**Re: Monthly Status Report, December 2014
NYSDEC Site 9-15-066, Cheektowaga, New York**

Dear Mr. Loey:

On behalf of CBS Corporation (CBS) and the Niagara Frontier Transportation Authority (NFTA), CBS submits this monthly progress report on activities undertaken in December 2014 at New York State Department of Environmental Conservation (NYSDEC) Site No. 9-15-066 in Cheektowaga, New York (the Site) pursuant to the Order on Consent and Settlement Agreement, Index No. B9-0381-91-8, entered with NYSDEC (the Order). Under agreements among the Respondents to the Order, CBS is managing the Remedial Program, including the closure and post-closure monitoring related to the Operable Unit 2 (OU2) groundwater collection and treatment system.

1. Site Activities and Status

- A. On December 10, 2014, CBS submitted to NYSDEC a monthly report on the status of activities at the Site in November 2014.
- B. TestAmerica Laboratories, Inc. (TestAmerica) completed the analyses of groundwater and storm sewer (surface water) samples collected in November 2014 as part of the first round of OU2 post-closure monitoring.¹
- C. On behalf of CBS, Conestoga-Rovers & Associates (CRA) completed the submittal of all outstanding electronic data deliverables (EDDs) for

¹ After receipt at the laboratory, containers for the groundwater sample collected at well MW-34D were accidentally broken. CRA resampled MW-34D and submitted the sample to TestAmerica on December 2, 2014.

incorporation of Site data into the NYSDEC EQuIS database. These included submittals on December 10, 2014 (*i.e.*, October 2014 treatment system influent and effluent and November 2014 treatment system effluent) and December 12, 2014 (*i.e.*, July 2014 and November 2014 groundwater and surface water samples). Site EDD submittals for incorporation into the NYSDEC EQuIS database are now up to date.

2. Sampling Results and Other Site Data

- A. Table 1 presents the results of the November 2014 groundwater sampling. As shown in this table, none of the monitored constituents were detected at concentrations above their respective remedial action objective.
- B. Tables 2 through 4 present the results of the November 2014 storm sewer sampling as well as the results of the baseline sampling conducted in July 2014. Sampling locations are shown in Figure 1. As indicated in these tables, low constituent concentrations are evident in the area of the 001 segment of the former collection system and the western portion of the 003 segment (*i.e.*, Manholes MH-3B and MH-3C). Higher (and variable) constituent concentrations are present in the area of the 002 segment and the eastern portion of the 003 segment (*i.e.*, Manhole MH-3A). Additional rounds of data are needed to assess trends in post-closure constituent concentrations in surface water.
- C. Attachments A and B provide the analytical laboratory reports for the groundwater samples collected in November 2014 and December 2014, respectively.
- D. Attachment C provides the analytical laboratory report for the surface water samples collected in November 2014.

3. Upcoming Activities

- A. CBS will submit a summary report on the completed OU2 closure activities to NYSDEC.
- B. CBS will continue the quarterly OU2 post-closure groundwater and surface water monitoring.

4. Technical and Schedule Issues

- A. There are no unresolved technical or operational issues affecting the OU2 post-closure groundwater and surface water monitoring.

Mr. David P. Locey

January 15, 2015

Page 3

With completion of the OU2 closure, the only planned future activity is completion of the remaining seven rounds of quarterly post-closure groundwater and surface water monitoring. On this basis, CBS requests that submittal of monthly progress reports be terminated and that future Site progress reporting be on a quarterly basis corresponding with the submittal of generated monitoring data.

We trust this submittal satisfies your requirements at this time. If you have questions regarding this status report or other project matters, please do not hesitate to contact me.

Respectfully submitted,

Leo M. Brausch

Receipt

The samples were received on 11/25/2014 9:40 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 3.1° C, 3.8° C and 4.1° C.

The sample receiving technician dropped and broke all of the VOA vials for sample WG-18036-112414-SG-001 and the TRIP BLANK. The client was contacted and the sample will be re-submitted to the laboratory for VOA analysis.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals

Samples WG-18036-112414-SG-006 (180-39256-6), WG-18036-112414-SG-008 (180-39256-8), and WG-18036-112414-SG-009 (180-39256-9) were analyzed at dilution for lead. This analyte is reported from the 6500ICP, for which internal standards, indium and yttrium, are added to all standards and samples during analysis. The indium counts in these samples were outside of QC criteria (70-130% of the indium counts in the ICB), therefore, the analyte referencing indium was diluted for analysis. Elevated reporting limits (RLs) are provided.

Receipt

The samples were received on 11/25/2014 9:40 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 3.1° C, 3.8° C and 4.1° C.

GC/MS VOA

The following samples were diluted to bring the concentration of target analytes within the calibration range: WS-18036-112414-003 (180-39250-3), WS-18036-112414-004 (180-39250-4), WS-18036-112414-006 (180-39250-6), and WS-18036-112414-007 (180-39250-7). Elevated reporting limits (RLs) are provided.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
E	Result exceeded calibration range.
F1	MS and/or MSD Recovery exceeds the control limits

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.
F5	Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL. The data are considered valid because the absolute difference is less than the RL.
U	Indicates the analyte was analyzed for but not detected.
