

FACT SHEET

Waste Stream, Inc., Site No. 645022
145 Outer Maple Street, Potsdam, NY
NYSDEC Region 6, St. Lawrence County

March 13, 2001

Remedial Investigation to Begin at Waste Stream, Inc.

A work plan has been approved by the New York State Department of Environmental Conservation (NYSDEC), for a detailed environmental study at the Waste Stream, Inc.. The 25 acre parcel is located at 145 Outer Maple Street, Potsdam, NY and has been operated by Waste Stream as a salvage yard. **See map on reverse side showing location of the property.** Previous investigations and interim site cleanups have shown portions of the property are contaminated with PCBs, heavy metals and petroleum residuals. As a result the NYSDEC placed this site on the Registry of Inactive Hazardous Waste Disposal Sites as a Class 2 site in 2000. A Class 2 site is a site at which hazardous waste is present and constitutes a significant threat to the public health or the environment; action is required.

The Site Investigation: The NYSDEC entered into an Order on Consent with Waste Stream, Inc., and other responsible parties on December 20, 2000 to conduct a Remedial Investigation/Feasibility Study (RI/FS). The Remedial Investigation will determine the nature and extent of the contamination both on-site and offsite, as well as potential threats to public health and the environment. As part of the investigation, various environmental media, including groundwater, surface water, soil and sediment will be sampled. The Feasibility Study will be conducted in conjunction with the Remedial Investigation. The Feasibility Study will evaluate possible actions to clean up the site. Based on the results of the RI/FS (which should be available by February 2002), NYSDEC will propose a means for cleaning up the site. Following consideration of public comments on the proposed cleanup plan and it's alternatives, NYSDEC will select a remedy for Waste Stream to implement.

Your Opportunity to Review the RI/FS Work Plan - Copies of the work plan which describes the RI/FS in detail are available for your review at the document repositories listed below. NYSDEC encourages your participation in the project. Your understanding and involvement can help ensure a cleanup program that effectively protects public health and the environment.

Re: Waste Stream, Inc. inactive hazardous waste site
Site # 6-45-022

Dear Mr. Cubley:

I have been advised that after certain negotiations with the owner of the above referenced Site located adjacent to your client's parcel, your client is not willing to give access to their property for the purposes of environmental sampling. The Site owner is obligated under Order with this Department to conduct such sampling. As you may know, the Environmental Conservation Law authorizes the Department or its authorized agents to enter upon any inactive hazardous waste disposal site, suspected site and areas near such sites for purposes of inspection, sampling, and remediation. ECL 27-1309, 1313(8).

The Department, therefore, is hereby providing notice pursuant to ECL 1313(8) that its agents or other authorized persons will enter upon your real property, known as _____, on or after April 23 2001, in order to conduct the sampling required by the Order's workplan. The Department will make every reasonable effort to ensure that any adverse impact of its entry on and occupancy of your property will be minimized. Accordingly, the Department will return the ground surface of the property to its condition before it entered your property, unless you otherwise agree.

Any questions or concerns about the Department's operations on your property should be directed to Phil Waite, P.E. project manager at (315)785-2605.

Sincerely,

cc: D. Sweredoski
P. Waite

Instructions to Prepare the Citizen Participation Record for Remedial Investigation, Feasibility Study and Record of Decision (Opposite Page 13)

General Instructions

- *When to Prepare This Citizen Participation Record:* When the site enters the Remedial Investigation stage of the RI/FS/ROD portion of the remedial process.
- *When to Review and Revise This Completed Citizen Participation Record:*
 - site remedial program changes significantly during these stages; or
 - community or NYSDEC issues and information needs change significantly; or
 - project manager and CPS determine, for other reasons, that review is needed.
- As appropriate, incorporate input into this CP Record and supporting document from participating NYSDEC staff, NYSDOH and other involved agencies.
- Fill in the site's name and other information as it appears on its Registry page. Include the Operable Unit number if applicable.

Instructions for Numbered Parts

Part 1. The CP activities required to be conducted during the RI, FS and ROD are listed here (shaded area). When a CP activity is completed, check the appropriate box and record the completion date.

