Re: Vapor Intrusion Work Plan, Revision 2  
Site Code 7-34-052  
Former Accurate Die Casting Site  
Fayetteville, New York

File: 2488/25463 #5

Dear Mr. Grathwol:

In response to your email on February 14, 2005, O'Brien & Gere has agreed to add two more soil vapor sampling points along the western property boundary at the locations you identified. The attached revised Figure 1 identifies the now 10 soil vapor sampling points. Note that all other details discussed in our February 13, 2005 work plan (revision 1) remain the same. Please provide the Department's written approval of the plan, including this revision 2, prior to our scheduled fieldwork on March 20, 2005.

If you have questions regarding this letter or require additional information please do not hesitate to contact me at (315) 437-6100, ext. 2536. Thank you for your attention in this matter.

Very truly yours,

O'BRIEN & GERE ENGINEERS, INC.

Mark A. Distler  
Vice President
