Inactive Hazardous Waste Disposal Site Classification Notice

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (Department) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (the "Registry"). The site identified above, and located on a map on the reverse side of this page, was recently added to the Registry as a Class 2 site that presents a significant threat to public health and/or the environment for the following reason(s):

The site is currently and has been an active commercial laundry facility since the 1930s. The business also operated as a commercial drycleaner from the late 1980s until the mid 1990s. On-site soil is contaminated with Tetrachloroethene (PCE) and trichloroethene (TCE). Site-related contaminants are present in on-site and offsite groundwater and soil vapor. In addition, there is the potential for inhalation of volatile contaminants through soil vapor intrusion into nearby buildings. Further investigation is needed to determine the extent of site-related contamination and to evaluate potential human exposures.

The Department will keep you informed throughout the investigation and cleanup of the site.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact the Department's Project Manager listed below.
