Hi Bernie,

On behalf of National Grid, please find the attached work plan for the supplemental pre-design investigation (PDI) program at the Ilion (East Street) former manufactured gas plant (MGP) site. As discussed during our September 19, 2012 meeting, the general scope of the field activities consists of additional soil sampling in the vicinity of the off-site contingency excavation area and the excavation of an additional test pit (as requested by NYSDEC) in the on-site area. Please contact Steve Stucker with any questions or comments.

Thanks,
Mike
