Results of Third Quarter 2005 Outpost Well Groundwater Monitoring, Northrop Grumman Corporation and Naval Weapons Industrial Reserve Plant Sites, Bethpage, New York. (NYSDEC Site #s 1-30-003A and B)

ENVIRONMENT

Dear Mr. Scharf:

Pursuant to the July 2003 Public Water Supply Contingency Plan (PWSCP) (ARCADIS G&M, Inc. 2003) for Operable Unit 2, ARCADIS is providing the NYSDEC with the validated results of groundwater monitoring performed for the Outpost Wells for the Third Quarter 2005. Table 1 summarizes the analytical results of monitoring for site-related volatile organic compounds (VOCs), as outlined in the PWSCP, for this period.

From September 13 through September 15, 2005, samples were collected from the nine Outpost Wells using the sampling methodology described in the PWSCP. Based on the trigger values for site-related TVOC concentrations established in the PWSCP, there are no new exceedences of trigger values. Wells in Clusters OW-1 and OW-2 continue to exhibit site-related TVOC concentrations above their respective trigger values, which were initially detected in samples collected during the First and Second Quarters of 2004.

Please contact us if you have any questions or comments.

Sincerely,

ARCADIS G&M, Inc.
