*Via E-Mail* September 29, 2009

Mr. David Stoll Shaw Environmental, Inc. 13 British American Boulevard Latham, NY 12110-1405

RE:

Schedule 2.11 Approvals Contract/WA No. D006132-7 Site/Spill Name – Levey Property Site Site No. - 828154

Dear Mr. Stoll:

The New York State Department of Environmental Conservation's Division of Environmental Remediation (DER) hereby approves the attached Schedule 2.11s for the above referenced WA for a total amount not to exceed \$254,751.00. Your firm may now submit a request for reimbursement for work completed under this WA.

If you have any questions regarding the WA, please contact the Project Manager, Chek Ng at (518) 402-9620.

Sincerely,

Michael J. Cruden Chief Contracts and Payments Section Bureau of Program Management Division of Environmental Remediation

Alexander B.Grannis Commissioner

David Stoll Program Manager Shaw Environmental and Infrastructure of New York, P.C. 13 British American Blvd. Latham, NY 12110-1405

Re: Contract # D006132-7 Counties: Suffolk Minority and Women's Business Program

Dear Mr. Stoll:

The Bureau of Affirmative Action and Minority and Women's Business Programs (BAA/W/WBP) is responsible for the administration of the Department of Environmental Conservation's (DEC) Minority and Women's Business Enterprise-Equal Employment Opportunity (M/WBE-EEO) Program. The M/WBE-EEO Program serves to assure that NY State certified minority and women-owned business enterprises (M/WBEs) are provided access to contracting opportunities. The program also ensures that minorities and women are provided equal access to employment opportunities (EEO) created by the expenditure of public funds. The Office of Minority and Women's Business Programs is in receipt of your firm's utilization plan. Based on our review, the following comments are provided for your information

September 29, 2009

A. The contractor's detailed M/WBE Utilization Plan is accepted.

B. The firms listed on your Utilization Plan are NYS certified M/WBE's and can be used for goal crediting purposes (see UP for details).

To be in compliance with the M/WBE-EEO program requirements, please ensure that the following procedures are followed:

- 1. That legally signed and executed M/WBE subcontracts are maintained in your files for review by the NYSDEC.
- 2. That copies of purchase orders (if used) along with copies of both sides of legally signed and canceled checks; need to be kept to verify actual payment to M/WBE's. These documents are to be kept in your files and made available when requested, for review by

the NYSDEC.

- 3. That you (Shaw Environmental and Infrastructure) provide this office, within fifteen (15) business days of the close of each federal fiscal quarter, a quarterly report listing of all M/WBE subcontracts on record for each prime contract and/or legally signed purchase orders. Please include date of award for each M/WBE subcontract, total dollar value and scope of work.
- 4. That any changes in the contractor (Shaw Environmental and Infrastructure) M/WBE utilization plan herein determined to be acceptable should be brought to the attention of this office immediately.

If you require assistance in obtaining the names of NYS certified M/WBEs that specialize in the tasks contained in your documents, you may access the Empire State Development Corporation's M/WBE Directory via the Internet at: <u>http://www.nylovesmwbe.ny.gov/cf/search.cfm</u> or contact me at (518) 402-9311.

Sincerely,

his 6

Christopher Hale Minority Business Specialist 1

13 British American Boulevard Latham, NY 12110-1405 Phone: 518.783.1996 Fax: 518.783.8397

September 14, 2009

Ms. Lisa Lagasse New York State Department of Environmental Conservation Division of Environmental Remediation Bureau of Program Management, Room 1224 625 Broadway Albany, New York, 12233-7012

### Subject: Executive Summary for Work Authorization D006132-07 Levey Property Site

Shaw Environmental and Infrastructure Engineering of New York, P.C. (Shaw) is submitting the attached 2.11 budget summary checklist for tasks 1, 2, 3, and 4 of the Levey Property Site (Site Number C152201). This scope of services discussed herein is based upon Work Authorization (WA) D006132-07 provided to Shaw on August 3, 2009 and subsequent meetings and phone calls with the NYSDEC Project Manager. Site activities will be completed in accordance with the September 2009 cost estimate/work scope. Shaw assumes that Task 1 (preliminary planning activities) and Task 2 (Geoprobe groundwater sampling and analysis, soil vapor intrusion sampling and analysis, and survey) will be completed prior to December 31, 2009. Shaw anticipates that Task 3 (permanent well installation, groundwater sampling, survey and IDW disposal) and Task 4 (Remedial Investigation / Feasibility Study Report) will be completed in 2010.

Please note that Shaw Labor Costs include direct costs (using average reimbursement rates), indirect costs and fixed fee. Shaw solicited bids from Shaw's four standby geoprobe companies, one of which was a Women Owned Business Enterprise (WBE). These contractors have been approved by the NYSDEC. One geoprobe company, Parratt-Wolf, chose not to provide cost estimates to complete this work. ADT submitted the lowest price and was selected to provide geoprobe services for this project. The award is for \$37,611.00 (including a \$1791.00 subcontractor management fee).

Shaw solicited bids from Shaw's four standby drilling companies, one of which was a WBE. The contractors have been approved by NYSDEC. Two drilling companies, Parratt-Wolf and Natures Way, chose not to provide cost estimates to complete this work. Aztech (WBE) submitted the lowest price and was selected to provide drilling services for this project. The award is for \$39,671.10 (including a \$1889.10 subcontractor management fee).

Shaw awarded the soil/groundwater laboratory analysis to Upstate Laboratories as they were next in the laboratory rotation on Shaw's groundwater/soil laboratory standby contract. The award is for \$21,791.700 (including a \$1037.70 subcontractor management fee). Shaw also awarded the air laboratory analysis to Centek Laboratories (WBE) as they were the next laboratory on Shaw's air laboratory standby contract. The award is for \$12,600.00 (including a \$600.00 subcontractor management fee).

Shaw solicited bids from Shaw's nine standby data validation companies, six of which are WBE and one of which is a minority owned business (MBE). One data validation company, EQM, Inc., chose not to provide cost estimates to complete this work. EQA, Inc. submitted the lowest price and was selected to provide data validation services for this project. The award is for \$4,216.00.

#### **Task 1 – Preliminary Activities**

This task includes costs for preliminary planning activities. This task includes a scoping meeting at the NYSDEC, development of site specific plans, review of existing files provided by NYSDEC (including: a site map, a planned sampling plan, a Phase I Environmental Site Assessment and Site Investigation Report), an initial site visit, and time to develop the 2.11s, progress schedule and this executive summary.

This task includes the following items:

- Trip to Albany for a scoping Meeting with NYSDEC;
- Review of Site files provided by NYSDEC (prior to the initial site visit);
- Trip to the Site for site reconnaissance and dig safely mark out for Task 2 Geoprobe locations, includes 8 hour travel time;
- Field Activities Plan;
- MBE/WBE Utilization Plan;
- Staffing Plan;
- Site Specific HASP;
- Site Specific QAPP;
- 2.11s, progress schedule and this executive summary.

