State Superfund Site Reclassification Notice Class 02 to Class 04

The Inactive Hazardous Waste Disposal Site Program is New York State's superfund program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

- Remedial activities at the site included: excavation and off-site disposal of contaminated soils exceeding applicable cleanup standards; in-situ (i.e., in place) chemical treatment through oxidation of residual groundwater contamination; and, maintenance of a site cover system.
- Human exposures to residual soil contaminants are being addressed through the implementation of an environmental easement on the property, which requires: limited use and development of the property; compliance with the approved Site Management Plan; compliance with an Excavation Plan to manage potential exposures to residual contamination; restricted use of groundwater at the property; maintenance of the site cover system; and annual certification that the institutional and engineering controls at the property remain in place and effective.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.

FOR MORE SITE INFORMATION

Additional information about this site can be found using DEC's "Environmental Site Remediation Database Search" engine which is located on the internet at:

www.dec.ny.gov/cfm/externalapps/derexternal/index.cfm?pageid=3

Site specific documents may be found online through the DECinfo Locator at :
