8/14/91

Visited site at 55 Motor Ave., Farmingdale to check out spill complaint for asbestos.

I walked around every where a bicyclist would be likely to be + did not find a green shed or any 50-100 bags of asbestos.

Since the site was partially boarded, I thought it may be a potential problem + so did not notify property occupants. A field adjacent to site was fenced with a Superfund site posting. I took a few photos + left.

I spoke to Alex Mackie on my return + he informed me the site was Liberty Industrial Trucking - a Superfund site being handled by U.S. EPA. Entire site is involved. Alex said he had also gotten call + referred caller to EPA.

Complaint sent to Carlos Ramos, U.S. EPA + cc to Alex for submittal to Albany.