Shaw Labor	\$23,502
Travel/Materials	<u>\$ 716</u>
TOTAL	\$24,218

#### Task 2 – Remedial Investigation Phase I

This task includes the advancement of 11 Geoprobe direct push borings along 4 east-west transects to assess groundwater conditions downgradient of the site. In addition, two direct push borings will be advanced to collect lithologic information from the downgradient area. Pending the results from the direct push groundwater analysis, soil vapor intrusion may be assessed for the nearby residential homes downgradient of the Levey Property Site. The soil vapor intrusion analysis includes 20 sub-slab samples, 20 indoor air samples and 5 ambient air samples. Additional detail on these tasks is provided below.

#### Geoprobe Groundwater Analysis

The proposed Geoprobe borings will be installed in the town right of way. Prior to the advancement of the Geoprobe borings, applicable drilling permits will be obtained from the town for these borings. Also, prior to the advancement of the Geoprobe borings, the proposed boring locations will be pre-marked for a utility mark out. In addition, each location will be cleared to 5 feet below grade with an air knife and vac truck for utility clearance at each location.

Eleven Geoprobe borings will be advanced along four east-west transects (Transect A, Transect B, Transect C and Transect D) downgradient of the site for groundwater profiling. Each Geoprobe boring will be advanced to a maximum depth of 100 feet below grade or until a confining layer is encountered. Discrete grab groundwater samples will be collected vertically every 10 feet beginning at the water table interface to an approximate depth of 100 feet below grade or a confining layer or refusal. Ten groundwater samples per boring location are anticipated for VOC analysis (plus QA/QC samples), and one to two groundwater sample per boring location is anticipated for Metals analysis (plus QA/QC samples). Groundwater samples will be collected using a Groundwater Profiler or similar device. Where sufficient groundwater volumes exist one set of parameters (temperature, specific conductivity, pH, oxidation reduction potential, dissolved oxygen and turbidity) will be collected immediately prior to sample collection. Groundwater sampling protocol is described in the site specific QAPP. For purposes of this cost estimate we have assumed that the Geoprobe assessment can be completed in 15 business days, including utility clearance and sample collection.

#### Ms. Lisa Lagasse NYSDEC, Albany, New York

A summary of samples collected during this task is listed below:

- 134 Groundwater VOCs by 8260B (includes 6 duplicate, 6 field blank, 6 trip blank and 6 MS/MSD samples)
- 24 Groundwater Metals by 7000 (includes 1 duplicate, 1 field blank, 1 and 1 MS/MSD sample)

Groundwater samples will be shipped under proper chain of custody to Upstate Laboratories for Standard TAT analysis of VOCs by EPA Method 8260 and Metals by EPA Method 7000. All samples will be validated by an independent third party. The data validation contractor will generate a data usability summary report to be submitted with Shaw's report.

Two Geoprobe soil borings will be co-located with the two of the groundwater profile boring locations to obtain lithologic and stratigraphic information in the area. Continuous soil samples will be collected from the two soil borings to a depth of 100 feet below grade or to the first confining layer, if encountered. The soil samples will be collected with a 5-foot macro core sampler or a similar device. The soil samples will be logged by a Shaw geologist. All borings/Geoprobe points will be field located using a Trimble unit and will not be surveyed by a licensed surveyor.

Assessment activities will include review of the groundwater analytical results and the lithology of the two soil borings. The groundwater results will indicate if off-site contamination is present downgradient of the Levey Property Site. This data will be utilized to determine what impacts exist, specific intervals of groundwater impact (used to select screen intervals for permanent wells described in Task 3), if soil vapor sampling and soil vapor intrusion analysis is necessary at nearby residential properties (described below as part of Task 2), and if further sampling off-site are necessary.

#### Soil Vapor Intrusion Analysis

A total of 20 sub-slab soil vapor samples, 20 indoor air samples and 5 ambient air samples will be collected from nearby residential properties to assess soil vapor intrusion, if warranted based on the groundwater profiling results. All soil vapor, indoor air and ambient air samples will be collected concurrently. The samples will be collected with individually certified Summacanisters. Soil vapor/air samples will be shipped under proper chain of custody to an approved ELAP certified laboratory, Centek Laboratory for analysis of VOCs by EPA method TO-15 to an accuracy of 1  $\mu$ g/m<sup>3</sup>. Soil vapor, indoor air and ambient air sampling procedure will be described in the site specific QAPP and will follow guidelines set in the *NYSDOH Guidance for*  *Evaluating Soil Vapor Intrusion in the State of New York (October 2006).* All samples will be validated by an independent third party. The data validation contractor will generate a data usability summary report to be submitted with Shaw's report.

A summary of samples collected during this task is listed below:

- 21 Subslab Vapor VOCs by TO-15 (includes 1 duplicate)
- 21 Indoor Air VOCs by TO-15 (includes 1 duplicate)
- 6 Ambient Air VOCs by TO-15 (includes 1 duplicate)

All Investigation Derived Wastes (IDW) (soil cuttings and purge water) generated during this task (Task 2) will be contained in 55-gallon drums and staged at the Levey Property Site. Samples will be collected from the IDW as part of Task 3.

This task includes the following assumptions:

- No travel required for drilling permits;
- Drilling permit costs do not exceed \$1,200;
- Utility Clearing will be completed concurrently with the Geoprobe borings;
- Geoprobing: 15 days, with Shaw oversight and includes the following:
  - Soil sampling (at two soil borings)
  - Groundwater sampling (assumption via low-flow techniques at 10-feet, 20-feet 30-feet, 40-feet, 50-feet, 60-feet, 70-feet, 80-feet, 90-feet, 100-feet with Geoprobe at 11 locations);
  - Closing holes with bentonite and asphalt
  - 10 hour work days
- Survey: 0.5 days of a Shaw geologist to survey Geoprobe locations with Trimble Unit (concurrently with Geoprobing, no separate mobe);
- Shaw travel time for Geoprobe oversight and survey is 24 hours (8 hours per round trip);
- Soil vapor sampling will be completed in 10 days by two Shaw geologists/scientists, includes Shaw travel time;
- Shaw travel time for soil vapor sampling is 16 hours (8 hours per round trip);
- Includes the time to design 15 air mitigation systems;
- An updated site plan will also be developed using recent aerial photography within the vicinity of the site, the surveyed Geoprobe locations and any other existing wells identified.

Ms. Lisa Lagasse NYSDEC, Albany, New York

Shaw Labor	\$ 43,198
Subcontractor Costs	\$ 69,901
Travel/Materials	<u>\$ 11,979</u>
TOTAL	\$124,816

#### Task 3 – Remedial Investigation Phase II

#### Permanent Groundwater Well Installation

The proposed monitoring wells will be installed in the town right of way; drilling will <u>not</u> occur within any sidewalks. Prior to the advancement of the monitoring wells, applicable drilling permits will be obtained from the town for these monitoring wells. Also, prior to the installation of the monitoring wells, the proposed boring locations will be pre-marked for a utility mark out. In addition, each location will be cleared to 5 feet below grade with an air knife and vac truck for utility clearance at each location.