Part 2. (Scoping). Determine if the required CP activities listed in **Part 1.** are sufficient, or if additional CP activities should be conducted. Scoping is accomplished by preparing the following document which supports the CP Record for RI, FS and ROD:

- Site Issues and Community Profile Scoping Sheet for RI, FS and ROD. (The Scoping Sheet and its instructions immediately follow the CP Record in this chapter.)

Evaluate the information the completed Scoping Sheet provides. Then check "Yes" or "No" if additional CP activities beyond those required should be conducted at these stages. Briefly indicate why or why not by summarizing your conclusions about the scoping information developed.

Part 3. Address **Part 3.** in one of several ways based on answers in **Part 2.:**

If Determined That . . .

Then . . .

- | | | |
|--|---|---|
| • Required CP sufficient; no additional CP needed | → | Leave Part 3. blank |
| • Required CP not sufficient, but sufficient staff, time and/or resources do not exist to do more | → | Leave Part 3. blank |
| • Required CP not sufficient; sufficient staff, time and resources do exist to conduct additional CP | → | Complete Part 3. [list activities to be conducted] |

Note: When a CP activity listed in **Part 3.** is completed, check the box and record the completion date.

Citizen Participation Specialist: Check the box if input from a citizen participation specialist (CPS) was received and reviewed during drafting of this CP Record. Provide a copy of the completed CP Record to the CPS.

Signature. After the CP Record is prepared (or revised) and reviewed, the DER Project Manager approves the document by signing and dating.

CP Record Management: Place the completed CP Record for RI, FS and ROD and its supporting document in the site's document repositories. Project Manager or assigned CPS also should maintain the documents in site files. Revised versions also should be filed at these locations.

Instructions to Prepare the Site Issues and Community Profile Scoping Sheet for Remedial Investigation, Feasibility Study and Record of Decision (Opposite Page 13)

This Site Issues and Community Profile Scoping Sheet generates information to help with the preparation of the CP Record for Remedial Investigation, Feasibility Study and Record of Decision. During this time the public wants to know how DER will plan and conduct the site investigation, and may want input in both the investigation and the selection of the remedy. Project staff want to be sure they have the information necessary to properly investigate the site and choose an effective remedy.

General Instructions

- *When to Prepare This Site Issues and Community Profile Scoping Sheet:* During preparation of its corresponding CP Record at the time the site enters the Remedial Investigation stage.
- *When to Review and Revise This Completed Scoping Sheet:* When the CP Record for RI, FS and ROD is reviewed and revised (*criteria listed in the CP Record's instructions*).
- Fill in the site name and other information as it appears on its Registry page. Include the Operable Unit number if applicable.

Instructions for Numbered Parts

Consider the bulletized issues and questions below and other questions unique to the site to help you to complete the three Parts of this Scoping Sheet.

Part 1. List Major Issues of Interest to the Community and Information the Community Wants.

- Is our health being impacted? (e.g. Are there problems with our drinking water or air? Are you going to test our water, yards, sumps? Have health studies been done?)
- Are there restrictions on what we may do (e.g. Can our children play outside? Can we garden? Must we avoid certain areas? Can we continue to fish, hunt, etc. on/around the site?)
- Who is responsible for the problem? Who is paying for investigation, cleanup?
- The site is affecting our property values!
- How can we get information (e.g. where are the repositories? Who are the Department contacts?)
- We want input into the investigation, cleanup alternatives and in choosing the remedy.
- We are interested in future use of the site. How can the site be used when you're done?
- What is your schedule of activities at the site? Why does the process take so long? Why can't you just clean up the site now?
- We want you to go off the site to look for contamination.

Part 2. List Information Project Staff Need From the Community.

- Can the community supplement our knowledge about past/current uses of the site?
- Does the community know of site impacts on adjacent properties, natural resources, etc?
- What are the best locations for document repositories and public meetings?
- Who is affected/interested in the site or the remedial program that we have not yet identified?
- Are there unique community characteristics that could affect how we exchange information?
- What CP activities does community think will best serve communication/involvement needs?
- Community input into RI work plan, FS Report, PRAP alternatives and PRAP selection.

Part 3. List Major Issues and Information Project Staff Need to Communicate to the Community.

