

Tioga Castings

Monitoring Well Inventory, 04/06/05

A click on a photo opens the photo at full resolution in a new browser window.

Driving time to the site from Warnerville was 2 hours -- total driving time from Albany is 2:45. The area has experienced flooding and MW-5 was submerged and could not be visited. I estimate its position to be NYTM: X = 394971; Y = 4662188 because I think we can see the concrete collar in the 1-foot resolution aerial photography (aerial image at the end of the album).

Photo

Description

Photo left. MW-1, coordinates 395161, 4662247. All of the monitoring wells at Tioga Castings are outside the fenced areas.

NAME	NYTM_X	NYTM_Y
MW1	395161	4662247
MW2	395036	4662178
MW4	394850	4662255
MW3	394890	4662216

Photo left. MW-1

Photo left. View across the leveled foundary site. The school is in the background.

Photo left. Slightly more northerly view across the leveled foundary site. The leveled area is fenced and the capped area within is also fenced. Both fences can be accessed through gaps.

Photo left. View within the fenced area, "Corner 1," coordinates 394939, 4662292, where we were able to enter the landfill.

Photo left. View looking west from Corner 1. Deer hoof prints could be seen on the slope of the landfill just up from this corner climbing towards the top.

Photo left. View looking south from Corner 1. The school is visible in the distance.

Photo left. View of woodchuck hole, northwest portion of the cap, looking towards Corner 2. The cap appeared in good condition except for the single woodchuck hole.

Photo left. Same woodchuck hole. Carl Hoffman, in the background, is recording "Corner 2" of the fence around the landfill cap. Coordinates of all four corners are listed below.

NAME	NYTM_X	NYTM_Y
corner1	394939	4662292
corner2	394867	4662304
corner3	394856	4662225
corner4	394929	4662211

Photo left. View from the cap towards MW-4.

Photo left. Carl Hoffman observing Mike Hallock obtain a Trimble GPS coordinate pair at MW-4. View is from the cap within the fenced area. MW-4 coordinates are 394850 4662255.

Photo left. Aerial site view. Click the image to see the full size graphic.