A maximum of four multilevel groundwater monitoring wells will be installed off-site of the Levey Property Site. Each monitoring well location will be completed as a multi-stage monitoring well allowing for three discrete sample intervals to be collected from the same well via a Solinst® CMT Multilevel System or similar device as discussed at the project review meeting. The permanent well locations and construction (screen intervals) will be based on the Geoprobe groundwater profiling results (Task 2). At two monitoring wells, confirmatory soil samples will be collected at a pre-selected 5 to 10 foot interval (based on Geoprobe borings – Task 2) and/or to confirm the confining layer at depth.

#### Multilevel Groundwater Analysis

Groundwater samples will be collected from each discrete screen interval of the monitoring wells installed (12 groundwater samples plus QA/QC samples). The samples will be collected via low flow sampling technique. Water quality parameters (temperature, specific conductivity, pH, oxidation reduction potential, dissolved oxygen, and turbidity) will be measured at 3 to 5 minutes intervals, and groundwater samples will be collected following the stabilization of these parameters. The samples will be analyzed for VOCs and Metals. The groundwater sampling procedure will be described in the site specific QAPP.

A summary of samples collected during this task is listed below:

Page 6

- 26 Groundwater VOCs by 8260B (includes 1 duplicate sample, 6 field blank samples, 1 MS/MSD sample and up to 6 trip blank samples)
- 26 Groundwater Metals by 7000 (includes 1 duplicate sample, 6 field blank samples, and 1 MS/MSD sample)

All samples will be validated by an independent third party. The data validation contractor will generate a data usability summary report to be submitted with Shaw's report.

#### **IDW Sampling**

Samples will be collected from the Investigation Derived Wastes (IDW) generated from the Geoprobe boring advancement, monitoring well installation and groundwater sampling. The IDW will be stored at the Level Property. As previously discussed, all soil cuttings and purge water will be contained in 55-gallon drums and staged at the Levey Property Site. One composite samples of soil and one composite sample of groundwater will be collected from the drums for analysis. The soil sample will be analyzed for VOCs, PCBs, pesticides and TCLP and mass metals. The groundwater sample will be analyzed for VOCs, PCBs, pesticides and metals.

This task includes the following assumptions:

- No travel required for drilling permits;
- Drilling permits are not more than \$200/location
- Dig Safely Mark-out: 0.5 day and 8 hour travel time for a Shaw Geologist to mark proposed well location for dig safely;
- Utility Clearing will be completed concurrently with the monitoring well installation (no separate mobe);
- Drilling: 12 days, with Shaw oversight and includes the following:
  - Soil sampling (at two monitoring well locations)
  - Well construction
  - 10-hour work days
- Survey: 0.5 days of a Shaw geologist to survey monitoring well locations with Trimble Unit (same mobe as monitoring well install, no separate mobe);
- Well Development: 1 day of a Shaw Geologist to develop each multilevel monitoring wells (12 intervals total), 48 hours after installation (same mobe as monitoring well install, no separate mob);

- Shaw travel time for drilling oversight, survey and well development is 24 hours (8 hours per round trip);
- Groundwater Sampling: 2 10-hour days of Shaw Geologist time to sample multilevel monitoring wells;
- IDW sampling will be completed concurrently with groundwater sampling (no separate mob);
- Shaw travel time for groundwater sampling and IDW sample is 8 hours;
- An updated site plan will also be developed using recent aerial photography within the vicinity of the site, the surveyed well locations and any other existing wells identified.

Shaw Labor	\$22,474
Subcontractor Costs	\$ 45,989
Travel/Materials	<u>\$ 6,612</u>
TOTAL	\$ 75,075

#### Task 4 – Final Report – Remedial Investigation / Feasibility Study Report

This task includes the costs for providing a remedial investigation report summarizing all work performed and completed as part of the off-site remedial investigation of the Levey Property Site. The report will be issued to the NYSDEC for review no later than 30 days after receiving all site sampling data. The report will include the field sampling methods, sample analysis results (text and tables), observations regarding trends of contaminants relative and upgradient and downgradient sample locations, maps (aerial photograph base map with current site features, local groundwater flow contours, vertical cross sections with VOC concentrations and confining lens/layers identified, spider maps showing VOC concentrations above Class A Groundwater Standards, aerial VOC contour maps for various depths), boring logs and well construction logs.

This task also includes the time to prepare the investigation work plans and a summary status report at the completion of Task 2 as time for these deliverables was not included in the Quickstart document for this work assignment.

If the results of the investigation indicate that off-site contamination is present, a Feasibility Study will be completed to evaluate remedial alternatives to address the off site contamination per DER-10 guidelines, Section 4 (Remedy Selection). The feasibility is contingent upon the results from Task 2 and Task 3. If all data is below State Standards, then a Feasibility Study is not needed.

Once NYSDEC comments have been received, Shaw will incorporate them into the final report. Shaw will issue NYSDEC one copy of the final report including, text, tables, figures/maps (i.e. site location, groundwater contours, analyte detections for each media, etc), well construction logs, etc in "bookmarked" pdf format on compact disc as well as the number of hard copy reports requested by the NYSDEC.

Additionally, Shaw will submit all original chain of custody's, forms (i.e., sampling forms, purge forms, inspection forms) as well as a copy of any data usability reports to the NYSDEC.

This task includes the following assumptions:

• Trip to Albany to discuss investigation results with NYSDEC.

Shaw Labor	\$30,259
Travel/Materials	\$ 383
TOTAL	\$30,642

#### WORK AUTHORIZATION TOTAL

#### Schedule

Field work will commence within 90 days of submission or 30 days of approval of the Draft Work Plan (including a Field Activities Plan, MBE/WBE Utilization Plan and Staffing Plan) to the NYSDEC. Upon approval of the work plan and approval of drilling permits by the town, Shaw will schedule the field work with the approved direct push subcontractor. The following schedule is proposed:

\$254,751

- Shaw anticipates that the site specific work plan and HASP will take approximately two weeks to complete.
- Shaw will schedule a site visit following the work plan approval.
- Shaw will apply for drilling permits following the site visit.
- Shaw will coordinate the direct-push contractor's schedule to minimize the impact to site operations and expedite the sampling effort. It is the anticipated that the actual field sampling effort (Task 2 Geoprobe) can be completed in 15 10-hour days based upon the estimate provided by ADT. The work start time will be determined by the Shaw site supervisor and may vary depending on weather and site conditions.

