting year. The report is to identify exceptions to the monitoring requirements for pressure drop, temperature, scrubber flow and waste stream. If no deviations from normal operating parameter ranges are found, the report shall certify to this.

Parameter Monitored: PRESSURE DROP
Lower Permit Limit: 12.5 inches of water
Monitoring Frequency: DAILY
Averaging Method: MINIMUM - NOT TO FALL BELOW STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2016.
Subsequent reports are due every 12 calendar month(s).

Condition 6: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

Item 6.1:
The Compliance Demonstration activity will be performed for:

   Emission Unit: 1-CARBR
   Process: 01A

   Regulated Contaminant(s):
   CAS No: 0NY075-00-0 PARTICULATES

Item 6.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
The flow rate across the impingement plate scrubber is to be maintained at a minimum 140 gpm.

The scrubber water flow rate, in gallons per minute shall be monitored and recorded daily. The monitoring devices and any recorders shall be calibrated or serviced and replaced as needed and operated in accordance with the manufacturer's recommendations, instructions and operating manuals.

These records and other data recorded during inspections of the scrubbers shall be retained on-site for a period of not less than five years and shall be made available to any Department representative for review during normal business hours.

An annual deviation report is to be submitted no later than January 31 for the previous reporting year. If there are no reportable deviations, a statement acknowledging this shall be submitted to the Division of Air Resources Region 9.

Parameter Monitored: FLOW RATE
Lower Permit Limit: 140 gallons per minute
Monitoring Frequency: DAILY
Averaging Method: MINIMUM-NOT TO FALL BELOW EXCEPT DURING STARTUP/SHUTDOWN
Reporting Requirements: ANNUALLY (CALENDAR) Reports due 30 days after the reporting period.
The initial report is due 1/30/2016. Subsequent reports are due every 12 calendar month(s).

Condition 7: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable Federal Requirement: 6 NYCRR 212-2.1 (b)

Item 7.1: The Compliance Demonstration activity will be performed for:

Emission Unit: 1-CARBR
Process: 01A

Item 7.2: Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE
Monitoring Description:
The temperature of the furnace shall operate at a minimum of 1300 degrees F. The permittee shall operate and
maintain a continuous temperature monitor and recorder which measures and records the combustion temperature within the regeneration furnace. The monitoring and recording devices shall be capable of accurately measuring the desired parameter. The temperature monitor and recorder shall be installed, calibrated, operated and maintained in accordance with the manufacturer’s recommendations.

The temperature recorder shall be calibrated or serviced or replaced, as needed, at a minimum of twice per year.

A record shall be maintained of the date of calibration and any maintenance of the temperature recorder.

These records are to be kept on-site for five years and shall be made available to any Department representative for review during normal business hours.

An annual deviation report is to be submitted no later than January 31 for the previous reporting year. The report is to identify exceptions to the monitoring requirements for pressure drop, temperature, scrubber flow and waste stream. This report shall be submitted to the Region 9 Division of Air Resources.

Parameter Monitored: TEMPERATURE
Lower Permit Limit: 1300 degrees Fahrenheit
Monitoring Frequency: CONTINUOUS
Averaging Method: MINIMUM - NOT TO FALL BELOW STATED VALUE AT ANY TIME
Reporting Requirements: ANNUALLY (CALENDAR)
Reports due 30 days after the reporting period.
The initial report is due 1/30/2016.
Subsequent reports are due every 12 calendar month(s).

**Condition 8:** Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

**Applicable Federal Requirement:** 6 NYCRR 212-2.4 (b)

**Item 8.1:**
The Compliance Demonstration activity will be performed for:

- Emission Unit: 1-CARBR
- Process: 01B
- Emission Point: 00003

Regulated Contaminant(s):
- CAS No: 0NY075-00-0 PARTICULATES
Item 8.2:  
Compliance Demonstration shall include the following monitoring:

Monitoring Type: MONITORING OF PROCESS OR CONTROL DEVICE PARAMETERS AS SURROGATE

Monitoring Description:
Particulate emissions from the spent reactivated carbon loading, unloading and handling operations are directed to a baghouse which is exhausted to atmosphere through emission point 00003. As per 6NYCRR, Part 212-2.4(b), particulate emissions from this source shall not exceed 0.05 grains/dscf on a dry gas basis.

A routine baghouse inspection and maintenance program shall be established indicating daily, quarterly and annual periodic maintenance. A manometer or magnehelic gauge to measure the baghouse pressure drop shall be installed and the normal operating range shall be between 1”-6”. Readings shall be recorded in a log and those outside that range will require the baghouse I&M program to be initiated. A record of all inspections and maintenance work performed along with the completion date shall be kept. The pressure gauge will be inspected and calibrated at least twice per year.

