# NG Bethpage Technical Update for NYSDEC 

April 15, 2010

## Meeting Agenda

- Opening Remarks
- Previous Action Items
- Baseline Model Results
- Off-Site FFS Alternatives
- FFS Schedule
- Closing Comments/Action Items

## Baseline Model Results

Potentially Affected Wells under Baseline Conditions:

- GM-38: Remedial Wells RW-1 \& RW-3
- BWD Plant 4: Wells 4-1 \& 4-2
- BWD Plant 5: Well 5-1
- OU-2: Remedial Wells 17, 18 \& 19

## Off-Site FFS

## Alternative 1 - NFA/Baseline

- Continue operation of GW IRM, OU-2, GM-38 systems
- Continue BWD wellhead treatment

## Off-Site FFS

## Alternative 2

## Alternative 1 plus:

- Upgrade OU-2 \& GM-38 treatment if needed
- Upgrade BWD wellhead treatment if needed

## Off-Site FFS

## Alternative 3

Alternative 2 plus measures to reduce VOC mass:

- New extraction well(s) in center of plume
- GW treated in OU-2 system

## Off-Site FFS

## Alternative 4

Alternative 3 plus measures to prevent VOC impacts at Plant 5 \& reduce VOC impacts at Plant 4:

- New extraction well(s) and treatment system; or
- Operate BWD Plant 4 as remediation system \& replace Plant 4 capacity

## Off-Site FFS

## Alternative 5

Alternative 4 plus measures to restore GW quality to predisposal conditions through:

- Additional extraction well(s) \& treatment systems
- Diffusion well fences upgradient of extraction wells

## Closing Comments and Action Items