- Analytical results will be reviewed by Shaw upon receipt and an assessment of soil vapor intrusion analysis (Task 2) and assessment of the multi-level well construction (Task 3) will be completed. A summary of the assessment and recommendations will be provided to NYSDEC within 2 weeks of receipt of the analytical results.
- If required, Shaw will coordinate soil vapor sampling at the nearby residential properties within one week of NYSDEC's approval of the data assessment and soil vapor recommendations provided by Shaw.
- If required and possibly based upon homeowners schedule, Shaw will complete the soilvapor sampling and analysis before December 31, 2009. This may vary depending on weather and site conditions and pending access to the nearby residential properties.
- Soil vapor, ambient air and indoor air analytical results will be received in a Category B deliverable format from the ELAP-approved laboratory within 28 days of sample receipt.
- If required, Shaw will apply for drilling permits for the permanent multi-level monitoring wells and coordinate with the driller's schedule. It is the anticipated that the actual field sampling effort (Task 3 Well installation) can be completed in 12 10-hour days based upon the estimate provided by Aztech. The work start time will be determined by the Shaw site supervisor and may vary depending on weather and site conditions.
- Groundwater sampling of the permanent monitoring wells will be completed within one week of the well installation, and IDW sampling will be completed at the same time.
- All samples collected during the site investigation will be submitted to an approved third party data validation contractor. The data validation contractor will provide a data validation/usability report within 30 days of receipt of analytical results.
- The results of these investigative activities will be included in a remedial investigation report discussing all file review data, analytical data and field investigative activities. This report may be expanded to a feasibility study if the analytical data indicates that remediation is needed to address off-site contamination. Three copies of the draft report will be submitted to the NYSDEC for review and comment within 90 days after completion of field work.

 Ms. Lisa Lagasse NYSDEC, Albany, New York

• Shaw will revise the summary report according to the comments provided by the NYSDEC. The report and EDD will be provided to the NYSDEC and NYSDOH within 30 days after receipt of comments.

Sincerely, Shaw Environmental & Infrastructure Engineering of New York, P.C.

## Schedule 2.11(e)

#### **Cost-Plus -Fixed Fee Subcontracts**

Name of Subcontrac	stor	Services to be Perfo	ormed	Subcontract Prie	ce
A) Direct Salary Costs Professional Responsibility Level	Labor Classification	Ave. Reimbursement Rate (\$/Hr.)	Max Reimbursement Rate (\$/Hr.)	Est. Number of Hours	Total Est.( Direct Salary Cost Ave Reim, Rate x Est # Hrs)

Total Direct Salary Cost \$0.00

1) The labor rate averages and maximum shall be adjusted by a rate equal to the increase in the CPI index CUURA101SAO-"All Urban Consumers-New York-Northern N.J.-Long Island" for the previous year. This index is published by the U.S. Department of Labor's Bureau of Labor Statistics. The adjustment will be calculated every January and will be effective for subsequent work assignment billing and budgeting purposes.

2) Schedule 2.1-0(a) may be re-negotiated after four (4) years at the request of either party. Any revision as a result of re-negotiation will be subject to the approval of the Office of the State Comptroller.

3) The maximum annual escalation is limited to 5%.

4) Reimbursement will be limited to the lesser of either the individual's actual hourly rate or the maximum rate for each labor category.

5) Reimbursement will be limited to the maximum reimbursement rate for the professional responsibility level of the actual work performed.

6) Only those labor classifications indicated with an asterisk will be entitled to overtime.

7) Reimbursement for technical time of principals, owners and officers will be limited to the maximum reimbursement rate of that category, the actual hourly labor rate paid, or the State M-6 rate, whichever is lower.

8) Maximum reimbursement rates may be exceeded or work assignment activities that are under the jurisdiction of the Schedule of Prevailing Wage Rates set by the New York State Department of Labor.

#### B) Indirect Costs

Indirect costs shall be paid based on a percentage of direct salary costs incurred which shall not exceed a maximum of 115% or the actual rate calculated in accordance with 48 CFR Federal Acquisition Regulation, whichever is lower.

#### New York State Department of Environmental Conservation

**Division of Environmental Remediation** 

Bureau of Program Management, Room 1224 625 Broadway, Albany, New York 12233-7012 Phone: (518) 402-9764 • FAX: (518) 402-9722 Website: www.dec.ny.gov

Via E-Mail August 3, 2009

Mr. David Stoll Shaw Environmental, Inc. 13 British American Boulevard Latham, NY 12110-1405

#### Re: WA Issuance/Notice to Proceed

Dear Mr. Stoll:

The New York State Department of Environmental Conservation's Division of Environmental Remediation (DER) is issuing to your firm and authorizing your firm to proceed with the work assignment (WA) identified below and in the enclosed work plan template for the performance of a Remedial Investigation/Feasibility Study.

Please contact DER's Project Manager (PM) immediately to discuss the WA, staffing, time critical work and any site specific concerns.

Contract/WA No.: Site/Spill No./PIN: Site/Spill Name: Program Element: Est. Total WA Budget:

Project Manager: PM Phone No.: PM E-mail:

Contract Manager: CM Phone No.: CM E-mail:

M/WBE Contact: M/WBE Phone No: M/WBE E-mail: D006132-7 C152201 Levey Property Site RI/FS \$257,400.00

Chek Ng (518) 402-9620 cbng@gw.dec.state.ny.us

Lisa M. Lagasse (518) 402-9747 lmlaga@gw.dec.state.ny.us

Juan Abadia (518) 402-9311 jtabadia@gw.dec.state.ny.us

Please review your firm's relationship with the Potential Responsible Parties (PRPs) listed on the enclosed Conflict of Interest Certification form. Complete the form, accept or reject the WA, and return the form to the Contract Manager (CM) within **5 calendar days** of the date of this letter.

The Schedule 2.11s and M/WBE Utilization Plan for the WA must be completed and sent electronically in a single Adobe® PDF document to the CM within **21 calendar days** of the date of this letter. If multiple sites are included in the WA, Schedule 2.11s must be provided for each site and the total WA. The Schedule 2.11s must be in accordance with the executed standby contract. The Schedule 2.11s should identify areas of work requiring subcontracting and the certified M/WBE firms to be utilized, if known. If the M/WBE Utilization Plan for the WA does not meet the M/WBE goals set forth in the standby contract, an explanation must be provided at the time the M/WBE Utilization Plan is submitted. Standby subcontractors should be utilized to the extent practical. Project specific subcontracts must be procured in accordance with the overall schedule (i.e. a reasonably estimated placeholder cost can be included for services not yet procured). The Schedule 2.11s should identify the management and technical staff assigned to the WA. Include resumes of staff not previously approved by DER. The Schedule 2.11s should reflect the scope of work outlined in the Work Plan Template. A cover letter accompanying the submittal of the Schedule 2.11s should include a brief justification of the budget supported by the Schedule 2.11s.

If you have any questions regarding the WA's scope of work (work plan template), and/or budget (schedule 2.11s), please contact the PM. Requests for reimbursement for the WA should not be submitted and will not be processed prior to the approval of the schedule 2.11s.