Parameter Monitored: PARTICULATES
Upper Permit Limit: 0.05 grains per dscf
Reference Test Method: Method 5
Monitoring Frequency: AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
Averaging Method: MAXIMUM - NOT TO EXCEED STATED VALUE - SEE MONITORING DESCRIPTION
Reporting Requirements: UPON REQUEST BY REGULATORY AGENCY
STATE ONLY ENFORCEABLE CONDITIONS
**** Facility Level ****

NOTIFICATION OF GENERAL PERMITTEE OBLIGATIONS
This section contains terms and conditions which are not federally enforceable. Permittees may also have other obligations under regulations of general applicability

Item A: Public Access to Recordkeeping for Facilities With State Facility Permits - 6 NYCRR 201-1.10 (a)
Where facility owners and/or operators keep records pursuant to compliance with the requirements of 6 NYCRR Subpart 201-5.4, and/or the emission capping requirements of 6 NYCRR Subpart 201-7, the Department will make such records available to the public upon request in accordance with 6 NYCRR Part 616 - Public Access to Records. Facility owners and/or operators must submit the records required to comply with the request within sixty working days of written notification by the Department.

Item B: General Provisions for State Enforceable Permit Terms and Condition - 6 NYCRR Part 201-5
Any person who owns and/or operates stationary sources shall operate and maintain all emission units and any required emission control devices in compliance with all applicable Parts of this Chapter and existing laws, and shall operate the facility in accordance with all criteria, emission limits, terms, conditions, and standards in this permit. Failure of such person to properly operate and maintain the effectiveness of such emission units and emission control devices may be sufficient reason for the Department to revoke or deny a permit.

The owner or operator of the permitted facility must maintain all required records on-site for a period of five years and make them available to representatives of the Department upon request. Department representatives must be granted access to any facility regulated by this Subpart, during normal operating hours, for the purpose of determining compliance with this and any other state and federal air pollution control requirements, regulations or law.

STATE ONLY APPLICABLE REQUIREMENTS
The following conditions are state only enforceable.

Condition 9: Contaminant List
Effective between the dates of 06/30/2015 and 06/29/2025
Applicable State Requirement: ECL 19-0301

Item 9.1:
Emissions of the following contaminants are subject to contaminant specific requirements in this permit (emission limits, control requirements or compliance monitoring conditions).

CAS No: 0NY075-00-0
Name: PARTICULATES

CAS No: 0NY075-00-5
Name: PM-10

Condition 10: Malfunctions and start-up/shutdown activities
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable State Requirement: 6 NYCRR 201-1.4

Item 10.1:
(a) The facility owner or operator shall take all necessary and appropriate actions to prevent the emission of air pollutants that result in contravention of any applicable emission standard during periods of start-up, shutdown, or malfunction.

(b) The facility owner or operator shall compile and maintain records of all equipment malfunctions, maintenance, or start-up/shutdown activities when they can be expected to result in an exceedance of any applicable emission standard, and shall submit a report of such activities to the department when requested to do so, or when so required by a condition of a permit issued for the corresponding air contamination source. Such reports shall state whether any violations occurred and, if so, whether they were unavoidable, include the time, frequency and duration of the maintenance and/or start-up/shutdown activities, and an estimate of the emission rates of any air contaminants released. Such records shall be maintained for a period of at least five years and made available for review to department representatives upon request. Facility owners or operators subject to continuous stack monitoring and quarterly reporting requirements need not submit additional reports for equipment maintenance or start-up/shutdown activities for the facility to the department.

(c) In the event that emissions of air contaminants in excess of any emission standard in this Subchapter occur due to a malfunction, the facility owner or operator shall compile and maintain records of the malfunction and notify the department as soon as possible during normal working hours, but not later than two working days after becoming aware that the malfunction occurred. When requested by the department, the facility owner or operator shall submit a written report to the department describing the malfunction, the corrective action taken, identification of air contaminants, and an estimate of the emission rates.

(d) The department may also require the owner or operator to include, in reports described under Subdivisions (b) and (c) of this Section, an estimate of the maximum ground level concentration of each air contaminant emitted and the effect of such emissions.

(e) A violation of any applicable emission standard resulting from start-up, shutdown, or malfunction conditions at a permitted or registered facility may not be subject to an enforcement action by the department and/or penalty if the department determines, in its sole discretion, that
such a violation was unavoidable. The actions and recordkeeping and reporting requirements listed above must be adhered to in such circumstances.

**Condition 11: Emission Unit Definition**
*Effective between the dates of 06/30/2015 and 06/29/2025*

**Applicable State Requirement:** 6 NYCRR Subpart 201-5

**Item 11.1:**
The facility is authorized to perform regulated processes under this permit for:
- Emission Unit: 1-CARBR
- Emission Unit Description:
  This emission unit describes the activated carbon regeneration furnace (emission point 00001) and the baghouse (emission point 00003) associated with carbon loading and unloading activities. The activated carbon regeneration furnace is vented to a venturi scrubber and 2-stage impingement scrubber with mist eliminator for particulate and acid gas control.

