### Project Team

#### *General Contractor and Subcontractors:*

- Mega Contracting Group, LLC
- Creamer Environmental, Inc. (CEI)
- Keller Group PLC (Keller)
- TIGG LLC (TIGG)

#### *Engineers/Consultants*

- Roux Environmental Engineering and Geology, D.P.C.
- Mueser Rutledge Consulting Engineers, PLLC
- GZA GeoEnvironmental. Inc.

### Remedial Action Work Summary

#### Work Activities Performed Onsite:

- Continued installation of support of excavation (SOE) elements including tieback installation inside the tension fabric structure (TFS); and,
- Repairs to one of the carbon vessels associated with the Vapor Management System (VMS).

#### Contractor Work Performed Onsite:

Creamer Environmental, Inc (CEI), continued with the installation of SOE elements along the south perimeter wall of waste characterization grid WC-8. Keller continued with tieback installation along the east wall of waste characterization grid WC-10. Water generated during tieback installation was recovered and sent to the water treatment system for storage and future processing.

CEI and TIGG repaired one of the four carbon vessels units of the VMS. The other three units were operated continuously during work hours and when activities occurred inside the TFS.

CEI applied dust control measures (wetting, tarping, limiting vehicle speeds, etc.) as needed.

#### Air Monitoring:

- No community air monitoring program (CAMP) exceedances were observed during the day.
- GZA GeoEnvironmental. Inc. will provide a summary report for CAMP activities.

#### Erosion and Sediment Control

- Erosion and sediment controls were inspected to ensure that silt fence and filter sock were undamaged and operational.

#### Sampling Conducted:

- None

#### Other Items of Note:

- None