If work is not initiated in a timely manner or the schedule 2.11s are not approved by DER within **60 calendar days** of the date of this letter, the WA may be terminated and reimbursement will be limited to a negotiated amount based on work performed to date of termination.

Sincerely,

Michael J. Cruden, P.E. Chief Contracts and Payments Section Bureau of Program Management Division of Environmental Remediation

#### New York State Department of Environmental Conservation Division of Environmental Remediation Conflict of Interest Certification

for

#### Standby Contract Work Assignment

#### 1. <u>Potential Responsive Parties</u>

To the best of the New York State Department of Environmental Conservation's knowledge, the potential responsible parties (PRPs) listed on the attachment are the known PRPs, as of the date of the work assignment issuance letter.

#### II. <u>Conflict of Interest</u>

Please check the appropriate boxes below and provide the necessary explanations:

The Contractor believes there are no potential organization or personal conflicts of interest with the PRPs listed and is accepting the above referenced work assignment.

□ The Contractor believes there are potential organizational and/or personal conflict(s) as indicated below:

- a) 
  The Contractor believes the conflicts would not prohibit the Contractor from excepting the work assignment

Please explain and include as an attachment what the organizational and/or personal conflicts may be. Please note that organizational and personal conflicts of interest issues that must be addressed are defined in Appendix B, Section III, Conflict of Interest, in the executed standby contract. Additional items to address include the estimated percentage and dollar value that the contractor's business with the PRP bears to the contractor's business as a whole, whether there are mechanisms in place that allow for adequate independent quality assurance such as Professional Engineer certifications, quality assurance quality control of data, independent periodic inspections of work.

#### III. Certification

The undersigned authorized representative for the contractor indicated below hereby certifies that the information provided in this form or as an attachment to this form is a accurate representation of the relevant facts or circumstances which would give rise to an organizational or personal conflict of interest as defined in Appendix B, Section III, Conflict of Interest, of the executed standby contract indicated below, except as disclosed herein.

Naud Stor 8/3/09 Signature of Contractor's Authorized Representative Date SHAWENVIRONMENTAL #IN Rastructure Engineering of NY. P.C. **Contractor Name** 

Please e-mail completed form to DEC Contract Manager within 5 calendar days of the date of the Work Assignment Issuance/Notice to Proceed Letter.

The Levey Property site is located in a suburban portion of Suffolk County, NY. This site is in the northwest quadrant of the intersection formed by South Strong Avenue and Victoria Avenue and is bounded by Chettic Avenue to the north. The site consists of an approximately 1.03 acre rectangular-shaped parcel of partially concrete-paved, partially unpaved and partially vegetated lot. It is developed with a one or two-story commercial building with a partial basement located in the northeastern portion of the on-site facility.

The site is currently vacant and is intended for residential use. Historically, this site was used as a small wallpaper production process and motor vehicle parts storage. In 2001, this site operated as a car and boat repair business, along with storage and assembly of bronze sculptures.

The surrounding parcels are currently used for a combination of commercial and residential. Residential homes exists south of the site across the street from Levey Property.

As of this update, completed investigations include a Preliminary Site Assessment (2006). The BCP application was approved on November 2006 and a Remedial Investigation is currently underway.

Contaminants of Concern (In	cluding Materials Disposed)	Quantity
OU 01 1,1,1-TRICHLOROETHANE		
1,1-DICHLOROETHANE		
TETRACHLOROETHYLENE (PCE)		
Analytical Data Available for :	Groundwater, Soil, Soil Vapor	
Applicable Standards Exceeded for:	Groundwater	

#### Site Environmental Assessment

The primary contaminants of concern at the site known at this time include volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs). On-site investigations indicate 1,1,1-trichloroethane, 1,1-dichloroethane and tetrachloroethene exceeding standards, criteria and guidance (SCGs) in the groundwater. Soil samples taken on-site indicate benzo(a)anthracene and benzo(a)pyrene exceeding SCGs.

Groundwater table is shallow (9' below ground surface) and flows in the southerly direction. An off-site investigation is currently planned to determine any VOC impacts down-gradient south of the site.

The nearest public supply well is located right across the street and is north of the site. The well is not expected to be impacted by contaminants from this site since groundwater flow direction is to the south. There are no known public wells downgradient of the site.

This site poses a significant threat to the environment. The NYSDOH has also determined that this site poses a significant threat to public health.

#### 6/17/2009

#### Site Health Assessment

Surface soils could present a direct contact exposure pathway as the site is not fenced and is within a residential neighborhood. Public water is provided to the local area and is monitored on a regular basis, thus is not considered to be an exposure pathway. The public supply wells are not expected to be impacted in the future by the site's plume. Soil vapor intrusion is a potential exposure pathway under investigation.

#### Work Plan Template Work Element: RI/FS

Date Jun 16, 2009

The scope of work will generally encompass activities contained in Work Element II of Schedule 1, Phased Remedial Investigation/Feasibility Study and other work elements as appropriate in the Engineering Consultant Standby Contract. Remedial Investigations/Feasibility Study (RI/FS) should be conducted in accordance with the "Draft DER-10, Technical Guidance for Site Investigation and Remediation dated 12/25/02" or the latest versions of these documents when available. Quality Assurance/Quality Control (QA/QC) must conform to the most current version of the NYSDEC Analytical Services Protocol (ASP). Soil vapor investigations will be performed in accordance with NYSDOH "Guidance for Evaluating Soil Vapor Intrusion in the State of New York." Additional information can be found at: http://www.health.state.ny.us/environmental/investigations/soilOgas/svi\_guidance

Task 1: Preliminary Activities Unless otherwise approved in writing by the Department's project manager, all work shall conform to standby contractor's pre-approved QAPP, HASP and FAP.	
File Review X	Max Hours 194
1 Trip to Site	Max Hours 16
1 Trip to Albany for Scoping Meeting (may be combined with site visit as discretion of Department's PM)	Max Hours

#### Standby Contract Work Assignment

Site Number: C1522	301 Site Name: Levey Property Off-Site Invest	igation	Operable Unit:	: 2
Project Manager:	Chek Beng Ng, Section C, Remedial Bureau A John Swartwout, Chief, Section C Chittibabu Vasudevan, Director, Bureau A	Telep	<b>bone:</b> 402-9620	

#### Site Location (City, Village, or Town, and County):

This site is located at 1305 South Strong Avenue in the Town of Babylon in Suffolk County. It is located on the corner of South Strong Avenue and Victoria Avenue. The corresponding tax map number is 0100-198-02-029. The frontages of the site measure approximately 225 feet along the north side of Victoria Avenue, approximately 200 feet along the west side of South Strong Avenue, and approximately 225 feet along the south side of Chettic Avenue. There is water tower approximately 800 feet northwest from the site. The site is surrounded primarily by industrial/warehouse buildings to the north and west, and residential buildings to the south and east.

