MEMORANDUM

To: Joe Jones

From: Eric Weinstock

Date: December 20, 2007

Subject: Tishcon Corp., 30 New York Ave. Facility

cc: Joe Elbaz
Jackie Nealon

In accordance with our Site Management Plan (SMP), we are sending you this Partial Decommissioning Report for the On-Site AS/SVE system.

We are still waiting for the Department's approval of our SMP which was submitted in April, 2007. We urge you and the NYSDOH to please complete your review and approval of this document so that the site can be reclassified from Class 2 to Class 4.

We have received your approval of our Off-Site Soil Vapor Intrusion Investigation Work Plan and will schedule this work during the winter heating season. We trust that the SMP will be approved before this next phase of field work at the site is performed.

Please call me if you have any questions. Have a wonderful holiday.

Regards,

Eric

Re: **On-Site Air Sparging/Soil Vapor Extraction System
Partial Decommissioning Report
Tishcon Corporation, Site No.: 130043E
30 New York Avenue, Westbury, NY
Agreement Index No.: W1-0758-95-05; Tishcon file #74**

Dear Mr. Jones:

As a follow up to our July 7, 2007 AS/SVE Closure Report for the Tishcon Site at 30 New York Avenue and in accordance with our Site Management Plan (Ref. 1), we are pleased to provide you with the following information regarding the partial decommissioning of the on-site AS/SVE system. Tishcon is in the process of adding an extension to the rear portion of their building. To accommodate the construction of the addition, the following actions were performed.

- On September 4, 2007, samples of the soil in the area of the foundation were collected and submitted for waste characterization analysis including VOCs. The results of these tests are attached.
- On September 24, 2007, SVE well V-3 and air sparge point S-6 were properly abandoned by the drilling company ADT using clean sand in the screen zones and a mixture of Portland cement and bentonite above the screen zones.
- On September 25, 2007, 27.58 tons of soil excavated for the foundation were shipped to Clean Earth of Carteret, a permitted disposal facility. Copies of the disposal manifests are attached to this report.
- On December 7, 2007, a 15-mil plastic vapor barrier manufactured Stego™ Industries was installed below the new concrete slab. Photographs of the installed vapor barrier are attached to this report.

The off-site extension of the AS/SVE system remains in operation. Once the off-site compliance wells meet their termination criteria, we will contact you regarding the decommissioning of the remaining system components.

ca RICH Environmental Specialists

If you have any questions regarding this report, please do not hesitate to call our Office.

Sincerely,

CA RICH CONSULTANTS, INC.

Eric A. Weinstock
Vice President

RE: Tishcon, NY Ave, Westbury, NY

Order No.: 0709011

Dear Eric Weinstock:

American Analytical Laboratories, LLC. received 2 sample(s) on 9/4/2007 for the analyses presented in the following report.

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The limits provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: <ol style="list-style-type: none">(1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.)(2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of The method allowable holding time

SHIPPER'S CERTIFICATION: This is to certify that the above named materials are properly classified, described, packaged, marked and labeled and are in proper condition for transportation according to the applicable regulations of the Department of Transportation, U.S. EPA and the State. The materials described above were consigned to the Transporter named. The consignee can and will accept the shipment and has a valid permit to do so if required. I certify that the foregoing is true and correct to the best of my knowledge.

Payment to the contractor for waste removal does not constitute payment to the carrier and if the contractor does not pay the carrier, the shipper is obligated to pay the agreed rate offered to the contractor.
