Mr. David P. Locey New York State Department of Environmental Conservation Division of Hazardous Waste Remediation Region 9 270 Michigan Avenue Buffalo, NY 14203-2999

Re: Monthly Status Report, September 2014 NYSDEC Site 9-15-066, Cheektowaga, New York

Dear Mr. Locey:

On behalf of CBS Corporation (CBS) and the Niagara Frontier Transportation Authority (NFTA), CBS submits this monthly progress report on activities undertaken in September 2014 at New York State Department of Environmental Conservation (NYSDEC) Site No. 9-15-066 in Cheektowaga, New York (the Site) pursuant to the Order on Consent and Settlement Agreement, Index No. B9-0381-91-8, entered with NYSDEC (the Order). Under agreements among the Respondents to the Order, CBS is managing the Remedial Program, including the closure of the Operable Unit 2 (OU2) groundwater collection and treatment system.

#### 1. Site Activities and Status

- A. Conestoga-Rovers & Associates (CRA) continued OU2 closure activities, with the grouting of pipe bedding at designated manholes on the 001 and 003 segments of the groundwater collection system. This work was completed on September 15, 2014.
- B. CRA submitted the electronic data deliverable for the July 2014 influent and effluent sampling for incorporation in the NYSDEC EQuIS database on September 17, 2014.
- C. On September 18, 2014, CBS submitted to NYSDEC a monthly report on the status of activities at the Site in August 2014.

- D. On September 26, 2014, NFTA submitted to NYSDEC the Site Management Plan (SMP) for NYSDEC review and approval.
- E. The groundwater treatment plant was not operated in September 2014, and no discharge occurred.<sup>1</sup>

### 2. Sampling Results and Other Site Data

- A. Because there was no discharge, no treatment system influent or effluent sampling was performed in September 2014.
- B. No other sampling or test data were developed during the September 2014 reporting period.

## 3. Upcoming Activities

- A. CRA will complete the closure of the OU2 system with the following activities:<sup>2</sup>
  - Partially filling (flowable fill) piping in the lower portion of the 002 segment of the groundwater collection system;
  - Plugging remaining open manholes (*i.e.*, CSMH-002, MH-002-01, and MH-002-02); and
  - Topping off Manholes 002-03, 002-10, and 002-15 with flowable fill.
- B. Encotech, Inc. will dismantle the groundwater treatment system.
- C. Waste materials generated in system decommissioning will be transported offsite for proper disposal.
- D. CRA will conduct the first round of post-closure groundwater and surface water monitoring.
- E. CRA will submit the electronic data deliverable for the July 2014 storm water sampling for incorporation in the NYSDEC EQuIS database.<sup>3</sup>

<sup>&</sup>lt;sup>1</sup> No water was observed to be accumulating in the remaining open portion of the collection system (*i.e.*, CSMH-002, MH-002-01, and MH-002-02), and pumping was not needed to maintain the water level below the top of these chambers.

<sup>&</sup>lt;sup>2</sup> This activity was completed on October 16, 2014.

<sup>&</sup>lt;sup>3</sup> This submittal has been delayed awaiting completion of a field survey/verification of sample location coordinates and elevations.

# 4. Technical and Schedule Issues

- A. The Site work for completing the OU2 closure program is scheduled to be completed in October 2014.
- B. There are no unresolved technical or operational issues affecting the completion of the OU2 groundwater collection and treatment system closure.

We trust this submittal satisfies your requirements at this time. If you have questions regarding this status report or other project matters, please do not hesitate to contact me.

Respectfully submitted,

Leo M. Brausch

Consultant/Project Engineer