#### Summary of Site History

1951 to 1953	Building was constructed.
1953 to 1994	Site was developed as D.T. Brown, Inc., Manufacturer of Tools, Machines and Metal Products.
1994 to 2001	Site may have been used as a wallpaper printing/production facility, and also a vehicle storage area.
2001 to 2003	According to records on file at the Suffolk County, the property has been occupied by Roman Bronze Works, Inc. and by a car and boat repair business in 2001. The on-site facility became vacant circa 2003.
2003 to present	Site remains vacant until the present day.

#### **Background Information**

This site consists of an approximately 45,000-square foot rectangular-shaped parcel of partially concretepaved, partially unpaved and partially vegetated land and is developed with a one (1)- to two (2)-story commercial building. This site is located in an industrial district designated as zone G. The on-site facility, constructed of brick and masonry in 1951, occupies approximately sixty percent of the site. Cars, plaster sculptures, printing equipment and wallpaper are stored on the first floor. There is a room in the south west corner of the building that contains a diesel generator, an above ground storage tank and kiln for firing ceramics. There is a partial basement located in the northeastern portion of the building consisting of an oilfired boiler which has been filled by sand by the Town, and is no longer accessible.

Two trailers containing printing equipment and supplies are located on the northwestern portion of the site, which has since been removed. Some soil piles, believed to be brought in from an off-site origin, was also located on the southwest portion of the property. At the time of this writing, it is unknown if the soil piles have been removed. There is a concrete-paved parking area located on the southeastern portion of the site. The remainder of the site consists of partially unpaved and partially vegetated land. Heavy machinery and poor lighting makes it difficult to inspect all areas inside the building.

#### Site Hydrogeology

The elevation of the site is approximately 21 feet above mean sea level (MSL). Groundwater flow is toward the southerly direction, and the average groundwater table is 9' below ground surface (bgs). Based on data from the nearby *Active Industrial Uniform Site* (ID: 152125) which is located 1.2 miles away, no confining layer have been encountered up to the depth of 50' bgs.

#### **Current Investigations and Findings**

A Phase I Environmental Site Assessment (ESA) was performed by G.C. Environmental, Inc in April 2004. A copy of that report is available upon request from the Project Manager. Subsequently, a site investigation report was issued in September 2006 by NYSDEC. At the time of this writing, the on-site portion is accepted under the Brownfield Cleanup Program, and an on-site remedial investigation is currently underway. The consultant for the off-site investigation should be familiar with the work done under the Phase I ESA and the Site Investigation Report, and leverage information found on both reports to generate a costeffective and efficient work plan.

A summary of the site investigation is included below:

**Groundwater** - Main contamination found on-site is 1,1,1-Trichloroethane (TCA) found primarily in wells located along the eastern end of the site. Maximum TCA contamination is 300  $\mu$ g/L found at the southeast end of the building. The highest level of tetrachloroethene (PCE) (62  $\mu$ g/L) is also found at the same location where the maximum TCA is found. Other volatile organic compounds (VOCs) found on-site above State exceedances (in lesser amounts) include 1,1-dichloroethane (38  $\mu$ g/L), Freon 113 (17  $\mu$ g/L) and trichloroethene (14  $\mu$ g/L). Unfiltered groundwater for inorganics detected above standards include antimony (20.1  $\mu$ g/L), chromium (55.4  $\mu$ g/L) and manganese (985  $\mu$ g/L). Semi-volatiles organic compounds (SVOCs) were analyzed in all the groundwater samples, but none was above the standard.

Soil - Not a primary concern, even though some exceedances were observed. No source was identified during the site investigation. More information may be forthcoming pending the on-site remedial investigation results.

Soil Vapor - 1,1,1-TCA (3873  $\mu$ g/m<sup>3</sup>) and PCE (4883  $\mu$ g/m<sup>3</sup>) were detected in the two on-site soil gas samples.

#### Work Plan Objectives

The intent of this off-site remedial investigation work plan is as follows:

a) Track any groundwater plumes which may have migrated off-site from Levey Property.

b) Gather lithologic and stratigraphic information from all the installed wells.

c) Perform groundwater sampling off-site from Levey Property.

d) Perform soil vapor intrusion investigation, pending the results of the off-site groundwater investigation e) Based on the results from (a), (b) and (c), write an off-site remedial investigation report to define the extent of the off-site contamination, and if applicable, write a feasibility study to evaluate the remedial alternatives to address the off-site contamination from Levey Property.

#### Scope of Work and Task/Subtask Descriptions

<u>NOTE</u>: Whenever possible, all procedures shall follow guidance set in DER-10 and the NYSDOH Soil Vapor Intrusion Guidance Document. For the purposes of Quality Assurance/Quality Control (QA/QC), trip blanks, duplicates, matrix spike/matrix spike duplicates shall be included in the sampling plan where appropriate.

Task 1 <u>**Pre-Sampling Tasks (including site visit)</u>** - Once the Notice-to-Proceed has been issued, please submit the following for NYSDEC review:</u>

a) Schedule 2.11 (from the work budget in this proposed scope of work);

b) Field Activities Plan;

c) MBE/WBE Utilization Plan;

d) Staffing Plan;

e) Site Specific Health and Safety Plan (HASP), and

f) Site Specific Quality Assurance Project Plan (QAPP).

The Consultant will also review the following attached documents before the site visit: a) Site Map

b) Planned Sampling Map

c) Phase I ESA by GC Environmental, Inc. (issued on April 2004)

d) Site Investigation Report, issued September 2006 by ERM

Please contact the Project Manager for electronic documents for (c) and (d).

<u>Surveying and Investigation Derived Waste (IDW) Disposal</u> - The locations for all temporary geoprobe wells and installed groundwater wells shall be surveyed. The horizontal positions should be tied into the North American Datum of 1983 and UTM Zone 18N coordinate system. The vertical positions should be tied to the North American Datum of 1988. Any identified permanent monitoring wells in the area of the off-site groundwater monitoring shall be recorded and identified (well construction details), if possible. The site survey information shall be provided on an aerial photograph that indicates current site features (i.e. roads, buildings, etc) and can be utilized as a base map to illustrate site conditions.

IDW consisting of soil cuttings and purge water shall be staged in appropriate container(s) and analyzed to determine the appropriate disposal methods. One composite sample for soil and one composite sample for the groundwater shall be taken from the disposal drums. Soil sample shall be analyzed for VOCs, PCBs, pesticides and inorganics, including TCLP and Total. Groundwater sample (unfiltered) shall be analyzed for VOCs, PCBs, pesticides and inorganics.

Task 3Temporary Geoprobe Wells - Prior to drilling, please ensure all utility (cable, electric, water, sewer) lines have been properly marked out. Two (2) soil borings (B2-L and D2-L) will be co-located with the groundwater wells as shown in Figure 2 to gather lithologic and stratigraphic information. Geoprobe soil borings to collect the lithologic information shall be done (up to a depth of 100 feet bgs or the first confining layer) FIRST to assess the depth of any encountered confining layer.