- Identify responsible party(ies) for the site contamination and who is funding investigation.
- Site investigation, remediation and CP activities and their schedule, and major changes.
- Ways for community to obtain/provide information (repositories, contacts, toll-free numbers).
- Site impacts on community and any restrictions on public's use of site and adjacent properties.
- Results of the site investigation.
- Proposed remedial alternatives and ways for public to review and comment.
- PRAP developed by the Department and ways for public to review and comment.
- Finalization of PRAP, why it was chosen, and what happens next.

**Instructions to Prepare the Site Issues and Community Profile Scoping Sheet
for Remedial Investigation, Feasibility Study and Record of Decision
(Continued)**

(~~2~~ Opposite Page)

Part 4. Community Characteristics

a. - e. Obtain information from local officials, residents, site reports, site visits, "windshield surveys," other staff etc. Review this information when reviewing/revising this sheet because: zoning may have changed, residential developments may have been built, businesses come and go, etc.

f. Has the affected community experienced other significant present or past environmental problems unrelated to this hazardous waste site? Such experiences could have major effects on public concerns and perspectives about the hazardous waste site; how the community relates to you; your image and credibility with the community; and the ways in which you communicate.

g. Consider factors such as:

- Is English the primary language of the affected community? (If not, provisions may need to be made to ensure the effectiveness of public contact such as door-to-door visits, fact sheets and meetings).
- The overall age of community members. For example, is there a large percentage of senior citizens in the community? (It may be difficult for some to go to public meetings and document repositories, or take site tours. This might dictate "going to" the community more directly with door-to-door visits, fact sheets, visits to community and church centers, nursing homes, etc.).
- How do people travel about the community? Would most people drive to a public meeting or document repository? Is there adequate public transportation?

Part 5. Affected/Interested Public. Individuals and organizations who need or want information and input can change during the site's remedial process. This need is influenced by real, perceived or potential impacts of the site or the remedial process. Some people may want information and input throughout the process. Others may participate only during specific remedial stages, or may only be interested in particular issues. It is important to revisit this question when reviewing this scoping sheet. Knowing who is interested in the site--and the issues that are important to them--will help you to choose and conduct appropriate participation activities, and to identify their timing and the information to be exchanged.

Check all affected/interested parties that apply to the site. **NOTE: Adjust the site's contact list appropriately.** The following are some ways to identify affected/interested parties:

- Tax maps of adjacent property owners
- Attendees at public meetings
- Telephone discussions and "800" calls
- Letters to NYSDEC and other agencies
- Political jurisdictions and boundaries
- Media coverage
- Current/proposed uses of site and/or adjacent properties (recreational, commercial, cultural)

NOTE: When completed, attach and maintain this Site Issues and Community Profile Scoping Sheet with the CP Record for Remedial Investigation, Feasibility Study and Record of Decision.

Site Issues and Community Profile Scoping Sheet (Continued from side one)

Part 4. Identify the following characteristics of the affected/interested community. This knowledge will help to identify and understand issues and information important to the community, and ways to effectively plan and deliver the site CP program:

- a. Land Use/Zoning Around Site: Residential; Agricultural; Recreational; Commercial; Industrial
- b. Residential Type Around Site: Urban; Suburban; Rural
- c. Population Density Around Site: High; Medium; Low
- d. Community Economic Status: High; Medium; Low
- e. Water Supply of Nearby Residences: Public; Private Wells; Mixed
- f. Other Present/Past Environmental Problems With Significant Impact on Affected Community? Yes; No
Explain if "Yes" _____

- g. Special Considerations: Language; Age; Transportation; Other _____
Explain Any Checked Categories: _____

Part 5. What Individuals and Organizations Within the Community Are Affected--Or Likely To Be Interested In--the Site, Its Investigation and/or Remediation? (Check All That Apply and Adjust Site Contact List As Appropriate):

- Adjacent Residents/Property Owners Local Officials Media Doctors/Nurses
- Business/Commercial Interests Native American Nation Labor groups/Workers
- Citizens Group(s) (Identify): _____
- Environmental Group(s) (Identify): _____
- Civic Group(s) (Identify): _____
- Recreational Group(s) (Identify): _____
- Other _____
- Other _____
