Mr. Robert Schick, Director  
Division of Environmental Remediation  
NYS Dept. of Environmental Conservation  
625 Broadway, 12<sup>th</sup> Floor  
Albany, NY 12233-7012

Re: **Proposed Remedial Action Plan — OU2**  
Pall Corporation  
Site #130053B  
Glen Cove (C), Nassau County

Dear Mr. Schick:

At your Department's request, we have reviewed the *October 2012 Proposed Remedial Action Plan – OU2* (deep on-site and off-site groundwater) for the referenced site to determine whether the proposed remedy is protective of public health. From our review, I understand the following:

- the area is served by a public water supply not affected by the site;
- use of on-site groundwater for potable or process purposes without necessary water quality treatment will be restricted;
- use and development of this site will be restricted to commercial and industrial uses;
- a site management plan will be developed outlining the operational and maintenance measures and required monitoring associated with the site's institutional and engineering controls; and
- periodic reviews will be completed to certify that the elements of the remedy are in place.

Based on this information, I believe the proposed actions are protective of public health and concur with the proposed plan. If you have any questions, please contact Ms. Charlotte Bethoney or me at 518-402-7860.

Sincerely,

Krista M. Anders, Acting Director  
Bureau of Environmental Exposure Investigation