Conduct eleven (11) geoprobe groundwater wells along the locations noted in Figure 2. There

Task 2

G1-5

will be four transects - Transect A, Transect B, Transect C and Transect D. Groundwater samples shall be taken at ten (10) intervals, beginning from the water table and every ten feet after the water table. Maximum depth will be 100 feet bgs or until a confining layer is encountered, per the results from the geoprobe for lithology information. Temporary piezometric wells shall be constructed at all eleven (11) geoprobe groundwater well locations.

<u>Geoprobe Groundwater Analysis</u> - All eleven (11) groundwater samples will be analyzed for VOC's using EPA Method 8260 and metals using EPA Method 7000. Two of the groundwater samples from locations B2 and D2 will be analyzed for metals, and shall be performed with unfiltered and filtered samples if the extracted groundwater is more than 50 NTU. A summary of the sample breakdown is provided in Table 1. All samples shall be analyzed by NYSDOH Environmental Laboratory Approval Program (ELAP) certified laboratory. The laboratory shall provide analytical data in a NYSDEC Analytical Services Protocol Category B data deliverable format. Laboratory data shall be validated by a third party that is independent of the laboratory which performed the analyses and the consultant which performed the fieldwork. A data usability summary report (DUSR) shall be submitted to the NYSDEC.

Task 5Permanent Groundwater Well Installation- A maximum of four (4) profile groundwater<br/>monitoring wells are to be installed off-site from Levey Property. Each profile well shall be<br/>capable of sampling three different depths. The locations for those wells, the screened intervals,<br/>starting and ending depths will be discussed after the geoprobe results have been received. With<br/>the current budgeted amount, monitoring well clusters shall be installed to obtain three (3)<br/>discrete samples in order to profile the groundwater column. Depending on data from Task 4, the<br/>intervals may be reduced if it is found that the contamination depth is reduced. Split spoon<br/>samples shall be collected from two (2) wells to confirm the lithology of the off-site area.

Task 6Multilevel Groundwater Analysis- All groundwater samples will be analyzed for VOC's using<br/>EPA Method 8260 and metals using EPA Method 7000. Metals analysis shall be performed with<br/>filtered samples if the extracted groundwater is more than 50 NTU. A summary of the sample<br/>breakdown is provided in Table 1. All samples shall be analyzed by NYSDOH Environmental<br/>Laboratory Approval Program (ELAP) certified laboratory. The laboratory shall provide<br/>analytical data in a NYSDEC Analytical Services Protocol Category B data deliverable format.<br/>Laboratory data shall be validated by a third party that is independent of the laboratory which<br/>performed the analyses and the consultant which performed the fieldwork. A data usability<br/>summary report (DUSR) shall be submitted to the NYSDEC.

<u>Soil Vapor Intrusion Analysis</u> - Pending results from Task 4, soil vapor intrusion may be needed to assess the sub-slab, indoor (lowest floor) and ambient air quality for the nearby residential homes down-gradient of the site. A total of twenty (20) sub-slab samples, twenty (20) indoor air samples and five (5) ambient air samples are budgeted for this work assignment. One ambient air sample shall be taken per test day. One (1) duplicate sample shall be included per twenty (20) samples. Summa-canisters shall be individually certified. All soil vapor intrusion testing shall follow the guidelines set in the *NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York (October 2006)*. Any departure from the sampling guidelines shall be notified to the Project Manager and recorded in the final report. EPA method TO-15 shall be used to analyze the Summa-cannisters.

Task 7

Task 4

G1-6

Task 8

**<u>Report Preparation</u>** - At minimum, the off-site investigation report should include the following deliverables:

a) local groundwater flow contours;

b) vertical cross-sections drawn along the direction of local groundwater flows, showing the extent of VOC contamination contour and the presence of any clay lens/confining layer with depth bgs;

c) spider maps showing VOC concentrations above Class GA Groundwater Standards for all the proposed groundwater geoprobe and profile wells;

d) areal VOC contour maps showing the spread of contamination on a chosen depth(s) bgs;

e) observations regarding trends of increasing/decreasing/unchanged concentrations from upgradient wells to down-gradient wells; and

f) well construction logs.

Should the results indicate that a remedy is needed to address any off-site contamination, please follow the guidelines from DER-10, Section 4 (Remedy Selection) for specific information which is needed for the Feasibility Study.

## TABLE 1Sample Summary

Task	TCLP	VOC	SVOC	Pesticide	PCB	Metals

Duplicates		3				
Task 2 - IDW Disposal						
Soil	1	1	1	1	1	
Groundwater		1 -	1	1	1	1.

Notes:

1. All samples shall be analyzed by an ELAP certified laboratory,

2. Analytical data shall be reported by the laboratory in a NYSDEC Analytical Services Protocol Category B deliverable format.

3. Soil samples shall be analyzed for Toxicity Characteristic Leaching Procedure (TCLP) by EPA method 1311 if leachable metals are found. VOCs will be analyzed by EPA method 8021B, SVOC by EPA Method 8270C, Pesticide by EPA Method 8081A, PCB by EPA Method 8082, and metals by EPA Method 7000.

4. Groundwater samples shall be analyzed for VOC by EPA Method 8260, SVOC by EPA Method 8270C, Pesticides by EPA Method 8081A, PCBs by EPA Method 8082, and metals by EPA Method 7000. If turbidity is greater than 50 NTU, a filtered sample shall be collected for metals analysis.

5. Air samples shall be analyzed for VOC by EPA Method TO-15.

6. Preliminary sample results shall be provided whenever feasible, and final sample results shall be provided within the standard turnaround time (30 days).

