Re: NOW Corporation - Site #3-14-008
Monthly Summary Report – May 2004

Dear Mr. Hoffman:

Enclosed is a monthly summary report for the operation, monitoring and maintenance (OM&M) of the remedial system at the NOW Corporation site in the Town of Clinton, New York. This report describes the OM&M of the soil vapor extraction (SVE) system and the groundwater pump-and-treat (P&T) system for a 28-day period (**May 4 – June 1, 2004**).

The P&T and SVE systems were online and fully operational throughout the reporting period, with no downtime. Approximately 631,700 gallons of water were treated during the period. Discharge from the treatment system averaged approximately 22,600 gallons per day (gpd). During the prior reporting period, the average discharge was 24,500 gpd.

As of the last day of the reporting period, a total of 39,415,300 gallons of groundwater had been recovered and treated by the system since it became operational in February 1998.

Table 1 summarizes influent and effluent analytical data for water samples collected on May 20, 2004. Although a few chlorinated VOCs were detected in the effluent sample, all effluent discharge requirements were met. Table 2 summarizes the operation and maintenance data recorded on the last day of the reporting period, while Table 3 summarizes monitoring well water-level data collected on the sampling date. Table 4 summarizes the SVE system air analytical data, as well as the analytical results from a sample of the air-stripper stack emissions (sample PAS). Sample PAS exhibited unusually low VOC concentrations in this sampling event. Repeating the practice of recent months, air samples were not collected at SVE wells VE-1 and VE-2, which are currently off line because the intakes at the wells are submerged. A copy of each laboratory data report (water and air) is included in this report.

Earth Tech made two site visits during the reporting period to conduct the required system inspections, maintenance, monitoring well water-level measurements, and monthly sampling. Details follow:

May 20th – Monthly sampling and monitoring well water-level measurements, and bi-weekly system inspection. Our technicians also changed the oil in the vapor blower motor.

Page 2
Mr. Carl Hoffman
NYSDEC

June 1st – Routine bi-weekly system inspection. Technicians pulled water-level transducer out of recovery well TW-3 for manufacturer repair/replacement. (While performing routine, daily remote monitoring of system operational parameters on May 29, I noted the TW-3 transducer output was showing “0.”) The discharge rate from recovery well TW-3 was adjusted downward to 2.0 gpm to minimize the possibility that the well would be pumped dry without transducer control. Technician also used “weed-whacker” to cut down vegetation near treatment plant building and some wells.

Please feel free to contact me at (518) 951-2262 if you have any questions regarding either this report, or the operation of the treatment system.

Sincerely,

Earth Tech Northeast

Stephen R. Choiniere
Project Manager

ANALYTICAL REPORT**

06/02/2004

Earth Tech
ATTN: Steve Choiniere
40 British American Blvd.
Latham, NY 12110

Project Reference: NOW Corp., 55849.01
Lab Number: A4052101-01/06

Enclosed are results for sample(s) received 5/21/04 by Air Technology Laboratories. Analyses were performed according to specifications on the chain of custody provided with the sample(s).

Report Narrative:

Sample analyses were performed within method performance criteria.
All results are reported without qualifications.

Results were faxed to Steve Choiniere on 6/02/04.

ATL appreciates the opportunity to provide testing services to your company. If you have any questions regarding these results, please call me at (626) 964-4032.

Sincerely,

Mark Johnson

Ethylbenzene	1.0	ND	1.0						
p,&m-Xylene	1.0	ND	1.0						
o-Xylene	1.0	ND	1.0						

PQL = Practical Quantitation Limit

ND= Not Detected (below RL)

RL = PQL X Dilution Factor