  Building(s): CALGON CARBON

**Condition 12: Compliance Demonstration**
*Effective between the dates of 06/30/2015 and 06/29/2025*

**Applicable State Requirement:** 6 NYCRR Subpart 201-5

**Item 12.1:**
The Compliance Demonstration activity will be performed for the Facility.

**Item 12.2:**
Compliance Demonstration shall include the following monitoring:

- **Monitoring Type:** RECORD KEEPING/MAINTENANCE PROCEDURES
- **Monitoring Description:**
  The North Tonawanda Wastewater Treatment facility is prohibited from re-starting operation of the sludge incinerator without first submitting an application for an Air State Facility permit modification.

- **Monitoring Frequency:** AS REQUIRED - SEE PERMIT MONITORING DESCRIPTION
- **Reporting Requirements:** ANNUALLY (CALENDAR)
  Reports due 30 days after the reporting period.
  The initial report is due 1/30/2016.
  Subsequent reports are due every 12 calendar month(s).

**Condition 13: Renewal deadlines for state facility permits**
*Effective between the dates of 06/30/2015 and 06/29/2025*
Item 13.1:
The owner or operator of a facility having an issued state facility permit shall submit a complete application at least 180 days, but not more than eighteen months, prior to the date of permit expiration for permit renewal purposes.

Condition 14: Compliance Demonstration
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable State Requirement: 6 NYCRR 201-5.3 (c)

Item 14.1:
The Compliance Demonstration activity will be performed for the Facility.

Item 14.2:
Compliance Demonstration shall include the following monitoring:

Monitoring Type: RECORD KEEPING/MAINTENANCE PROCEDURES
Monitoring Description:
Any reports or submissions required by this permit shall be submitted to the Regional Air Pollution Control Engineer (RAPCE) at the following address:

Division of Air Resources
NYS Dept. of Environmental Conservation
Region 9
270 Michigan Ave.
Buffalo, NY 14203

Reporting Requirements: AS REQUIRED - SEE MONITORING DESCRIPTION

Condition 15: Visible Emissions Limited
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable State Requirement: 6 NYCRR 211.2

Item 15.1:
Except as permitted by a specific part of this Subchapter and for open fires for which a restricted burning permit has been issued, no person shall cause or allow any air contamination source to emit any material having an opacity equal to or greater than 20 percent (six minute average) except for one continuous six-minute period per hour of not more than 57 percent opacity.

**** Emission Unit Level ****

Condition 16: Emission Point Definition By Emission Unit
Effective between the dates of 06/30/2015 and 06/29/2025

Applicable State Requirement: 6 NYCRR Subpart 201-5
Item 16.1:
The following emission points are included in this permit for the cited Emission Unit:

Emission Unit: 1-CARBR

Emission Point: 00001
   Height (ft.): 56   Diameter (in.): 24
   NYTMN (km.): 4772.82   NYTME (km.): 183.129   Building: CARBON

Emission Point: 00003
   Height (ft.): 55   Length (in.): 85   Width (in.): 20
   NYTMN (km.): 4772.82   NYTME (km.): 183.1   Building: CALGON

Condition 17: Process Definition By Emission Unit
   Effective between the dates of 06/30/2015 and 06/29/2025

Applicable State Requirement: 6 NYCRR Subpart 201-5

Item 17.1:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-CARBR
   Process: 01A   Source Classification Code: 3-90-006-99
   Process Description:
      The natural gas-fired activated carbon regeneration furnace receives spent activated carbon from off-site water treatment facilities for regeneration. The furnace is vented to a venturi scrubber followed by a 2-stage impingement scrubber with mist eliminator for particulate and acid gas control.

   Emission Source/Control: IMPIN - Control
      Control Type: IMPINGEMENT PLATE SCRUBBER

   Emission Source/Control: VENTS - Control
      Control Type: VENTURI SCRUBBER

   Emission Source/Control: ACRF1 - Process

Item 17.2:
This permit authorizes the following regulated processes for the cited Emission Unit:

Emission Unit: 1-CARBR
   Process: 01B
   Process Description:
      Spent carbon is trucked in sacks where it is off-loaded into a hopper system for the activated carbon regeneration furnace. Once the spent activated carbon has been regenerated, the product is directed to a bagger system to place the regenerated carbon sacks. These sacks are temporarily stored within the building until they are
trucked off-site for commercial sale. The loading,
unloading and general handling activities are vented to a
fabric filter baghouse for particulate control and to
atmosphere through emission point 00003.

Emission Source/Control: BAGH1 - Control
Control Type: FABRIC FILTER

Emission Source/Control: BAGA1 - Process

Emission Source/Control: UNLA1 - Process