7. For characterization tasks, only analyze the groundwater if field activities indicates visual/PID anomalies.

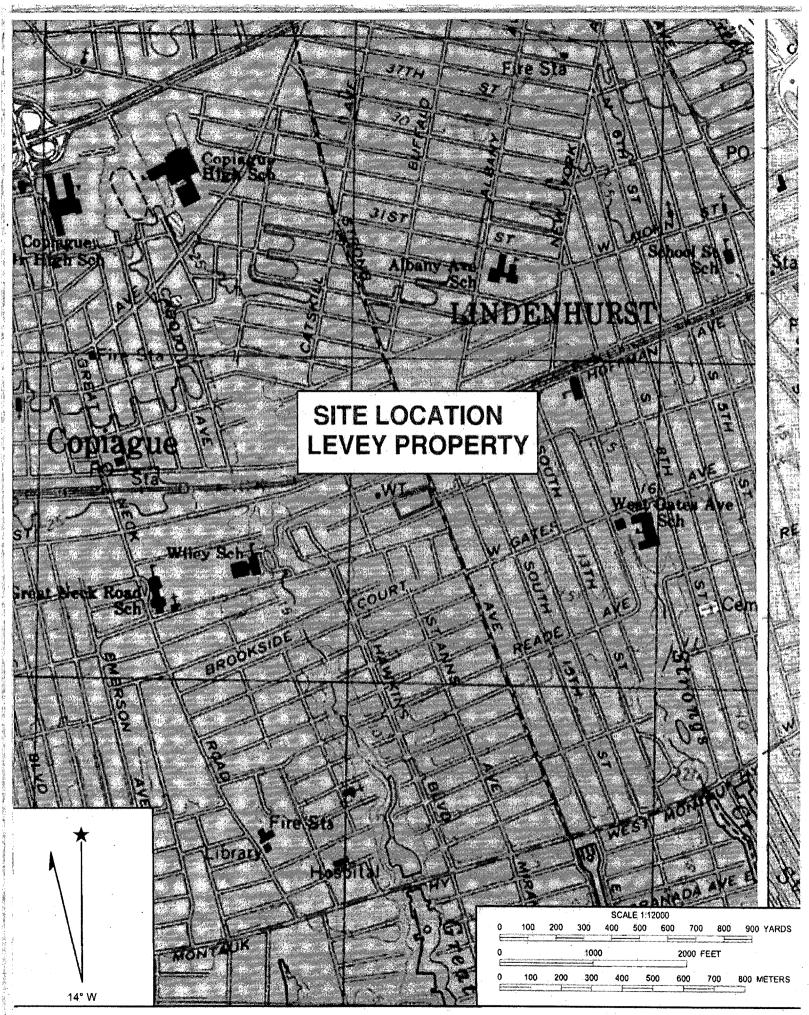

#### Estimate of RI/FS Work Assignment Budget

TASK	DESCRIPTION	BUDGETED AMOUNT (\$)
1	Pre-Sampling Tasks (including site visit)	15,000
2	Surveying and IDW Disposal	7,500
3 .	Temporary Geoprobe Wells	38,500
4	Geoprobe Groundwater Analysis	30,000
. 5	Permanent Groundwater Well Installation	81,000
6	Multi-level Groundwater Analysis	10,400
7	Soil Vapor Intrusion Analysis	20,000
8	Report Preparation	55,000
	TOTAL	257,400

Project Schedule: As agreed upon in the Work Plan submitted by the Consultant.

#### Special Considerations

- 1. A total of four (4) copies of the draft design report shall be submitted to the DEC for review and comment. Upon receipt of these comments, the consultant shall revise the report and print the requested number of final copies indicated in the comment letter. One copy of the final report; text, tables, maps, photos, etc., will be submitted as a single pdf file. All electronic files should be submitted to the Division on a Compact Disc.
- 2. All collected samples must be analyzed by an ELAP-certified laboratory.
- 3. The chemical and geologic data are to be submitted in the most recent version of the NYSDEC EDD with the final report submission. Currently this is the USEPA National EDD or Multimedia EDD format.
- 4. All field activity logs and/or field notes may be included in the final report as an appendix, and therefore MUST BE LEGIBLE.

#### Work Assignment Issuance Request Memo for Engineering Standby Contracts

#### MEMORANDUM

**TO:** Mike Cruden, Chief, Contracts and Payments Section, DER

FROM: John Swartwout, Section Chief, Bureau A, Section C B through Chittibabu Vasudevan, Director, Remedial Bureau A

SUBJECT: Work Assignment Issuance Request

DATE: JUL - 3 2009

Site Name and Number, Location: Levey Property (Site ID: C152201) is located in the town of Babylon in Suffolk County.

Site Information: See attached copy of UIS report.

Conflict of Interest: See attached.

Work Element: Off-site RI/FS

Duration: 24 months

Estimated Budget: \$ 257,400

Funding Source: State Superfund

Brief Description of Scope of Work: The objective of this work assignment is to investigate off-site groundwater contamination from the Levey Property BCP site. Soil vapor intrusion investigation may also be conducted pending results from the off-site groundwater analysis. This work assignment also includes funding for a feasibility study should any off-site remediation be needed.

#### New York State Department of Environmental Conservation Fixed Fee and Subcontract Management Fee Analysis MEMORANDUM

#### To: File

From: Andrea Indelicato, Contracts and Payments Section, Division of Environmental Remediation
Subject: Closeout cost adjustments for D006132-7, Levey Property Off-Site
Date: 11/9/2012

#### **Fixed Fee Analysis:**

1. Base LOE* (hr.):	1574
2. Closeout LOE (hr.):	2092
3. Percentage Change LOE (Closeout-Base/Base x 100):	32.9%
4. Is a Fixed Fee adjustment needed?	Yes
5. Original Fixed Fee:	\$12,414
6. Fixed Fee due at WA closeout:	\$15,195
7. Fixed Fee claimed at WA closeout:	\$15,195
8. Increase/Decrease to total Fixed Fee paid out**:	\$0.00

\*Base LOE is calculated as the number of direct labor hours in the original work plan plus the initial hours given for new tasks in subsequent amendments. Original Fixed Fee is calculated as the fixed fee amount in the original 2.11s plus the initial fee given on the Schedule 2.11 (g)s for any new tasks added in subsequent amendments. Do NOT alter the number of hours or the associated fee amounts for tasks in the original work plan even if they are increased later on in amendments. If tasks are deleted in later amendments, those hours and associated fees should be subtracted from the base hours and fee.

\*\*An adjustment is ONLY necessary if the dollar amount in #6 is different from the dollar amount in #7. (The #7 figure is the amount the firm has collected for fixed-fee over the life of the project, including any amount claimed on the final CAP; it's found on the final Schedule 2.11(g) Summary - Column D, Row 9.)

#### <u>Subcontract Management Fee Analysis:</u>

Subcontractor Name	Actual work performed (\$)	Fee due on actual work performed	Fee claimed at closeout	Adjustment to fee paid out
1. ADT	\$26,482.77	\$1,324.14	\$1,229.70	\$94.44
2. Centek*	\$12,510.00	\$625.50	\$625.50	\$0.00
3. EQA	\$1,745.00	\$0.00	\$0.00	\$0.00
4. Aztech*	\$30,169.51	\$1,508.48	\$0.00	\$1,508.48
5. Zebra	\$13,100.72	\$655.04	\$655.04	\$0.00
6. Mitkem	\$18,087.80	\$904.39	\$0.00	\$904.39
7. Data Validation Services*	\$2,699.00	\$134.95	\$0.00	\$134.95
8. Innovative Recycling Technologies*	\$4,082.81	\$204.14	\$0.00	\$204.14
* M/WBE	\$2,846.39			

		,		
		· ,		
Amount requested on final CAP:	\$13,966.00			
Adjustment to Fixed Fee:	\$0.00			
Adjustment to Subcontract Management Fees:	\$2,846.39			
Amount of final payment:	\$16,812.39
