Re: Request to Continue Substrate Release Compound (SRC)
Application at Former Grant Hardware Site (ID: 344031)

Dear Mr. Zimmer:

The New York State Department of Environmental Conservation (Department) received Geovation's request, dated January 23, 2008, to continue the application of SRC to the two pilot areas at the Former Grant Hardware Site.

It is the Department's understanding that the SRC is conducive to the continued degradation of the on-site chlorinated volatile organic compounds. The SRC compound has been shown to be environmentally safe.

Based on the above facts, the request is hereby approved.

Sincerely,

Chek Beng Ng, P.E.
Environmental Engineer 2
